Dear Sir,

Attention of Mr. R. Gurney Orr.

Enclosed in this letter you will find four tenders for lighting Plant equipment for four reserves we understand are needing this class of equipment this season, namely:-

Morley, Alberta.
Sturgeon Landing, Sask.
Onion Lake, Sask.
Cardston, Alta.

We are enclosing our catalogue showing the 6 K W units on page 17 and 8 K W quoted on page 18. These plants are of our latest design and we are sure that you will get the best of satisfaction.

The prices include the pulleys and belting necessary to couple the engine up to Laundry line shaft, providing same with tight and loose pulley adjustment.

If the above tenders are not in order in any way, kindly inform us as to the alterations necessary to comply with your specifications and we will be glad to do it. Any further information that you might desire will be gladly given on request.

Trusting to be favoured with part of this business,
we are,

Yours respectfully,

Our reference

Attention- Mr. Gurney Orr,

We beg to tender on Lighting Equipment for Sturgeon Landing Reserve, Sask.

To Supply a 6K.W Size "LISTER-BRUSTON" Patent Automatic

ELECTRIC LIGHTING Plant of 6 K.W. Capacity at 110

Volts consisting of :-

ENGINE :-

A "Lister" 2 Cylinder 12 B.H.P. Vertical Water Cooled enclosed type Petrol Engine, running at 550 r.p.m. on full load, fitted with High Tension Magneto Ignition, Automatic Pump Fed Lubrication, Centrifugal Governor and specially designed for running long periods without attention. The engine is complete with water and fuel tanks, and connections, necessary spanners and a few spare parts.

DYNAMO :-

An open protected type shunt wound Dynamo, having an output of 55 amperes at 110 volts, and coupled to the engine by means of flexible leather coupling.

BASE :-

The above are mounted on cast iron base which forms foundation of Plant.

SWITCH-BOARD :-

An enamelled slate switchboard carrying voltmeter, 2 ammeters, patent relay and circuit breaker for automatic operation, and the necessary fuses and terminals.

OUTPUT :-

This plant would be capable of carrying a load of 150 lamps of 40 Watts ~~and 150 power~~, all on together. Also the necessary leather belting and pulleys to connect on Laundry Drive shaft.

PRICE :-

BATTERY :-

A Battery of 54 cells of 36 ampere hour capacity at the 10 hour rate, contained in glass jars, and complete with connecting strips, insulators, separators, connectors, etc. This Battery is the open type E.T. two plate Exide Manchester Chloride.

PRICE :-

ACID :-

Necessary concentrated acid for the above battery.

PRICE :-

\$3,990.00 completely installed at Sturgeon Landing Reserve ready to couple to building distribution.

Mr Duncan G. Scott,
Deputy Superintendent General,
Sturgeon Landing,
Sask.

Dear Sir,

We understand that the Dominion Government intend building an Indian Residential School at Sturgeon Landing, and we write to say that we should be glad to have an opportunity of tendering for the Laundry Machinery.

We handle the machinery manufactured by Messrs D. & J. Tullis of Glasgow, and we can compete very favourably with all other makes on the market on this side of the Atlantic, besides giving you a very much more substantial make of machinery.

We take this opportunity of sending you our catalogues, and, if you would kindly let us know what machines are required, we shall have much pleasure in sending you our quotations.

Hoping to hear from you at an early date,

We are, Dear Sir

Yours faithfully,

Premier Laundry Machinery Co. Ltd.

Ottawa, June 10, 1925.

Sir,-

As advised by telegram of yesterday you have been appointed Inspector of Construction for the new Sturgeon Landing Indian Residential School, and you will be expected to devote all of your time to this work. You will be paid at the same rate as for your work at the Duck Lake School. The contract for the portion of the building which it is proposed to erect has been awarded to Mr. R. H. Wyatt of Winnipeg at his tendered price of \$25,519. and it will be your duty to see that this building is erected in accordance with the plans and specifications, and also to issue progress certificates for payment on the contract, the procedure for which you are already familiar with.

I would particularly draw your attention to the fact that under no circumstances is any extra work to be authorized in connection with this contract that will add to the cost of the building, without first submitting an estimate of the cost to the Department and obtaining authority in writing.

For all information with reference to the site of the proposed building you are to communicate with Indian Agent Waddy at Le Pas, Man.

I am sending you, under separate cover blue print copies of the plans and specifications, tender forms and diary sheets, also certificate forms.

The voucher for your salary should be signed by Indian Agent Waddy, and forwarded to the Department attached to the diary sheets.

Adrien Faillon, Esq.,
The Pas, Man.

Your obedient servant,

J. D. McLean.
Asst. Deputy and Secretary.

x

I wish to advise the Department that, no matter which site is chosen, it will be necessary to expend money to clear the timber. I asked local men the cost of doing this work and their figures are all the way from \$35.00 to \$50.00 per acre. I have no idea of how much should be cleared, but would judge that at least 20 acres should be done to make the place fairly fire-proof, though this would not make it altogether safe as the forest is heavy all round this district. It might be well to allow the contractor to do the work on percentage basis, no local man made an offer, but there are one or two who would do it if given the chance. It could also be done by day labour under the inspector who goes in to superintend the construction of the building.

LAND PATENTS BRANCH

OTTAWA, 15th June, 1925.

Sir:

Your File No. 397387.

With further reference to the application of your Department to acquire all the lots in that portion of Sturgeon Landing Subdivision, Section 13, Township 61, Range 30, West of the Principal Meridian, lying west of the Sturgeon-Weir River, I beg to say that the Department is prepared to assure you that of the lots applied for a transfer will be made to the Department of Indian Affairs of at least the lots lying to the north of Third Street, namely, Lots 26, 28, 30, 32, 34, 36, 62, 64, 66, 68, 70 and 72.

An officer of the Department has been requested to furnish a report on all the lots applied for in this Subdivision, and upon receipt of the required report the question of including in the transfer to your Department the lots lying south of Third Street will receive careful consideration.

I may add that in consideration of the transfer of these lots to the Department of Indian Affairs this Department will expect to be compensated for the outlay incurred in the survey of the Subdivision.

Your obedient servant,

(Sgd.) N. O. Cote,

Controller.

As a Copy

Copy for H. C. Smith

July 28th, 1925.

Mr. Adrien Taillon,
Inspector of Construction,
Guy Residential School,
Sturgeon Landing, Sask.

Dear Sir:-

We have yours of the 23rd inst., and note contents. In answer to same will say:-

Re page 3, paragraph 2, for first certificate. We sent you a list as we have sent to all architects that we have worked for, and it should be sufficient for you to issue a certificate on. If you thought the amount was too much it would have been easy enough for you to have sent part of it and asked for something different for the balance. However, I think what I have sent you will be sufficient for the department, as it would be up to you to check the amount of materials and put your own valuation on them, and see if this corresponds with the amounts asked for. If they didn't, then it would be in order for you to cut them down.

I might say that it takes two weeks from the time we send you a letter until we get a reply, and that if we do not get a certificate by return mail we will take this matter up direct with the Department.

Re doors:- While specifications call for 3 panel doors, 1 1/2" thick, we took the liberty of changing them to stock doors, as 3 panel doors are stock doors in the East, and the specifications being written in the East, they would naturally follow stock specifications, because I understand the Department's requirements are, that they don't purpose going into special stock for Indian schools. All doors sent, except 4, which are 2-6-6-6 are 1 1/2". These 4 are 1 3/8, and not 1 1/8, as you mention. These are for closet doors and are always used for this class of work.

Re Windows:- Windows will be painted before being placed in the frames, as specified.

Re base & Casings:- The specification calls for moulded bases and casings. If you will look at cross section on the plan you will find that we have sent base exactly as is shown there, which is a moulded base, within the meaning of standard millwork specifications. Any wood that is worked other than being absolutely square is called moulded, and to match this base we sent bull nose casing, but if the Department were to insist on having a back band for this casing, which is not nearly so sanitary, we would certainly send it.

Re specifications for flooring:- Specifications call for hardwood flooring to be bored, driven up tight and nailed. If you will wait until this flooring is laid or until we are laying it to voice a complaint I think that you will find that there will be no need of complaint, as I think our men will lay it to your entire satisfaction.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

-2-

Re specifications for beams:- Specifications for beams reads as follows "beams shall be of 8x10, formed in long lengths of 2" thick, by depth of beam". It doesn't say that pieces that it is formed of shall be of long lengths, but that the beams shall be formed the full length of what is required of 2" material. This we have sent you, and to make up the beams we have sent 2x10-16's, with less than a 10 ft bearing, will be ample.

Re Outside Studding:- All outside studding are full lengths, with the exception of the jog in the foundation, which will have short studs, with plates on top doubled, and then your studding the same length as the balance of the building, on top of this. This is standard construction, as we have always done it.

Re Ceiling over Boiler Room:- Specifications distinctly say that all joists for floor joists will be 2x10. Cannot see how you can read 2x6 edgways for a solid floor. We have sent these joists for this job and they are on the ground, and if we had to re-order it would cost a lot of money as this place is situated, as you are aware, a long ways from lumber yards. This we certainly did not figure on, and would expect an extra for the work if it were changed.

Re steps and platform in basement:- Page 21, paragraph 17 says, "build outside and inside steps and platforms indicated on plan of concrete, etc." Indicated means 'marked'. There are no steps marked. Page 29, paragraph 23, specifically mentions steps to chapel of wood. Page 33, paragraph 40, calls for stairs to be constructed where shown of wood. It would not look good construction to me to have reinforced concrete stairs and platform running up between frame walls, and would not take it as such. The stairs that we figure should go in in concrete are those from the boiler room to hall, to engineers quarters, and machinery room. These are part of the floor, which are concrete and which will go in in concrete. The mill men in estimating this job also estimated this would go in in wood, as they read the specifications, and sent them that way. We are sorry that you interpret these any other way, as I am afraid your ruling is not correct.

Re certificate of radiation of boiler:- This we have mailed to you at your request.

I trust that the above explanations will meet with your approval. If not, I would ask you to kindly get the architect, Mr. Orr's interpretation, and let me have it.

Trusting that we will hear from you, with certificate enclosed by return of mail, we remain,

Yours sincerely,

RNW/EB.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

R. N. WYATT
CONTRACTOR

WINNIPEG July 29th, 1925.

Architect

Duncan C. Scott, Esq.,
Deputy Superintendent General,
Department Indian Affairs,
Ottawa, Canada.

R

Dear Sir:-

We are enclosing copy of letter sent to Mr. Taillon, Building Inspector at Sturgeon Landing, re Guy Residential School, in reply to his of July 23rd, a copy of which he claims was mailed to you. We trust this is in order.

It looks to me as though this man and I are not going to be able to pull, as it seems that he is starting in to make things rather impossible. It is rather to be expected that when a party, who has tendered on the job, and whose price was too high, and who is set as Inspector over the successful contractor, that he would try and make it impossible. I might say that I figure I am a responsible contractor. I have worked under a great many architects and have always been able to give satisfaction. I have done business with the Merchants Bank of Canada as their contractor for over a period of a dozen years, also built for the Bank of Montreal, Royal, Union, Imperial, Nova Scotia and Home, and have yet to hear of any complaints.

The things mentioned in Mr. Taillon's letter are very easily overcome, and I think it would be well if he were instructed from the Chief Architect, as to how he should interpret those specifications. I might say further that unless he issues a certificate for some money that we will have to shut down the works. I would kindly ask that you instruct him to issue a certificate for some monies.

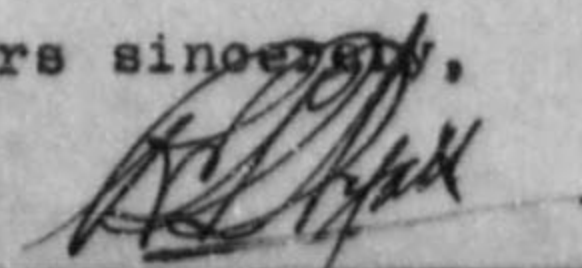

It takes two weeks from the time he writes us until we get an answer back to him, on account of the slowness of the mail service. Only one mail a week from The Pas to Sturgeon Landing, and it is easily seen that it would be a month before we get a certificate from him, and we have already been working on the job over a month.

I am enclosing copy of Estimate as sent him, and will say that we have all materials on the job to complete it, with the exception of Electric wiring, as per our estimate, and we would be pleased if you would instruct him to take care of this at once, and have certificate mailed to us without further delay.

Thanking you in anticipation, we remain,

RNW/EB.

Yours sincerely,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

R. N. Wyatt

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Sturgeon Landing, Sask.
July 23rd, 1925.

R.N. Wyatt, Esq.
WINNIPEG, Man.

Dear Sir:-

Your foreman on the works of the construction of Guy Indian School at this point has given me your statement of material delivered to date but I regret to say that I cannot accept same before the following are adjusted and before the conditions set forth on page 3, paragraph 2 of specifications (Before the 1st certificate etc) are realized.

10-The doors are not as specified. Instead of $1\frac{1}{2}$ " three paneled doors all those received are with five panels and some only $1\frac{1}{4}$ ". I therefore refuse those doors.

20-The windows should have been painted before being sent but it is understood that they will have to be painted before being placed in frames.

30-The bases and casings: the specifications call for moulded bases and casings but as just plain bull nose ones were received I cannot accept them.

40-According to specifications flooring should be bored. I wish to have the flooring nailed at about 3" from the end and not 7 or 8 inches. Therefore kindly see that this matter is attended to.

50-Specifications mention that beams must be made up of long pieces. As I do not see any here I must say that I will not accept short pieces or beams made up in two pieces. For your information I may tell you that long pieces as desired can be had in The Pas.

60-Outside studding: the latter 2x6 should be full length. I do not see them on the grounds. Please order them.

70-Ceiling over boiler room: Plan shows 2x6 edgewise solid floor. Kindly see that this is complied with.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

80-Steps and platform in basement.
By what is sent it looks as if those were to be made in wood but specifications distinctly call for concrete steps and platforms and I insist upon this point.

90-Certificate of radiation of boilers from the manufacture must be sent to me as soon as possible in order to enable me to accept said boilers

You will note by the above remarks that I do not ask anything outside of what is called for in the specifications and plans but I insist upon having it.

Another point which I wish to call to your attention is the fact that your statement of material delivered is incomplete and not enough detailed. By the experience I have in connection with such contracts I am positive that the Department of Indian Affairs would certainly not accept your statement and figures as set forth in your last communication.

I am sending a copy of this letter to the Architect of the Indian Department at Ottawa and another to Commissioner Graham, Indian Department at Regina.

I hope that you will give immediate attention to the above and adjust whatever is found deficient.

Yours truly,

Adrien Taillon,

Inspector of Construction,

Guy Indian Residential School,

Sturgeon Landing, Sask.

Edmonton -:- Alberta.

July 28th, 1925. 192

L. J. C. et M. I.

Mr R.G. Orr, Architect,
Department of Indian Affairs,
OTTAWA, Ont.

Dear Mr Orr:-

In the course of my visit at Sturgeon Land-
ing Mr Taillon gave me the enclosed letter and asked me to
forward it to you. It is a copy of a letter sent to Mr R.N.
Wyatt, Contractor of the school at that point.

By my own personal experience I can say
that there are no exaggerations in Mr Taillon's statements
and I could say that most of the material seems to be of
inferior quality. Mr Taillon did not mention the spruce
which is on the ground for being specified he could not
refuse it but I must say that it is of the worst quality
being twisted and bent and I wonder how nails will keep
in place in such timber. You are probably aware that this
northern spruce is far from having the consistency and
keeping qualities of our eastern spruce.

Mr Taillon has requested me to ask you
to wire to him regarding the ceiling over the boiler room.
He says that his opinion is the right one but as there may
be a little difference between the plans and specifications
he wishes to have a document to show to the superinten-
dent of Mr Wyatt. You can wire to A. Taillon, c/o P. Tail-
lon, The Pas, Man. and the message will be promptly for-
warded to him.

I am pleased to state that the site cho-
sen for the school is one of the finest I have ever seen
and I am sure that in such a location the school will be
a credit to the Department and a boon for the Indians of
that remote country.

I will leave tomorrow for the Blood re-
serve to see the new construction being made presently. I
will be in Edmonton at the above address until August 12.

Yours very truly,

Joseph L. C. et M. I.

~~OTTAWA, ONT.~~ July 22nd, 1925.

Sir:-

Re Guy Indian School -
Sturgeon Landing, Sask.

The plans of the survey made by Mr. Patterson of the property of the proposed Guy Indian School at Sturgeon Landing and of the Sturgeon river in that vicinity show that it will be impossible to consider the installation of a hydro plant at that point to operate the water and lighting system for the school building. The survey reveals that it would be impossible to secure power in this vicinity without completely damming the river, the cost of which would be prohibitive for the power required. These plans will be forwarded in about a week's time.

The power required to operate the water system and lighting can be more economically obtained from some of the standard types of gasoline, kerosene or fuel oil engines, and as I understand the Department of Indian Affairs wish me to prepare a report dealing with the installation of the water, light and sewerage systems, it will be necessary before doing this to have the following information:-

I - Light and Power.

- (a) - Total number and size of lights, to be provided for.
- (b) - Approximate amount of power required for the laundry and other purposes.

II - Water System.

- (a) - Number of inmates to be provided for.
- (b) - Is fire protection required from the main water system, and if so, to what extent?

III - Sewerage.

- (a) - Number of inmates to be provided for.
- (b) - Will septic tanks of the same size and capacity as those installed at McIntosh be required here?

August 1, 1925

Attention Departmental Engineer.

McClure

Sir:-

Re:- Indian School, Sturgeon Landing, Ont.

As requested by your letter of April 9th last we have had one of our engineers visit the site of the proposed Indian Residential School at Sturgeon Landing, Saskatchewan, and Mr. Attwood, our District Chief Engineer in Winnipeg, advises that it will be impossible to consider the installation of a hydro-electric plant at this point to operate the water and lighting systems for the school.

Encl.

A copy of Mr. Attwood's letter is enclosed and you will note that, understanding you Department desires a report covering the installation of water, light and sewerage systems for the school, he requires certain information covering the required capacity of these systems. If you will be good enough to supply this information it will be transmitted to Mr. Attwood promptly.

You will also note that Mr. Attwood assumes that the room marked "machinery room" on the plans of the school is provided for the installation of machinery for the operation of the above mentioned systems. We shall be glad to be advised of the correctness of this assumption.

Your obedient servant,

J. T. Johnston,
Director.

for Amb

J. D. McLean, Esq.,
Asst. Deputy and Secretary,
Department of Indian Affairs,
Ottawa, Canada.

The data obtained through the survey show that the securing of a water supply from the river, which is the only visible source, will entail an expensive intake in order to prevent freezing.

If you will please let me have an early reply my report outlining the suggested installation with estimated cost can be forwarded within the next two weeks. In preparing this report, I am assuming that the room marked "Machinery room" on the plans of the school is provided for the installation of the machinery to operate the water, lighting and power systems. If this is not the case, please advise, in order that a separate building may be provided for.

Your obedient servant,

C. H. Attwood,
per J.C.
District Chief Engineer.

Memorandum

Hon. Charles Stewart.

With reference to attached letter from Mr. Walker of Winnipeg regarding the contract awarded to Mr. R.N. Wyatt for the Guy Indian residential school, I beg to say that I have today telegraphed to Indian Agent Waddy to arrange for an advance to the contractor on his contract.

With reference to Mr. Walker's statement that Mr. Taillon was one of the competitors in tendering on this job I might say that Mr. Taillon was not a competitor and did not submit a tender. Mr. Taillon was inspector of Construction last year on the building of the Indian Residential School at Duck Lake, Sask.,

MEMORANDUM

Mr. Pratt.

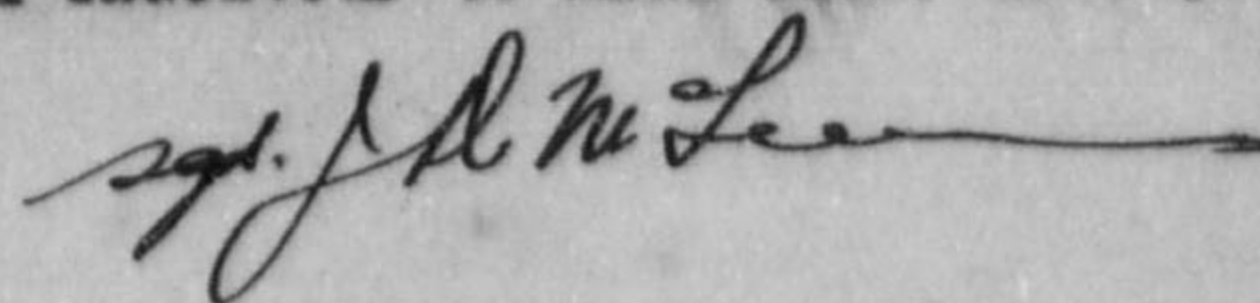

With reference to Mr. Walker's telegram to the Minister of the 12th instant, and to my memorandum sent you this date, I beg to say that the following telegram has been sent to Indian Agent Waddy at The Pas:

"From correspondence received it appears that Inspector Taillon is too exacting in demands on contractor Guy School. Wyatt desires advance on contract. Please try to arrange with Taillon to issue a certificate for payment as soon as possible".

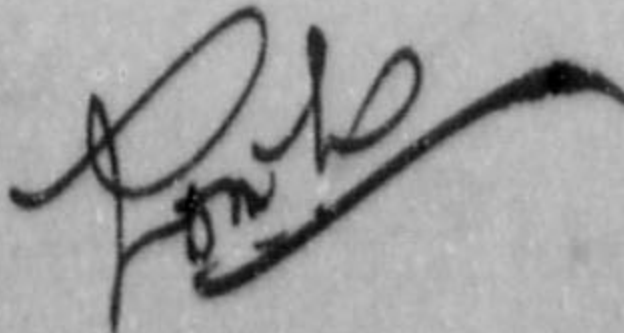

and also the following telegram was sent to Mr. Wyatt:

"Have wired Agent Waddy, The Pas, today re advance on contract Guy School. It would be advisable for you to communicate with him".

It is hoped that Indian Agent Waddy will be able to satisfactorily adjust matters. If not, the Department will endeavour to make other arrangements.

WINNIPEG July 28th, 1925.

Mr. Adrien Taillon,
Inspector Guy Residential School,
Sturgeon Landing,
Sask.

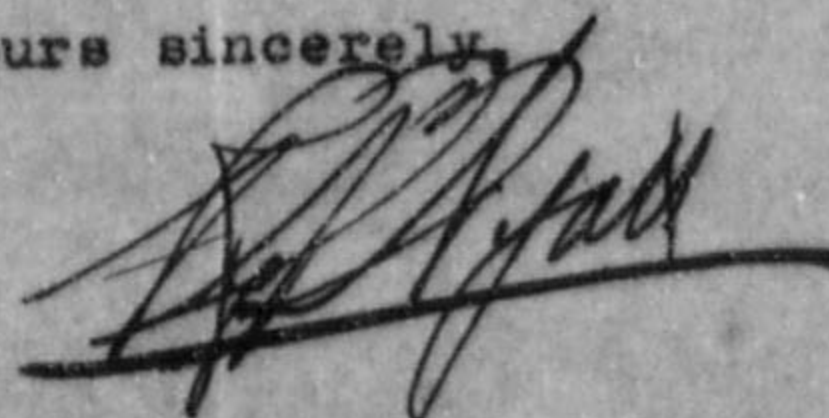

Dear Sir:-

We have your wire of July 28th, and contents
noted.

In reply will say, that when our foreman goes
out on a job he is instructed to carry out the specifications,
and I am afraid it is just possible that you are acting a lit-
tle unreasonable or taking him the wrong way, as I have had
this man working for me a great number of years, and have had
him work all over this western country, to the satisfaction of
everyone he has worked for up to date. I am very sorry if this
is the case, but all I can do, seeing the distance is so great
between us is to ask him to proceed and carry out the specifi-
cations as I interpret them to him, until such times as you
get a ruling from Ottawa on the points of contention.

Yours sincerely,

RNW/EB.

check from Ponchutest

R. N. WYATT
CONTRACTOR

WINNIPEG July 28th, 1925.

Mr. Adrien Taillon,
Inspector of Construction,
Guy Residential School,
Sturgeon Landing, Sask.

Dear Sir:-

We have yours of the 23rd inst., and note contents. In answer to same will say:-

Re page 3, paragraph 2, for first certificate. We sent you a list as we have sent to all architects that we have worked for, and it should be sufficient for you to issue a certificate on. If you thought the amount was too much it would have been easy enough for you to have sent part of it and asked for something different for the balance. However, I think what I have sent you will be sufficient for the department, as it would be up to you to check the amount of materials and put your own valuation on them, and see if this corresponds with the amounts asked for. If they didn't, then it would be in order for you to cut them down.

I might say that it takes two weeks from the time we send you a letter until we get a reply, and that if we do not get a certificate by return mail we will take this matter up direct with the Department.

Re doors:- While specifications call for 3 panel doors, 1 1/2" thick, we took the liberty of changing them to stock doors, as 3 panel doors are stock doors in the East, and the specifications being written in the East, they would naturally follow stock specifications, because I understand the Departments requirements are, that they don't purpose going into special stock for Indian Schools. All doors sent, except 4, which are 2-6-6-6 are 1 1/2". These 4 are 1 3/8, and not 1 1/8, as you mention. These are for closet doors and are always used for this class of work.

Re Windows:- Windows will be painted before being placed in the frames, as specified.

Re base & Casings:- The specification calls for moulded bases and casings. If you will look at cross section on the plan you will find that we have sent base exactly as is shown there, which is a moulded base, within the meaning of standard millwork specifications. Any wood that is worked other than being absolutely square is called moulded, and to match this base we sent bull nose casing, but if the Department were to insist on having a back band for this casing, which is not nearly so sanitary, we would certainly send it.

Re specifications for flooring:- Specifications call for hardwood flooring to be bored, driven up tight and nailed. If you will wait until this flooring is laid or until we are laying it to voice a complaint I think that you will find that there will be no need of complaint, as I think our men will lay it to your entire satisfaction.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

R. N. WYATT
CONTRACTOR

WINNIPEG

-2-

Re specifications for beams:- Specifications for beams reads as follows "beams shall be of 8x10, formed in long lengths of 2" thick, by depth of beam". It doesn't say that pieces that it is formed of shall be of long lengths, but that the beams shall be formed the full length of what is required of 2" material. This we have sent you, and to make up the beams we have sent 2x10-16's, with less than a 10 ft bearing, will be ample.

Re Outside Studding:- All outside studding are full lengths, with the exception of the jog in the foundation, which will have short studs, with plates on top doubled, and then your studding the same length as the balance of the building, on top of this. This is standard construction, as we have always done it.

Re Ceiling over Boiler Room:- Specifications distinctly say, that all joists for floor joists will be 2x10. Cannot see how you can read 2x6 edgways for a solid floor. We have sent these joists for this job and they are on the ground, and if we had to re-order it would cost a lot of money as this place is situated, as you are aware, a long ways from lumber yards. This we certainly did not figure on, and would expect an extra for the work if it were changed.

Re steps and platform in basement:- Page 21, paragraph 17 says, "build outside and inside steps and platforms indicated on plan of concrete, etc." Indicated means 'marked'. There are no steps marked. Page 29, paragraph 23, specifically mentions steps to chapel of wood. Page 33, paragraph 40, calls for stairs to be constructed where shown of wood. It would not look good construction to me to have reinforced concrete stairs and platform running up between frame walls, and would not take it as such. The stairs that we figure should go in in concrete are those from the boiler room to hall, to engineers quarters, and machinery room. These are part of the floor, which are concrete and which will go in in concrete. The mill men in estimating this job also estimated this would go in in wood, as they read the specifications, and sent them that way. We are sorry that you interpret these any other way, as I am afraid your ruling is not correct.

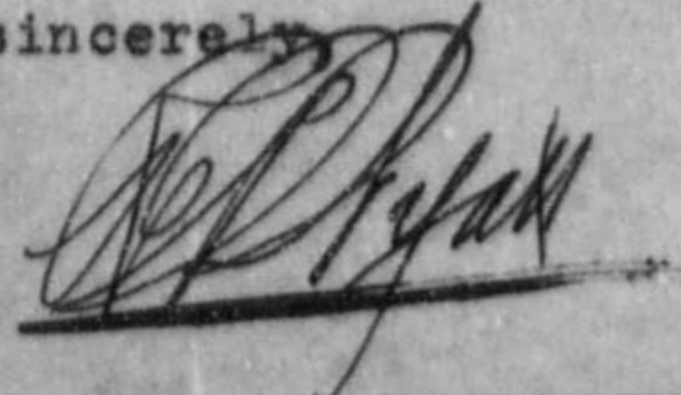

Re certificate of radiation of boiler:- This we have mailed to you at your request.

I trust that the above explanations will meet with your approval. If not, I would ask you to kindly get the architect, Mr. Orr's interpretation, and let me have it.

Trusting that we will hear from you, with certificate enclosed by return of mail, we remain,

Yours sincerely,

RNW/EB.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

August 16th.1925.

R. N. Wyatt Contractor.
Winnipeg Manitoba.

Dear Sir:--

Received your letters of July 28th.1925 and
Contents noted.

In reply would say that it would take too much time to refute all of your arguments which are based on your own idea and to your own advantages and not fair to the Depart ment., I base myself on the plans and specifications.

Regarding the issuance of certificate page 3 paragraph 2 of specifications, in order that first certificate for payment be issued you must comply with terms of specifications, moreover I have notified you that no certificate would be issued until everything was O.K.

I have notified you and your man here regarding the thickness of the walls, that is that they should be 13" and 15 " thick as called for and not 12" and 14 ".

Your man here has decided to retrench the wall that divides the scullery with the Main Building, also the belts on the sills which are specified to be placed at every 5 feet, there are some that are placed as far away as 12 feet and he does not mind what I say nor the specifications.

He wants to change the a part of the joists that is putting them running on the width of the building, the plans call for the joists to run with the length of the building, in changing them a beam will be needed the whole length that will be supported on 2x4 partitions, this will not be strong enough to support the weight, where this change is proposed it comes under the chapelle.

All of the changes that you are making ~~are~~ have no reason to be made as before any change is made you are supposed to have a written order to that effect, even if this building is for Indians the money is just as good.

Regarding the ceiling of the boiler room look at the detail, you will see that half of the section that starts from the bath the floor measures 6", the other half section the joists are lengthways of the building the joists are 2x10 so that the boards are even on top, there is four inches difference at the bottom ~~of~~, the half section ~~in back~~ of 10" being in back of the boiler room.

Regarding steps and platform they should all be of concrete we will let the Architect decide, also the doors on the outside of the Boiler Room and the double door on the side the sills are to be of concrete and not of lumber.

Do you know that the storm sashes have no sliding panels as specified, I have not all unpacked yet but I have seen quite a few that are not as specified, also some have three lights and two lights instead of six as specified.

Some of the steam piping that came with the boiler has been in use before and I do not think should be used here.

Regarding the doors outside for the Boiler Room and ~~that of~~ the double door on the side the specifications call for doors to be 2 1/2" thick these here are 1 5/8" thick with a 1/4" V joint the V joint should be even on the top(A real Indian Door).

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Boiler Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I am preparing a list of all that does not conform with plans and specifications and will mail same to you by the next boat, I will also send a copy to the Department.

Regarding the issuance of certificates for payment I have my orders to follow and you have certain conditions to fulfill and if we cannot agree the Department will have to decide.

I was forgetting your framing lumber, I am sorry to say that it cannot all be used in the building as some pieces for outside studding are too short and these cannot be put in in two pieces but plans will have to be followed in this respect, I am refusing these unless a ruling is forthcoming from the Department otherwise, also understand that everything must comply with plans and specifications these are my orders, received from the Department.

Again no certificates for payment will be issued until everything is O.K. it depends on you to either shorten or lengthen the time regarding the issuance of certificates.

Regarding the doors that you mention in your letter as 1 1/8" thick this is a mistake in writing they are 1 3/8" thick and still do not conform with the specifications which calls for them to be 1 1/2" thick.

Regarding your foreman here you state that I am taking him the wrong way and that I am acting a little unreasonable with him, I am only following orders and asking him to comply with plans and specifications, and I assure you that if this is done there will be no difficulties at all and that we can get along fine.

Hoping that this will receive your consideration and that orders will be given your foreman here to comply as stated above, I remain,

Yours very truly,

Adrien Taitton

C O P Y

July 28th, 1925

Mr. Adrien Taillon,
Inspector of Construction,
Guy Residential School,
Sturgeon Landing, Sask.

Dear Sir:-

We have yours of the 23rd inst., and note contents. In answer to same will say:-

Re page 3, paragraph 2, for first certificate. We sent you a list as we have sent to all architects that we have worked for, and it should be sufficient for you to issue a certificate on. If you thought the amount was too much it would have been easy enough for you to have sent part of it and asked for something different for the balance. However, I think what I have sent you will be sufficient for the department, as it would be up to you to check the amount of ~~mat~~ materials and put your own valuation on them, and see if this corresponds with the amounts asked for. If they didn't, then it would be in order for you to cut them down.

I might say that it takes two weeks from the time we send you a letter until we get a reply, and that if we do not get a certificate by return mail we will take this matter up direct with the Department.

Re doors:- While specifications call for 3 panel doors 1 $\frac{3}{4}$ " thick, we took the liberty of changing them to stock doors, as 3 panel doors are stock doors in the East, and the specifications being written in the East, they would naturally follow stock specifications ~~being-written~~ because I understand the Departments requirements are, that they don't purpose going into special stock for Indian Schools. All doors sent, except 4, which are 2-6-6-6 are 1 $\frac{1}{4}$ ". These 4 are 1 $\frac{3}{8}$, and not 1 $\frac{1}{8}$, as you mention. These are for closet doors and are always used for this class of work.

Re windows:- Windows will be painted before being placed in the frames, as specified.

Re base and Casings:- The specification calls for moulded bases and casings. If you will look at cross section on the plan you will find that we have sent base exactly as is shown there, which is a moulded base, within the meaning of standard millwork specifications. Any wood that is worked other than being absolutely square is called moulded, and to match this base we sent bull nose casing, but if the Department were to insist on having a back band for this casing, which is not nearly so sanitary, we would certainly send it.

Re specifications for flooring:- Specifications call for hardwood flooring to be bored, driven up tight and nailed. If you will wait until this flooring is laid or until we are laying it to voice a complaint I think that you will find that there will be no need of complaint, as I think our men will lay it to your entire satisfaction.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Re: R Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Re specifications for beams:- Specifications for beams reads as follows "beams shall be of 8x10, formed in long lengths of 2" thick, by depth of beam". It doesn't say that pieces that it is formed of shall be of long lengths, but that the beams shall be formed the full length of what is required of 2" material. This we have sent you, and to make up the beams we have sent 2x10-16's, with less than a 10 ft. bearing will be ample.

Re Outside studding:- All outside studding are full lengths, with the exception of the jog in the foundation, which will have short studs, with plates on top doubled, and then your studding the same length as the balance of the building, on top of this. This is standard construction as we have always done it.

Re Ceiling over Boiler Room:- Specifications distinctly say that all joists for floor joists will be 2x10. Cannot see how you can read 2x6 edgways for a solid floor. We have sent these joists for this job and they are on the ground, and if we had to re-order it would cost a lot of money, as this place is situated as you are aware, a long ways from lumber yards. This we certainly did not figure on, and would expect an extra for the work if it were changed.

Re steps and platform in basement:- Page 21, paragraph 17 says "build outside and inside steps and platforms indicated on plan of concrete, etc." Indicated means 'marked'. There are no steps marked. Page 29, paragraph 23, specifically mentions steps to chapel of wood. Page 33, paragraph 40, calls for stairs to be constructed where shown of wood. It would not look good construction to me to have reinforced concrete stairs and platform running ~~te~~ up between frame walls, and would not take it as such. The stairs that we figure should go in in concrete are those from the boiler room to hall, to engineers quarters, and machinery room. These are part of the floor, which are concrete and which will go in in concrete. The mill men in estimating this job also estimated this would go in in wood, as they read the specifications, and sent them that way. We are sorry that you interpret these any other way, as I am afraid your ruling is not correct.

Re certificate of radiation of boiler:- This we have mailed to you at your request.

I trust that the above explanations will meet with your approval. If not, I would ask you to kindly get the architect, Mr. Orr's interpretation, and let me have it.

Trusting that we will hear from you, with certificate enclosed by return of mail, we remain,

Yours sincerely,

RNW/EB.

W. M. Graham Esq.
Indian Commissioner.
Regina Sask.

Dear Sir:- Forthnightly report re
Guy Indian Residential School
Sturgeon Landing Saskatchewan.

Following please find fortnightly report
as specified above, I arrived here on the fourth of July 1925,
the excavation had been started, since the concrete footings and
forms are finished, the concrete walls will be finished in another
two days.

All of the materials are on the spot, rough lumber, finish
lumber, brick, doors and windows, hardware, paint, boilers, plumbing
fixtures, cement and plastering, there are 15 men on the job.

Remarks.

Materials.

The majority of material here do not conform with the specifications.
The doors are 5 cross panels half of them are not of the thickness
that is 1 1/4" as specified they are 1 3/8 and they should be three
panels.

Windows should be painted they are not and storm sashes should be
equipped with sliding panels.

Casings should be 5" wide those here are 4 1/4", the base boards are
all the same they are plain bull nose and they should have a moulding
as specified.

Regarding the steam pipes some that is here, is pipe that has been
in use before.

I have notified the Contractor Mr. Wyatt of Winnipeg Manitoba that
plans and specifications must be followed, and that no certificates
for the payment of money will be issued until everything complies
with plans and specifications regarding the labor and material.

I have not issued any certificate for payment yet and will not
until everything is satisfactory. Your obedient servant.

Sir:-

I am enclosing herewith for your information, copies of a report from Mr. Adrien Taillon, Inspector of Construction at the Guy Indian Residential School; also a copy of a letter from the contractor, Mr. Wyatt of Winnipeg.

I feel that this is the beginning of a long controversy between these parties, and that the Department should be advised of it at the start.

Your obedient servant,

W. M. Graham,
Indian Commissioner

Secretary,
Dept. of Indian Affairs,

R.N. Wyatt, Esq.
WINNIPEG, Man.

Dear Sir:-

Your foreman on the works of the construction of Guy Indian School at this point has given me your statement of material delivered to date but I regret to say that I cannot accept same before the following are adjusted and before the conditions set forth on page 3, paragraph 2 of specifications (Before the 1st certificate etc) are realised.

1o-The doors are not as specified. Instead of 1¹/₂" three paneled doors all those received are with five panels and some only 1 . I therefore refuse those doors.

2o-The windows should have been painted before being sent but it is understood that they will have to be painted before being placed in frames.

3o-The bases and casings: the specifications call for moulded bases and casings but as just plain bull nose ones were received I cannot accept them.

4o-According to specifications flooring should be bored. I wish to have the flooring nailed at about 3" from the end and not 7 or 8 inches. Therefore kindly see that this matter is attended to.

5o-Specifications mention that beams must be made up of long pieces. As I do not see any here I must say that I will not accept short pieces or beams made up in two pieces. For your information I may tell you that long pieces as desired can be had in The Pas.

7o-Outside studding: the latter 2x6 should be full length. I do not see them on the grounds. Please order them.

7o-Ceiling over boiler room: Plan shows 2x6 edgewise solid floor. Kindly see that this is complied with.

80-Steps and platform in basement.
By what is sent it looks as if those were to be made in wood but specifications distinctly call for concrete steps and platforms and I insist upon this point.

90-Certificate of radiation of boilers from the manufacture must be sent to me as soon as possible in order to enable me to accept said boilers

You will note by the above remarks that I do not ask anything outside of what is called for in the specifications and plans but I insist upon having it.

Another point which I wish to call to your attention is the fact that your statement of material delivered is incomplete and not enough detailed. By the experience I have in connection with such contracts I am positive that the Department of Indian Affairs would certainly not accept your statement and figures as set forth in your last communication.

I am sending a copy of this letter to the Architect of the Indian Department at Ottawa and another to Commissioner Graham, Indian Department at Regina.

I hope that you will give immediate attention to the above and adjust whatever is found deficient.

Yours truly,

Adrien Taillon,

Inspector of Construction,

Guy Indian Residential School,

Dear Sir:

Following please find fortnightly report for the month of July regarding work on the Guy Indian Residential School at Sturgeon Landing Saskatchewan.

I am here since the fourth of July and up to now the following work is completed, Excavation and concrete forms and footing., the walls will be finished in two more days, there are now fifteen men on the job and more are expected shortly.

The following materials are on the job..

All rough and finished lumber, brick, boiler and plumbing fixtures, steam and water pipes, metallic lath and shingles, doors, windows, paint and hardware.

Remarks.

A lot of the above mentioned material is not according to that specified in the specifications such as the doors that are here. are 5 cross panels and half of them are 1 3/8" thick instead of 1 1/4" as specified., the storm sashes are not equipped with sliding panels., the casings are 4 1/4" instead of 5" and are plain bull nose without moulding also the base is the same.

Of the amount of steam pipes here a lot of them have already been in use.

Platforms and steps the foreman here calculates putting these in lumber, the lumber for same is here, I have refused same.

The walls that form the division of the scullery and main building are the same height as the others walls that is 5'6".

Have you a sketch of the electric fixture showing what the contractor is supposed to furnish, if so please sent me one.

Regarding the sewers do they come in from the front part of the building facing the river?

I have notified the contractor Mr. Wyatt at Winnipeg that plans and specifications must be followed and that no changes will be allowed without a written order to that effect.

The foreman here has been notified too but he will not listen to me at all.

I have not issued any certificates for payment yet and will not do so until everything complies with plans and specifications regarding labor and material.

Awaiting your reply, I remain,

Your obedient servant.

Some of the bolts which are set into the cement walls to hold the sills are not spaced at proper intervals of five feet as called for in the specifications, and Mr. Taillon objected to this. It is possible that not quite enough bolts are used in the building, and that they are not set in according to the strict interpretation of the specifications, but I think the building will not suffer for this. However, I am reporting it just as I saw it.

There is an argument in regard to a stairway leading up between the laundry and the storeroom. The Contractor states this is a stairway, and according to specifications it should be made of planks, as it abuts unto the plastered wall. It seems that the Inspector classifies it as steps, and the specifications state that steps should be made of cement. The Department can judge which is the correct interpretation, either stairway or steps. There are dozens of little objections not noted here that were drawn to my attention by the Inspector.

I was very friendly with Mr. Taillon and endeavor to get him to give me a progress estimate of some sort, so that Mr. Wyatt could be allowed an advance on his contract, but the Inspector absolutely refused to give a progress estimate of any sort, and he told me that he fully intended to leave the job this week, as he had given the Indian Department his resignation and has made other arrangements for the future for himself.

On my return to The Pas on the 17th I wired to you asking that a new Inspector be sent in. I cannot see any other alternative as Mr. Taillon has his mind made up, and he is going to leave.

I am not in a position to give a progress estimate myself, but I enclose a list received from Mr. Wyatt, giving estimate of cost of his material up to date, and also a letter from his foreman, showing the amount of labor used in the construction of the building, and I believe when these letters and this report are received at Ottawa that it will probably be decided to allow Mr. Wyatt a fair advance cheque on his contract. of course, the Department

The Pas, Man.

Aug. 18th. 1925

IN YOUR REPLY REFER TO No. 4538/153 ALSO TO DATE OF THIS LETTER
--

Sir,—

In reference to various telegrams regards Inspector Taillon at Guy Indian Residential School. I beg to report that I was at Sturgeon Landing on the 16th inst., and went over the building in company with Mr. Taillon and Mr. Alyea, the Foreman for Mr. Wyatt.

Mr. Taillon pointed out that the walls are not thirteen inches in thickness. Some of these walls are more than thirteen inches, some slightly less than thirteen inches, and the foreman explained that in running the concrete he allows for the form expanding when the concrete is being poured, and pressure comes on it. In some places the pressure did not expand the forms to full thirteen inches. The wall itself is constructed in first class shape.

The joists and sills do not come flush at every angle of the floor and walls. There is a small space between some of the joists and sills. Mr. Taillon states that this is not according to specifications; that they should be exactly flush, and tight, in every instance.

The walls of the first floor are sheeted in, and the building is well under way. The mill work, hardware, sheet metal, plumbing, and heating equipment, brick etc. is ~~on~~ on the ground.

The Inspector objects to some of the piping being second hand, but the Contractor states that this second hand pipe is being filled with cement and used as some sort of a stand under the ~~pressure tank~~, but no second hand pipe is really on hand for general use.

The Inspector also objects to the shed, which is used to house the mill work. Although this shed is water-proof from the top, he states that the rain can drift in through the sides into the mill work. up to the present little damage seems to have been done from this cause but no doubt Mr. Taillon was right to object to the shape of the building.

DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Man.

August 18th, 1925.

Sir,

Herewith are two copies of Mr. Craig's report providing for a Water Supply, Power and Lighting and Sewerage System for the Guy Indian School, Sturgeon Landing, Saskatchewan. As we have had no reply to the questions asked in our letter of July 22nd we have assumed that the requirements of these services will be for an institution of 100 inmates and with a limited power supply and fire protection.

The investigation of the Sturgeonweir river showed quite conclusively that a water power development for the requirements of the Guy Indian School would be too costly and for that reason Mr. Craig has provided for moderately priced but reliable oil engines, which I feel are suitably adapted for the requirements of the institution. In selecting suitable machinery Mr. Craig received actual prices for all equipment f.o.b. Winnipeg, and in going into this matter he found that while a number of firms could supply various machines, fittings, equipment, etc., the Canadian Fairbanks-Morse Company are prepared to supply the complete installation. In my opinion it would appear advisable when calling for tenders for the above machinery and installation that tenders should be called for from firms who can and will supply and install the machinery, equipment, etc. In addition to facilitating the work it places the responsibility for the completion and successful operation of the entire plant upon one firm.

With respect to the installation of the sewerage system and the intake pipe for the water supply system I am of the opinion that a price for this work should be received from R.N. Wyatt, the present contractor of the school building. I feel sure that he would be prepared to quote a reasonable price for this work, or that he would do the work on a cost plus basis, naming an upset price for the completed job. I would further point out that it is absolutely necessary, if the Department of Indian Affairs decide to proceed with this work, that the equipment which may be decided upon should be purchased immediately, and the work be started with the least possible delay.

The plans of the sewerage and water system accompanying the report are in sufficient detail to permit the contractor to proceed with this work immediately. With respect to the purchasing of the engines, generators, pump, tank, shafting, pulleys, belts, etc., if the Department are satisfied with the machinery installation as outlined in Mr. Craig's report, specifications for these machines can be forwarded immediately.

Your obedient servant,

J.T. Johnston, Esq.,
Director, Water Power & Reclamation,
Department of the Interior,
Ottawa, Ontario.

Sgd... C.H. Attwood,
District Chief Engineer.

mechanic

Sir,

Encl.

On April 9th last you wrote asking that we have a report prepared as to the feasibility of erecting a small hydro electric power plant and make recommendations as to water supply and sewage disposal for an Indian residential school at Sturgeon Landing (your file number 132-7-15). I now beg to enclose copy of a letter from our District Chief Engineer at Winnipeg, Mr. C.H. Attwood, together with a copy of a report covering the ground outlined in your letter of April 9th.

You will note from Mr. Attwood's letter that a water-power development would be too costly and that the engineer has therefore provided for a moderately priced but reliable oil engine installation. You will also note his various recommendations as to the manner in which the work might be carried out.

Mr. Attwood states that if your Department decides to proceed with this work the equipment which may be decided upon should be purchased immediately and the work started with the least possible delay.

Your obedient servant,

J. T. Johnston

R. N. WYATT
CONTRACTOR

WINNIPEG August 25th, 1925.

Department of Indian Affairs,
Ottawa, Canada.

-Attention Mr. Ott,
Re Guy Residential School.

Dear Sir:-

I would like to report to you after visiting this building under construction last week as to how I found things.

It seems that Mr. Alyea, our foreman, and the Inspector Mr. Taillon, could not get along. This is partly due to the fact that the place is so isolated, and weather conditions very bad (in fact, it rained nearly every night in July and quite a number of days) together with mosquitos, of which I believe they have never known them to be worse, (in fact the Indians that we had engaged could scarcely stand them). Then the heat, bull dogs, which attacked the horses and sand flies, together with Mr. Taillon bothering the man on the other hand, it got him nearly bushed. However, he seems to be doing a very good job, and in speaking with Mr. Taillon I found him a very nice old gentleman, one who would possibly want to put something over you if he thought he could get away with it, but after discussing the building in general with him and he found out that I knew just about as much about the job as he did, he became very amicable, in fact, I don't think I would have any trouble in the world getting along with him myself.

Mr. Taillon states that he has written the Department asking for advice on how he was to interpret the specifications, and that he had received no reply. I think this possibly had something to do with his retiring. There were several matters of contention which he took up with me, a copy of my letter to him was mailed to the Department. No doubt you will be able to see it.

Would like to have your orders on this given to your new Inspector, and a copy of same sent to me. It must be remembered that it takes two weeks from the time that I get a letter from our foreman on the job until we can get a reply back to him, and in the meantime something has got to be done to push the job along. I think it would be necessary for you to instruct your Inspector to be able to decide these things at the moment.

There is the matter of electric lighting fixtures, in which the amount of \$175.00 has been allotted. Would be pleased to have your recommendations as to the class of fixtures to be installed, as the electrician is now on the job and we want to send them as quickly as possible.

Another matter that we haven't yet taken up with the Inspector is as to how you propose having the return pipes to the boiler placed under the floor. It says in the specifications "as shown", but

CANADA

R. N. WYATT
CONTRACTOR

WINNIPEG

--2--

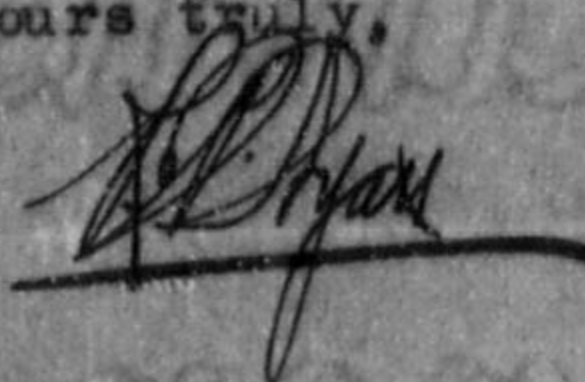

we figured nothing for this, as there was nothing shown. Kindly let us know what you would have done in this case.

Would be pleased to receive a reply from you at your earliest convenience, as we expect to be plastering this job the week after next and would like to have the floors put in before we start the plastering.

I think it would be better if you would allow me to write you instead of to the Inspector in charge, a copy of which could be sent to him, as it would help matters a great deal on account of the slowness of the mails in that direction.

Trusting to hear from you, I remain,

Yours truly,

RNW/EB.

Ottawa, Aug. 28, 1925.

Sir,-

Replying to your letter of the 18th instant with reference to the work at the Guy Indian Residential School, I beg to say that the Department has issued a certificate (No 1) in favour of the contractor for \$8,000. and a cheque for this amount has wired him yesterday.

I am enclosing herewith a copy of the certificate which I would ask you to please forward to the building inspector.

With regard to your comments on the building I would say that it would appear that the concrete walls should be satisfactory. Regarding the stair leading up between the laundry and store room, it was the intention that these be built of wood, in fact steps which came between concrete walls should be built of concrete and those between plastered walls on frame work of wood.

It is hoped that Mr. Grant, the newly appointed Inspector of Construction, will be able to arrange all matters satisfactorily with the contractor.

Your obedient servant,

J. W. Waddy, Esq.,
Indian Agent,
The Pas, Man.

A. F. MacKinnon.

Ottawa, Aug. 29, 1925.

Sir,-

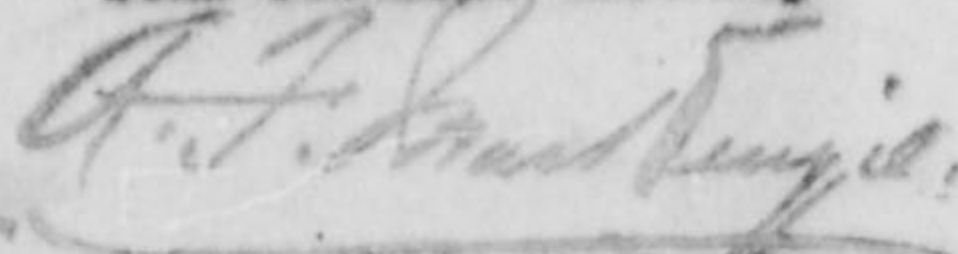

Replying to your letter of the 25th instant with reference to the Guy Indian Residential School, I have noted your remarks with regard to the difficulties experienced in the carrying out of this work on account of local conditions. I addressed a letter yesterday to Indian Agent Waddy, advising him that the Department had issued a certificate for \$8,000. as a payment on your contract. I also advised him that from his report it would appear that the concrete walls would be satisfactory, and that the stairs leading up between the laundry and store room should be built of wood, and that steps which come between concrete walls should be built of concrete and those between plastered walls on frame work of wood.

With reference to the electric lighting fixtures, I am today writing to Mr. Dunn to select these fixtures, and I would ask you to please get in touch with him.

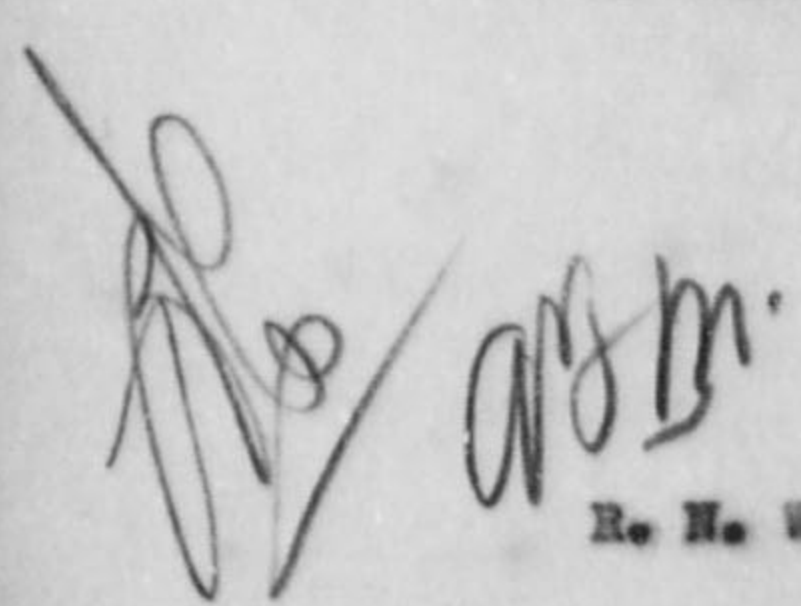

With regard to the return heating pipes under the floor, these may be covered up and the floor finished in the regular way.

Regarding the other items in connection with the building which came up between your foreman and Mr. Taillon, these will have to be left to Mr. Grant, the new Inspector, and I think he will be able to make satisfactory arrangements.

Your obedient servant,

A. F. MacKenzie.
Acting Asst. Deputy and Secretary.

Sept 3rd 1925

Sir;-

In reference to the Guy Residential School at Sturgeon Landing, I would be obliged if the Department will advise me if it is the ~~intention~~ intention to have this place heated this coming winter. In my opinion it will be necessary to keep the frost from getting in and heaving the foundations.

In case it is decided to heat the place it would be well to have wood cut immediately and it could be done under the supervision of Inspector of Construction Roderick Grant.

I have had the timber on the 20 acres saved for wood, but it is green poplar. We could use it if a similar quantity of dry wood was used in the furnaces at the same time.

Any instructions thought necessary in this matter will be appreciated, we have not much time to think it over as the winter will soon be coming in this district.

I am, Sir,
Your obedient servant,

Dear Sir :--

Attached hereto please find diary sheets
and my account for labor as Inspector of Construction re the Guy
Indian Residential School at Sturgeon Landing Saskatchewan.

The account amounts to \$ 122.00 being for 17 days labor and
board for 20 days and covers the period in August up to the day
before I left Sturgeon Landing to come back.

In August I mailed you my diary sheets and account for the month
of July 1925, but have not received any payment yet, probably this
account has been lost or mislaid, if so please let me know and I
mail you another.

I am sorry that I was obliged to leave this work, but under the
circumstances in fairness to the Department and my own conscience
I could not do otherwise.

Hoping that my resignation has not put you to any inconveniences,
and to hear from you soon regarding my account, I remain,

Yours very truly,

Adrian Tailor

R

Dear Sir

Re - Construction work on the
above school. I would be pleased to have a decision with
reference to the Construction of the floor over boiler room,
when I checked up the work done here I found that the
Contractor constructed the floor the same as the
floors throughout the main part of the building now under
Construction with 2"x10" Joists. I will refer you to the plans,
Sheet No 2 Cross section A-A shows the floor to be
Constructed of 2"x6" spiked together, when I asked the
foreman about the change from the plans, he told me
that was what they called for, he also referred me to the
Specification of Carpenter's joining, page 28 Clause 14 dealing
with flooring, according to the Specification all ceiling on
the ground floor excepting boiler room to be finished with
Metal Ceiling, according to the foreman's interpretation of
this, the Ceiling of boiler room will have open
Joists. Re the plumbing and drainage inside the building,
the work is almost Completed except for the line from
the boiler room which they are working upon now -
there is no plans here showing disposal of the sewerage
outside the building, the same applies to the water service,
if the boilers are to be used the winter it will be
necessary that the installation take place at once
if not we will not be able to get a test on the
heating system before the steam fitters go away -
as I have ^{only} been here a little over two weeks I can't
find any information dealing with this part of the
work, I do not know what arrangement had

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Room Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

made previous to my coming here. there is no records left here for me to go by regarding the disposal of sewage, if plans are prepared for this we would like to have a copy here.

Chimneys

Plan of heating layout sheet No 6 shows by figures that the chimney for boiler have flue 31" x 31" x 65' high. this should read 31" x 31" x 56'0" this would bring the top of the Capping on chimney 17' above the ridge of the present main roof. the height of the domestic chimney is 52'0"

please advise if I am right, I have not seen the plans for the future extension & do not know the height of the highest part of the extension.

Plan sheet No 3 shows an opening in wall between Scullery and the future building to be boarded up the same as the other two openings. if we had the height of this opening it could be framed. there is no height given. at present the Contractor covered the wall on the outside with 1 Ply of ship-lap. the work will take the Contractor about four weeks. Complete the plaster work is not started yet the braten are set and the steam-fitters are on the heating plant - the plumber is well advanced with the drainage under the building, the concrete floors are being put in where practical to work. Kindly let me have the information asked for & oblige

Yours truly R. Grant

Inspector of Construction

Ottawa, Sept. 19, 1925.

Sir,-

Replying to your letter of the 12th instant with reference to the work on the new Gay Indian Residential School, I beg to give you the following information on the different points mentioned in your letter.

1. Boiler Room Ceiling.

The specifications call for boiler room ceiling to be built of 2 x 10 joists similar to other portions of the building and no extra covering of any kind is specified for this ceiling. If you can make satisfactory arrangements as to price with the contractors you may arrange to have the ceiling covered with sheets of galvanized iron.

2.

It is not the intention to install this year the water supply or sewage disposal systems, as there are no funds for this work, and they will be included in the plans and specifications when these are completed for the finished building. You may, therefore, make the most economical arrangements possible for temporary water supply for the building and temporary drainage.

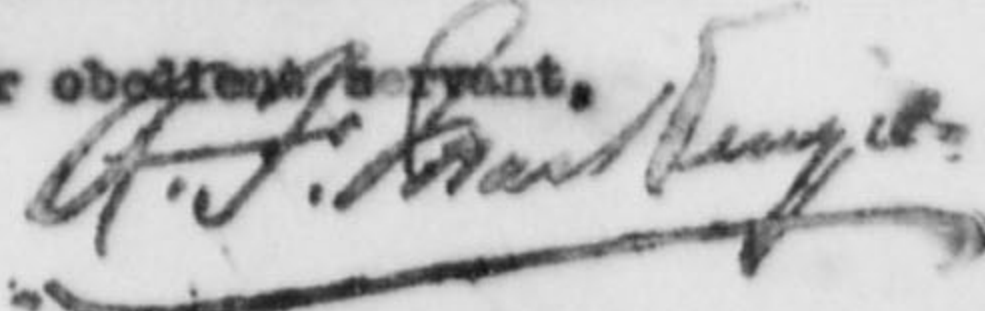

3.

The chimneys should be built to the height as shown on the elevations.

4.

The opening shown between scullery and future building should be the width as shown on plan, and the bottom opening three feet from floor line, and top opening six feet from floor line.

Your obedient servant,

R. Grant, Esq.,
Inspector of Construction,
Indian Residential School,

PROGRESS ESTIMATE OF WORK DONE TO DATE
on

THE GUY INDIAN RESIDENTIAL SCHOOL.

The work is now well advanced towards completion, the work on the superstructure to be completed on the outside is as follows:

OUTSIDE PAINTING:- To be done

Sixteen feet to be built on Boiler room chimney,

Outside stair to be built to chapel,

Roof to be built over fuel room, Roof over stair entrance to

boiler room to be built. 50% of siding to be completed on left

side of elevation. Storm sash and screens to be fitted to window

frames on outside, Grading and cleaning up around building is to

be done yet. Excavation for main building is complete except for

footings, Inside work is well advanced, Plaster work is completed

in Chapel and 70 % is completed in basement. Concrete floors are

laid in engineers room, bakery, pantry, kitchen, scullery, store-room

and toilet. All concrete stairs in basement has yet to be built.

All carpenter work is completed inside of basement and chapel except

for interior finish and hardwood floors to be laid in chapel. All

the finishing material is now on the job. Electrical wiring is now

installed except for lights in fuel room and stair entrance from

outside to boiler room. The plumbing is now installed and tested out

ready to place the twelve fixtures in position when the plaster work

is completed in basement.

No. 2

Plastering will be completed by Saturday next.

Hot water storage tank in Boiler room has been installed and connected up to the water supplies. pipe.

Boilers are set in place and bricked up. All steam mains from Boilers run through the building. All risers to radiators are in chapel ready to be connected up when hardwood floor is laid. There is about 60% of the heating plant completed, which does not include the pipe and boiler covering nor the testing out or cleaning the boilers. All of the material is on the job to complete the work. Breeching from boilers to smokestack is 75% complete.

Work on metallic sheeting has not been started in basement but the material is on the job.

The Contractor expects to complete his work on the contract in about three weeks time.

Dear Sir:-

You will find attached bill from R.N. Wyatt, Contractor on the above school for material supplied and used in the erection of the above building amounting to the sum of \$ 20,716.15.

It will be satisfactory to pay Mr. Wyatt a second payment of \$ 8000.00 on his contract.

I might say that in addition to the above there is material and labor completed to the extent of \$ 23000.00. Mr. Wyatt's bill does not include any of the sub-contractors estimates of labor and material.

I have placed a conservative estimate on the value of material installed and labor done.

In further reference to letter 13207-15 of the 14th inst second paragraph, I beg to state that I have seen His Lordship Bishop Charlesbois, and he tells me that the man he has in mind for the work looking after the heating of the Guy Residential School at Sturgeon Landing is a Mr. Emile Milette of The Pas, Man, who holds a second class engineers certificate, and is a married man.

I have seen Mr. Milette and he is willing to take the work for the sum of \$3.00 per day wages, he would have to go to Sturgeon Landing probably before the middle of October to be on the job before freeze up.

If this arrangement is satisfactory to the Department I would be obliged to have the appointment confirmed by wire so Mr. Milette can make necessary arrangements about taking his family up with him.

GOVERNMENT OF CANADA.
REQUISITION FOR TEMPORARY APPOINTMENT

TO THE CIVIL SERVICE COMMISSION:

You are hereby notified that, because of a temporary pressure of work in this department, the employment of extra assistance is necessary. You are requested to authorize the employment of some person to fill the temporary position described below:

DESCRIPTION OF POSITION:

Title of position.....**Fireman**..... Division and grade.....**IA3**.....
Department.....**Indian Affairs**..... Branch **Indian Agencies** Division.....
Place of work.....**Sturgeon Landing**..... Salary rate.....**\$90.00 a month.**..... Appropriation.....**School Vote**.....
Date appointee should report for duty.....**October 15/25**..... Probable length of employment.....**6 months**.....
Officer to whom appointee should report.....**J. W. Waddy, Esq., Indian Agent, The Pas, Man.**.....
Description of work.....

SPECIAL QUALIFICATION REQUIREMENTS FOR POSITION:

THE APPOINTEE SHOULD POSSESS THE FOLLOWING SPECIAL QUALIFICATIONS AS TO:

Education.....**as per classification**.....
Experience or technical proficiency.....**do.**.....
Place of residence.....**Sturgeon Landing School.**..... Sex.....**Man**.....
Other qualifications.....

EXPLANATION OF NEED FOR ASSISTANCE:

Reason extra assistance is needed
If the position has been previously occupied, give the preceding occupant's name, salary rate, and reasons for leaving.....
(Name) (Salary rate)
(Reasons for leaving)

Signed.....
(Signature of Deputy Head)

NOTES AND INSTRUCTIONS:

1. File this requisition with the Civil Service Commission as soon as the need for extra assistance is recognized. Prepare two copies; forward one and retain one awaiting "Certificate of Appointment." No letter of transmittal need accompany this requisition. If more space is required for describing the work, for stating the special qualifications, or for any other purpose, attach an extra sheet of paper.
2. File a separate requisition with the Civil Service Commission for each vacancy in a temporary position. For permanent or seasonal places use the special requisition forms provided.
3. Give the position the title ordinarily used to designate it in the department. If the position is a new one give it a tentative title which, as nearly as may be, is brief and descriptive of the work to be done.
4. The Civil Service Act, 1918:
23. (1) When from a temporary pressure of work, extra assistance is required, the Commission may, on the written report of the deputy head that such extra assistance is required, authorize the employment of such number of temporary officers, clerks, or employees as are required to carry on the work. 1906, S. 94, amended.
- (3) Temporary employment in the civil service shall only be authorized for such time, not exceeding six months, as the Commission deems necessary, and the period for which the employment is authorized shall be mentioned in the certificate of qualification issued by the Commission. One or more extensions of such period of employment may be granted by the Commission, but each such extension shall be limited to a period not exceeding six months.

THIS SPACE RESERVED FOR THE USE OF THE CIVIL SERVICE COMMISSION

September 30, 1925.

Dear Mr. Foran,-

I beg to advise you that we have today received a letter from the Indian Agent at The Pas, requesting authority to employ Mr. Emile Milette, of The Pas, as Fireman in charge of the Sturgeon Landing Indian school during the winter months. The first unit of this school is completed, and it will have to be kept heated during the cold weather and every precaution taken against fire. Mr. Milette holds a second class engineer's certificate, and he would be willing to take up the work at a salary of \$90.00 a month. The Indian Agent urges ^{that} immediate authority be wired, as it will be necessary for Mr. Milette, if engaged, to go to Sturgeon Landing before the middle of October, so as to be on the job before the freeze-up. I am inclosing herewith requisition, and would very much appreciate your taking immediate action, so that we can advise the Agent in good time. There is no one at Sturgeon Landing who could be employed for this service.

Ottawa, October 1, 1925.

Note for File : -

Mr. Medland telephoned with reference to the Fireman to keep the fires going to protect the first unit of the Sturgeon Landing school during the winter months. He states that, as the position Fireman is exempt from the operation of the Civil Service Act, we will not require a certificate for this man for six months, but, should his employment extend beyond that period, it will be necessary to have one.

Sir:

In reference to letter 13207/15 of the 14th inst. regards wood for the Guy Residential School.

I beg to report that I will take this up immediately.

See letter under J.P.
Regards second paragraph, asking what arrangements are to be made for someone to look after the building. I will take this matter up with His Lordship Bishop Charlebois on his return to The Pas this week, as I have an idea that he has some priest in mind, whom he intends to use for a care-taker and I will discuss the matter with him and then report to the Department.

The Inspector of Construction has asked me for blank forms of Progress Estimate, but I have none of these in the office. I would be obliged if the Department could send him a supply of these blank forms direct to Sturgeon Landing by the first mail as he wishes to put in a progress estimate as soon as possible.

I am, Sir,

Your obedient servant.

Ottawa, October 2, 1925.

4647/153

Sir:-

Replying to your letter of 25th ultimo, relative to the appointment of a man to look after the heating of the Guy Indian Residential School at Sturgeon Landing, and nominating the services of Mr. Emile Milette of The Pas, Man., who holds a second class engineer certificate, I beg to confirm the following night lettergram to you of yesterday's date:

" Approval granted for appointment Emile Milette as fireman at salary Ninety dollars per month to look after heating Guy Residential School during coming winter. Please arrange to have him be on job as soon as services necessary."

Mr. Milette's position will be classified as that of Fireman, as that position is exempt from the operation of the Civil Service Act. Should, however, his employment extend beyond the period of six months it will be necessary to obtain a certificate from the Civil Service Commission to continue his services. As stated in our telegram, the salary allowed will be at the rate of ninety dollars (\$90.00) per month. Please advise when he takes up duties. You should forward properly certified vouchers in duplicate from time to time for the amount of salary due at the above rate.

Your obedient servant,

A. F. MacKenzie

The Day Indian School,
Sturgeon Landing, Sask.
October 1st. 1925.

The Secretary, Dept. of Indian Affairs,
Ottawa,

R

Dear Sir:-

Your letter of September 19th inst. to hand.
replying to my letter of the 12th. inst. with reference to
certain part of the work on the contract.

I note that you advise that the joists over the
boiler room should be 2 x 10 as per specifications. I
admit that the specifications reads 2 x 10 joists but the
plans call for or show 2 x 6 laminated floor. As you have
decided to cover the ceiling with galvanized iron it will
be satisfactory as a fire prevention. I am getting a price
from the contractor for this work. I am also getting a
price direct on the material ourselves, and if required will
do the work.

Regarding the heating plant, we are arranging to
heat the building this winter with wood heaters. We are also
going to make a test on the heating plant before the boilers
and piping are covered.

Chimneys are built to the height above the present
roof as shown on elevation.

The opening between scullery and future building is
the width shown on plan. Height 5'-0" from finished floor
to bottom of opening, 6' from finished floor to top of opening.

In regard to the present excavation for the future
building it will be necessary to have this drained, otherwise
the present building would be flooded in the Spring. I have
asked the contractor to have this done before he completes his
contract.

In regard to the outside drainage of sewerage disposal
the contractor has made a ditch 10ft deep from the point where
the cast iron soil pipe comes out of the building on the right
side elevation, 15' north of the entrance to the basement.
This ditch runs southeast for 190 ft. towards the riverbank.
This work was started before I took over the inspectship. There
is no records showing that this work was included in the present
contract. The foreman on the job says that the contractor
instructed him to have this done and a record kept on the time.

I may state that we will drain the heating system after
making the test through this drain. We will have some difficulty
in getting a supply of water from the river, but will do the best
we can.

I am, Sir,

Your Obedient Servant.

A. Grant
Inspector.

IN YOUR REPLY REFER TO

No. 100-4

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

REGINA, SASK., Oct. 6th, 1925

Sir:

I beg to forward herewith The Pas Agency vouchers as undermentioned representing the salary of the Building Inspector at Sturgeon Landing and his board bill for the month of September.

In connection with the board bill I may state that this is a very fair and reasonable charge in view of the location of Sturgeon Landing and its inaccessibility. The vouchers are as follows:-

#276 - Inspector's wages for September,	\$168.00
#277 - F.M. Hayes, Inspector's board bill for the month of September,	50.00

You will note that the voucher in favor of Mr. Grant is accompanied by his diary certified to by the Agent, Mr. J.W. Waddy and that Mr. Grant was engaged on inspection work on two Sundays in the month, the 20th and 27th. The explanation being that this was unavoidable as the plasterers insisted on proceeding with their work in order that they might the sooner return home.

Mr. Grant requests that his salary of \$168.00 be paid to his wife Mrs. R. Grant, 119-14th Street West, Prince Albert, Sask.

He remarks

He remarks that his salary for August had not at the time of writing reached his wife, but doubtless a cheque has before now been sent forward. If not will you please see that its dispatch be expedited, and that the enclosed voucher for his wages for September be also paid to his wife with the least possible delay.

Sir;-

In reference to letter 13207-15 of the 14th ulto first paragraph, I beg to state that I have supplied sufficient stoves and pipe to heat the Guy Indian Residential School during the winter, and I have made arrangements with Mr. Wm. Hayes to cut and deliver the following firewood.

75 cords four foot wood from the slash around the building left when the land was cleared.

75 cords dry wood from Indian lands.

The price is \$3.00 per cord for the former and \$5.00 per cords for the latter. In case any has to be recut for the small stoves an additional charge of \$1.00 per cord will be charged.

I beg to recommend that this be accepted, I enclose original papers regards the tender. There was another man, named P. Durie of Sturgeon Landing, asked to bid but he did not make any offer as he had no teams.

I am, Sir,
Your obedient servant,

Ottawa, October 21, 1925.

Sir:-

I have your letter of 5th instant relative to the cutting and delivering of the fire wood required to heat that portion of the building which has been constructed at the new Guy Indian Residential School during the coming winter, and enclosing prices which you have received.

In reply I beg to say that you may arrange with Wm. Hayes to cut 75 cords 4 ft wood and 75 cords of dry wood. This price to include delivery at the school. In case any of this wood has to be re-cut for the small stoves, an additional \$1.00 per cord will be allowed.

You should furnish properly certified vouchers in duplicate covering the expenditure incurred. This should show the number of cords of different kinds of wood supplied. You will be good enough to see that this wood is delivered at the school at an early date. Care should be taken to see that the full quantity of wood charged for is delivered.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

M

REGINA, SASK., Oct. 24th., 1925

Sir:

I append an Excerpt from a letter received from Mr. J. W. Waddy, Indian Agent at The Pas with reference to the contractors who were erecting, and the Inspector who was put in charge of the work at Guy's School at Sturgeon Landing, as follows:-

"The freeze-up is here now and this man is still at the school, the contractors must be finished but they are frozen in also. I have a letter from the Department telling me to advise Mr. Grant they have no further work as Inspector of Construction in sight. I will keep you advised of any actual change in travelling conditions, as if the actual freeze-up is here the Inspector will not be able to get away from Sturgeon Landing until the roads are passable, probably over a month."

I gather from the information Mr. Waddy conveys that he is preparing the Department for a possible additional charge for his services by Mr. Grant owing to his compulsory detention at Guy's School. I should like to know if under the circumstances the Department would continue to pay him the per diem rate.

Your obedient servant

W. M. Graham
Indian Commissioner.

The Secretary,

INDIAN OFFICE

At.....The Pas, Man.....

4735-153

R.....October 23rd 1925..

Sir:-

In reference to letter 132-7-15 of the 2nd inst regards appointment of Mr. E. Millette as fireman at Guy Indian Residential School, I beg to state that this man left The Pas on the last boat leaving for that point on the 13th inst.

The Captain of the steamboat just informed me that he just got to Cumberland, which is half way to Sturgeon Landing, and then ran into a snow storm which held him up. When the storm was over the lake had frozen over. He waited two days to see if the ice would move, and when he saw it had tightened up for the winter he unloaded all his passengers, and came back down the river.

Mr. Millette is marooned at Cumberland House until such time as dog teams can cross the lake to Sturgeon Landing, and in the meanwhile the Inspector of Construction, R. Grant is ice bound at the school in company with the contractor's foremen, his painters and carpenters, and may be there three weeks or a month more before travelling is safe.

When I put in the pay list for Mr. Millette at what date will I start his time, I think it should be allowed from the 14th at which time he would have started work if the elements had not interfered.

I am, Sir,
Your obedient servant,

J. W. L. S. J.

132-7-15.

4735-153.

Ottawa, November 2, 1925.

Sir:

I have your letter of the 23rd ultimo, informing the Department that Mr. E. Millette, who was appointed fireman at the Guy Indian Residential School, has, on account of weather conditions, been held up at Cumberland House and will not be able to proceed to the school until such time as dog teams can cross the lake.

In reply I beg to say that the Department agrees with you that payment of Mr. Millette's salary should be made from the 14th ultimo, at which time he would have started work if weather conditions had not interfered with his arrival at the school. You may therefore, in forwarding vouchers for his salary, request payment from that date.

It is hoped that the contractor's men who were unable to leave the work will arrange to have the building heated until such time as Mr. Millette arrives.

Your obedient servant,

J. D. McLEAN

INDIAN OFFICE

At The Pas, Man.

Oct. 27th. 1925.

Letter No. 327.

Sir:

I have the honor to enclose voucher No. 327, amounting to \$67.00, in favour of Brown & Moors, The Pas, Manitoba, for galvanized iron, ceiling for boiler house at Guy Indian Residential School.

I have no authority from the Department for the purchase of this material. However, I presume the authority was sent to Inspector of Construction, Mr. Roderick Grant, as I was instructed by him to purchase this material, after calling for tenders. I followed his instructions, and have the material on hand here, and it will be forwarded to the Guy School by the first team leaving town after the lakes freeze over.

I am, Sir,

Your obedient servant,

Indian Agent.

GUY INDIAN SCHOOL,

STURGEON LANDING, SASK.

OCT, 31st 1925

[Signature]
THE SECRETARY

DEPARTMENT OF INDIAN AFFAIRS,
OTTAWA,

R

Enclosed you will find a list of the work to be done on the Guy Indian School at the 31st, of oct, Owing to the water in Cumberland lake been frozen over we have had no mail service since the 8th, of oct, the material required to finish the work came as far as Cumberland and owing to the boat been unable to come through to the landing it was taken back to the Pass,

I understand it will not be here until the Lakes freeze over so that the freighting teams can cross them in safety,
With reference to the heating of the building during the present winter, it will be possible to use the boilers all winter as we have arranged to have the necessary supply of water when required,

During the month of oct, we used one of the boilers to heat the building in place of heaters as it was the best way to dry out the building, at present we have the two boilers filled with water, by having one boiler filled and held in reserve they will have to refill them once during the winter from the river,

THE drains from the boiler room had been drained out before the cold weather came,

Your Obedient Servant

Roderick Grant
Inspector

GUY RESIDENTIAL SCHOOL

COMPLETION & EQUIPMENT

\$60,000.

An amount of approximately \$60,000 will be needed to complete and equip Guy Residential School.

It is the desire of Rt. Rev. Bishop Charlebois to open the school before next Winter and I hope that the Department will provide for an early start in the work of completion, the more so on account of the shortness of the Summer Season in the Sturgeon Landing District.

WATER SYSTEM AND SEPTIC TANK.

\$7,000.

Together with the completion of the building these two important items require the attention of the Department and in my estimation a certain amount should be set aside for such purposes. \$7000.00 is found to be the approximate cost.

Sir:

I beg to forward herewith copy of a telegram received from Mr. J.W. Waddy, Indian Agent at The Pas stating Mr. Grant the Inspector at the Guy School, Sturgeon Landing is at The Pas making his final report, and that the Contractors wish him to go to Winnipeg, offering to pay his expenses, while Mr. Grant suggests that the Contractors should meet him at The Pas and requesting me to wire my opinion. I also enclose a copy of my reply that I had no opinion to offer and Mr. Grant should best know his own business. I thought it well to forward this information to you in case it be brought to your attention from another source.

Your obedient servant,

W. M. Graham
W. M. Graham

TENDERS WANTED

Sealed Tenders addressed to the undersigned and endorsed on the envelope, "Tender for a portion of the Guy Indian Residential School, Sturgeon Landing, Saskatchewan," will be received up to noon of the 11th day of May, for the erection of the above mentioned building.

Plans and specifications may be seen at the office of the Indian Agent at The Pas, at the office of John R. Bunn, Inspector of Indian Agencies, Winnipeg, and at the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada, for 10 per cent. of the amount of the tender payable to the order of the undersigned. (War Bonds of the Dominion, or Canadian National Railway Bonds will also be accepted as security, or Bonds and Cheque, if required to make up an odd amount), which amount will be forfeited, if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest, or any tender, not necessarily accepted.

DUNCAN C. SCOTT,
Deputy Superintendent General
of Indian Affairs.

Department of Indian Affairs,
Ottawa, April 7, 1925.

DOMINION WATER POWER BRANCH

Winnipeg, Manitoba,
November 27, 1925.

Sir,

This will acknowledge your letter of November 21st with reference to the request of the Departmental Engineer of the Department of Indian Affairs for additional elevations and contours on the general plan accompanying the report on the water supply and sewerage system for the Guy Indian Residential School at Sturgeon Landing.

Enclosed you will please find a general plan with further elevations shown. At the time Mr. Patterson made the survey of the school site the question of supplying the school from a storage tank was not taken into account and the elevations of the ground some distance from the river were not secured. Mr. Patterson states, however, that there is very little rise in the land for a considerable distance from the river, and I consider that the slight increase in height that would be gained by locating the tank some distance back from the river, would not compensate for the additional expense of the piping.

I note that the Departmental Engineer desires me to mark what I consider is the most suitable location for a storage tank to take the place of the pneumatic pressure tank proposed in the report. With very little difference in the elevation of the ground in the vicinity of the school, the storage tank might be placed at any point that would be most suitable in connection with the required water mains.

The suggestion is made that, with the practically level ground surrounding the school, it might be more feasible to arrange to have the water tank placed either in the top storey or on top of the school. This is only a suggestion, and it is realized, changes in the design of the school might be necessary to support the weight of the tank when filled with water.

Your obedient servant,

C. H. Attwood,

District Chief Engineer.

R. GURNEY ORR. ESQ.

CHIEF ARCHITECT
DEPARTMENT OF INDIAN AFFAIRS
OTTAWA.

DEAR SIR,

RE DRAINAGE ON ABOVE SCHOOL

The outside drainage for sewerage disposal was made by the contractor on the authority of the water power branch he made a ditch 10ft. deep approximately 190ft. long from the point where the cast iron soil pipe comes out of the building, the actual length of ditching is 120ft, as it has being bridged at every 8ft of ditch, I wrote the dept. on the 1st of oct, about this as I saw no record of the work being authorised but I had no reply,

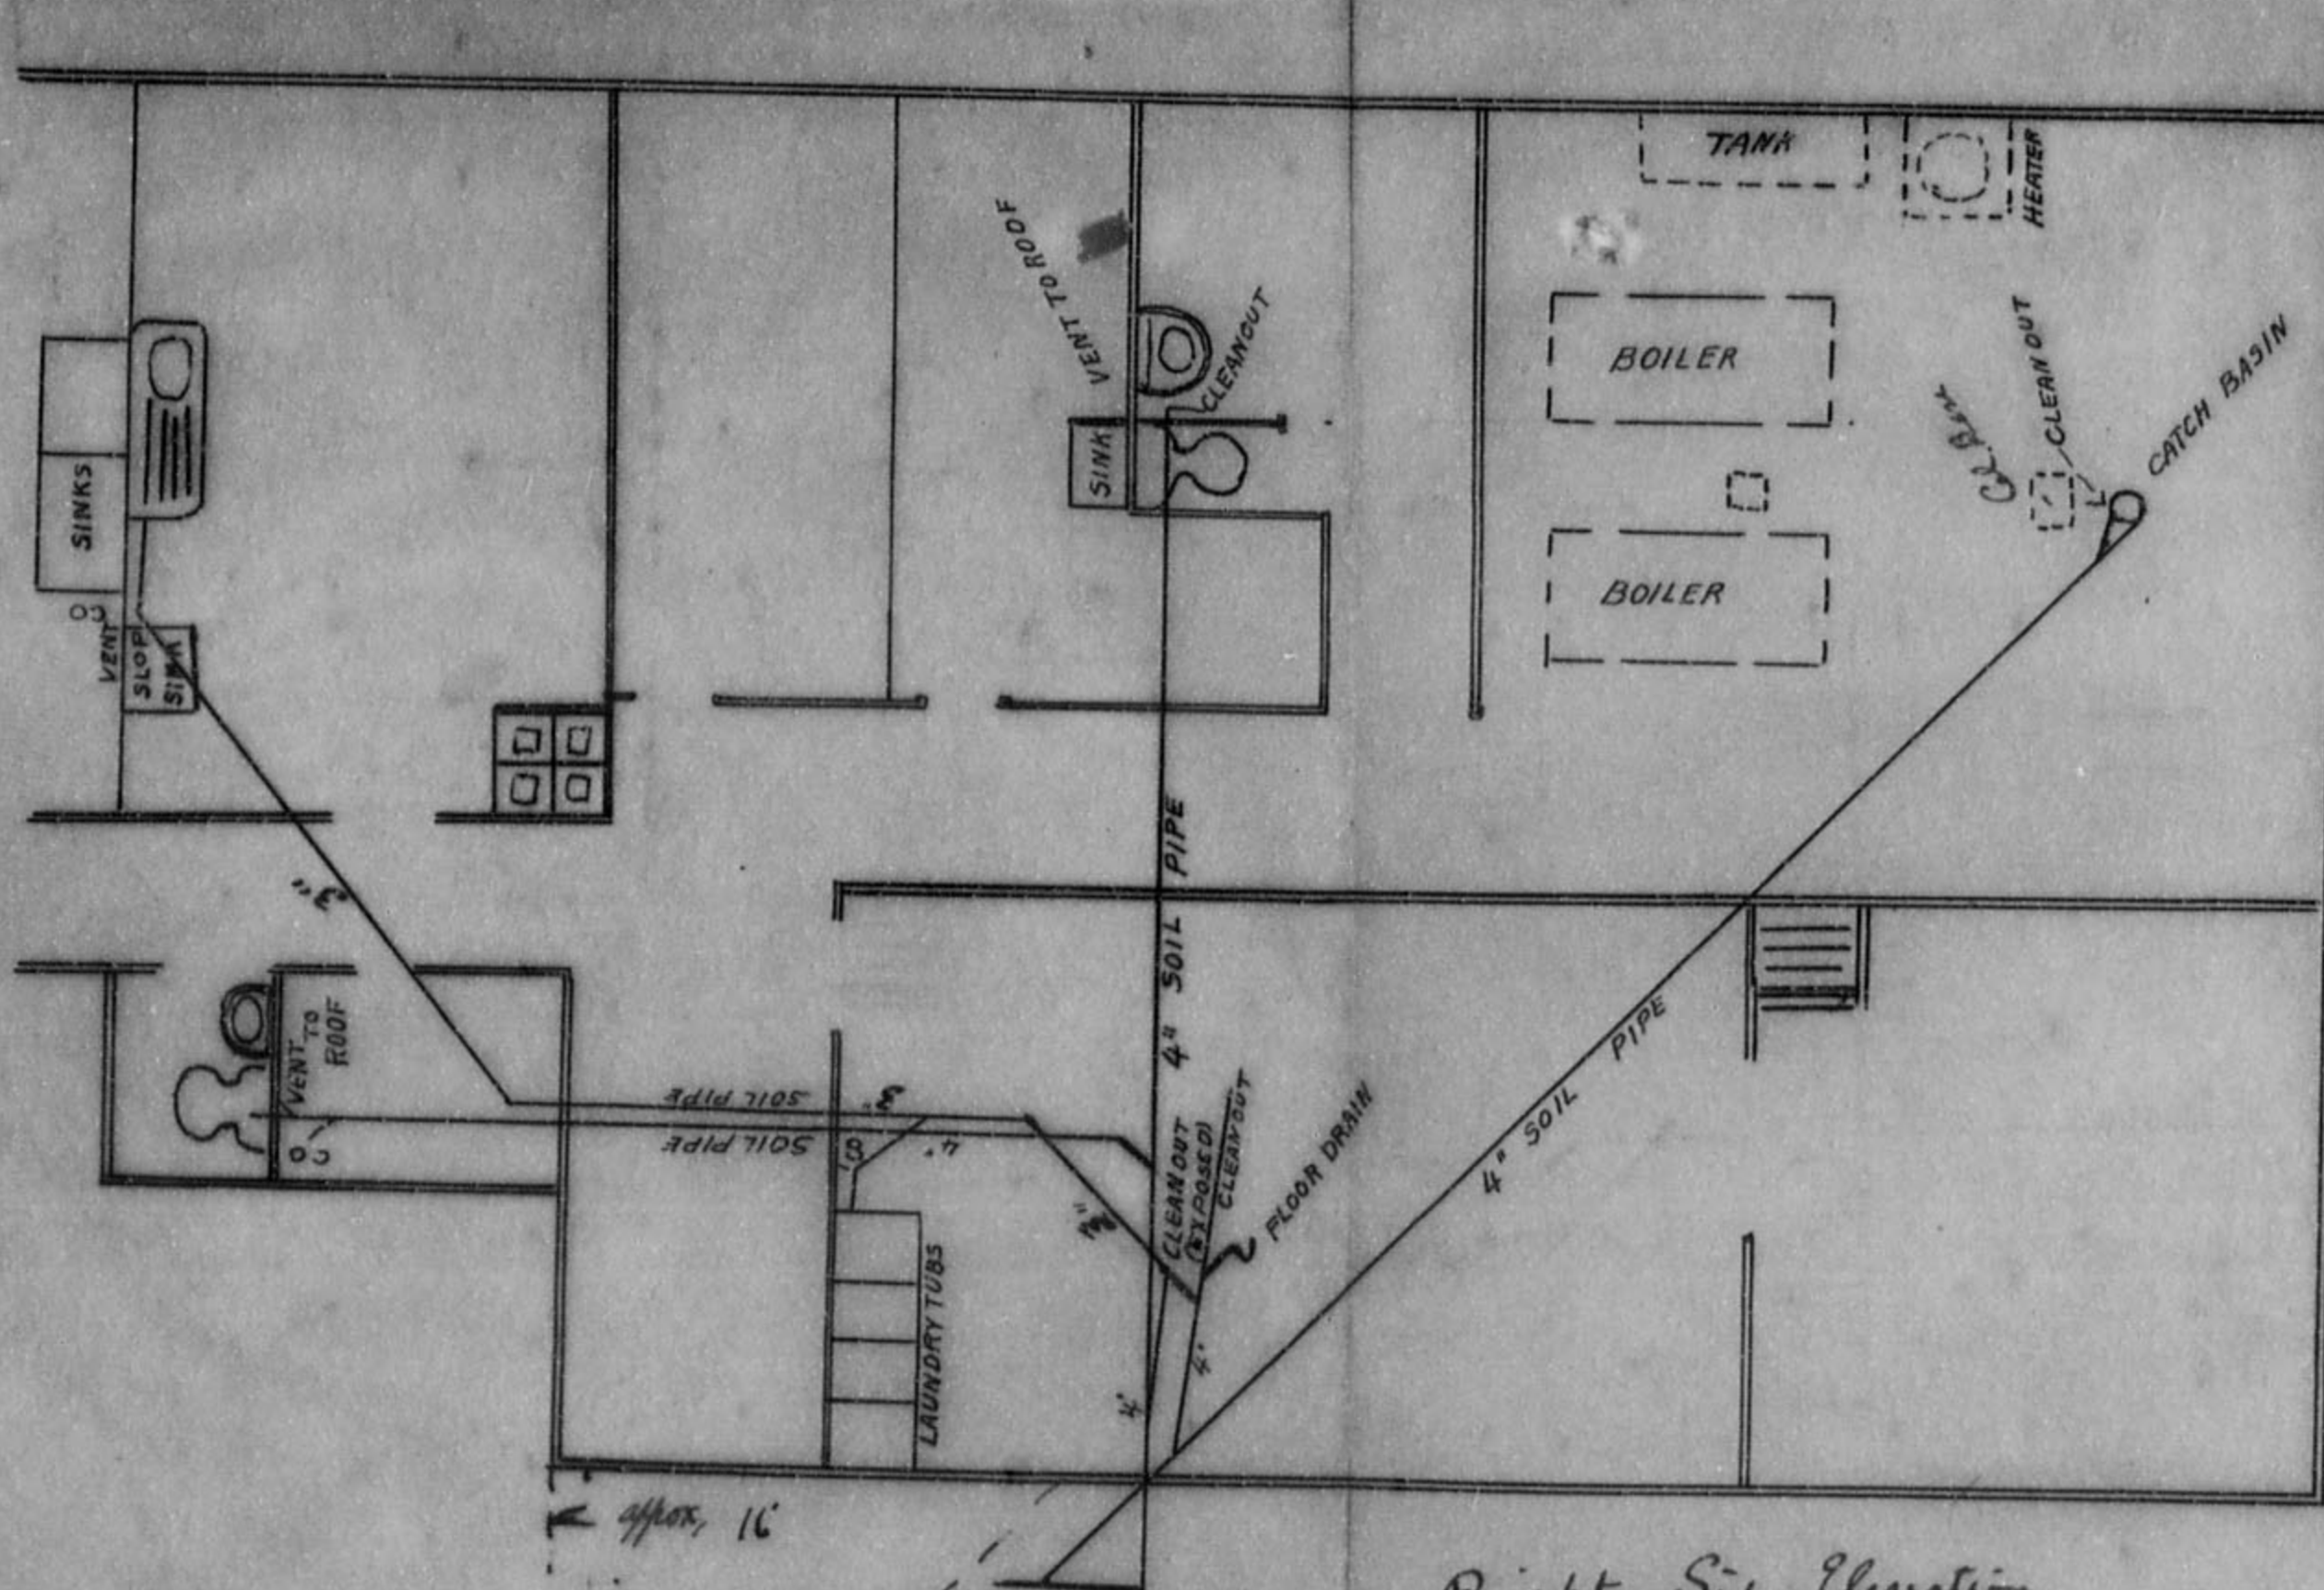

yours truly

R

Dear Sir:-

RE GUY INDIAN RESIDENTIAL SCHOOL. STURGEON LANDING.

Regards my letter to you of the 31st October with a list of the work to be completed on the above school, I beg to report that since then all the material required to complete the work was delivered at the school and all the items on list were completed on the above date.

The work has been completed as per plans and specifications except for the following changes and omissions. 1. Brick chimney for boiler; the base of the chimney was carried up to a height of ten feet in concrete above the concrete footing, then finished in brick to the height given on plans. Concrete base was in place when I took over the work.

2. Opening in partition wall between machine room and laundry; plan shows opening to have doors the same as shown on outside double ~~walk~~ door on the rear wall to machine room; the partition was changed from the location shown on plan and moved seven feet into space allowed for laundry; opening has been finished with plain jamb and casing.

3. Cross on roof; the plan shows cross on roof, rear elevation. This has not been done as shown, the contractors foreman had no instructions to do this work as there was no mention of it in the specifications. If the Department does not have it done His Lordship Bishop Charlesbois informs me he will be pleased to contribute it himself.

4. Grading has been done on the rear elevation and right side elevation, there is approximately about 75 yards of earth to be graded on the left side.

5. The following were sub-contractors on the work. J. Davidson, Winnipeg, contractor on the plastering. I have to report that all the plaster, cement and keen cement work was finished as per specifications excepting the work done in the machine room, hallways and stairway and plaster work above the keen cement on the walls in the laundry which owing to difficulties with delay of material and delay by the carpenters not being prepared for the plaster the plasterers lost considerable time and wanted to get away to catch the last boat so they put the finishing coat on before the undercoat was properly dry as per the manufacturers specifications. They were over.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Boer Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

They were told, along with the contractors foreman, that these walls were not ready for the finish coat and if they put it on it was at their own risk as they were working away from the specifications. I have to report that this part of the work has shown up well under the circumstances.

Standard Plumbing and Heating Co. Winnipeg, were contractors on plumbing and heating. The heating plant has been installed as per specifications, with one omission from the plans, it has reference to installation of the radiator in the scullery, 27 sq ft of which was to be ~~connected~~ up and removed when future extension is to be made. we did not require the radiator so did not connect it up and give a finished job to the heating plant in this part. The heating plant has been in operation since the end of September and there is one boiler operating all the time and will be during the winter. The heating plant is giving first class satisfaction all radiators are working satisfactorily. The plumbing has been installed with all fixtures as per specifications, and all drains and connections as per sketch submitted shewing the drainage layout.

Shchumcher & Gray, Winnipeg put in the electric wiring. This is completed, according to specifications, fixtures hung and all switch and push plates in position. All wiring was finished except for boiler room, fuel room and stairway before I took charge.

With reference to the general construction of the building all work ~~was~~ done while I was in charge in accordance with the plans and specifications.

I would draw your attention to the finished floor laid in chapel. The flooring supplied in accordance to specifications #1 Maple. I beg to report that it is a poor grade of #1, it was badly matched, varying 1/16 inch in width and when #1 Maple is mentioned in specifications it should be #1 best grade as there are several grades of #1 Maple flooring on the market. It did not help the flooring being stored at the school site all summer during the wet season although it was under a roof. Kiln dried maple is very susceptible to moisture which it absorbs; while on the matter of finish flooring it is right that I should mention that the floor joists should all be sized before the rough floor is laid; in the present case the sizing of the floor joists did not help the laying of this grade of maple flooring. The flooring is 13/16 " thick.

Regards interior doors, all the doors supplied were 1 1/2" thick of good quality fir 5 cross panels, except for the two doors at rear of platform in chapel which are 1 1/2" thick taking the place of three panel doors specified, the only difference is in the design.

All interior staining and varnishing has been completed, also all outside painting as per specifications.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The contractor has supplied and fitted all the window screens and screen doors as per specifications, all having been marked for their proper location and stored in the store room, all windows are fitted with storm sash with one sliding panel to each window.

The excavation for the future building has been done to the depth called for, but no excavation has been done for the footings. It was necessary to have a trench dug from the lowest point of the excavations to the river bank for drainage in the spring. Instructions have been left with the fireman to keep the drain open.

Covering of boilers and steam pipes and all fittings in piping covered as per specifications, also jacket heater for summer use covered. All return pipes and boiler front in boiler room painted. All bare risers, radiators and piping in building not covered painted as per specifications.

There is a piece of cement base not on wall, right side of hallway from future building entrance. I gave instructions at the time the plasterers were doing the plaster work not to put it in as they had no time, the length of this piece of base is only 12 feet and they were not in position to do it at the time to my satisfaction.

In handing over the building to the fireman instructions were left with him as to the temperature required during the winter in the building. The building is now thoroughly dried out and there is no sign of dampness. We are heating the building by using one of the boilers and will be able to do so all winter, this will allow the fireman every opportunity to regulate the heat as best required.

When there was no possible means of heating the building before the boilers were in use and no water service I asked Mr. Waddy to ship me three heaters and stove pipe for emergency. After getting word from Ottawa that there would be no water service this year and advising me to make the best arrangements possible to heat the building and as I have already reported to the Department the heating of the building with the boilers was preferable to heating by stoves I left the stoves which are not being used in the care of the fireman.

Considering the circumstances and difficulties under which the construction of this building was put up I would say that we got a good job and value received.

Your obedient servant,

Roderick Grant
Inspector of Construction.

119 14th STREET WEST

PRINCE ALBERT, SASK.
DEC, 8th, 1925

R. GURNY ORR, ESQ.
CHIEF ARCHITECT
DEPARTMENT OF INDIAN AFFAIRS
OTTAWA.

DEAR SIR:-

RE GUY INDIAN RESIDENTIAL SCHOOL

I would further add to my report to you of the 28th of november on the completion of the work on the contract of the erection of the above new school, that the prospects of finding suitable sand and gravel at sturgeon landing should be well considered by the contractors tendering on the work of the proposed extension to the present building next year,

There is plenty of good gravel to be had at the Pas suitable for the work that would cost \$5.00 per c. yard landed at the school site this price for gravel would run up the cost of the concrete work, There is suitable gravel to be found at the landing providing time is taken to locate the best to comply with the specifications by the contractor and approved of by the inspector in charge before delivered on the job if this is done there should be no trouble about the gravel after delivered on the job, they will have to figure on hauling sand and gravel anywhere from 3 to 10 miles return trip, I was told that the contractor on the present building hauled 6 loads per day with one team hauling one yard and a quarter to a load this gravel was not up to all the requirements in the specifications, the gravel used in the concrete floors in the basement was of a better grade,

I would also recommend that the contractor have all cement lime and plaster tested out before it leaves the yards, if does not come direct from the cement plant, if this is done it will prevent the use of inferior material on the work, sometimes the yards is carrying old stock which has deteriorated unknown to the management and they ship the material to some job as good stock, if this test is made the trouble with bad material will be eliminated,

I would also recommend that the plans for the future extension provide for eavestroughing the same should apply to the building now completed as the rain water from roofs affect the foundation walls through time although they received a heavy coat of waterproofing on the outside,

since I made out my last report a patch of plaster 2ft. x 4ft, scaled in the pantry it has being pointed out to the contractor it is not much only the putty coat that scaled, an allowance should be made by him to have this repaired by the plasters on the work next year,

I would also recommend that if the proposed work go on next year that arrangements be made for an early start on the work so that the contractor will a chance to finish in time before the freeze up takes place, this year the work was not finished before the freeze up came and the contractor and his men were placed at a disadvantage to get out, one man had his feet frozen and another a bone broken in his foot on the ice, the contractor reports that they will both be laid up for two months, I trust you will take my recommendations as given with the best intensions,

yours truly

At The Pas, Man.

R

December 12th 1925, 19.....

To Architect
1

Sir:-

I have the honor to enclose a fyle of vouchers, estimates and reports from R. Grant the Inspector of Construction of the Guy Indian Residential School at Sturgeon Landing, Sask.

1. Report reg gravel etc for future building.
2. Final report on present contract with R.N. Wyatt.
3. Report and plan of drainage system.
4. Final progress certificate.
5. Voucher for extras passed by Inspector of Construction
6. The last noted voucher in detail from the contractor as supplementary to the voucher #5.

The building is occupied by the fireman Mr. Milette and has been taken over as complete I should judge, with the few minor items noted.

Mr. Grant told me he thought it would be well if the Department shipped in the cement and the rough lumber for the forms this winter. This would give the contractor a fair start on the work in the spring if he could obtain gravel near the site. If the gravel has to be obtained at The Pas of course the cement need not go in ahead, as gravel would have to go forward on barges after navigation opens.

I am, Sir, Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Department of Indian Affairs,

R. N. WYATT
CONTRACTOR

WINNIPEG November 16th, 1925.

J. W. Wady, Esq.,
Indian Agent,
The Pas, Man.

Dear Sir:-

We are enclosing copy of a letter written to Mr. Moxley, Painter, who went up to work for us at Sturgeon Landing, in reply to one received from him.

I might say that this man is far from being a painter, and when Mr. Weber was down here I asked him what he promised to pay this man, as it was he whom I wired to have a couple of painters go up there. He said this man was not much of a painter and if he were hiring him he would give him 40 cents an hour. We paid him 50 cents.

It is unfortunate the way the job has ended up that those fellows didn't get back on the boat. Apparently this is something which none of us have any control, as I understand the boats usually quit running about the 15th, and we would have been ready to come out, had the boat made its last trip.

113
I would be pleased to hear from you as to what your idea is regarding this man Moxley by return of mail, as we do not want to have any after clap like this with workmen.

Yours truly,

RNW/EB.

November 16th, 1925.

R. E. Moxley, Esq.,
Painter,
The Gas, Man.

Dear Sir:-

We are in receipt of your letter dated November 12th re cheque, and might say that when we make out cheques we make them out from time sheets, as made out by our foreman, and these are supposed to be O.K'd by the workman. Mr. Alyea, our foreman, claims that you are not a first class painter by any means and we paid you as a second class painter.

We took the matter up with Mr. Weber as to what he thought the wages were in your town for that class of man, and this is the amount that we paid you.

I cannot understand how you arrive at your statements, as we never asked Mr. Lovell to go up except through Mr. Weber, whom I wired to see if he could get a couple of painters to go up. It would be much better if you could get in touch with Mr. Weber, and ask him if he quoted any wages to Mr. Lovell. I want you to understand that we pay a rate of wages in keeping with a man's ability, but understand too that if a man does not prove to be first class and we agree beforehand to pay him a certain wage we will certainly pay him that. In this case I have got to be informed as to what rate you were promised. Upon receipt of this information I will take the matter up again.

I am sorry that any adjustment like this has to be made, as I am not in the habit of having any disputes with anybody regarding wages.

I am enclosing a copy of this letter to Mr. Wady, and will ask him for his opinion.

Yours truly,

RHW/RE.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

POOR COPY

4798-153

The Pas, Man.

November 20th 1925.

Dear Mr Wyatt:-

I have your letter of the 16th about dispute regards Mr. Moxley's account for wages as painter at Sturgeon Landing.

I went to see Weber and he says he pays 50¢ per hour to painters, but he picks them up when the season is slack. Mr. Moxley works as painter and has done a number of jobs in town, and probably could make out a case that he is a painter, though he does not belong to any union.

He paid \$23.00 to get back from Sturgeon Landing, so has not much to show for his work.

I do not intend to interfere with you and this man, but just give you the above facts, so you might reconsider paying him a little more than you intended to do, he is hard up and requires money and would probably settle reasonably with you. He says he must have satisfied Bert with his work or he would have been fired, as you kept no drones on the job.

Yours sincerely,

Signed *R. N. Wyatt*
Indian Agent.

R

Sir:

In reference to the contract for building Guy Indian Residential School. The painter on this job, Mr. R. A. Moxley, has asked me to write to the Department and state that he has not received sufficient pay for his work.

I enclose some correspondence which I have had about this matter with Mr. Wyatt, the contractor. I understand that Mr. Wyatt has paid this man off at the rate of 50¢ per hour, and that there is no dispute about the number of hours worked, but that the painter asks for 65¢ per hour.

The Inspector of Construction wrote to the contractor on November 26th, and advised him that this man was the only real painter who was on the job, and that he thought it would be advisable to pay him the difference between what he asked for and what he received; in other words he advised that Mr. Moxley be paid at the rate of 58¢ per hour.

I have no comments to make on this matter, but am just advising the Department of the wishes of Mr. Moxley.

I am, Sir,

Your obedient servant,

Indian Agent.

DEPARTMENT OF INDIAN AFFAIRS

COMMISSIONER'S OFFICE,

REGINA, SASK., Dec. 29th, 1925

IN YOUR REPLY REFER TO
NO. 100-4
ALSO TO DATE OF THIS LETTER

ajf

Sir:

I beg to forward herewith the under-mentioned vouchers in connection with the inspection of Guy School at Sturgeon Landing in The Pas Agency by Mr. R. Grant, Inspector of Construction,-

#384 - Opasqual Hotel	\$25.50
#385 - F.M. Hayas, Board of Inspector at Sturgeon Landing.	33.00
#386 - Inspector's Salary for November	144.00
#387 - Inspector's fare The Pas to Prince Albert, Sask.	11.00

Before submitting these vouchers I wrote Mr. Waddy for further explanation as to why the Inspector should have remained at The Pas for six days after his return from Sturgeon Landing, and why his final reports and statements could not have been prepared before leaving Sturgeon Landing while he was waiting for favorable weather conditions to come out. Mr. Waddy writes in reply that Mr. Grant informed him that he could not make out his report at Sturgeon Landing as he did not know whether certain work would be completed. The work in question appears to have been that to be performed by an electrician whom he met at The Pas on his way out to do the work. There was some carpentry work also to be completed, and men left to do this would not have returned to The Pas until a day or two after the Inspector arrived at the latter place.

The Inspector's diary accompanying voucher #386 does not clearly state what he was doing on the days he stopped over at The Pas, but Mr. Waddy gives more elaborate details. It would appear that on Monday the 23rd the Inspector interviewed and instructed the electrician, and also interviewed Bishop Charlesbois who desired some details about the plan of the building.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Tuesday the 24th the Inspector was preparing his final reports and estimates. On Wednesday the 25th Mr. Grant was attending to correspondence and prepared to leave on the train, but had to wait over to see what the contractor had to say in answer to some telegrams sent to him. On Thursday the 26th there was no train and Mr. Grant spent the time in the Agent's office doing some odd jobs on his final work, and finally he left on Friday the 27th for Prince Albert on the afternoon train. The voucher includes payment for Friday the 27th while he was on the train proceeding to destination. The Agent, Mr. Waddy seems to make out a case justifying payment for the number of days charged in the voucher, but I am inclined to think that Mr. Grant need not have made it necessary to remain at The Pas to draw up his final reports and estimates, and that two or at the outside three days should have been sufficient to enable him to obtain sufficient data to make his final report to the Department. However, I have made no deductions in the voucher and leave the matter for the Department to decide.

In concluding his letter to me Mr. Waddy refers to the preparation by Mr. Grant of the sewage disposal plan for the use of the Department's architect to show the location of each pipe. I presume the Department requested Mr. Grant to submit this plan, which he prepared I understand at his home in Prince Albert and for which no time is allowed. Mr. Waddy completes his letter by saying,-

"Mr. Grant's employment was taken as complete when he reached Prince Albert, though I am more or less certain that he will have considerable correspondence yet with the Department as the contractor may try to get a few more extras than Mr. Grant allowed. He was looking out for the interests of the Department all the time."

Your obedient servant,

W. M. Graham
Indian Commissioner.

DEPARTMENT OF INDIAN AFFAIRS Ottawa, Jan. 9, 1926.
CANADA

Approved
MEMORANDUM: *SC*

Mr. Scott.

Plans and specifications are now ready for the installation of a sewage disposal and water supply system for the Guy Indian Residential School, now in course of erection at Sturgeon Landing, Sask. The sewerage system consist principally in the construction of a septic tank and two separate sewer lines from the building to the tank, the outlet sewer from the tank to discharge directly into the Sturgeon Lake. The estimated cost of this work will amount to \$1,800.

The water work system as projected will comprise an eighty gallon per minute typhoon pump, operated by an eight H. P. gasoline or oil engine, all of which can be installed in the basement in a room specially provided for same. The water will be conducted from the lake into an intake well by gravity, from where it will be pumped into an elevated water tank, which will be embodied in the new addition.

The reason for placing the tank above the building is due to the fact that the school grounds are practically level and a saving will be made in both the cost of construction and the maintenance.

The estimated cost of the water works, including the pipe line, which will be about 700 feet long, will amount to \$3,000. exclusive of the cost of the tank, the plans for which are under preparation.

Upon consulting with Mr. Orr it was found advisable that the capacity of the engine specified for the water work system be such as to equally operate the electric generator, which will be required for this building. I have therefore prepared a specification for the electric generating plant in order that the machinery may be adjusted in co-ordination with that of the water supply. It will consist of a five K. W., D. C., 110 volt generator, a switch board complete with ameter, voltameter, fuses, switches, etc. and a 200 ampere hour storage battery.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Poor Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Mr. Scott.

The estimated cost of the generating plant as before specified will be \$1,500.

With your approval the specifications of the above mentioned systems will be attached to the general specification for the building, in order that the tenders submitted will also include a price for these works. Otherwise the advertisement for tenders will have to call for a separate price for the sewerage, water supply systems, and electric generating plant.

Will you kindly advise me accordingly.

Sir,—

In reference to my last letter regards the roof of the Guy Indian Residential School having some leaks. I beg to enclose another report I have received from the fireman at this place, in which he states that the trouble seems to be in the flashing. I do not know just where he means by the flashing, but presume it is probably the flashing around the chimney. I will make a note of this, and have it attended to next summer, if there is another contractor on the job.

Before the Inspector of Construction left the Department authorized him to have galvanized iron put on the ceiling of the boiler room, and the material was purchased. However, it was not delivered in time to be put on by the contractor, and I told the fireman that if he had any spare time during the winter I would be pleased if he did this work, and he informs me that he has the work about finished. I told him there would be no extra pay in this, that we could not pay an employee for doing two jobs at the one time. I trust this is satisfactory.

I am, Sir,

Your obedient servant,

W. L. Waddy
Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,

INTRODUCTORY.

The Guy Indian Residential School now under construction by the Department of Indian Affairs, is located at Sturgeon Landing on the right bank of the Sturgeon river some 2,000 feet above Namew lake, into which it empties. This report outlines a water supply, electric light and power installation, and sewerage system for the school, together with the estimated cost thereof. It is proposed to install both plants in the machinery room shown in the plans of the school.

WATER SUPPLY AND POWER.

GENERAL.

An investigation was made of the feasibility of developing hydro power for the school from the Sturgeon river. The investigation showed however that the cost would be excessive for the small amount of power required and it was decided to use two oil engines for the necessary power.

The water supply system is designed to fully supply the domestic demand for over 100 inmates and give a limited fire protection. The electric lighting and power plant comprises a $7\frac{1}{2}$ k.w. and a $3\frac{1}{2}$ k.w. generator, driven by a 10 h.p. and 6 h.p. oil engine respectively, which should amply take care of the light and power demands of the institution.

As shown on the General Layout Plan No. 1, it is proposed to take the water from the river some 700 feet north of the school, a four-inch intake pipe running from the river to the school. As this is some distance above the sewer outlet, with rapids between the sewer outlet and the water intake, there should be no danger of the water supply being polluted.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Boor Copy

The proposed plant calls for two oil engines, a 10 h.p. and a 6 h.p. By means of a line shaft either engine can be used for driving the pump or the electric generators. With this duplicate power there should be no interruption to either the water or electrical service.

WATER SUPPLY.

Intake.

As shown on General Layout Plan No. 1, it is proposed to take the water from the river about 700 feet north of the rear end of the school through a four inch wrought iron pipe. This location was decided on in order to avoid the necessity of having to go far out into the river to avoid freezing. At the location shown on the plan for the point of intake, the current is fairly swift near the shore and at the present level the water is ten feet deep a short distance out. No trouble should therefore be experienced from freezing during the winter. Another reason for choosing this location was the advisability of going a certain distance above the sewer outlet. As between this point and the sewer outlet there is a fairly swift rapids, no danger from pollution should be incurred. A ridge of rock about 150 feet wide, three feet below the ground will make part of the excavation for the intake line expensive, as it will be necessary to have at least five feet of covering over it to ensure against frost.

Pumping Plant.

The proposed pump will be of the plunger type similar to the Fairbanks-Morse "Typhoon Pumps" capable of pumping 90 g.p.m. against 60 pounds pressure with either an independent air compressor or with the compressor attached to the pump. The plunger type of pump is chosen on account of the long suction pipe. As shown on the Machinery Bayout Plan No. 2

the pump will be driven from a line shaft. Two sources of power will be available, either from a 10 h.p. or a 6 h.p. oil engine. This should ensure continuous service. From a three-inch discharge pipe the water goes to a 12" x 4" pneumatic pressure tank and from there to the school water mains. Though the proposed pumping plant will more than supply the domestic requirements, only a limited amount of fire protection will be given. It is considered, however, that for any ordinary outbreak of fire the supply should be sufficient.

ELECTRIC LIGHTING AND POWER.

The Gay Indian school is remotely situated from rail and water transportation during the winter months and in order to provide continuous service it is most advisable to install two power units. In the following layout two units are proposed, the larger unit being sufficient to meet most of the power requirements of the institution as finally completed. In case of breakdown or engine trouble either power unit would provide light and water service.

The electric lighting and power plant will consist of a 7½ k.w. and a 3½ k.w. D.C. generator. As shown on Machinery Layout Plan No. 2 the 7½ k.w. generator will be driven from the line shaft by the 10 h.p. oil engine already mentioned, or in case of its breakdown by the 6 h.p. oil engine. The 3½ k.w. generator will ordinarily be direct belt driven by the 6 h.p. oil engine, but in case of this engine failing it may be driven from the line shaft from the 10 h.p. engine. By this means practically continuous operation will be secured.

The $3\frac{1}{2}$ k.w. generator should supply most of the electric power for lighting, while the larger generator may be used either for power or lighting requirements.

A one panel switchboard with voltmeter, ammeter and necessary switches is provided as shown on Machinery Layout Plan No. 2.

Laundry Room Service.

As shown on the Machinery Layout Plan No. 2, the line shaft is carried through to the laundry and the necessary power can be taken either from the 10 h.p. or 5 h.p. oil engine.

ESTIMATES OF COST.

WATER SUPPLY AND ELECTRIC LIGHT AND POWER.

PIPE LINE.

Excavation 300 cu. yds. earth @ 1.00	\$ 300.00

Transportation & Installation Charges	400.00
	\$ 3,310.00

SEWERAGE SYSTEM.

GENERAL.

As the Gay Indian Residential School will have about 100 inmates the emptying of raw sewerage into the river was not considered advisable, and the following is a report on the proposed sewerage system that is considered would answer the requirements. Plans and profiles, together with estimates of the cost accompany this report. The elevations given on the plans and profiles are sea level, Topographic Survey B.M. 51, Elevation 883.73 on the Manitoba-Saskatchewan boundary.

As the land about the school will be used for playgrounds and gardens the system has been so designed that no structures appear above ground level. The sewerage system proposed will take care of 100 inmates.

After an examination of the conditions both from the cost and sanitary points of view it was decided that a sewerage system with only septic tank treatment would be sufficient and at the same time the most feasible.

Further treatment by disposal beds, of the sewerage after leaving the septic tank, was considered, but in addition to entailing a large extra cost the topography of the site is not suitable. Sewerage Disposal Beds to give satisfactory results should be near enough to the surface of the ground to allow of air action which is the main factor in the purification of the sewerage. As the ground surrounding the school is practically level the sewer will have to be laid at a depth of about eight feet. This would mean placing the disposal beds at this depth which is too deep for the securing of proper action from the air. From the sanitary standpoint the septic tank treatment of the sewerage should be sufficient as the affluent after passing from the tank will discharge directly

into the river where the dilution should be great enough to prevent dangerous pollution.

As shown on the General Layout Plan No. 1 it is proposed to take the drains from the laundry room at the rear of the building. The laundry waste and roof water are to be carried in a separate drain to a manhole below the septic tank, where it will then join the outlet pipe which will carry both it and the sanitary sewerage to the river. By this method, in addition to reducing the amount of sewerage to be treated, it ensures that no chemicals, etc., used in washing, enter the septic tank.

The sewerage from the toilets, baths, etc., is carried by a six inch tile (designated Sanitary on the Plan) to the septic tank, from whence it discharges into the river.

LAUNDRY WASTE.

As already stated the waste from the laundry is not treated but is discharged directly into the river. A six inch cast iron soil pipe carries the waste from the building to the double manhole "A". See details of manholes Plan No. 4. From this manhole a six inch tile is laid in the same trench as the sanitary sewer as far as the septic tank and from this point is carried round the septic tank to the outlet manhole "B" and thence into the river.

SEPTIC TANK AND SYPHON CHAMBER.

The sewerage, other than the laundry waste, leaves the building through a six inch cast iron soil pipe to the double manhole "A", thence through a six inch tile to the septic tank. As shown on Plan No. 3 the septic tank and syphon chamber are combined and are to be constructed of a 1, 2 and 3 concrete mix. To secure protection from frost a double plank roof with a six inch air space is provided.

The septic tank itself is seven feet wide, seventeen feet long and six feet deep at the centre. To facilitate the removal of sludge the bottom of the tank slopes towards the inlet end, and a manhole is placed in the roof at this point. The affluent enters the tank through a six inch cast iron soil pipe and by means of a tee and a short length of pipe is carried one foot below the sewerage line, thus avoiding any disturbance to the surface scum.

From the septic tank the sewerage flows over the dividing wall to the syphon chamber; two baffle boards carried one foot below the standing level of the liquid preventing any undue disturbance.

From the syphon chamber the sewage is discharged through two three-inch "Anthes" automatic syphons designed to discharge under an eighteen-inch head.

MANHOLES.

As shown on Plan No. 4 the manholes are constructed of concrete, with the exception of the roof which is made of two thicknesses of two inch plank. Each manhole is provided with a two foot square cast iron cover to allow of easy entrance.

Manhole "A" is a double manhole having two chambers separated by a concrete dividing wall, the one chamber taking the laundry waste and the other the sanitary sewerage. An iron screen is provided for the sanitary sewerage chamber to prevent any articles such as rags, boots, etc., reaching the septic tank.

In case it is desired to shut off the sewerage from the septic tank an opening between the two chambers with a sliding wooden gate is provided. The sewerage can thus at any time be diverted into the laundry drain and discharged directly into the river.

OUTLET.

In the vicinity where it would be feasible to place the sewer outlet a boulder shoal extends for some distance out from the shore. To lay a pipe through this, at a sufficient depth to prevent freezing, would be very expensive and to avoid this it is proposed to carry the sewage from the river bank in an eight inch square wooden box drain. The box drain would be made in sections about twelve feet long. With the rise and fall of the river a sufficient number of the sections will be taken up or laid down to carry the end of the drain to the river.

The other alternative is the laying of cast iron pipe far enough out into the river to ensure any possibility of freezing in the winter. This would entail expensive excavation through the boulder shoal and a certain amount of cofferdamming in the river itself. The cost for this will be quite high and for the present at least it is not considered necessary or advisable as the use of the wooden box drains though entailing a certain amount of labor should be satisfactory.

Winnipeg, Manitoba,
August, 1922.

Dear Sir:-

I have just received a letter from His Lordship Bishop Charlebois O.M.I. in connection with the completion of the Residential School at Sturgeon Landing and I take the liberty of bringing before you the subject of said letter with the hope that action will be taken if it is at all possible.

His Lordship states that last December Agent Waddy of The Pas suggested in a letter to the Department that the cement required for the foundations of Guy Residential School be freighted on the ice before the opening of navigation and that the contract for hauling gravel be let without delay for the same purpose. This gravel can be taken around Sturgeon Landing at a place to be chosen by the Indian Agent himself. The reason of such a request is to allow the contractor to start the foundations and finish them during the month of May and thereby assure the completion of the school fort next Fall. If this course is not followed His Lordship is of opinion that the school will not be completed before Winter or in time to secure children.

I leave the matter to your judgment and would request an early answer and if the latter is favorable a telegram sent to Agent Waddy with proper instructions would greatly oblige.

Yours truly,

Joseph Guy O.M.I.

MEMORANDUM:

Mr. Scott.

Plans and specifications are prepared for the completion of the Guy Indian Residential School at Sturgeon Landing, Sask.

Owing to the location of this building tenders should be invited at an early date, in order to take advantage of the short building season. If you approve, of inviting tenders immediately for this building, I would ask you to please furnish me with the names of newspapers in Winnipeg that can be used for the inserting of the necessary advertisement.

If tenders are invited now, giving the required time to figure, which will be approximately a month, it will make it possible, if a satisfactory tender is received, to let a contract before the first of May.

ALSO

TO DATE OF THIS LETTER

Sir,—

In reference to your letter No. 132/7/15, of October 2nd, 1925, regards appointment of Mr. Emile Milette to position as fireman for six months at the Guy Indian Residential School. I would be obliged if the Department could have this appointment extended for one month, or until the opening of navigation, which will be about May 15th.

If the contract for this school is not let in the near future the Department might consider leaving Mr. Milette as caretaker for the finished portion of the building.

I would be obliged for an answer as soon as possible, so I can get word through to Mr. Milette before the roads get too bad for travel.

I am, Sir,

Your obedient servant,

Sir,-

Replying to your letter of the 23rd instant, with reference to the employment of Edile Milotte as fireman at the Guy Indian Residential School, I beg to say that the Department agrees to retaining his services as fireman, until the contract has been awarded for the completion of the new building, or until such time as you think his services should terminate.

Your obedient servant,

TENDERS WANTED.

Sealed tenders addressed to the undersigned and endorsed on the envelope "TENDER FOR THE COMPLETION OF THE GUY INDIAN RESIDENTIAL SCHOOL, STURGEON LANDING, SASK." will be received up to noon of the thirtieth day of April, 1926, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Melford, Sask., at the office of the Indian Agent, The Pas, Man., and the Indian offices in Regina, and Winnipeg, also at Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten percent of the amount of the tender, payable to the order of the undersigned, (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security or Bonds and cheque if required to make up an odd amount), which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

WILLIAM G. BROWN.
Deputy Superintendent General
of Indian Affairs.

Department of Indian Affairs,
Ottawa, March 27, 1926.

Ottawa, April 3, 1926.

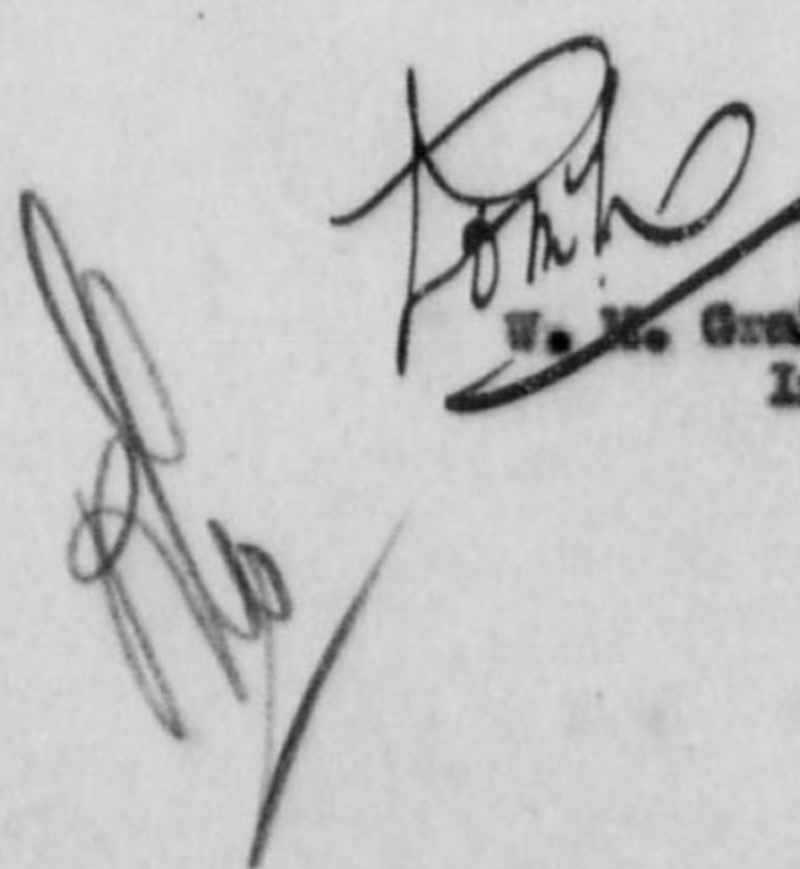

Sir,-

I am sending you today under separate cover blue print copies of the plans and specifications for the completion of the Guy Indian Residential School, at Sturgeon Landing, Sask. Advertisements inviting tenders for this building are now appearing in the Regina 'Leader' and the Melfort 'Horn'. Please arrange to give ample opportunity to firms wishing to tender to examine the plans and specifications, and if they desire to submit a tender please furnish them with a tender form, copies of which are being sent you.

You will notice that the tenders close on the 30th day of April. After this date I would ask you to return one copy of the plans and specifications to this office.

Your obedient servant,

J. D. McLean.
Asst. Deputy & Secretary.

March 30th, 1926.

Sir,—

I have the honor to report that the fireman at the Guy Indian Residential School at Sturgeon Landing, reports that the water seeps through the walls of the boiler room. He states that he had to hire a man to help him clear out the drains, and I have sent a voucher through for the amount of this work. I do not think any damage happened to the building, but I am putting this information on record ~~in~~ in case there is anything required to be repaired when the new contract is let.

TENDER FORM

DEPARTMENT OF INDIAN AFFAIRS OTTAWA, CANADA

Building... Guy Indian Residential School

Location... Sturgeon Landing Sask.

I, (we) Albert Amyat
the undersigned, hereby offer to the Deputy Superintendent General of Indian Affairs, to furnish all the necessary tools, implements, materials and labour, and to execute and complete in a satisfactory and workmanlike manner, all the works required in completing the aforesaid building, according to drawings, specifications and form of contract exhibited to (me, us), and prepared under instructions of the Deputy Superintendent General of Indian Affairs, for the sum named as under.

Tender for the whole of the work as shown on drawings and described in the specifications (Amount of tender to be written) Ninety Nine Thousand Nine Hundred Dollars

----- (\$99,900.00) -----

I, (we) herewith agree to complete the work within a period of _____ months from the date of notification of acceptance of tender, and hold myself (ourselves) ready to enter into a contract for the due execution of the work.

(a) I, (we) herewith enclose an accepted cheque for \$ Ten Thousand Dollars on a chartered bank, payable to the order of the Deputy Superintendent General of Indian Affairs, equal to ten (10) per cent of the amount of the tender, as per terms of the advertisement and specifications for this work.

(b) Attached hereto is a letter from the Manager of the Bank of _____ certifying that War Bonds to the value of _____, have been deposited in the Bank of _____ subject to the order of the Deputy Superintendent General, Department of Indian Affairs at Ottawa, Ont.

War Loan Bonds of the Dominion will be accepted as security, or War Bonds and cheque, if required to make up an odd amount.

Envelopes containing this tender are to be endorsed "TENDER FOR Guy Indian Residential School Sturgeon Landing Sask." and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

"TENDERS MUST BE IN THE HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The signatures of persons tendering must be in their respective handwritings.

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESS OF PERSONS TENDERING:

Albert Amyat
275 Rue St Joseph Hull P.Q.
Dated at Hull Quebec, this Thirtieth day of April 1926

NOTE.—The security cheque or War Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so, or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

Winnipeg, 30th April, 1926.

The Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.-

Sir:-

I beg to acknowledge your letter and as marginally noted above.

Also the copies (3) of the plans and specifications for the completion of the Guy Indian Residential School at Sturgeon Landing.

I beg to advise that I have complied with the instructions as to providing ample opportunity to firms wishing to tender, and I have provided them with tender forms, copies of which are also acknowledged.

Today I am returning one copy of these plans and specifications, under separate cover as directed.

I have the honor to be,
Your obedient servant,

W. R. Brown

Dear Sir,

We would greatly appreciate it if you would let us know to whom the contract has been awarded for the completion of the Guy Indian Residential School at Sturgeon Landing, Sask.

If you could also let us know the total amount of the contract, the unit prices bid, and the names and addresses of all bidders, we would be much obliged to you.

Do not bother to write a letter. Just make a memo on the margin or reverse side of this letter and mail in the enclosed return envelope.

Trusting that you will be kind enough to co-operate with us by letting us have this information as promptly as possible, so that we in turn can pass it on to engineers, contractors and manufacturers throughout Canada, we remain,

Yours truly,

DEPARTMENT OF INDIAN AFFAIRS
CANADA

April 30, 1926.

MEMORANDUM:

Mr. Scott.

Plans and specifications were prepared and tenders invited for the completion of the Guy Indian Residential School at Sturgeon Landing, Sask., by advertising in the Regina 'Leader' and the Melfort 'Moon'. The tenders closed at noon today and in response the following have been received.

E. B. Sharpe, Minnedosa, Man.	\$88,829.00
R. N. Wyatt, Winnipeg, Man.	\$92,235.00
S. Brown, Winnipeg, Man.	\$93,800.00
A. Amyot, Hull, Que.	\$99,900.00
Wyndels Construction Co., St. Boniface,	\$112,300.00

An offer was also received from P. W. Graham of Moosejaw to construct the building on a cost plus 10% basis.

All of the above mentioned tenders are accompanied by the required deposit security with the exception of the tender of E. B. Sharpe. With reference to this tender a telegram was received from the Canadian Surety Company advising that they have issued a bid bond as his security. A telegram was received from Mr. Sharpe advising that he will arrange for a cash security in lieu of the bid bond. As the tender of Mr. E. B. Sharpe is the lowest and a reasonable price for the work, I beg to recommend that it be accepted.

A portion of the building was erected last year, which included boiler room and boilers, kitchen, power house, laundry, store rooms and chapel, the cost of which was \$25,519.00. The cost of the building is necessarily high on account of its isolated location and the cost of freighting the materials by water from The Pas to Sturgeon Landing. There are funds provided in this year's vote for Indian Education for this building.

The above tenders include in addition to the building itself the complete installation of the water supply, sewerage disposal, and electric lighting systems.

W. H. Wyndels
ARCHITECT.

TENDERS WANTED
Sealed tenders addressed to the undersigned and endorsed on the envelope "Tender for the Completion of the Guy Indian Residential School, Sturgeon Landing, Sask.", will be received up to noon on the thirtieth day of April, 1926, for the erection of the above mentioned building.
Plans and specifications may be seen at the Post Office at Melfort, Sask., at the office of the Indian Agent, The Pas, Man., and the Indian offices in Regina, and Winnipeg, also at Department of Indian Affairs at Ottawa.
Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent. of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security or Bonds and cheque if required to make up an odd amount), which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.
The lowest or any tender not necessarily accepted.
DUNCAN C. SCOTT,
Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, March 27, 1926.

Sir:-

I beg to call your attention to the matter of the engine for the new school at Sturgeon Landing, and to point out that the specifications call for a 10 H.P. engine 5 K.W. generator and 200 ampere hour battery for 32 volts.

This is quite unusual for a large installation of this kind, and will, in my opinion, be a very poor source of power. I would suggest that 110 volts be used at least, and instead of a 10 H.P. engine have one 6 KW set and one 3 KW set working in parallel, the same as we have at Cardston and Edmonton. This will cut out the battery trouble which we have been having so much of lately.

Your obedient servant,

W. M. Graham,
Indian Commissioner.

Ottawa, June 5th, 1926.

His Excellency

The Governor General in Council.

The undersigned begs to report that the same being necessary, tenders were called for the completion of the Guy Indian Residential School, at Sturgeon Landing, in The Pas Indian Agency, in the province of Saskatchewan, the same to be receivable by April 30th, 1926, and that the following tenders were received, together with the required deposit security:

ocd

R. H. Wyatt, Winnipeg, Man.	\$ 92,235.00
S. Brown, Winnipeg, Man.	\$ 93,800.00
A. Amyot, Hull, Que.	\$ 99,900.00
Wyndels Construction Co., St. Boniface, Man. .	\$112,500.00

Wm

The Architect of the Department of Indian Affairs has reported that the lowest of the above tenders, namely that of Mr. R. H. Wyatt, of Winnipeg, Manitoba, is fair and reasonable and the undersigned has the honour to recommend that it be accepted pursuant to the requirements of Sub-section 2 of Section 56 of the Public Works Act. Funds for this purpose are available from Parliamentary appropriation for Indian Education for the current year.

Gentlemen:

We note that you will start work at once on an Indian Residential School at Sturgeon Landing, Saskatchewan. You, no doubt, are familiar with Massillon Bar Joist Fireproof Floor Construction which we manufacture and sell in Canada. We would appreciate your consideration of this type of floor in this work and are asking Mr. Walter Soper of E. N. & W. E. Soper, our representatives in Ottawa, to call upon you and give you any information you may desire.

We have furnished these joists in the past year and a half when we began manufacturing them for a large number of schools throughout Canada and the reports of satisfaction we are receiving are very gratifying. We are enclosing descriptive literature and Safe Load Tables and Standard Specifications for your use in designing and we would be very glad to have you call upon us at any time, sending us your plans and specifications for designs and estimates. Thanking you in advance for any consideration you may show this material, we are,

Yours very truly,

The Committee of the Privy Council have had
 before them a report, dated 5th June, 1926, from the
 Superintendent General of Indian Affairs, submitting that,
 the same being necessary, tenders were called for the com-
 pletion of the Guy Indian Residential School, at Sturgeon
 Landing, in The Pas Indian Agency, in the province of
 Saskatchewan, the same to be receivable by April 30th,
 1926, and that the following tenders were received, to-
 gether with the required deposit security;

Copied

R. H. Wyatt, Winnipeg, Man.,	\$ 92,235.00
S. Brown, Winnipeg, Man.,	93,800.00
A. Amyot, Hull, Que.,	99,900.00
Wyndels Construction Co., St. Boniface, Man.,	112,300.00

The Minister recommends,- the Architect of the
 Department of Indian Affairs having reported that the low-
 est tender, namely that of Mr. R. H. Wyatt, of Winnipeg,
 Man., is fair and reasonable,- that it be accepted pursuant
 to the requirements of Sub-section 2 of Section 36 of the
 Public Works Act. Funds for this purpose are available
 from Parliamentary appropriation for Indian Education for
 the current year.

The Committee concur in the foregoing recom-
 mendation and submit the same for approval.

Handwritten signature
 Clerk of the Privy Council.

The Honourable
 The Superintendent General of Indian Affairs.

Dear Sirs:

Attention Mr. Duncan Scott.

Would you kindly advise us if any
Laundry Machinery is being installed in the
new Indian Residential School which is being
constructed at Sturgeon Landing, Sask.

We understand that Mr. E. B. Sharpe
of Minnedosa, Man., is the General Contractor
and if any laundry equipment is specified for
this building we would get in touch with the
General Contractor. We have understood that
no Laundry Machinery is to be installed in this
Indian School.

Thanking you very much indeed for
advising us in this connection, we are,

Yours very truly,

STANLEY BROCK LIMITED.

*an effect***R**

Mr. J. D. McLean,
Assistant Deputy and Secretary,
Department of Indian Affairs,
Ottawa, Canada.

Dear Sir:-

I have your letter of June 10th, for which
I beg to thank you. I am returning herewith copies of
Contract duly signed.

We are putting this building in hand and
promise to rush it to completion, but we are going to
experience some difficulty in getting materials delivered
on account of the low water in the rivers and lake. The
company who handles the transportation by boat expect a
raise in water by the 21st of this month, as the snow
in the mountains usually comes down about that time, al-
though the weather here up to date has been rather cool,
which would retard the melting of the snow. However, you
can rest assured we will try and get out before we are
frozen up again.

Re payments on this job:- If it could be
arranged that upon the report of your Inspector, Mr. Grant
to your Agent, Mr. Wady at The Pas, that Mr. Wady could
wire you the amount due me you could have the monies wired
to the Bank of Montreal, Lombard Street Branch, Winnipeg.
This would assist materially in financing this job, as I
presume you are aware that we have to get all our materials
in by boat before the first of August or it would be impos-
sible to get them in afterwards, as the water usually goes
down by that date. so you can understand my payments for
materials would be heavy and if we were to wait until Mr.
Grant's report reached you from the job and a cheque sent
back here to me it would be half a month gone.

Would be very pleased to have this arranged as
asked for.

RNW/E.
Enc.

Sir,-

J.P.
Replying to your letter of the 7th instant, requesting that you be furnished with details showing the location of the footings and piers under the posts of the wooden frame structure, supporting the elevated water tank above the machinery room at the Guy Indian Residential School at Sturgeon Landing, Sask., I would refer you to the specification which fully describes in detail the dimensions and type of construction, and the manner in which this structure should be erected.

I would suggest that you prepare a sketch of the type of construction which would best adapt itself to the portion of the building where it is to be located, and submit it to the Department for approval. Should you be unable to attend to this matter the Department will endeavour to prepare plans as requested in your above mentioned communication.

SIR:

RE

REPORT OF PROGRESS ON WORK ON INDIAN
SCHOOL.

R

I take pleasure in submitting my report to the Department on the progress of the work done by Mr. R. N. Wyatt on his contract on above mentioned school.

The work on all concrete footings base of interior partitions, basement walls and piers for the posts in the basement was completed on July 7th. The gravel and sand used in this work was shipped from the other side of Sturgeon Lake and Marshall Point in barges and was up to the standard called for in the specifications.

The frame work is well advanced, the walls is sheathed to the height of the first floor joists on the outside with shiplap. #####

Ground floor joists framed in place and rough floor laid diagonally. All bearing partitions and posts and beams in place in the basement and ground floor.

First floor joists in place except for right side wing. Expect these will be in place Monday.

First floor walls is framed except for the right side wing. ###

The excavation for the trench for the four inch water intake pipe is well advanced. Work on the blasting of rock is making good progress.

Work on the excavation for the Septic tank was started on the 16th. inst.

Work on the whole is progressing rapidly. There is thirty-seven men employed on the entire work. Owing to the low water at the start of the work, freight on the material was slow. But I am glad to report now that the high water mark is reached for navigation, the material is reaching here each

Ottawa, Aug. 27, 1925.

Sir,-

The Department is in receipt of your report on the proposed water supply and sewerage system for the Guy Indian Residential School at Sturgeon Landing, together with blue prints of the plans, etc.

In view of the fact that this school will not be operated before next year, it is not considered advisable at the present time to proceed with the above mentioned work. It is the intention of the Department to embody this work in the project for the erection of the remaining portion of this building. I would, therefore, ask you to furnish me with three additional copies of the blue prints similar to those already on hand, for which I thank you.

The Department will undertake itself the preparation of the specifications and other necessary details.

Your obedient servant,

A. F. MacKenzie.

GUY INDIAN RESIDENTIAL SCHOOL.
STURGEON LANDING SCHOOL.
JULY 31st. 1926.

REPORT OF PROGRESS OF WORK.

I hereby take pleasure in making my second report to the Department on the progress of the work done by Mr. A.N. Wyatt on his contract on the above mentioned school.

Since my previous report the contractor has had an average of forty-five ^{men} working on the various works, working twelve hours per day.

Carpenter work.

This work is now well advanced. The building is framed to the height of the ceiling of the second floor. All over the centre portion of building has the roof framed and the roof boards of ship-lap nailed in place with cornice built. The exterior and interior of the outside frame walls is boarded up with the hiplap to the height of the roof plate.

All the outside door framed and window frames in place. The siding has been started on the outside walls, right side elevation. The rough flooring has been laid diagonally on all the upper floors and all joists bridged across to specifications.

All studs bearing partitions are in place on all floors.

Strapping of the inside of exterior walls in basement is now started.

Beam fillings on top of roof plates to underside of roof boards completed on centre portion of building.

The work of excavating for septic tank is now completed.

Outside drainage.

Plumbing is now under way with the six inch tile drain to tank.

The six inch cast iron drain below basement ^{floor} is now in place. Joints packed with oakum and leaded but not tested out.

The plumbing work is going ahead with advantage before the shiplap is put on the ceiling.

Electrical work.

Work was started on the 29th of July.

Water intake pipe.

There is six hundred feet of the ditch completed to the depth required. There is 100 feet of rock blasting to be done yet, five feet deep through solid rock. Blasting operation in the ditch has been going on for 3 weeks.

You will note that the various branches of the work is going on to advantage.

We expect the steam fitters here any time now to start on the heating. All the material for plumbing and heating is now on the site. I am well satisfied with the progress of the work to date during the past month.

Water proofing of the outside foundation walls from the top of the footing to the top of the grade ~~line~~ has been completed and the earth filled in according to specifications.

I have the honor to be Sir
Your obedient servant.

The Secretary..
Department of Indian Affairs. Ottawa. Ont. Inspector of Construction.

PLEASE REFER TO ONE SUBJECT IN A
LETTER AND IN YOUR REPLY QUOTE
FILE NO.B-6419-M.....

DOMINION WATER POWER AND RECLAMATION SERVICE

WINNIPEG, MAN.

July 27th, 1926.

R. Grant, Esq.,
Inspector of Construction,
Guy Indian School,
Sturgeon Landing, Saskatchewan.

Dear Sir:-

This will confirm the decision we arrived at when I took up with you personally at Sturgeon Landing the question raised in your letter of July 9th, with reference to the water supply intake for the Guy Indian School.

In your letter you state that the plan of the water supply system shows the four-inch intake pipe to be some 700 feet long, whereas to reach the location shown on the plan as the point of intake would require 930 feet of four-inch pipe.

This discrepancy in the length of the four-inch intake pipe required was, as I pointed out, due to a misunderstanding as to the location of the school. In June of last year Mr. Patterson of this office visited Sturgeon Landing in company with Bishop Charlebois when two alternative sites for the school building were chosen by Bishop Charlebois and staked out by Mr. Patterson. These alternative sites "A" and "B" are shown on the blue print plan which I left with you.

Before designing the water supply it was necessary to know which of the sites had been chosen and the question therefore was taken up with Mr. Wyatt, contractor for the school, who stated that the site designated "A" had been decided on as the most suitable.

In estimating the cost of excavation Mr. Wyatt was requested to make borings along the proposed pipe line as Mr. Patterson with his limited equipment and help had not been able to determine how much rock excavation would be necessary. The borings were carried for 700 feet from the school building, which distance from site "A" would bring the intake well above the small point^{as} shown in white on the plan. As already stated, it was understood that site "A" had been chosen and the plans for both the sewer and water systems were therefore laid out for this site.

On receipt of your letter the question was taken up with Mr. Wyatt, who stated that this office must have been given the wrong location, as the lower site "B" had been chosen, and not site "A". This, of course, explained the discrepancy, as the distance between the two sites is about 200 feet.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

As shown in red on the plan, with the actual location of the school at site "B", 700 feet of intake pipe would bring the point of intake in the bay, and not above the small point as originally proposed. In examining this point of intake on the ground with you it was found that there was very little current and we both agreed that it would be advisable to extend the four-inch intake about 125 feet, as at this point the current is quite strong a short distance from the shore.

In order to ensure running water at this point during periods when the river is low I pointed out to you that it would be advisable to clear the channel above of the loose rocks and boulders. By doing this a fairly good flow should be maintained, thus ensuring that the water will always be fresh at the point of intake.

I have taken this up with Mr. Wyatt and told him that you propose to take up the matter with the Department of Indian Affairs and recommend that the extension of the intake pipe and the clearing of the river bed above the point of intake be carried out.

Yours truly,

C. H. Attwood.

District Chief Engineer.

AUG, 10th, 1926

SIR,

Re-location of water intake well

In checking up the 4" water intake line we found that the location site of the well measured 930ft, from the rear of the building in place of 700ft, as per the plans & specifications,

I took the matter up with the dept of water & sewerage at Winnipeg, on receipt of my letter MR CRAIG answered it by making a visit here when he took the question of this discrepancy up with me personally, attached you will find his letter confirming the decision we came to with regard to the location of the well,

the contractor has the ditch made to the 700ft, mark and 380ft, of 4" pipe laid in the trench the balance of the pipe will be laid when he completes the blasting of the rock near the school site,

I took the matter up with MR WYATT when he came here and asked him to give me a price on the additional work as outlined in MR CRAIG'S letter OF July 27th, his price is based upon a rock formation being encountered at the location selected for the well site it also includes the clearing of channel, of approximately 100 c,yds, of loose rock to ensure running water,

I would suggest that you give permission for me to have borings taken on the proposed site and along

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

the proposed pipe line from intake well to the water edge
so that we could arrive at the actual cost of this work,

the proposed site for the intake well will be
approximately 50ft, from the water this means an additional
30ft, of 8" C. I., pipe and 8ft, of 8" steel pipe its
necessary to keep the well this distance from the river
owing to the formation of the bank and protection for the
pipe line from frost,

I am forwarding you the plan showing the site
chosen for the building marked in red,

you will also see the proposed new location of
the intake shown in red,

at the 700ft, mark the well would be 32ft from the
river,

52ft south of the 700ft, mark there is a ravine
crossing the pipe line to the full depth of the ditch
if you decided to consider placing the intake at this point
it would be best on the south side of the ravine, the water
is the same depth approx, 18ft, but very little current to
be of any advantage, ^{to} far from the running stream *to ensure*
fresh water at the intake,

MR WYATT submitted a price of \$2,359.00 to complete
the work, I would ask you to wire me if it is alright for
me to proceed to make borings as i have outlined so that we
will be in a position to check up on this price,

yours truly

Radwick Grant

STURGEON LANDING, SASK,

AUG, 14th, 1926

SIR,

Re-pumping machinery

Would you kindly forward here plan of the layout of the pumping machinery and electric generator, also the layout of the laundry machines,

at present the double doors on the rear wall of the machinery^{Room} open to the inside this will have to be changed so that they will open out wards , I would ask you to consider bring^{ing} a steam line alongside the supply pipe to the tank house to be connected to heating coil there for the purpose of heating the tank room during extreme cold weather,

I would state that there is no regular mail service to sturgeon landing from the pas, any mail for here should be addressed ^{to} MR WADDY at the pas, and he will forward with the boat coming here,

I have the honour to be

your obedient servant

Roderick Grant

STURGEON landing, SASK,

AUG, 14th, 1926

SIR,

Re-elevated water tank layout.

Your letter of July 21st with reference to my request for detail of above layout, on receipt of your letter I wired you as follows, wire,

to save time suggest details of water tower frame work be prepared at ottawa, contractor will be delayed waiting approval of sketch made by me, inside measurement of machinery room seventeen feet ten inches by eighteen feet ten inches, contractor wants to start this work at once, room six feet longer than shown on plan,

since ^{the} I prepared a sketch of the layout of machinery room showing the location of the footings and piers, I have shown the centres of the piers on detail, I may say that we have put this work in according to this detail and its the best to suit the limited space at our disposal, the frame work is to be built according to specifications based upon the layout for the footings, the contractor insisted that he be allowed to proceed with this work to allow him catch up with the outside work, I trust this will meet with your approval,

I have the honour to be

your obedient servant,

The Secretary

STURGEON LANDING, SASK.

Aug, 21st 1926

SIR,

Re-proposed sewer drain in root cellar

With reference to the above it will be necessary to put a floor drain in this cellar as there will be a stench from rotten vegetables going through the building unless they have the drain so that they can wash the floor, we could not connect this drain to the sewer of the main building as it is so much lower but it can be connected to drain from the boiler ^{Room} which is at the same level. there is no ventilation to this cellar, we could be able to vent it from one of the windows in the stererom above by useing the top part of the window and bringing the fresh air through a galvanized ~~xxxxxx~~ iran air duct of a suitable size which could be regulated, there is also the chance of aseepage from the outside owing to the location. The water from so many roofs will be responsible,

I remain your Obedient Servant

GUY INDIAN RESIDENTIAL SCHOOL
STURGEON LANDING, ?SABK,
AUG, 21st, 1926

R

SIR,

Mr. Chint
Your telegram of the 13th inst, was received
by me to day which read as follows,

Referring your telegram ninth instant you may arrange
with contractor to proceed with construction of
elevated water tank for Guy school in accordance
with details mentioned in specifications sketch
plans one quarter inch may be furnished later for record

we started to do this work on the 13th, inst, and
completed the framing of the tower to the floor
level for tank, this work was done as per the spec-
ifications with the necessary horizontal and cross
bracing, the posts are 10"x10" B.C. fir, assembled
in two lengths and adjusted on each corner with
6"x6"x3/8, angle irons 6'0" long, bolted through
with 3/4" bolts, the beams on top of the posts supporting
the 4"x12" fir joists are 10"x12" supported to the
posts with the strap irons specified,
outside measurement of posts at base on piers
15'7"x 14'0" at the top of the posts it measures
13'7"x 12'0",

I wired you with this mail as follows,

Received your wire of thirteen aug, to day,

wooden framed tower built to height of tank floor
stop, will make tank house fourteen feet x sixteen feet
inside, to height specified, stop waiting instructions
on water intake proposed change, freighting to this point
delayed through low water,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Per Copy

The specifications calls for the tank house to be
18'
14'x18' I have arranged with the contractor to
make this housing 14'x16' my reason is on a
point of construction to suit the length of the beams
on top of the posts supporting the floor joists,
the posts lean on all sides 12" to centre line at top,

*authorised
by wire*

In my letter of aug, 14th I asked you to consider
the question of having a steam line run in side
the pipe box along with the supply pipe and
brought into the tank house and connect to a wall
coil for heating purposes, it would be advisable to
have this done otherwise they will have trouble
during the cold weather with the system freezing up,
REgarding the water intake we are still blasting
the rock near the building it will be a few days
before it will be complete, this work is going to
be delayed untill a decision is come to with
regard to the change of site of the intake well
if ^{it} is decided ^{to} make this change it would be adviseable
to wire the contractor about ordering the necessary
4" gal, iron pipe and any additional material he
may require to do this work as there is going to
be difficulty encountered freighting the material
from now on during the season, you will see that
your wire of the 13th did not reach me untill the
20th,

I remain your Obedient servant

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Sept. 1, 1926.

MEMORANDUM:

Mr. Paget.

Owing to the change of the location of the Guy School now in course of completion the four inch galvanized iron intake pipe for the water supply system will have to be extended a length of 230 ft. and the location of the intake well has also been changed. This will mean an additional length of 30 ft of 8" cast iron pipe. The Inspector of Construction strongly recommends that the material for this additional work be purchased at once, owing to the early closing of navigation. The question of the laying of this pipe can be decided later on, after the Department is furnished with an estimate of the approximate cost of the work by the Inspector, who is now engaged in boring test holes to find out the nature of the soil. I would, therefore, recommend that he be authorized to instruct the contractor to arrange for the delivery of the above mentioned material as early as possible. The approximate cost of this work, according to my estimate, should not exceed \$2,000.00 unless additional excavation had to be made in solid rock.

Amphibious
Sir:-

Sturgeon Landing,

R

August 28th, 1926.

I have the honor to report that on my visit to the Guy Indian Residential School here to-day the following following matters were drawn to my attention by Mr. R. Grant, Inspector of Construction.

1st. In regards to porch on right side elevation of building under construction, and the entrance to the boys wing, these two places should be screened in.

2nd. His Lordship Bishop Charlesbois asks for a stairway to be provided for an entrance to the sitting room in the girls wing.

3rd. The site for the stable is picked out by His Lordship east of left side elevation of building and the stable should be provided as the animals are already arriving here. Bishop Charlesbois has put up a one ply shed for temporary stable for one team but this will be no use for winter quarters.

4th. A root cellar will be required in addition to the small cellar in the main building. Mr. Grant has written you about need of drain for cellar in building.

5th. Outside toilets will be required for pupils arriving here before the sanitary arrangements are complete.

6th. A warehouse is required for storing supplies coming off the boat etc.

7th. Seating and necessary furniture for completing the chapel should be sent soon to allow of water transport being used as this is much cheaper than team work in the winter.

The Secretary,

Department of Indian Affairs,

Ottawa.

OVER-----

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

I beg to suggest that favorable consideration be given to foregoing requirements. It can all be done cheaper at this time than after the contractor leaves, and could be done on cost plus per centage basis by contractor under supervision of Mr. Grant.

If these items are allowed I should be advised by wire as water transport will close in near future from lack of water on the lakes and rivers.

I am pleased to be able to report to the Department that the school is being put up in workmanlike manner and that the materials supplied seem to be first class. The building is now having the finish put on and of course will not go ahead as quickly as up to this time, but the contractor will have enough of it finished to allow the Principal to have some pupils enter the school by September 15th.

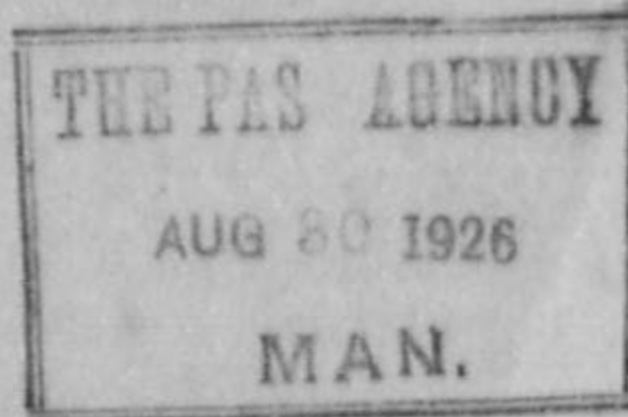

Your obedient servant,

J. L. O'Leary
Indian Agents

P.S.

On my return to The Pas to-day I received telegram of the 25th inst regards lack of funds for stable. I presume this will also apply to the root cellar. Bishop Charlesbois will require lumber for floor, mangers etc of rough stable if the permanent one is not built at once.

The Secretary,

Department of Indian Affairs,
Ottawa.

Sir;-

Re Guy Indian Residential School,
under construction, I beg to draw your attention
to the fact that there is ^{no} eaves trough provided
in the plans and specifications.

Owing to the building which was put
up in 1925 being kept too low above the grade line
we find difficulty to grade around the building to
drain the surface water away without affecting the
appearance of the building by having to grade
too high. I would recommend that permission be
given to have eaves trough placed around the whole
building as there are signs of seepage in the
basement now after heavy rains, the large roof surface
without eaves trough has a bad effect upon the
foundation walls.

Your obedient servant,

Radrick Grant
Inspector of Construction.

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING, SASK,

SEPT, 1st 1926

SIR.

PROGRESS REPORT

I hereby submit my report for the two weeks ending
auguston the work done by Mr Wyatt the contractor on his
contract to build the Guy Indian School,

Since my report of the 14th, aug, the contractor made good
progress on the general contract all the various works
have being carried out successfully to ensure no delay,
all excavations for sewers and septic tank complete except
for the filling in and the excavations for the manhole
marked "B" at septic tank,

water intake ditch is now complete
to the building from a point 700 ft, at the rear of the building
as per the specifications, the 4" gal, pipe laid in ditch
and brought inside of machinery room to be connected to
the pump which is now been installed, the work on the supply
pipe from the pump to the tank is also under way,

all sewer pipes on the outside laid
and connected to drainage from building to the manhole
marked "A" the sanitary sewer is connected to the septic
tank, the auxiliary sewer line is laid to the outlet from
the septic tank but not connected to the manhole marked "B",

the septic^{tank} is now built of concrete with
all pipe connections made to the separate compartments
as per the specifications, the top of the tank is not
covered with the reef but provision is made to have this
completed,

concrete work to be completed,
manhole marked "B" , Intake well, basement floor,

(page) 2

Carpenter workin basement,

The carpenters are now busy working fitting window sash into the frames, setting door frames in basement, putting up V joint in the boys and girls recreation rooms,

Ground floor,

all window sash fitted in frames, and door frames are now being set up in place,

First floor,

window sash is now getting fitted in the frames, all work complete for lathe,

Second Floor,

window sash is now fitted in the frames, all work complete for lathe,

Carpenter work outside,

Left side elevation complete,

Rear elevation complete, Right side elevation siding put on to the height of the windows on the ground floor,

Front elevation is 50% complete,

Front porch and verandahs are built with stairs complete,

Verandah on right side elevation is not yet built,

Frame for water tower is complete to the floor of the tank house, the contractor is waiting for a shipment of lumber to build the walls of the tank house,

Lathing & Plastering,

Plastering was completed in the basement on the 22nd of august except for the keene cement to be put on the walls of the toilet & washroom for the girls,

Ground floor,

plastering will be completed on this floor by sept 3rd,

First floor,

Lathing will be completed on this floor and ready for the plasterers by sept 4th,

Second floor,

(over)

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Second floor,

Lathing is complete on this floor to the extent of 25 % with men working to keep ahead of the plasterers, Painting and Glazing,

Outside painting is finished on the Left side elevation, 75% complete on the rear elevation, front and right side elevations not ready for the painting, All windows sash and frames primed on the inside and painted on the outside where advanced with the painting of the siding there is approximately 50% of the interior trim stained before ^{put on walls} ready for the carpenters when they start on the finishing work,

All window sash and storm sash has ^{been} primed and glazed, Galvanized Ironwork & ventilation,

Metall shingles complete on main roof except for the sides of the dormer windows and the verandah roof at the boys entrance,

Metall ceiling complete in the basement with cornice,

Metal ceiling is complete on the ground floor to the extent of 50%,

all ventilating ducts in place, with the registers in place in basement,

Electric wiring is completed in the main building, the electric generating plant is not here, this should be under way now as we have the IO H, P, oil engine on the job, ready for the installation of generating plant, Plumbing and drainage,

Since my last report the soil and waste pipes to roof were tested out by water test according to specifications,

Water service pipes with branches to all fixtures installed, also standpipe system provided for fire protection as per the specifications,

(over)

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Boer Copy

Steam heating,

all wet and dry returns complete in the basement with all the necessary connections made for the wall radiators, also the risers are through to the ground floor ceiling and all radiators distributed on each floor, all the aspirating coils are now installed in the air ducts,

Steel Gasoline tank 36"x10 ft has being installed outside the building where specified,

The work is proceeding well on towards completion inside to allow accomodation in certain portions of the building for the children when they arrive as per the request of Bishop Charlebois, the contractor may not be able to accomodate his Lordship with all the accomodation he asked for on the 15th sept, as it is not convenient or good for the proper completion of the building however he making an effort to comply with the request, all trades are working in conjunction with each other to complete the work in accordance with the specifications, there is 40 men working on the different trades and unskilled labor, a portion of the men are still working 12 hours each day, both fire escapes have been installed as per the plan of rear elevation,

I have the honour to be
your Obedient servant

Sir,—

I beg to report that the Department has four stoves at the Guy Indian Residential School which were supplied last fall when we intended to heat the building by that method during the past winter. These stoves cost \$77.50 plus freight, about \$85.00 in all.

The Inspector of Construction tells me there will be no place to use these stoves after the building is complete this fall.

What disposition may be made of these stoves, they could be sold by the Inspector a fair value if the Department wishes.

[Handwritten signature]
[Handwritten signature]
 Sir, Re. Guy Indian Residential School.

As per your wire of the seventh inst regards laundry machinery for above school instructing that contractor should purchase same the Canadian Laundry Machinery Co quoted to the contractor as follows \$860.00 and the Beaver Laundry Co \$990.00 both prices F.O.B. Winnipeg, Man. I instructed the contractor to accept the lowest price, which includes the washer and extractor. It is probable that this price does not include commission to contractor for handling charges. I have arranged for contractor that following be supplied, belting for machines, line shaft and bearings etc. Line shaft and bearings have been shipped also the generator, the latter is here and loaded on the barge.

The sisters and the Bishop are leaving here to-night for Sturgeon Landing and I came to town and arranged for shipment of everything that we can foresee to complete the building, as we have very short time to do the work.

While here I arranged for supply of roof coating for the rubberoid roofing on the roofs of the laundry, kitchen and fuel room, which was built last year and require this treatment. I also ordered sufficient concrete paint of suitable color for the basement floors.

Your obedient servant,

Roderick Grant
 Inspector of Construction.

Sir,—

Re Guy Indian Residential School. Intake well.

The test borings along the proposed ditch for the additional 125 feet to intake well shows clay and loose rock formation. Location of intake well shows formation of clay and boulders at depth of nine feet six inches. Ditch from well to shore line is 85 feet, test borings show loose rock at depth of six feet from surface, this formation shows the same from well to shore line.

The elevation of the ground at site of proposed well is 20'6" above lowest water level, the 4" pipe will be laid at depth of 14'0" below grade line where it enters intake well, this depth is caused through the grade line at point of well being high. The depth of the 4" pipe as laid at the 700 foot point completed by the contractor is down 8 feet, the location selected for the well is the best as there will be no interference with bends in the suction pipe, the distance is increased between the well and the shore line, it is also advisable to use the selected site for protection of the pipe line from frost; by bringing the intake well closer to the shore line it would mean that the pipe line would be too close to the embankment, and as I have said we do not want to have any fittings or bends in a pipe line the length of 825 feet from suction pump.

Referring to your wire of September 3rd I have arranged with the contractor for the shipment of the necessary materials only as required ~~shown~~ for the above work as outlined. In regards to the labor on this work I received a further estimate from the contractor of \$6770.65, which included diverting the stream to ensure fresh water all winter at point of intake, but I considered this so excessive that I will not recommend it to the Department. I now recommend that we go ahead with the work under the contractor plus percentage on what you consider will be additional to his contract. We are going ahead with this work on this basis to complete same as economical as possible, and on my return to Sturgeon Landing I will send a detailed estimate.

Your obedient servant,

Roderick Grant
Inspector of Construction.

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING, SASK,

SEPT 14th 1926

R

SIR, *[Handwritten signature]* Estimate on additional work required
to complete the water intake

I have the honour to quote you my personal estimate on
the cost of doing the above work after making test holes
on the line of suction pipe also ^{line} the of the inflow pipe
from the source of supply to the site of the well,
test borings were taken on the site of the well,

First,

To excavate trench 125 ftm, from the end the pipe
where the contractor finished to the location of the well,
to supply all pipe labour required,

Second,

To excavate trench 65ft from the intake well to a
point 20ft from the river, to supply 65ft of 8" cast iron
pipe and complete all labour,

Third,

The contractor advised me that he figured on the well
being sunk to a depth of 20ft below grade line at the
point located on the plan when he figured on the work of
the general contract, the new location of the well at grade
line is 20'6" above the lowest water level this means that
it will have to go down 30'6", in making up this estimate I
have allowed for the difference in excavating and concrete
required to complete this part of the work,

Fourth,

The contractor claims that he will require an
additional sum above his contract price for the labour
on the laying of the 20ft of cast iron pipe next the river
and connected to the steel pipe in the water as the
formation at this point he claims is rock, I have not allowed

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Boer Copy

this in my estimate, it will be adjusted later,
Fifth,

To clear the channel above the point of intake
of loose rock and boulders to divert the stream so that
the water will always be fresh at the point of intake,
Price to complete the additional work as outlined above
will cost \$3800.00.

The price quoted by the contractor was based on a rock
formation,

I would further add to my report of sept, 9th on the test
borings that at a depth of 12ft in the well the formation
showed hardpan with rock, the further down we go with the ex-
cavations for the ditch to the river the showings are the same
the ditch for the intake pipe show clay and loose rock,

you will note that my price does not include any of the work
that the contractor has to perform to his contract to
complete his work as per the plans and specifications,
I will endeavour to keep the cost of the work as low as
possible and keep all records of time employed on the work,
The adjustment for the additional work will be considered as
per your wire of , sept, 3rd,

Your Obedient Servant

Roderick Grant
Inspector of construction

GUY RESIDENTIAL SCHOOL

STURGEON LANDING, SASK,

SEPT, 18TH, 1926

sch

SIR,

There is 46 children now resident at this school we have being able to get the basement and the ground floor far enough advanced for their accommodation, as there is not sufficient blankets here yet the sisters find it difficult to get along, we have the heat throughout the building, the sisters wanted the kitchen and pantry fitted up for their requirements I have arranged to have this done as they have no place fitted up, we have made temporary tables until such time as we get the permanent ones done, THE greatest drawback is the water we expect to have this brought to the building in about three weeks time unless we come across something unforeseen that will make further delay, His Lordship Bishop ^{Charles} is here and he wants a basin in the drug rooms on ground and first floor where they will dispense medicine,

Yours truly

Redmond Grant
Inspector of construction

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING, SASK.

SEPT, 15th, 1926

PROGRESS REPORT,

SIR,

I have the honour to submit my report to you on the work done by MR R.N. Wyatt the contractor on the erection of the Guy Indian School, since I submitted my report of sept 1st, The work on the outside sewer drains is now completed except where the drain pipes leaves the septic tank for the manhole "B" this manhole has to be built,

Septic tank is complete with reef put on ready to be covered over with earth,

The water intake pipe is connected to the pump in the machinery room and the supply pipe brought from the pump to the floor of the tank house also the overflow pipe installed from the tank house to the boiler room and connected to the sewer, the tank house is built but not completed, the material is now on the job for the water tank but it is not assembled,

The basement is now completed except for the following items, cement base on outside walls, pipe covering which is now underway, to connect the wall radiators and interior painting on metal ceiling and all varnishing,

Ground Floor,

The work on this floor is now well advanced towards completion, the carpenter work is all done except for the finished floor in the corridor, the painting is being gone on with, and all hardware put on,

First Floor,

The plaster work is well advanced on this floor and at this date is 50 0/0, complete, the carpenter work is ahead as far as it is possible until the plaster ^{Ceiling} work is done, the work on the metal will go ahead as soon as the plasterers are through with this floor,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Bo-R Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The second floor.

The balance of the lathing is not done on this floor, however, I expect they will be working on it in a few days, the plasterer completed three rooms,

plumbing,

The plumbing work is well advanced under the conditions in which the plumbers are working not being able to complete one floor at a time, all toilet and bathroom fixtures in the basement are connected up complete, the toilet and bathroom fixtures on the ground floor are connected up to the extent of 75 0/0, stills toilet and baths on the second floor has being connected up,

heating,

This work is ^{so} as well advanced that we are in a position to supply heat to all parts of the building when it turns cold at night time, I expect this part of the work to be complete in 12 days,

Electric work,

there is nothing to report on this work of any further advance being made since my report of sept 1st, we have the generator and equipment here on the job and work of installing same will be proceeded with at once as the electricians are here,

Water intake,

Since the 13th of sept we are busy working on this intake pipe lines and excavations for the well I expect to have the pipe here with the next beat which is expected here at the end of the present week, this is the part of the work that is holding us back we are ^{doing} our best to have the water to the building and the work completed outside

page 3

Before the freeze up or sooner if possible,

Outside work,

Owing to a shortage of materials we have been delayed in completing the siding on the front elevation and the right side elevation, the veranda on this side of the building is now being built, I expect the carpenters will be through with this work in a weeks time so that we will have the painting completed, the work on the outside of the tank house is also going towards completion, I have arranged that the sisters have temporary accommodation with tables and anything they required for the children until such time as we will arrange for the permanent requirements, the work is going ahead with the same number of men working on the different trades,

I have the honour to be

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING SASK,

Sept, 25th 1926

Dear Mr Waddy

Re- quirements for school

In going over the above with the Sister Superior and the Principal the following is a list of them,
Girls recreation room, platform, cupboard, table, benches with hinged tops,
sisters dining room, tables with drawers for each sister, cupboard, benches,
pupils dining room, tables, with benches,
mens dining room, table and cupboard,
Fathers dining room, dining table and serving table,
Boys recreation room, same as the Girls,
store at kitchen, shelving,
Pantry, tables and shelving, bins,
kitchen, tables and cupboard,
Firemans room, cupboard,
three class rooms, platform, for desk, and cupboard,
Indian girls reception room, benches, cupboards and table,
Drug room ground and 1st floors, medicine cabinets,
the other rooms requires cupboards and shelving, I have a list of the most they want done. If you have a list of all the furnishings that is being shipped, its possible that they may be shipping some of the furnishings I mentioned above. If I had a copy of the list we could be governed accordingly and make only the requirements not shipped,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Per Copy

I think we will have time to get this material before the freeze up, there will be quite a job of cubboards required for the sewing room, and linen closets, it would be best to leave everything off untill we have a copy of the ^{list} as shipped, we could make everything here as outlined,

we are getting along fine with the intake well ^{about} the 125ft, of 4" suction pipe laid in trench and filled in, the well is down 22ft, and in a clay, we are down 14ft with the inflow pipe ^{drain} I am afraid we will be unable to divert the stream this year as the water is now up 30" all the rock is covered over with water, I wonder if you could find out from the Bishop if he intends to put in a dough mixer so that we could make arrangements to have ^{it} connected up,

please let me have the information about the furnishings before we order material,

TO DATE OF THIS LETTER

C. G. G. G.
Sir,—

I beg to inform the Department that Mr. Grant, Inspector of Construction, Guy Indian Residential School, writes to inform me that he is making out a detailed list of requirements in the carpenter line for fixing up pantries, store rooms, recreation rooms, etc., in the basement. These requirements are outside the contract of Mr. R. N. Wyatt. He states that later on he will submit detailed list for the other floors for these extra requirements; that it will be plain work and could be done by the carpenters working for the contractor.

I would be obliged if the Department will issue instructions in this matter. No doubt they have been considered already, but Mr. Grant has no instructions regarding same.

I am, Sir,

Your obedient servant,

OCTOBER 1st. 1926.

OCT 15 1926

RECORDS

SIR,

RE
PROGRESS REPORT.

I have the honor to submit herewith my report on the work done by Mr. R. N. Wyatt, the contractor, on the erection of the above mentioned school since I submitted my report of September 15th. 1926.

The manhole marked "B2" is complete with the pipes from the septic tank and the laundry running into it, with the discharge pipe from the manhole connected to the box drain discharging into the river. The roof of the septic tank is now covered with earth and graded over top.

The additional 125 feet of the water intake pipe is now laid in trench to well. The well is excavated to a depth of 22 ft. We have run into quicksand at this depth and had to stop operations until we could get suitable material for cribbing, which we expect to arrive here next week. The trench for the inflow pipe from the river to the well is now down 16 ft. Owing to the river rising 3 ft above the low water level, we are having difficulty in excavating to the depth required below the low water level mark.

We have connected a temporary pipe line from the river to the intake pipe at the well for a domestic water supply to the building. We are using the pumping plant in the machinery room which is now installed. The water is now installed and in use as it may be a few weeks before the intake is completed. I decided to have this temporary work done to accommodate the requirements of the building as it was quite a hardship on the Sisters, trying to attend upon the children without a water supply. It was also best to have the water tank filled before the cold weather set in so that any leaks would have a chance to take up before the frost came.

The basement.

The basement is now complete except for the following items, Interior painting on metal ceilings and all varnishing on the woodwork, painting of all exposed steam pipes and radiators.

Ground floor.

There has nothing further been done on this floor except the painting of the rooms at the boys wing and class room #3. At present the children make use of this floor as it was the most advanced toward completion.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

First floor.

The plaster work is now completed. The metal ceiling has been put throughout except in two rooms. The metal was left of these rooms until later as it was advisable owing to the waste and water pipes being exposed on the ceiling. Carpenter work of this floor, All door jambs set in place. Work to some extent has been done on window trim, also finished floor laid in sisters dormitory.

Second floor.

Plaster work all completed. Carpenters have not started work on finishing.

Plumbing.

The plumbing work is completed throughout the building to the extent of 80 % of the contract.

Heating.

The work on the heating installation is now complete on all floors with all pipes in the basement covered as per specifications.

Electric work.

This work has been pushed ahead since my last report. The generator has been installed with the necessary equipment and now working but not completed.

Outside work.

The contractor is pushing the outside work before the cold weather comes on. Work is done grading around the building and finishing up all painting outside on main building and tank house and framed tower. Storm sash has all been fitted and now being painted. Carpenters are getting well completed with all details on the outside. The pipe box from the roof of the machinery room to the outside of the tank floor for the supply and overflow pipes is now being built. The steam line to tank room is also completed.

We have not done very much work on the inside except when the weather would not permit outside work.

PROGRESS REPORT

R

I have the honor to submit my report for October 15th. on the work done by Mr. R. N. Wyatt, the contractor, on the erection of the above mentioned school.

Since my last report the Contractor has completed all outside work on the main building except for the painting of verandahs and small details.

Basement.

The painting has been started on this part of the building.

Ground floor.

No further progress has been made on this floor since my previous report. The children and staff are still occupying the basement and ground floor until the other floors are completed.

First floor.

No further progress has been made on this floor.

Second floor.

Work is well advanced on the metal ceilings. Bathrooms on this floor was finished to allow the plumber to put up his fixtures. Work has been started on the finishing.

Plumbing.

The plumbing installation is now completed. All fixtures connected up and all tested out satisfactory.

Painting.

All outside painting is well advanced including framed tower and tank house. A few days will complete this part of the work.

Grading.

Grading around building has been completed.

Eavestroughing.

This work has been completed on the entire building.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Room Copy

(Page 2.)

ditional work on water intake.

Further progress has been made on the excavation for the well or inflow ditch from the river as we have not received the lumber required for the cribbing. The lumber arrived here on the 9th but owing to the barge which carried this, breaking away from her cable and got away from the boat in a high wind and stranded across the lake. We expect to have this lumber delivered here about next Monday, when work will be pushed ahead. We have diverted and increased the stream by clearing the channel above the point of intake, of loose rocks and boulders.

Barn.

Work has been started on this and we expect it to be completed and ready for the housing of the stock in about one weeks time. Electric installation.

Work on generator and equipment is now completed.

Pumping machinery is installed complete and has been operating for the last three weeks and giving good service.

The laundry machinery is now installed in the laundry and has been used with satisfaction.

Re work to be completed on main building.

We are going to finish complete the second floor before we ask the children to be moved from the ground floor, Then complete the first floor and finish up what was left off on the ground floor and basement.

The work inside will now go ahead as the outside work is now almost completed for the carpenters, the work to be done is carpenter work and painting. Heating and plumbing installation has now been completed as per specifications and is giving good satisfaction. I expect we will be into the cold weather before we can complete the permanent work on the intake water supply, if we had the lumber in time we would have been able to complete in milder weather.

I have the honor to be
sir
Your obedient servant.

NOV, 6th, 1926

SIR,

Am. Architect

PROGRESS REPORT

R

I have the honour to submit my report for october 30th, on the progress made on the work by Mr Wyatt the contractor on the erection of the Guy Indian School,

The work of painting the verandas and details on the outside not completed at the time of my last report, is now finished,

The work on the 2nd, floor is going ahead, the metallic ceiling is now complete on this floor including the painting,

The carpenters are working on the finishing and will be completed on or about the 15th, of nov, ready for the painters to start work on the varnishing as we have all the woodwork stained,

the children will be moved up to their dormitories just as soon as the painters are finished,

The painting work was advanced in the basement to the extent of finishing the girls wash room, toilets and recreation room,

The contractor expects to have all the interior work completed about the 15th of dec,

The additional work on the water intake is now progressing ^{have} we the well excavated down to the required depth, at the time of writing we have the concrete in the floor of the well and concrete in the walls up to the ~~high~~ height of four feet, we had considerable blasting to do while excavating and at the depth of 8'6" below the lowest water level we struck bedrock, we are having the same formation in the ditch for the inflow pipe from the river, we are working at a disadvantage by having maintain the temporary water service to the school as the pipe line runs along the inflow ditch to the permanent pipe at the well,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Boon Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

this pipe line is exposed in the trench and makes it difficult to ~~be~~ ahead with the excavations, it will take us three or four weeks to complete the permanent work, as we are having zero weather and as low as ten below we find it much harder to maintain the present water supply,

all the work on the outside of the building is now complete,

The work on the barn is completed except for the floor, at present we are taking out bush timbers for this part of the work, there is now 11 head of cattle and four horses housed in the building for the past ten days,

we have also excavated for a root cellar as there was not sufficient accomodation inside for there potatoes and vegetables to be stored during the winter,

I may further state that we did no work on the ground and first floors since my last report,

I delayed my report as there was no mail service untill the winter trail is open for travelling,

I have the honour to be
your obedient servant,

-----*Rednick Grant*-----

[Handwritten signature]
Sir,—

I have the honor to report that the Inspector of Construction at the Guy Indian Residential School asks to be supplied with about \$25.00 worth of kalsomine and brushes to give a clean coat to the walls of the ground floor of the new building.

OK AM
The children arrived at the school while the plaster was being put on and they were accommodated on the ground floor where they dirtied up the walls with their hands and by leaning against them while the plaster was wet. I can get the kalsomine locally if the Department approves of the expenditure.

Your obedient servant,

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING, SASK,

NOV, 27th, 1926

SIR,

PROGRESS REPORT

I have the honour to submit my report for Nov, 27th on the progress made on the work by Mr Wyatt the contractor on the erection of the Guy Indian School,

since I submitted my last report the carpenters completed all of the finishing work on the 2nd, floor including the staircase at the boys end to the basement,

the painting work on this floor and the staircase is now finished, the boys and girls will be moved up to their dormitories on the 30th of nov, when all the painting work will be dry and ready to receive them,

the carpenters are now working on the first floor and will be finished in about 10 days,

the painting work is being done on the metal ceilings of this floorx also work on the varnishing has started,

there has being no further advance made on the finishing of the ground floor and basement since my last report,

all the cows and horse stalls in the barn has now being floored with a substantial timber floor taken from the bush and squared to make a solid floor under the stock,

the work on the water intake is going ahead, the concrete well is now completed and we are working on

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

(2)

the excavations for the inflow pipe from the well to the river ,
I may say that we are having considerable difficulty with rock
and quicksand in this ditch, the progress on the work is slow
owing to that formation, we do not know for certain how much
longer it will ^{take} us to complete this work as there is so much
blasting of rock to be done and the trouble with quicksand and
water that we have to keep pumps operating all the time,
we are doing our best to have this work done as soon as possible,
and we are endeavouring to keep the cost as low as possible,
re- the desks for the class rooms , just as soon as we have the
children moved to there permanent dormitories on the top floor we
will have the classrooms completed and the desks in place, at present
the children occupies them for ~~their~~ dormitories, we expect the
furniture here within the next two weeks also materials to make
additional tables and cubboards not ordered ^{to be made} outside,

I have the honour to be
your Obedient Servant,

Roderick Grant
Inspector of construction

Architect

PROGRESS REPORT

R

I have the honour to submit my report for dec, 15th, on the progress made on the work by Mr Wyatt the contract on the erection of the Guy Indian School,

since I submitted my last report the carpenters completed their work on the finishing of the first floor, they are now working on the ground floor and basement finishing up the work left unfinished when the children arrived, I expect all the carpenter work to be completed about the end of the year,

The painting work is now well advanced on the first floor and will be ready for occupancy on the 20th dec, when the sisters will move up to there permanent quarters,

The woodwork on the ground floor has to receive two coats of varnish except for class room #3 Indians room, and two bedrooms which had being finished previous to this floor being occupied, all floors has to be oiled or varnished as specified on this floor, metallic ceiling on the ground floor has to receive the finishing coat of paint on the ceiling of all the corridors,

The woodwork in the basement has to receive two coats of varnish throughout where stain and varnish is called for in the specifications, the painting is complete in the girls recreation room and toilets, washroom, the painting in the boys recreation room, toilets and washroom has not being started,

The metallic ceiling in the basement is complete to the extent 75% of the painting,

I expect the painting work to be complete before the 15th of Jan,

We have installed the new cook range for the

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Poor Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

use in the kitchen,

The desks have been assembled and will be placed in the class rooms when finished painting,

We have not started on the work of installing the oven in the bakery as the space taken up with the oven was 9'x7' and the size of the bakery was limited for an oven this size I waited untill the Bishop arrived and took the matter up with him when he decided to have it installed in the bakery, as we have the brick here we will start upon the work at once, the capacity of the oven is 300 loaves, we will install the dough mixer as soon as it arrives here,

The work of making the furnishings required in the way of tables for the dinning rooms, benches for same, and benches for the recreation rooms with hinged tops, also the fitting up of the kitchen and pantry, cubboards for all the dormitories, sewing room, platforms in the three class rooms will be started as soon as the material arrives, His Lordship Bishop Charlebois paid us a visit last week and told me that he wanted me to remain here untill all the work of making the furnishings was complete I told him that I would be here untill the water intake was completed and if it was satisfactory to the dept, that I would remain and have all the work outlined above done, the items mentioned above does not include any of the furnishings made outside, The seating accomodation in the chapel is being arranged for as per your instructions,

Re- the water intake

We are working on this work through the cold weather and are now getting close to the river, it is impossible to say when we will have this completed as we have so many difficulties to contend with and it is work on which you cant use many men,

I have the honour to be

your Obedient Servant,

GUY INDIAN RESIDENTIAL SCHOOL,
STURGEON LANDING, SASK.
DEC, 31st 1926

SIR,

PROGRESS REPORT

R

I have the honour to submit my report for dec, 31st, on the progress made on the work by Mr Wyatt the contractor on the erection of the Guy Indian School.

Since I submitted my last report the carpenter work on the finishing has ^{being} completed throughout the building. The work on the painting is well advanced in the basement and ground floor and should be completed on the 15th of jan. The balance of the window shades to be fixed in the rooms not finished by the painters will be done when these rooms are completed,

Re- the water intake,

The work has ^{being} going ahead every day and I expect we will reach the river in about 10 days when we will prepare for ~~the~~ coffer dam in the river before we can excavate for the pipe. this work should be completed sometime about the 20th, of jan, with regards to the water supply during the time we have being on the construction of water intake, we have kept the house supplied with water through the system by the pumping plant and there has being no trouble with the frost on the intake line from the well as we have pumped all the water from the well since we had it completed in Nov, we are in a position to keep the house supplied with water untill we open the valve on the inflow pipe from the river when ^{have} the work completed,

Re- installation of oven,

we have made a start on this work and it is well advanced although we were delayed for material,

The work is also started on the furnishings and we are having them done for the rooms that requires them made first,

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 1)

Re- installation of oven,

we have made a start on this work and it is well advanced although we were delayed for material,

The work is also started on the furnishings and we are having them done for the rooms that requires them made first,

The furniture has been delivered here and placed in the different rooms, the chairs has come knocked down and are put together with glue,

Re- class rooms,
these rooms were used as dormitories when the children came here and they made use of them untill they were moved up to their permanent quarters at the end of Nov, through these rooms been used by the children at that time, the white plastered walls became very dirty there was no way to stop them putting their hands on the walls as they knew no better, and there was considerable sickness among them, I have arranged to have these rooms kalsomined as it is necessary that paint or some equivalent be used,

Re- dough mixer
we have not been able to make a start on the installation of this machine,

I have the honour to be

your Obedient Servant,

Roderick Grant
Inspector of construction,

The Secretary

Dear Sir,

I beg to call your attention that a bell will be needed for the Residential Guy school. They cannot do without a bell. But I do not see any place in the building provided to put it. You could call the attention of the Department on this fact.

I think the best would be to put up a little tower in the centre of the building in which the bell ~~shd~~ could be placed. Please, see about this before you get ~~the matter~~ through your work in the school.

I beg to remain yours truly.

JAN. 11th, 1927

SIR,

Please find attached letter from Bishop Charlebois drawing my attention that they require a bell for the Guy School, as there was no provision made on the plans for a tower to house a bell, I would recommend to the dept, that they consider placing this tower on the main roof of the centre portion of the building, centre line of bell tower to be on centre line of building, design of tower and roof of same, to conform with the construction of the main roof design, I would prefer that this was done now while I am here as I understand that a bell has been purchased and will be shipped here very soon, by placing the bell on the centre line of the building it would be operated in the main corridor on the ground floor,

I have the honour to be

your Obedient Servant,

Jan. 25, 1927.

Sir,-

Replying to your letter of the 11th instant, with reference to the providing of a belfry for the Guy School, I beg to say that you may arrange to have a small belfry built on the roof of the passage leading from the school to the chapel. A suitable covering can be provided in this location for the bell at a cost not exceeding \$65.00, the bell rope to be taken down and operated from the passage leading from the school to the chapel.

It is not considered advisable to place a belfry on the main building as this would cost considerably more in order to keep it in proportion to the building.

Your obedient servant,

J. D. McLean.
Asst. Deputy and Secretary.

GUY INDIAN RESIDENTIAL SCHOOL

STURGEON LANDING, SASK.

JAN 26th, 1927

Dear Waddy

I am enclosing the final estimate in favour of
R. H. N. , Wyatt the contractor for the sum off \$15,535.00.
the estimate is dated for the 1st of Feb, as I expected we will
have the cofferdam completed in the river at that time
I have not made out my final report on the work untill the intake
is complete , Mr Wyatt has a considerable amount of money coming
to him for extra work on that understanding I have given him his
final certificate , that he will complete his work as per contract,
the work inside the building in practically complete and anything
not now complete will be done as per contract,
I am sending this to for your approval and if you consider it right
kindly let it go through as it is,

Wyatt is anxious to get the money he
has tied up at Ottawa,

I beleive it is the best to let him have this
untill the extras is adjusted,

yours truly

Red-Grant

Amey
Dear Sir;-

I have the honor to enclose the final estimate for R.N. Wyatt for the Guy Indian Residential School. The Inspector of Construction says there are a few minor items to be given the final touch but he is satisfied to sign this final estimate. His letter is attached.

I understand that Mr. Grant is getting two of Mr. Wyatt's men to help him with the cupboards, shelves etc at the school. In this connection I would be obliged if the Department will say if this meets with their approval, as Wyatt will probably charge us a percentage on cost. My opinion is that it is satisfactory as the men have their own tools on the job and that Mr. Grant will push the work of completing the extras and clean up the whole operation, but I would feel satisfied if the Department will give an opinion one way or the other.

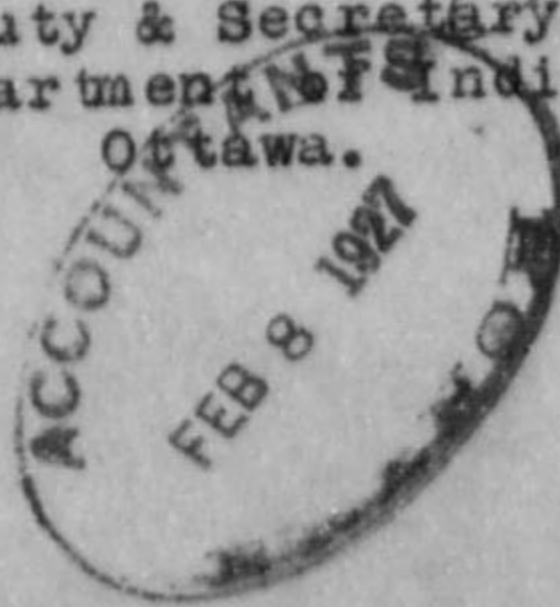

Your obedient servant,

W. A. Dwyer
Indian Agent.

Asst. Deputy & Secretary,

Feb. 9, 1927.

Sir,-

I beg to acknowledge receipt of your letter of the 31st ultimo enclosing certificate No 6 for payment to Mr. Wyatt on his contract for the Guy Indian Residential School. This certificate has been changed to \$15,000.00, and cannot be considered, therefore, as a final certificate. The final certificate will have to show and include all extra work that has been authorized, and should be accompanied by a statement showing how the various amounts are made up.

With reference to the erecting of cupboards, shelves, etc. if Mr. Grant can undertake this work himself the Department would be prepared to retain him for this work, providing same did not exceed two months. This would probably work out more economically than by using Mr. Wyatt's carpenters.

Your obedient servant,

J. D. McLean

Winnipeg, 14th February, 1926.

The Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Re Pews for chapel of the new Guy School at
Sturgeon Landing.

I beg to Acknowledge you letter, number and
date as marginally note.

I have notified Messrs Cusson Lumber Co. of
St. Boniface that their tender at \$868.35 has been ac-
cepted. In this connection I would like to get the
Blue Prints, these will be returned with the vouchers cov-
ering the invoices for these pews and communion rail.

In the meantime I have placed the order with
The Cusson Lumber Co., and they are starting on the work
this morning.

I have the honor to be
Your obedient servant.

DEPT. OF INDIAN AFFAIRS

FEB 17 1927

WINNIPEG February 14/27

R

J. D. McLean, Esq.,
Secretary Dept., Indian Affairs,
Ottawa, Canada.

Dear Sir:

I thank you very kindly for your prompt answer on the
10th Inst., to my wire of the same date.

I received your remittance of Fifteen Thousand Dollars
(\$15,000.00), but the Certificate calls for Fifteen Thousand
Five Hundred and Thirty Five (\$15,535.00), kindly let me know
what happened to the Five Hundred and Thirty Five Dollars
(\$535.00), and would like to have your check for this amount. and
now that the Contract is completed I should have my deposit
check returned.

Your Inspector on the job being Scotch exercises all the
qualities of their race when it comes to issuing Certificates,
one would think it was his own money he was paying out. You can
readily understand that I was entitled to further money after
September than he gave me as we had the School inhabited by the
15th September and could have been easily finished by the Contract
time had we not done the extra work outside, which we wanted to
get done to protect ourselves from suffering from the cold. This
also assisted the Department in saving time on extra cost of doing
this work in cold weather. Our bill for extras will amount to a
considerable sum and presume that he will not want to give me any

Sir,-

Replying to your letter of the 14th instant, with reference to the payment on your last certificate, I beg to say that it was necessary to hold back \$533.00 from this certificate in order that it would not be considered a final certificate. All extra work performed by you, in order to be considered, will have to be shown on the final certificate. It is not necessary of course to wait until all of the work is completed in order for you to obtain an advance on the extra work, provided everything is in order. Your deposit security cannot be released until thirty days after the completion of the contract. I wrote to Indian Agent Waddy on Feb. 9th, advising him that the Department had changed the certificate to read \$15,000.00 in order that it would not be considered as a final certificate and instructed him that it would be necessary to show all extra work performed on the final certificate together with a full statement showing the nature of the work performed and the authority for same.

Your obedient servant,

J. D. McLean.
Asst. Deputy and Secretary.

Memorandum:

Approved
Dr. Scott

You will remember that His Lordship Bishop Charlebois was authorized to secure whatever additional equipment was absolutely necessary for the conduct of the Guy Indian Residential School. He has now forwarded accounts as follows:-

1	Skiff	-	\$ 64.60
6	Fish nets	-	58.50
1	Gravity Washer	-	17.00
1	Special Net with Lines	-	71.25
	Other Fishing Equipment	-	111.14
	Athletic Equipment	-	4.35
1	6 H. P. Gas Engine with clutch pulley	-	263.30
	Total	-	\$590.14

The accounts are all receipted and, as the equipment can be considered really necessary for the school, I wish to recommend that reimbursement be made.

I will expect to receive that measure of relief within a few days.

Mr. Grant has been given by me the necessary accounts of the Extra's in question and doubtless will send them forward to you in due course for your consideration when the job will likely be wound up in the regular way. In the meantime I will have to make arrangements for further financing unless you are about to meet my request.

In closing I wish to refer to my letter of February 14th and having re-read it, it strikes me as no doubt it struck you as rather unusual from a standpoint of business. You will doubtless be pleased to learn from me that the relation with Mr. Grant had been entirely satisfactory except he is rather slow in issuing Certificates and does not appear to realize the difficulties of financing so far removed from our centres.

Hoping you will be able to give this matter your immediate attention, I am

WINNIPEG March 1, 1927.

Architect

J. D. McLean, Esq.,
Asst. Deputy, Dept. Public Works,
Ottawa, Canada.

Re - Guy Indian School Sturgeon Landing, Sask.

Dear Sir:

Your favor of the 21st ulto., received while I was away from the City temporarily and it could not be answered until now.

The principal difficulty of financing the work at Sturgeon Landing lies with the Extra's of which the total amount will run to between Twenty and Twenty Five Thousand Dollars.

I was at Sturgeon Landing in the last week of January and of course asked Mr. Grant, the Inspector in charge, to certify an appropriate proportion of my outlay on these Extra's; but for some reason unknown to me that was not done, and I now ask that you give consideration to the difficulties of the situation thus imposed on me.

Your letter in reference allows that an advance on the Extra work is due to me; but, also stated that the Extra work in order to be considered will have to be shown on the final Certificate, yet because it is impossible to state when the final Certificate will be issued there appears to be some degree of inconsistency in the conditions thus laid down. I therefore desire to appeal to you for relief which is absolutely necessary and in the circumstances properly due to me.

I note the reason why you send me Fifteen Thousand Dollars by check just recently instead of the Fifteen Thousand Five Hundred and Thirty Five Dollars as certified by Mr. Grant. Do you not think that a much smaller sum, say the odd Thirty Five Dollars would serve the purpose indicated in your statement. Then as Mr. Grant has certified to the full amount of the Contract, same being complete in every respect to his satisfaction, there does not appear to be any reason for holding the deposit security and I hope to receive that at once because the date of Mr. Grant's certificate was Feb. 1st 1927, and the thirty days mentioned in your letter is now nearly expired.

Personally I am of the opinion that the security deposit and at least Five Hundred Dollars from the amount you have retained out of the total of Mr. Grant's certificate dated February 1st., can be sent to me at once according to your letter of the 21st., and

INDIAN AGENT'S OFFICE

R

IN YOUR REPLY REFER TO
No. 901-153.
ALSO
TO DATE OF THIS LETTER

The Pas, Man.

March 26th 1927. 19

Sir,—

In reference to the contract for the Guy Indian Residential school I beg to say that I reported at time the final estimate was put in that a day or so of work was required to finish up the water pipe etc. As Mr. Grant reported lately to the Department Mr. Wyatt has not yet put in this length of pipe. It seems the easiest thing in the world to do this, but it is not by any means a snap. Wyatt's foreman has put in about two months trying to get excavated a spot of clay and boulders six feet long and one foot deep, and to get his crib work water tight to put in the length of pipe. The rock bottom has cracks through which the whole force of the current is forcing water, and at the day of my visit four large pumps could not hold back the flow. The foreman is about disgusted and I would not wonder if he pulls off the job.

If he does pull out we will probably get someone to tackle the work and finish it, though we may have to wait till summer when the water is warm enough for a chap to get right in and do a little spade work in his pelt, it's not by any means what I would call an impossible situation.

Your letter #132-7-12 of the 9th of February instructed me to take Wyatt's men off extras and furnishings etc and I told Mr. Grant to do this, since then he has worked alone, see my other report on furnishings.

The purpose of my visit was to get the extras and contract cleaned up to March 31st as there has been lots of time to do this. However Mr. Grant has not been able to get the contractors figures down to where he wants them yet and they have not been presented in voucher form. I wished to get them all in for this fiscal year but the contractor has nothing ready so they will have to stand over.

Asst. Deputy & Secretary,
Department of Indian Affairs,
Ottawa.

Guy Indian Residential School,
Sturgeon Landing, Sask.

J.W.Waddy, Esq..
Indian Agent,
The Pas, Man.

March 19th, 1927.

Dear Mr. Waddy:-

Re work required to complete the job as requested by the Principal and Sister Superior.
Basement. To stain and varnish the cupboards already built and to build 15 more lockers in girls playroom.
One cupboard 12" deep X3'x5'. Kitchen. One cupboard 12" deep by 3'x5'.. In Fathers- Sisters and Mens dining room one cupboard each.
In scullery. One table with drawer and bread cutting shelf.
Closing up bottom of stairs in basement. The Principal asks that these two openings be closed with v joint and doors supplied. This is to ensure privacy from the boys and girls who are inclined to wander through the building when they are left in the recreation rooms.
Painting in kitchen and pantry. Put paint on over the keene cement and on the metal ceiling in the kitchen, this is very dirty.
Ground floor. Desk platform in Class Room #3. The Principal also requests that we close up the opening between the Sr girls room and corridor with a doorway 7' high. This will keep the Indian visitors who visit this room from wandering around, and will also give the visitors a room to themselves at this end of the building as well as the other end.
First floor. Clothes room. One cupboard 12" deep x 14'x10' with hat and coat hooks for each girl.
Sewing room. One cupboard 12" deep x10'x20'.
In corridor to chapel balcony. One blanket cupboard, for use of staff- 18" deep x10'x18'. With doors.
Sisters living room balcony. Bench on hinged strips.
Second floor. Boys dormitory. Cupboard under wash basins to hold boots etc. One cupboard for blankets 18" deep x10'x12', with doors on all cupboards.

You will see from this that there is quite a lot of work to be completed, I would like to have it done by break up, you will have to arrange for the materials to come at once if the work is to be done. I have put on a painter to help me finish the job, he will have about fifteen days work, this was necessary as I want to get the job through.

The Principal ~~mentioned~~ mentioned the following. There are no facilities here for drying clothes in the winter and they are using every empty room here to dry the laundry. If the Department will allow this I could have one made here suitable for their requirements, in the meanwhile I will do nothing about it except get prices on materials which would be required, and when I get this here I will advise you.

I hear you are coming up here soon and at that time I will go into all these matters personally with you.

Yours truly,

Roderick Grant

Store room and linen closets. All fitted up with shelving.

Second floor.

Boys dormitory. There were 52 cupboards built, stained and varnished.

Girls dormitory. 42 cupboards built stained and varnished, also cupboards built under wash table for boots etc of each pupil.

I have already asked you about supply of galvanized iron laundry boxes for holding dirty linen, these are necessary and should be supplied, I cannot make them.

The alabastine supplied has been put on all the walls of ground floor and basement. This was necessary as these walls were filthy after the pupils had occupied this place the first month when they could not be placed up stairs and when they did not understand anything about cleanly customs necessary for occupants of houses. This is not being done on upper floors.

I am writing separate letter regards necessary work to complete this building.

Yours truly, *Roderick Grant*
Inspector of construction

Guy Indian Residential School,

Sturgeon Landing, Sask.

Mr. Waddy, Esq.
Indian Agent,
The Pas,

Mar, 19th, 1927

Copy for the Department

Dear Mr Waddy,

Re- extra work done on furnishings,

I beg to report that the following work was completed
in different parts of the building.

Basement, Boys recreation room, there is 100 lin ft of benches built
around the walls with hinged tops on each locker for the use of the
boys, size of lockers 15"x 20"x 20" stained and varnished complete,

The Secretary,
Department of Indian Affairs,
Ottawa.

Dear Sir:-

Re water intake.

I have the honor to report to you on the above work that the extra 65 feet of eight inch inflow pipe laid from the well was complete on the 10th of January last. On the completion of the laying of this pipe I came inside and worked on the extra furnishings. During part of the months of January and February I had to get help from the men who worked for the contractor as the demand to have this work done was urgent, I had to get the work done that was most required.

Since the end of February I have been working alone on receipt of your instructions through Mr. Waddy. This was on furnishings.

During the time the 65 feet of pipe was being laid I had to keep continually on the job outside.

The contractor started into work where we left off laying pipe as per his contract. At the end of January he had all his pipe laid with the exception of the last length of steel pipe in the river. He had the coffer dam ready for pumping out, but unfortunately owing to the rock bottom in the river he could not get the dam tight to get the excavation finished for this length of pipe, he had only to go down two feet for the distance of six feet when the deep water would have been reached. To date he has only been able to excavate one foot. To make connections with the pipe laid it will be necessary for him to go down this other foot so that the pipe will be deep enough at the lowest water level for the protection from frost. I am sorry that he is having such trouble, he has worked every workable day since the end of January, we have had four pumps working and cannot get the water low enough to finish excavating but we are hopeful that we will have this completed any day now. We have expected every day since the last of January that that would clean up the job. I am enclosing copies of letters forwarded to Mr. Waddy in reference to furnishings. I am working on plan of present water line and sewage line as they were changed on account of the building not being on the spot noted on the plan. These will be for your file for future reference.

Your obedient servant,

Modrick Grant
Inspector of Construction.

Sir;

Please find bill from R. N. Wyatt the general contractor on the material supplied to complete the extra work on the water intake and the time of the plumber connecting up pipe for the temporary water line to the building, the bill is correct except for the 4" galvanized pipe, it should read 125ft, there is a credit due the department for 20 ft 4" gal. pipe.

also the following bills
changing steam mains in the machinery ^{room} for the construction of the framework carrying the water tower,

to laying temporary pipe line
from the river to the boiler room to fill the boilers,

to the installation of hot and
cold water service to the laundry machines, also waste pipe connection
to the sewer,

to running a steam line through the pipe box to tank
room and installing heating coils,

Dear Sir;-

In reference to Roderiak Grant the Inspector of Construction at the Guy Indian Residential School, who was notified that his employment as Inspector ceased on March 31st last, and who has been employed for six weeks as carpenter on the school furnishings, I would be obliged if the Department will advise me if he is to be allowed transportation to his home in Prince Albert when the work is completed, it was at this point he was hired.

If transportation is to be allowed I would be obliged for a requisition for transport from The Pas to Prince Albert, I will arrange for payment of river transport from my expense account.

I think it fair that he be allowed transport as above.

Your obedient servant,

Indian Agent.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

April 27, 1927.

*Approved under
original instructions,
in accordance
with
R. H. McLean
Supt.*
Memorandum:

MR. McLEAN.

In view of the distance of the new Guy Indian Residential School from markets, the Department authorized Bishop Charlebois to get whatever equipment was necessary for the satisfactory conduct of the school and to present receipts to the Department. Reimbursement has already been made for many articles which His Lordship purchased to advantage. He bought a bell for the school, however, which is a more expensive type than usually secured for this purpose. It was purchased from the Meneely Bell Company, of Troy, New York State, and the cost was \$355. There was no duty on the equipment.

As His Lordship had carte blanche authority and in no other case was it abused, I am inclined to recommend reimbursement, particularly as he made a special plea when in Ottawa last week. I should be grateful for your instructions.

Russell Porter

DEPARTMENT OF INDIAN AFFAIRS
CANADA

R

OFFICE OF
INDIAN AGENT

The Pas, Man.

May 5th 1927.

5753-153

The Secretary,

Department of Indian Affairs,

Ottawa.

Dear Sir;-

Re R. Grant, carpenter, Guy Indian
Residential School, Sturgeon Landing.

I beg to report that this man has been
working during April at \$6.00 per day, but he
cannot get his time sheets sent in here on account
of the condition of the ice on the lakes and rivers.

His wife will require some money to
live on, and I would be obliged if she could be
sent an accountable cheque of \$100.00 to
following address. Mrs. R. Grant.

119-14th St West,
Prince Albert, Sask.

If the Department agrees to this request
and gives me the number of the cheque sent I will
account for it in Mr. Grant's time sheets when
they come to hand.

I have no answer to my letter to the
Department #5672-153 of the 11th ulto. regards the
over.

Handwritten notes:
OK if you
approve

R

R. Ferrier, Esq.

Supt. of Indian Education, Ottawa,
Indian Departement.

Dear Sir,

Reverend Father Dayon, Principal of Residential Guy School,
in a night letter, mention to me that the stable has not been completed
last fall. He would like to know if the work for the completion will
be done by day or by contract. If is by contract, he would prefer
that Mr. Waddy will have charge to give the contract. I do not know
much work is still to be done. Mr Waddy will know it. I wish you will
now communicate with him.

My best regards to you with sincere thanks for your refund
checks, specialy the one for the bell. I greatly appreciate your
kindness.

I remain, Sir, your obedient servant,

+D. Leharlebois, O. S. B.

Bishop of Keewatin.

Sir:

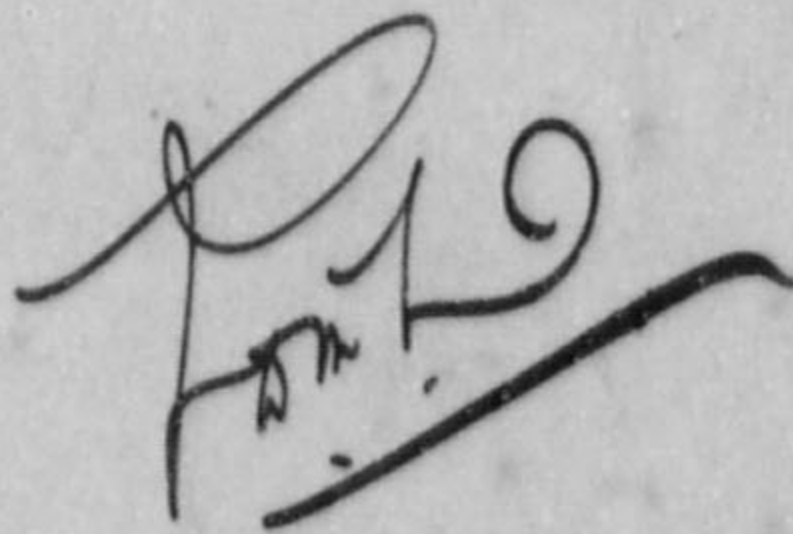

His Lordship Bishop Charlebois writes that Rev. Father Doyon, Principal of the Guy Indian Residential School, informs him that the barn at the institution is not completed. I should be grateful if you would let me know just what work remains undone and estimate the cost thereof.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy and Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

5747-153

R

The Pas, Man.
May 10th 1927.

Dear Sir;-

I am in receipt of a letter from the Principal of the Guy Indian Residential School in which he asks that the following buildings be constructed at that school.

Warehouse 15'X20' walls 10'.

Build root cellar in place excavated 15'X30'.

Chicken house 15'x40' walls 10'.

Ice house 16'x20' walls 10'.

Carpenter-machine-blacksmith shop 20'x50' walls 12'.

House to accomodate visiting parents etc. 16'x30'x8'.

The Principal has sent me list of material required for the above work, but no plans of the buildings so I am not able to figure on the cost of labor. His list of lumber, brick, cement, paint, hardware, freight etc would come to about \$5000.00, and the labor might amount to probably 2000.00.

The Department, after considering whether the buildings are to be constructed, might advise what policy is to be planned in reference to labor, or whether contract work will be considered.

During June and July it will be impossible for me to overlook any construction as I am absent paying annuity.

Day labor is not satisfactory unless the workmen are under close supervision.

Mr. R. Grant made out the list of material for Fr. Doyon, and when he comes through The Pas on his way home next week I will have him make sketches of each building, and have the matter put in shape to submit to contractors if so desired, or to submit them to the Department.

I enclose the lists of material sent here, and will be obliged if they are returned when the Department checks them over and approves or cancels them.

The Principal asks for 25 rolls barbed wire, this will be purchased under instructions in letter 132-7-14. The canoe he asks for on last sheet of estimates enclosed is for use while fishing.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Department of Indian Affairs,

Sir:

I have your 5747-153 of the 10th instant, with reference to outbuildings and other requirements of the Guy Indian Residential School. You may purchase what materials are necessary to complete the root-house and also 11 rolls of rubberoid to cover the implement shed. The labour should be supplied by the school management, without cost to the Department. Our funds are completely assigned this year and it will not be possible to proceed with the hen-house, ware-house, ice-house, carpenter shop and Indian house. These requirements have been noted for future estimates. I have already written, asking for an estimate of the cost of completing the barn. You may let me know what paint is required to protect the buildings already erected. I regret that the Department cannot authorize the purchase of a canoe. I am returning the list of materials for the other outbuildings. These should be kept in your office, and, when you are forwarding recommendations for future expenditure, you will be in a position to quote just what is required.

Your obedient servant,

A. F. MacKenzie

Le nas, Man. 7 June, 1927.

Dear Mister Waddy,

I needed to see you, but you are away and I am obliged to leave to visit my missions before you come back.

One thing about which I wanted to see you was regarding a whare house ^{at} Guy School. I hear that the department does not intend to put it ^{up} now; but, you know, it, is needed very soon. Next month, we are going to ship all the outfit for the year, because the rate of the freight will ^{be} nearly double after the 1st. Of Agust on the boat. And just now there, no place at all to storage it as the existing small whare house is occupied as poultry house.

- So I wish you will wire at once to the Department to reccommand the construction of the whare house at once. It cannot cost so much after all. I hope you will find the opportunity of this demand and you will wire accordingly.

I will be back only at the end of july.

Best regards to you I remain

Yours truly,

+ O. Charlebois, vic. I.

June 11th 1927.

Dear Sir:-

I have the honor to inform the Department that His Lordship Bishop Charlesbois has asked me to write to the Department regards a warehouse for keeping supplies that are being purchased for the Guy Indian Residential School.

The Department recently informed me that they had no funds for this purpose, and I informed the Rev. Principal of the school of this fact, however, Bishop Charlesbois says that this matter is urgent and asks that the matter be reconsidered. The building is necessary, and it could be put up as a shell and finished later on if so desired.

The matter of a boat for the same school has not been settled, but Rev. Fr. Martin Lajeunesse, who is the secretary here for His Lordship Bishop Charlesbois, informs me that a 24 foot boat with six horse power engine is required, it will cost \$552.00 built here by the Pas Canoe Co. He asks that this boat be authorised, also a skiff costing \$42.75 for use in the fishing operations at the school. I beg to recommend that this matter be considered, and as I will be away on treaty trip again on Monday, for probably 16 days this time, would be obliged if the Department would advise Rev. Fr. Lajeunesse by wire if the warehouse, boat and skiff are allowed, and if he can get them built by Pas Canoe Co if allowed.

9 6000 in list for completion of school plant etc.

Ottawa, June 18, 1927.

Reverend Sir:

With reference to the providing of a warehouse and a power boat for the Guy Indian Residential School, I have to confirm my Day Letter to you of today's date, as follows:-

"Department will allow \$400 for construction warehouse at Guy Residential School. You should make best possible arrangements. You may also accept offer of Pas Cance Company to construct 24 foot power boat for \$552."

If you propose to erect the warehouse by day labour, you should buy the materials, after getting the best possible price, send in labourers and have time sheets kept, in duplicate, showing the hours the men worked and the receipts for their wages. The Pas Cance Company's offer of June 11th to supply one power boat, 24 ft. long, 4 ft. 6 in. beam, V bottom, with 6 H. P. Gray motor, for \$552, was favourably considered by the Department and I telegraphed you to accept it. You may also have them provide one skiff at a cost of \$42.75.

Your obedient servant,

J. D. McLEAN

Sir:

I have a letter from Rev. Father Doyon, Principal of the Guy Indian Residential School, asking if I will supply the Department with a sketch of carpenter shop, hen house and root cellar, as he states he has been advised that it is probable that these will be constructed if he supplies the details asked for.

On my return from Nelson House I will make plans of these buildings. I am just leaving for there now, to pay annuity, and have absolutely no time for drawing today.

The cost of these places is hard to figure out until I make the plans, and I cannot even guess at the approximate figure required. It will probably be August 1st before I can get at this work.

Sir:

Attached account from the Standard Plumbing and Heating Co.,
Winnipeg, is for a small quantity of pipe and fittings which they
had left over from the work. It was a good assortment of fittings
and very useful the engineer in charge to have.

Yours truly,

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Sir:

Attached account from the Standard Plumbing and Heating Co.,
Winnipeg, is for the material we used on the temporary water
supply. As it would cost considerable to freight this back to
Winnipeg, I recommend that the Department purchase this material
as it will be useful to have at the school.

Yours truly,

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Sir:

Attached claim from the Contractor for the inconvenience caused by the children arriving at the school before he had completed the work.

When the children arrived on the 13th of September the basement and ground floor was not complete and he had to move his men from these floors to accommodate the children. There is no doubt but that he was put to some inconvenience and expense on this account.

I would recommend that the Department consider his claim. I consider that \$200.00 would be a fair compensation.

Yours truly,

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Sir:-

Re Painting V Joint Walls Basement.

The attached account is for painting the Vjoint on the walls of the boys' and girls' recreation rooms, basement. There is no mention of having this painted in the specification, unless, it was understood to be trim as per paragraph 12 on page 37, in the specification.

We had paint used as it was more serviceable for light, the base of the walls to the height of windows stool was painted in light grey, while the upper part was finished in white.

Yours truly,

Roderick Grant

Sir:

Re Installation of Range.

We had to make the door openings larger to allow the range thru. It had to come in thru the outside door to the basement, left side elevation, and thru boys' recreation room to dining room, and thru scullery. All these openings had to be made larger to allow it to come thru.

I would draw your attention to the fact that the range supplied by the Department did not arrive at the school until the 5th. December, from the 10th. September to December. We used the Cook Range belonging to the Contractor, otherwise, they would have been handicapped for want of a cook range.

Sir:-

Re Repairs to Old Buildings.

These buildings were renovated by the contractor for the use of the hired help at the school. The work was done at the request of the principal for the use of the families of the men hired. Two buildings have been put in good shape of repair.

All the old buildings that were no good adjacent to the school building have been ~~renovated~~ removed. There are also charges for repairs to plaster in the basement of the part built in 1925 which was made.

Yours truly,

R/C

Sir:-

Re Installation of Laundry Machinery.

Attached account is for the supply of the Laundry machinery including all belting, transmission shafting, pulleys and ceiling hangers and labor. This does not include any of the transmission shafting and equipment installed in the machinery room to run the gas engine, generator and water pump, as per contract.

There is 20ft. of line shafting in the machinery room coupled to 20ft. in the laundry, making 40ft. of transmission shafting in all. I would refer you to the specifications on page 18A annex A. of the specification, the paragraph dealing with shafting, it mentions laundry machinery, in the supply of transmission shaft and equipment. All the equipment including labor charged on the bill was installed in the laundry. Dealing with Laundry installation only.

Sir:-

Re - Labor on Barn.

The attached account is for the labor supplied in the erection of a completed barn 28' X 50' including the cost of cutting down standing timber in the bush and having same hewed up square and laid solid throughout the barn passageway and stalls.

Yours truly,

Roderick Grant
Insp. of Const.

Sir:-

Material used on Barn.

The attached account is for the supply of all material used in the erection of a completed barn 28' X 50' with concrete footings, *hip* roof, height of ceiling from stable floor 0' 0", height of hay loft from floor ~~shaft~~ to ridge 22'. Estimated quantities of material were gotten out at first for a building complete except for the drop siding and shingle. The shiplap on the outside was to be covered over with tar paper and held with lath and the same on roof. As the stock was on the ground the Bishop wanted the work done at once and would prefer a completed job which was given except for the outside painting, he was afraid that a temporary building would not be suitable. The size of the building was approved by the Bishop and the site was chosen by him. The floor of the barn is well laid with bush timber well hewn which makes a solid floor. Electric light and water is installed.

Yours truly,

Roderick Grant

119-14th, ST. West,
Prince Albert, Sask.
30th, June 1927.

Sir:

Attached account for the additional work on the water intake including the construction of the well and the laying of 32 feet of inflow pipe at the river as per the contract.

I would refer to my estimate of September 14th on the cost of doing the additional work.

1st Supplying and laying 125 feet of 4" Gal. pipe from the point 700 feet from the building to the well.

2nd Supplying and laying 65 feet of 8" cast iron pipe from the well to the river.

3rd The additional depth of the well.

4th I made no allowance in my estimate for the supplying and laying of the 32 feet of pipe at the river.

5th Clearing the channel above the point of intake.

The Contractor's account for excavations for the 4" pipe on the water line does not include the supply of the pipe as this was charged for on another account. The depth of the 4" pipe where it enters the well is 14' 6" below grade line and 18' where connected to the pipe at the point 700 feet from the building.

The well is down 30 feet from the roof to the floor of the well. The Contractor's bill includes the construction of the whole well and all material and expense. It also includes the lumber used in cribbing the well and the lumber used in cribbing the 65 feet of ditch to the river.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

After a depth of 14 feet was reached we had to drill through rock and quicksand all the way down and at 7' 6" below the water level we came upon solid rock. It was slow work excavating from 14 feet below the grade line to the bottom of the well we had to dynamite every foot of the way and put in a tight cribbing owing to the quick sand. The contractor deducted the amount he figured on in the contract.

The account for laying the 65 feet of 8" pipe does not include the cost of supplying the pipe which was charged for in another bill. The formation in the ditch below the river was the same as the well. It had to be cribbed tight all the way owing to the water and quick sand. Pumps were in use all the time we were working.

The account for laying the 32 feet of pipe to the river and work on the cofferdam I may say that the Contractor had great difficulty in getting the cofferdam tight in the river owing to the rock bottom the water coming in through the bottom where they were excavating.

With regard to the lay out of the work I have forwarded plan to the Dominion Water Supply Department, Winnipeg, for them to alter their plans to show the work as it was laid. No doubt you will have received a copy of the corrected plans by now.

Below you will find cost of the additional work as per my estimate of September 4th.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

To excavating trench 125 feet	\$284.96
To additional work on construction of 10 feet of well	662.00
To excavation for 65 feet of 8" pipe	1661.00
To 125 feet of 4" pipe and 65 feet of 8" pipe	499.71
To diverting stream	<u>500000</u>
	\$4147.67

With the above information and referring to your wire of September 3rd and my letter of September 9th you will be able to arrive at the amount which should be paid to the Contractor for this work.

You will note that the accounts do not show a charge for gasoline except for six gallons purchased from the trading store. As we had the pumps running every day there must have been a considerable quantity used up. The gasoline was supplied by the principal. It looks as if he did not put in his bill to the contractor.

Yours truly,

Redwick Grant

Sir:-

Re Veranda Screens & Outside Stairs.

The attached account is for the material and labor supplied enclosing the veranda at front of left side, also the veranda on the ground floor and first floor right side elevation with screen wire, the same as supplied for the window screens.

The Bishop asked for a stair to be built up to the veranda on the right side elevation. He pointed out that this was necessary for this part of the school to have this stairway built for the convenience of the Sisters and any visitors for that part of the school.

The account includes the cost of supplying paints and labor.

Yours truly,

Roderick Grant

Sir:-

Re Temporary Water Line.

We had to maintain a temporary water service to the building during the winter while we worked on the water intake. We were able to supply water to the school all winter except for three weeks in December, it was very fortunate that we were able to supply the entire building with water. Otherwise it would have been bad for the sewerage and drainage system, as it was impossible for the occupants to use the outside toilets all the time. During the time we were unable to supply the house, water had to be carried from the river.

I appreciate the assistance that I received from the Contractor in helping maintain the water supply during operation on water intake.

Yours truly,

Rodrick Grant

Sir:

Re Stairs in Chapel.

The work of installing the stair from balcony to Chapel floor was done on request of Bishop Charlebois. This was required for the benefit of the sisters and senior boys who will occupy the first floor of the school. He pointed out that this was an omission from the plans and that it was necessary to have it installed for the convenience of the occupants on the first floor.

Yours truly,

Roderick Grant

Dear Sir:-

I have the honor to enclose 41 accounts received from Mr Grant who has been checking them up, they are in favor of R.N.Wyatt for the Guy School work.

Mr. Grant also enclosed two accounts in favor of the Standard Heating and Plumbing Co, Winnipeg, and he has certified to all the accounts.

I do not know whether I should sign them or not, I am not conversant with the details of any of them, but I signed the recapitulation of Wyatt's account.

IN YOUR REPLY REFER TO

No. 5887-153

ALSO

TO DATE OF THIS LETTER

Sir,

Re letter #132-7-5 of the 19th May last I beg to advise the Department that the Principal of the Guy School is ready to construct the root house there now and I am shipping him the cement, lumber etc for this place, also the rubberoid for the implement shed.

Letter 132-7-5 of May 17th last regards completion of barn. This place requires

20 gallons shingle stain-----	50.00
16 gallons red barn paint	60.00
2 gallons white paint	11.00

It will also require a manure track and outfit, a hay fork and track, tubs for drinking water for horses etc and the doors require changing.

Will you please advise me if any of this is to be allowed.

Re my letter #5858-153 of the 7th ulto in which I stated that the Principal wanted plans of carpenter shop, hen house and root cellar, I beg to say that the root cellar is dug and no plans are needed, the material has been allowed.

The material and freight for the hen house would amount to about \$900.00, and the labor to another \$250.00 or so if the plan the Principal had in mind was carried out, but I think he will cut down on this, he was here on Saturday and told me he will send some drawings he has regards this place. He requires a hen house before fall.

The material and freight for the carpenter shop and blacksmith shop will come to about \$1200.00. Labor would be \$400.00 extra.

The Principal asks for funds or authority to construct a house for one of the staff and the material for this amounts to \$425.00. This is a new item, and the Principal asks that the Department purchase the lumber. Please let me know by wire if this can be gone ahead with as he is very anxious for an answer.

I enclose a list of items he wants to complete some of the rooms with, I have not had time to make copy of it, however if they are allowed will the Department please let me have the list back. I am right up to the neck in work here or would elaborate on these many requests.

Your obedient servant,

Asst. Deputy & Secretary,
Department of Indian Affairs,
Ottawa.

CONTRACTOR

WINNIPEG July 30/27

R

Duncan C. Scott, Esq.,
Deputy Supt. General,
Dept. Indian Affairs,
Ottawa, Canada.

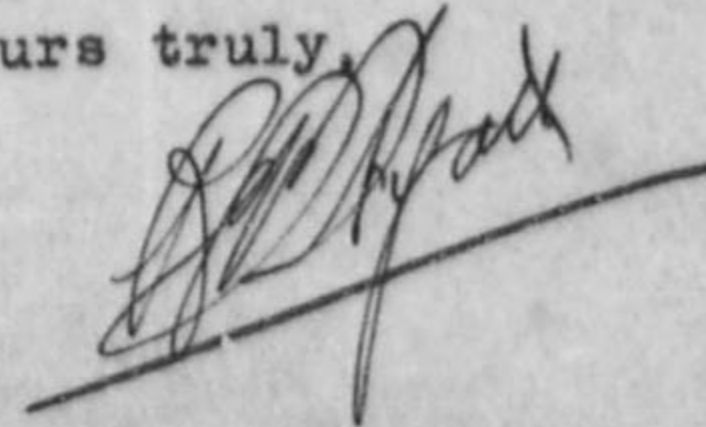

Dear Sir:-

I understand the accounts to an amount approximately Twenty Thousand Dollars as Extra to my Contract have been forwarded to you by Mr. J. Waddy, Indian Agent, The Pas, Man. and which Mr. Roderick Grant, Inspector of Construction, on the new Indian School at Sturgeon Landing, Sask., had only approved and submitted to Mr. Waddy for his certification in the process of final settlement. The works and materials charged for on these bills were furnished by me, for the greater part before the 1st January last, and a lot of the material was purchased as long ago as September the 30th. I have previously explained how, that we had not been able to obtain any payment on these Extra's and I cannot but feel that, the cause of the delay lies in the fact, that Mr. Grant, although, a first class Building Inspector does not grade high as a Clerk, who would appreciate the responsibility of financing, for as a matter of fact the Bank costs for carrying these accounts has now run to nearly One Thousand Dollars.

Now I want to state that the circumstances are such that a grave injustice has been put on me. The representative of your department has certainly been slack in rendering such fair and reasonable action as I feel should have been accorded. May I, therefore, respectfully apply for payment from your department for at least a part of the Interest we have had to pay.

Trusting you will grant me your favorable consideration,
I am

Yours truly,

RNW/EM

Sir:

I have your No. 5887-153 of the 1st instant, with reference to out buildings and other improvements at the Guy Indian Residential School. I telegraphed you today as follows: -

"Reference your letter 1st instant, you may purchase stain and paint required complete Guy school barn also hayfork and track. Regret no funds for hen house, carpenter shop and staff house. Writing."

I regret that I cannot allow a manure track and outfit. You may arrange for either tubs or a trough for drinking water for the horses, and if the doors should be changed, you may make the necessary arrangements, incurring as little expense as possible.

The hen house, carpenter shop and staff house have been noted for next year.

You may purchase the lumber, paint and hardware requested in the Rev. Principal's letter of the 29th ultimo, which is returned herewith. I regret I cannot allow door checks. I shall have a further communication with reference to the request for two sewing machines.

ENC.

R. N. WYATT
CONTRACTOR

WINNIPEG August 15/27

Ans. B. Scott
Duncan C. Scott, Esq.,
Deputy Supt. General,
Dept Indian Affairs,
Ottawa, Canada.

Dear Sir:-

Yours of the 5th Inst., was only received in reference to my letter of the 30th Ult., submitting to your consideration the question of Interest charges in carrying certain costs in connection with the Indian School, Sturgeon Landing, Sask., through costs having been incurred in works additional to the Contract, and not arising from it.

For instance, on September 18th last, I find that we purchased certain Laundry Machinery, and September 28th all the Lumber, Hardware, Etc., for out buildings, also there were numerous other lots of material purchased shortly afterwards, and all before December 31st.

Applications were repeatedly made to your Inspector in the hope of securing payment of these items and in January of this winter the writer made a special trip to Sturgeon Landing, at forty five degrees below zero in order to push things along. The Inspector promised to send a Certificate immediately, but even to this date it has not been received.

These statements of fact are just a part of what could be written, but they ought to be sufficient explaining further to my letter of July 30th drawing attention to what I cannot but regard as a perfectly fair claim to be acted on by your department.

Yours truly,

RNW/EM

5966/153

Dear Sir:

I have the honor to enclose voucher No. 202, in favor of Rev. Fr. Doyon, Guy Indian Residential School, Sturgeon Landing, Sask., via The Pas, Manitoba, for labor making tables and wardrobes for bedrooms of the staff at Guy Indian Residential School.

I do not know just what authority the Reverend Principal had for this expenditure, but can certify that the furniture was necessary and I presume the Principal took the most economical way of having it constructed.

I beg to recommend that the amount be paid if there are any funds on hand for the purpose.

I am, Sir,

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,

The Pas, Man.

IN YOUR REPLY REFER TO
No. 5978/157
ALSO
TO DATE OF THIS LETTER

August 25th, 1927.

Sir,—

I beg to state that on my official visit to the Guy Indian Residential School on August 18th, 19th and 20th, I went into matters very fully with the Principal, as he was complaining that certain things had not been completed before the Inspector of Construction left there. I will come to these later on in this letter.

The Sister Superior asked if she could be supplied with a typewriter. The Principal has a typewriter, but he is located at a different end of the building to the Sister Superior and she does most of the office work, and states that it is necessary that she be supplied with one of these machines if the Department will be pleased to grant one.

only allowed a Sch.

At this time I wish to mention that His Lordship Bishop Charlebois, who was at the school, extends his thanks to the Department for all the favors which have been shown to him and his people while the school was being built and he said he could not express his thanks fully enough to cover all the favors he has received.

Starting the examination of the building in the basement. The laundry requires doors ~~on the~~ clothes cupboards; it also requires an ironing board 3' x 12', to be attached to pulleys so it could be attached to the ceiling and be out of the way when not in use. The bake shop requires a thermometer on the oven, which is made by McNabb & Roberts, and the baker asks if she could be supplied with a fiber washtub for setting the yeast before she mixes up the dough in the dough mixer. She also asks for a tin box which would hold about fifty loaves, for keeping bread fresh. The principal asked for door checks for the outside doors, but I noticed in your letter of the 11th inst. that these are refused. In the Brothers' dining room two small cupboards are asked for to hold the dishes, etc. and a cupboard is also asked for to keep the athletic goods for the boys play room. These could be made on the premises if material is supplied. The Principal also asks for a small door to be placed under the main stairs in the boys part of the basement, just a V-joint affair; he also asks for a drip basin under the tap in the boys' play room. In the school rooms all the seats have not been attached

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

Per Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

to strips. Two of the rooms will require four hundred lineal feet 1 x 3, with six gross screw nails to attach the seats in sets of four. The Principal asks ~~for doors~~ ^{no} to be placed on the shelves of his library in his room, and he also asks for a desk lamp for his office; shelving is required in the cupboard in the junior class room; the Sister Superior also asks for a large hand bell to use in the corridors to call the pupils and the staff; the cupboards in the clothes cutting room are not all varnished, and they require staining and hooks and eyes; the partition at the bottom of the stairs on the girls' side of the building requires to be varnished; the girls' recreation room requires a cupboard of V-joint and also requires about twenty more small individual lockers, which ^{yes} could be used as seats and for the use of the girl pupils. The Principal asks for two sewing machines for this room, but I see by your letter of August 12th that these have been refused. The Sisters dining room also requires a cupboard for the dishes; the laundry department of the school were asking for a dryer for drying clothes; His Lordship Bishop Charlebois is asking for a steam engine and boiler in place of the gasoline engine, as he says it would be more economical to run and would give more power. If this is supplied, eventually the steam could be used in the dryer. The matter of the steam engine will be taken up later on. I am getting information regards costs, etc., of same before I bring it officially to the attention of the Department. In the girls' sewing room three benches 16' long are required; in the same room the cupboards required to be varnished and the doors of the cupboards require to be stained and varnished; On the veranda used by the sisters four benches are required, with folding legs so that they can drop down alongside of the wall and be out of the way when the sisters are walking around on this veranda, where they take their exercise. The cupboards in the hall, which leads to the balcony of the chapel have not been varnished and stained. This should be completed. The Principal also asks if window stripping of some sort can be supplied for the windows, to keep the draft out in the winter; on the third floor three clothes closets are required for staff rooms. These are on order in Regina since last fall and I had a letter this week saying they are being supplied. V-joint doors are required under the basins in the dormitory of the boys' room. One cupboard requires staining in the same room; small boys' dormitory ditto; small girls dormitory ditto. There is a hole leading to the roof, in the ceiling of the third floor, and the sisters store a lot of material in the space between the roof and the ceiling. In order to reach this place the Sisters ask for a ladder on hinges and free at one end, and the free end of the ladder could be attached to a pulley and pulled up out of the way when not in use.

In the boys' dormitory on the first floor there are no basins, toilets, or cupboards. It is absolutely bare except for the beds. Mr. Grant did not draw my attention to this before he left, so I presume he thought it was satisfactory. However, these pupils will require basins, toilets and cupboards.

The Secretary - 2.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

POOR COPY

The pipe line was extended across a valley, which was filled in with earth, and the filling is now acting as a dam to hold back the water which comes from the surrounding country. In order to allow this water to escape and to save the filling from washing into the river, it will be necessary to place a galvanized pipe or culvert to carry away the extra water. This pipe should be 36' long and at least 18" in diameter. If this is not supplied the whole lot of the filling put in will be washed away and the water system exposed. There also should be some back filling done on the pipe line, which was put in during the winter. This is now settled considerably and it should be filled in level with the surrounding ground. I think it would cost probably \$20.00 or \$25.00 to make a job of this.

From ^{the} The school grounds slope gently towards the barn, and in between these places all the water from both places collects and during a storm it runs off very quickly. Twice this summer the water has cut a gulch between the school and the barn and has been levelled both times. In order to avoid this it will be necessary to put in 150 feet of 8 inch tile with a small catch basin where most of the water collects. This will drain the water down to the bank of the river and avoid any unsightly washouts in the future.

The Principal asks to have the hay loft lighted with electricity. This would require 75 feet of flexible conduit, a switch box, 3 outlet boxes, one blank cover, and some other attachments.

The school has shipped me in one 10" pulley, which they want to exchange for a 16" pulley to speed up the dough mixer. The first pulley supplied was not quite suitable. They also shipped me in an 8" pulley for the generator, as being too large, and asked me to have it brought down to a 7 1/2" pulley. If I receive authority from the Department I can ship these two pulleys to Winnipeg and exchange them there. The expense for this should not be very heavy.

The Principal asks for a 40 foot extension ladder to use along the eavestroughing when it gets clogged up with snow and ice in the spring and fall. He also asks for some solder and a half gallon of muriatic acid for *Schmitt* repairing the eavestroughing.

An extra length of 8" pipe will be required for the water intake. It should be on hand at the school to be placed in position any time the water gets low in the river.

The Principal of the school asks if threshold strips can be placed on all the doors leading off the corridors in the school into each room. He states that the draft in the building draws all the dust and dirt from the corridors into the rooms. This was not done during construction and the Department might consider the advisability of having them put in.

The Secretary - 3.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

Re-A Copy

The material required for many of the cupboards, doors, etc., mentioned in this letter appears to me to be similar to what was allowed the Principal in your letter of the 11th August, and before I supply him with this material which has been authorized I will find out if that is what the material was for, so there will be no duplication of material.

If any repairs suggested are allowed by the Department I will be obliged if they will say if an appropriation will be allowed to a carpenter to do the work of carpentering, painting and staining.

OK
to
file

I think I am leaving the worst trouble for this last paragraph. When I was at the school I naturally walked down to the kitchen to see how the Sisters were getting on in cooking the immense pile of food necessary to feed all the Indians and white people who had been invited to the official opening, and I was surprised when I got to the kitchen to find the sisters paddling around in four inches of water all over the kitchen floor, and they told me that there had been water standing in the kitchen at times during the last summer; that every time it rained the water came in under the floor and along the outside wall. It appears to me that Wyatt or Wyatt's men slipped some considerably big stones into the cement at this point and the wall and floor just here are not water proof. There is only one way to get away from this trouble and it had to be done at once, so I told the Principal to put some men at work and build an apron of cement, similar to a sidewalk only not so heavy, all along the face of the kitchen and in the small entry just where the first part of the school joins on to the main building. This will keep the water from running down along the walls, and I trust will be satisfactory. This expenditure was absolutely necessary and I trust will be approved by the Department.

I have the honor to be, Sir,

Your obedient servant,

W. A. D. D.
Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

P.S. It would appear that I have got long winded since making the speech at opening ceremony of the school, my letters in future, however, will be much shorter. *W. A. D. D.*

Ottawa, September 8, 1927.

Sir:

I have your 5978/153 of the 25th ultimo, with reference to equipment, etc., at the Guy Indian Residential School.

Only one typewriter is provided by the Department for each Indian residential school. The Department cannot agree to a hinged ladder for use in connection with storing goods in the attic, as the construction does not allow this space to be used for storing purposes. I regret that there are no funds available for the purchase of a drier. A desk lamp and doors for the Principal's library cannot be allowed. No basins can be supplied in the boys' dormitories on the first floor; but you may arrange for the installation of one toilet. I regret the Department cannot agree to electric light in the hayloft of the barn. I wish to point out that solder and muriatic acid should be purchased from the per capita grant or other receipts.

You may have the Rev. Principal make a definite proposal in connection with window stripping and threshold strips. An estimate of the cost should accompany the proposal. You may arrange for a small quantity of varnish and stain for the decorating mentioned in your letter - the school management to be responsible for the labour. You may purchase the following:-

- | | |
|--|---------------|
| 1 Thermometer, | 1 Drip basin, |
| 1 Wash tub, | 1 Hand bell, |
| 1 Tin breadbox, | |
| 36 ft. of galvanized pipe 18" in diameter, | |
| 150 ft. of 8" tile with small catch basin, | |
| 40 ft. Extension ladder, | |
| 1 Length of 8" pipe for the water intake. | |

You may also effect the exchange in pulleys mentioned in the fourth paragraph of page 3.

You may arrange for the filling mentioned in the first paragraph of the third page of your letter, at an estimated cost of \$25. Your action in arranging for a cement apron to keep the water from running along the walls is approved.

J. W. Waddy, Esq.,
Indian Agent,
The Pas, Man.

- You may arrange

You may arrange for the engagement of a carpenter for one month and for the purchase of the necessary materials for the following: (inexpensive type of work only should be undertaken)

- Doors on laundry clothes cupboards,
- Ironing board with pulley,
- 2 Small cupboards in Brothers' dining room,
- Cupboard for athletic equipment in boys' playroom,
- "Y" joint door under main stairs in boys' basement,
- Strips and screws for attaching to classroom desks,
- Shelving in junior classroom cupboard,
- Inexpensive cupboards in first floor boys' dormitory,
- "Y" joint cupboards in girls' recreation room,
- 20 Small lockers in girls' recreation room,
- Dish cupboard in Sisters' dining room,
- 3 Benches in girls' sewing room,
- 4 Benches for Sisters' verandah,
- "Y" joint doors under basins in boys' dormitory.

Before purchasing the materials for this carpentry work, please take the action mentioned in the first paragraph of the last page of your letter.

Your obedient servant,

A. F. MacKenzie

Dear Sir:-

Your letter September 14th., re \$500.00 account paid to E. Hagen. On account of the lateness of the season I thought it wise to let the job of clearing the river so as to divert more water to the intake supply. As the water was so cold at that time of year it was pretty hard to get men to work in it and as Mr. Hagen had some of his fellow country men who, he had in his employee, he was willing to take the job. The amount to clear was a width of about 25' and 100' long, and the estimated amount of rock to be removed was 100 yards. This had to be taken out of at least two feet of water. I estimated 100 yards at \$5.00 per yard and think you will agree the price was reasonable, in fact Mr. Hagen did not any more than make wages. In my action Mr. Roderick Grant your Inspector concurred.

Trusting this information will be what you require,

Mr. Chene*

R

Sir:-

Your letter of Sept 14th with reference to statement of account sent in by R.N. Wyatt, Contractor on certain work done at the Guy School, Sturgeon Landing, has been forwarded to me from my home address, at Prince Albert, and which I received to-day.

You will find in my estimate of Sept 14th 1926 to the Department on the additional work required to complete the water intake, that the fifth item deals with the work mentioned in your letter and was carried out by R.N. Wyatt, the general Contractor who had subcontracted the work to Mr. Hagen, who had the work done. Mr Wyatt asked me at the time if it was allright for him to get Mr. Hagen to do the work on contract. I told him that it was perfectly allright providing the work did not cost more than \$ 500.00. The channell was cleared of the rock and loose boulders sufficiently to divert the stream and have a stronger current at the point of intake as specified.

I remember Mr. Hagen complained about the work being so difficult to undertake at that time of the year.

I knew that he give full value in his work.

Your obedient servant

Radnick Grant

CONTRACTOR

WINNIPEG October 24-27

R

A. F. MacKenzie, Esq.,
Acting Asst. Deputy and Secretary,
Dept Indian Affairs,
Ottawa, Canada.

Dear Sir:-

Having reference to your letter of Sept. 14th and my reply of the 21st. This business appears to me to have been fully and satisfactorily explained and therefore I am at a loss to understand why the balance of my account remains unpaid. Certainly I feel some explanation is due me.

Then there is my letter of August 15th addressed to Mr. Scott to which, apparently, there has been no reply. May I ask if you will kindly inquire of Mr. Scott if he received that letter. All officers in the department are doubtless jointly interested in these matters, that is why I feel at liberty to ask any officer to kindly get the information, such as I am now applying for.

The fact is that I feel considerably agrieved with the delay or lack of interest shown in settling up my Contrast and Extra's in connection with Guy Indian School, and I would hope within a few days to receive some explanation for the delay and a definite statement when the money due will be paid.

The department surely realizes that every day is a cost to me in carrying these accounts.

Yours truly,

RNW/EM

October 24th 1927.

Dear Sir;-

Re letter #132-7-15 of the 8th ulto.,
third paragraph, regards window stripping
I beg to say that the Principal of the Guy
Indian Residential School informs me to-day
that he wants 3500 feet of Storm King strips,
this is a felt composition, costing 2¢ per
lineal foot retail, probably about \$50.00
for the lot when we ask for quotations.

There would also be the cost of
putting it on, unless the Department gave
instructions to have the staff put it in
place if it is supplied.

Your obedient servant,

[Handwritten signature]

Ottawa, October 31, 1927.

Sir:

I have your letter of the 24th instant, giving an estimate of the quantity and cost of the window stripping required by the Principal of the Guy Indian Residential School.

In reply I beg to say that you may arrange for the purchase and delivery of approximately 3,500 feet of Storm King strips. The expenditure incurred should not exceed your estimate of approximately \$50. When this material has been supplied, you should forward a properly certified voucher, in duplicate, in the usual manner covering the cost.

It is expected that the staff of the school will be responsible for the labour in installing this window stripping without cost to the Department.

Your obedient servant,

J. D. McLean

Sir,

Your file number: 132-7-17.
Attention: Departmental Engineer.

I have received from Mr. Chané copy of a telegram from the Indian Agent at The Pas with reference to the bad condition of the water supply at Guy Indian residential school, and have wired to Mr. Attwood asking him to arrange to have a report made on the existing conditions and what is required to remedy them.

In view of the lateness of the season, however, I have also asked Mr. Attwood to take what action he considers necessary to have conditions immediately remedied if he finds that such action is urgent, which I trust is satisfactory to your department.

Ottawa, October 24, 1927.

Sir:

I have your voucher No. 190 of the 17th instant, covering labour in connection with the construction of a root house at the Guy Indian Residential School. The cost in this connection, viz.: \$438.70, suggests that somewhat elaborate provision has been made. The Department originally expected the school management to be responsible for the labour costs and I have to request that, at your convenience, you will see the Reverend Principal re the matter and let me have a definite recommendation. You should report just what type of root house has been prepared.

Your obedient servant,

J. D. McLEAM

Guy Indian Residential Boarding School,
Sturgeon Landing, SASK..
Oct. 6th, 1927

Dear Mr Waddy:-

Re- Root-Cellar

I am enclosing herewith the Return os Labour for the Root-Cellar. I am surprised myself seeing how much it costed to have that root-cellar completed, but I am presenting to you the real amount of money I did spent for that work.

On the starting, laborers had to dig for a few days, though the digging had been done last Fall. Then the work on the walls; and the roofing. After the cement walls done, we had that heavy rain for a week; As there was no drain in the root cellar, the walls cracked and bent. We had to put a wall of logs around the inside cement walls and then to put the roof. This took lot a time and lot a money. However the root cellar will be very good.

I didn't take any saw-dust, because when the Toben came here I asked Harmenn, the Captain if there was any saw-dust across the river, and he told me that there was none. So it was too late to wait.

I have about 75 bags cement left
I am sending you the cost for the gravel hauled. I paid the that amount Cash. There is some more gravel left also

Will it be possible for a dentist to come here before freeze up. So many teeth to be fixed.

Yours vera truly,

Rev. Napoleon Doyon - O. C. 7.
Principal.

Dear Sir;-

I have the honor to acknowledge receipt of letter #132-7-5 of the 24th inst regards voucher 190 for root house at the Guy Indian Residential School.

A lot of the expense was in connection with digging out dirt that had fallen in to the excavation since it was dug out in 1926. Bad weather at time it was being build also added to the cost. The enclosed letter from the Principal explains the situation.

The root house is straight cement walls with lumber roof, filled in on top with earth.

The Pas, Man., Nov. 29th, 1927.

Dear Sir:

I have the honor to enclose voucher No. 346, for \$23.80, in favor of E. Carroll, The Pas, Manitoba, for distilled water supplied to the Guy Indian Residential School, for renewing the batteries of the electric light plant. Some time ago the Principal asked the Department for a distillery for making this water at the school and the request was refused. The Principal asked me then to order the water and if the Department refused to pay for the same he will assume the charges. However, he states he thinks the Department should pay for the distilled water. The express charges were necessary on this shipment, as the water was ordered so as to catch the last boat leaving The Pas. It was needed immediately.

I am, Sir,

Your obedient servant,

Sir:

I have your letter of the 29th ultimo, enclosing a voucher in favour of E. Carroll, The Pas, to the amount of \$23.80, covering the cost of distilled water and express charges on same for renewing the batteries of the electric light plant at the Guy Indian Residential School.

In this connection I have to say that it is the practice for charges of this nature to be paid by the school authorities from their per capita grant or other receipts. The account which you forwarded is returned herewith, and the school authorities should arrange for the payment of same.

INTRODUCTORY.

On October 14th, 1927, the Department of Indian Affairs on being advised that the water supply of the Guy Indian Residential School at Sturgeon Landing had been condemned requested that an engineer of this Branch visit the school and submit a report covering the question. Following instructions from Mr. Johnston to this effect the undersigned visited the school on October 27th and 28th and in company with the Principal, Reverend Father Doyen, made an investigation and inspection of the school water supply.

PRESENT WATER SUPPLY.

The water supply is taken from the river some 825 feet above the school. At this point an eight-inch wrought iron intake pipe extending five feet into the river carries the water to a concrete intake well thirty feet deep located about one hundred feet from the shore. From the intake well the water is drawn through a four-inch suction pipe to the school.

The present trouble with the source of supply is due to the intake pipe only extending five feet from shore instead of from twenty to twenty-five feet, as instructed, to ensure the point of intake being in the current. Five feet from shore there is no current owing to a small point of land immediately above and the supply is therefore drawn from comparatively still water. The manure which the school authorities complain of is the remains of that used by the contractor in his efforts to seal the cofferdam and which had never been properly

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Peer Copy

removed. With the end of the intake only five feet from the shore and in still water it will naturally take some time for this trouble to disappear, unless steps are taken to remove the manure.

The question of the distance necessary to extend the intake into the river in order to reach the current was taken up personally with the Inspector, Mr. Grant, in July of last year when the writer visited the school for this purpose. At that time the matter was fully gone into and instructions were given that the intake pipe was to be carried at least twenty feet out from the shore in order that the point of intake would be in running water.

In Mr. Grant's letter dated August 31, 1927, to Mr. Waddy, Indian Agent at The Pas, copy of which is enclosed, he stated that owing to the difficulty of sealing the cofferdam at the water end of the intake the contractor could not make the necessary rock excavations for the last 22 feet of trench, with the result that, as shown on the accompanying plan, this length of pipe was not laid to the proper grade, but has a gradual rise from the eight-inch valve to the end of the pipe in the water. Mr. Grant points out that with the water end of the pipe gradually rising, the further the pipe was extended the nearer it would come to the surface, and as no bends or fittings were available he decided to carry the pipe only a short distance from the shore. In his letter to Mr. Waddy Mr. Grant recommends that the pipe be extended some four or six feet and by using a sixteenth bend correct the upward slope of the present intake.

COMMENTS AND RECOMMENDATIONS.

It should be pointed out that with this intake length of pipe not laid to the proper grade the danger from frost at the water end of the intake has been largely increased, and though it may not now, under the circumstances, be necessary to re-lay this section to the proper grade extra precautions will have to be taken each fall to protect this section of the intake from freezing. To provide a proper intake it will be advisable to have the present pipe extended some fifteen or twenty feet further into the river where, as shown on the plan, the end of the pipe will be in six feet of water at the present stage of the river and well out into the current. It will be noted that Mr. Grant fears that by extending the present pipe further than four to six feet out there will be danger of the outer end being broken by ice or other debris. If the pipe is properly covered with earth, brush and rock, however, no trouble from this cause need be feared. This covering will also provide a measure of protection from freezing, though an additional covering of brush and snow should be placed over the intake each fall.

In extending the pipe one of the following methods may be used in order that the extension will properly follow the bed of the river. (a). Putting on a ninety degree bend on the end of the present intake and with a short nipple connecting it to another ninety degree bend. By this means a flexible joint is secured and the necessary added extension of the intake can be raised or lowered as desired. (b). Flexibility can also be obtained by placing a flexible joint at the end of the present intake and the extra length of pipe can then be lowered to conform with

the bed of the river. As the ninety degree bends are cheaper than a flexible joint and more easily obtained the first method is probably preferable.

In taking up the question with Father Doyen it was agreed that owing to the lateness of the season it would be inadvisable to extend the intake during the winter, but as soon as possible next year after the high water had passed this work should be done. With reference to the contamination of the water caused from the remains of the manure left in the cofferdam, it was pointed out to Father Doyen that this must be fairly well diluted by now and with the forming of the ice this source of trouble should be considerably reduced. No sickness has been traced to the water supply but it was further pointed out to both Father Doyen and Mr. Waddy that it would be advisable to have an analysis of the water made and if from this analysis it was found that contamination existed then chlorine in some form should be used in the water supply until the intake is extended.

It may be stated with reference to this installation that this office was not requested to supervise the construction but only to submit a report and plans covering the installation. In July 1926, owing to the change in the location of the school, there appeared a discrepancy in the length of the suction main and the point of intake. Mr. Grant wrote to this office with reference to this matter and the undersigned immediately visited the school and discussed with Mr. Grant the location of the intake and the necessity of extending the intake pipe into the current and deep water. This was not done and the manure was not removed which is the cause of the present trouble.

RIVER BANK.

-5-

Another point raised both by Mr. Waddy and Father Doyen was the slipping of earth on the river bank along the line of the suction main. This sliding as shown in the accompanying photographs occurs a short distance south of the intake well and is taking place along a stretch about two hundred feet long. Though not agreeing with Father Doyen, who states that the whole river bank is slipping, the sliding which has occurred so far is quite serious in that any further extensive slip will endanger the suction main. The usual method adopted to overcome trouble of this nature would be to drive a line of piling, but as rock is likely near the surface a sufficient depth to make the piling secure could probably not be obtained. Another method would be by placing a stretch of rock-filled cribs on the river bank below which would provide a toe for the slipping to come to rest. Either of these methods would be costly and probably the cheapest and most satisfactory scheme is to closely watch the slipping and if there is danger of the pipe being broken to have this stretch relaid sufficiently far back to be out of the way of any trouble from this cause.

St. Phillips Indian Residential School,
Keesekoose, August 31st, 1927.

Dear Mr. Waddy:-

Your letter of Aug. 25th to hand yesterday with reference to the water intake and the senior boys dormitory first floor (not Junior boys) as per your letter, Guy Indian School.

Tell Father Doyen that it would not be to any advantage to extend the present pipe further in the river without first putting the present pipe down deeper, I will explain to you the reason that the inflow pipe is not down deeper in the water.

The inflow pipe coming from the well is down 5'6" below the lowest water level, this level was maintained for a distance of 65' of extra pipe 8" in dia, this pipe was laid at this depth for another two lengths 5' each. Owing to the rock formation in the river the last 22' of pipe had to be raised higher in the river. The contractor could not get the cofferdam tight to excavate the rock with dynamite as the water came thru the rock at the bottom and the pumps he had was not able to keep the water low enough to do the work, we could have added another length of pipe but the further we would go into the river at this level the less depth of water we would have at the end of the pipe. You will see by this that to gain an advantage you would have to lower the steel pipe in the river. Supposing you put a fitting on the end of the pipe to extend it out further in the river and to have the end of the length added, deeper in the water you would be working to a better advantage as your pipe would be in deeper and nearer the stream, but it would be no benefit to protect the pipe from frost in the winter, the supply of water is governed by the part of the pipe nearest the top of the water as it is an inflow pipe not a suction, without lowering the present pipe your best plan would be to put the fitting on, to turn the piece of pipe that you propose to add down in the deep water.

I have explained the particulars to Father Doyen that the trouble will not be now, it may be in the winter from frost unless the pipe is protected, I explained to him that at the late fall of the year as the water over the pipe freezes he will have to cover over the ice for a considerable surface with a good depth of straw or some other covering for a protection, during the very cold weather the river backs up owing to the shallow water in the channels freezing over, when this happens it ensures a protection for the pipe but previous to this taking place it would be wise to protect the pipe, The river will not get low enough to affect the water supply during the spring summer and early fall, the bottom of the pipe is down approximately 4' below the lowest water level taken in Sept. 1926 when the water was very low, that would make the top of the pipe 3'4" below the water at the low water level, you will see that if we had been able to take the pipe thru at the same level as the extra 65' there would be no danger from frost, should the misfortune happen that the pipe would freeze up on them in the river there supply would not be entirely cut off although it would be limited to a reduced quantity, Father

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Poor Copy

Doyen knows about this, this was the source from which we were able to maintain a water supply last winter while working on the intake. As I have pointed out to you that it be better to connect one sixteenth bend with a piece of pipe 4' long or longer if it is possible with the bend turned downwards, according to the depth of water would determine the length of pipe you should use, I would suggest that you do not use more than 4' or 6' of the pipe or you will have to protect it from been hit from ice or any other debris in the water.

I will prepare a sketch and write the particulars to the Standard Plumbing Coy., asking them to supply the required pipe as it is a screwed joint, you can forward the letter and sketch on to them with your requisition, if you decide to have this done.

Personally I do not think you will have the water low enough for Father Doyen to have this done this year. The reason that I am in favour of extending the pipe is to get nearer the stream and I would like to see the pipe longer than four ft, if it could be protected from all danger of been hit by something that would do damage.

With reference to the senior boys dormitory not having toilets wash basins and cuboards,

Kindly look thru the list of requirements that was asked for by the Principle and Sister and you will not find anything asked for this dormitory. The Sister mentioned about requirements in the way of cuboards but did not ask for any, kindly let them know this as I have all particulars of everything they asked for in the way of furnishings on file. With further reference to this dormitory about the basins and toilets there was no mention of this during the roughing in for the plumbing fixtures, you are aware that we installed hot and cold water basin in the principles room and cold water in the Indians room immediately under this dormitory, that was the time to speak to me about this when we were on the plumbing work, you will understand when we put the extra sinks in the drugrooms and drain in root cellar, toilet in the junior boys dormitory all this was roughed in with less expense when done at the proper time, had this been pointed out to me at the proper time I would have taken the matter up. This dormitory is for the senior boys and I do not see why there should be a run on the toilets during the night that they would require extra toilets, then there is baths and plenty of wash hand basins to spare in the basement, it would be easy to put in a wash basin as connections would be made from the principle's room, to install a toilet it would be very expensive compared to having it done at the proper time. The department was not approached for any work to be done in this dormitory, in fact the dept. did not authorize any of the extra work put in by the plumber that I have mentioned. I had this done myself as I could see that these several items were necessary and by having them done at the proper time it saved money, I am very much disappointed if the principle and Sister superior say they asked for this additional work to be done in this dormitory if they say so they are wrong, they received all it was possible for me to get for them,

with kind regards,

(Signed) Rod Grant.

Received to Mr. McLean
Attention Departmental Engineer.

Sir:

With further reference to my letter of October 14th, I enclose herewith a report received from Mr. Attwood on the water supply system at the Guy Indian Residential School in Saskatchewan.

You will notice that the trouble is not serious and the changes recommended are slight. The difficulty being due to the fact that the work was not carried out according to the plan prepared by our District Chief Engineer.

Mr. Attwood recommends that nothing be done until next summer. The principal of the school is in agreement with this, and I beg to recommend accordingly that the work be deferred until conditions are suitable for carrying it out.

Your obedient servant,

J. T. Johnston,
Director.

OFFICE OF
INDIAN AGENT

The Pas, Man., Dec. 6th, 1927.

6207/153

Dear Sir:

I have the honor to enclose report of my visit last week to Guy Indian Residential School.

In addition to the report on the class rooms etc. the Principal drew my attention to the following matters:

He asks for 30 feet $1\frac{1}{4}$ " hose pipe, for use in the engine room, with $1\frac{1}{2}$ " iron "T". He also asks for one dozen bushings, size from $\frac{1}{2}$ to $1\frac{1}{2}$ " for use in the engine room.

The Fairbanks Morse pump requires two valves $\frac{1}{2} \times 2\frac{1}{2}$ " 5/16 stem, and one piston rod. The piston rod broke and has been temporarily repaired by the blacksmith; it should be replaced.

The arch in the oven fell in on the day of my visit to the school, through some fault in the construction, but the blacksmith states he can rebuilt the arch if supplied with brick. He asks for fifty fire brick, one hundred clay brick, two sax fire clay and two sax lime.

He also wants rings for the engine which operates the electric light plant.

I am, Sir,

Your obedient servant,

Colvady
Indian Agent.

Asst. Deputy & Secretary,

[Handwritten signatures and initials]

The Pas, Man., Jan. 10th, 1928.

Dear Sir:

I have the honor to report that the Principal of the Guy Indian Residential School has asked me if anything will be done towards extending the water intake at the school this winter. He thinks that if it is to be done the best time would be when the weather gets warm in the latter part of March when they could cut a channel in the ice and lower in the necessary pipe.

I am, Sir,

Your obedient servant,

Sir,-

Replying to your letter of the 10th instant, concerning the proposed extension to the water intake pipe for the water supply system at the Guy School, I beg to say that it has been arranged between the Principal and Mr. Attwood of the Dominion Water Power Branch at Winnipeg to have this work carried out as soon as convenient, in accordance with the report prepared by Mr. John Craig, of the Dominion Water Power Branch also of Winnipeg, last November. You may therefore communicate this information to the Principal of the School.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

OFFICE OF
INDIAN AGENT

The Pas, Man.

Feb 29th 1928.

6386-153

Dear Sir:-

I beg to report that the Principal of the Guy Indian Residential School has asked to be supplied with a long list of unions, valves, nipples, couplings, tees, pipe and pipe taps to amount of \$100.00, I got a price placed on the list he submitted.

The explanation with request is that there is no stock of these articles on hand in case of breakdown of water system, and they have had some repairs already to do. I do not like recommending anything further at this time of year, and we have the school pretty well supplied already, but they have a first class mechanic at the school and if he saved only one trip of a plumber from town here he will repay this account over and over, so under the circumstances it appears that the request should be granted.

He also asked me to supply \$25.00 of stain, oil, hinges, hooks & eyes etc for completing cupboards. I have sent in so many final requisitions for these cupboards that I will recommend no more, I was handed what I was told the final one last August and sent it to the Department as such. However, if it is considered that this material should be supplied I know it will not be wasted.

Your obedient servant,

Indian Agent.

Ottawa, March 7, 1928.

Sir:

I have your letter of the 29th ultimo, relative to the request of the Principal of the Guy Indian Residential School to be supplied with unions, valves, nipples, couplings, tees, pipe and pipe taps, and also to be supplied with a quantity of stain, oil, hinges, etc., for completing cupboards.

In reply I beg to say that you may purchase the articles required for the water system to an amount not exceeding the sum of \$100, and you may also purchase and have forwarded the material required to complete the cupboards to an amount not exceeding approximately \$25. Please forward an itemized account, in duplicate, properly certified covering the cost. The articles for the water system are to be kept in stock at the school for use in case of a breakdown. Any further replacements will have to be made by the school authorities from their per capita earnings or other receipts. Regarding the material to finish the cupboards, this is the final equipment that can be supplied for this purpose.

Your obedient servant,

A. F. MacKenzie

EXTRACT FROM REPORT OF MR. INDIAN AGENT WADDY,
for the month of March, 1928, on the Guy
Indian Residential School.

Original on File 132-7-7.

The galvanized smoke stack from the boiler to the chimney had not been cleaned and was full of soot, a fire risk. There was not way to get into it so I am sending up a sheet of galvanized iron with flanges and after it arrives the blacksmith will cut out a hole in the smoke pipe, clean out the soot, and then place the galvanized sheet around the pipe with the flanges to attach same so it can be got at when required.

X X X X X X X X X X X X X X X

The fire escapes are in good shape, but the Sisters carry the keys to the doors on same. In case they are away if a fire comes the pupils have no chance to escape. Would it be possible to supply them with four boxes containing an axe such as we see on trains, then the youngsters have a fighting chance to batter down the doors in case of necessity. These boxes could be placed near the escape doors.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, April 5th, 1928.

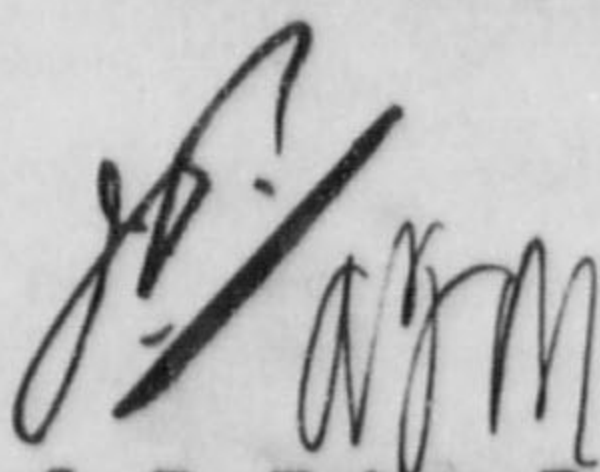

Sir:

Relative to your report for the month of March, last, on the Guy Indian Residential School, it is noted, with reference to the galvanized smoke stack from the boiler to the chimney, that you are having same cleaned and that you are arranging with the blacksmith at the school to carry out the necessary arrangements to make this smoke stack easy of access for cleaning purposes in future.

Relative to the fire escapes, it is noted that the Sisters carry the keys to the doors leading to these escapes. It is considered that some arrangement should be made by the staff to see that the keys are readily accessible in case of fire, so that there would be no delay in reaching the fire escapes.

The Department approves of your suggestion that 4 boxes, with glass fronts, each containing an axe, be installed near the doors, and you may arrange for the purchase and installation of this equipment. No unnecessary expense should be incurred, and when the boxes have been installed, you should forward an account, in duplicate, properly certified, covering the cost.

Your obedient servant,

A. F. MacKenzie,

Ottawa, April 13, 1928.

Reverend Sir:

His Lordship Bishop Charlebois, who visited the Department today, requests that equipment be supplied for the drying of clothing at the Guy Indian Residential School. This improvement involves a considerable sum of money and the Department is making a note for next year's Estimates. An effort will be made to secure an appropriation for a drying tumbler with the necessary boiler.

Your obedient servant,

A. F. MacKenzie

DOMINION WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT.,

April 21, 1928.

Sir,

I have received your letter of the 19th instant concerning the repairs required to the water supply system of the Guy Indian Residential School at Sturgeon Landing, Saskatchewan, and in accordance with your instructions will arrange to have the proposed work carried out as nearly as possible in accordance with the report prepared by Mr. J. Craig of this service.

You will remember that the difficulty with regard to this water supply system arose from the fact that the contractor did not carry out the instructions given to him by Mr. Craig, and as our engineers were not authorized to supervise the work while it was being done the defect was not discovered until after the trouble arose.

To avoid this difficulty in the present case I am asking Mr. Attwood, our District Chief Engineer at Winnipeg, to arrange to have the work supervised so that it may be carried out in accordance with Mr. Craig's recommendations, and I trust that this action will meet with your approval.

Your obedient servant,

J. T. Johnston,
Director.

Dear Sir:-

I have the honor to report that the Principal of the Guy Indian Residential School asks to be supplied with about \$5.00 of kalsomine to renovate the hallways of the school. He expects a visit from the Superior General of the order very soon and wishes to have everything tidied up prior to her visit.

Sir:

I have your letter of the 30th ultimo, relative to the request of the Principal of the Guy Indian Residential School to be supplied with kalsomine to the cost of about \$5, to be used in renovating the halls of the school.

In reply I beg to say it is considered that this material should be purchased by the school authorities from their per capita earnings or other receipts, and you should advise the Principal accordingly.

Your obedient servant,

A. E. MacKenzie,
Acting Asst. Deputy and Secretary.

Sir:

I wish to refer to your 5887-153 of August first, last, which is relative to improvements at the Guy Indian Residential School. Funds are now available for the erection of some small outbuildings, and you should secure from the Rev. Principal a proposal, with estimate, concerning the carpenter and blacksmith shop and a small house for a member of the staff. At one time there was also a request for a hen house. Please ascertain just what outbuildings are required, have the cost estimated and indicate how much of the labour can be provided by the school management.

Your obedient servant,

T. R. L. MacInnes,
Acting Asst. Deputy & Secretary.

MEMORANDUM

Dr. Scott, -

With reference to Mr. Wyatt's claim for a balance due on his contract for the erection of the Guy School, I find that an item of \$500.00 for extras in connection with the water system was included in the amount of \$19062.57 allowed for extras, but when certificate No. 8 was issued, ~~the~~ payment of this amount (\$500.00) was withheld pending further explanations which were requested on the 14th September 1927. Satisfactory explanation was furnished by Mr. Wyatt and subsequently certificate No. 9 was issued on the 28th October 1927 for the sum of \$500.00, which would appear to complete payment in full of Mr. Wyatt's claim. There is an item however inserted in Certificate No. 9 which seems to complicate the matter, and I am inclined to think that this was only inserted by way of explanation for the \$500.00 in question. This item reads as follows:- "Extra work \$500.00 (rock excavation for clearing of channel to divert additional water towards intake water supply system, 100 c.yds. at \$5.00 a yard)" and this amount was added to the sum of \$111,297.57, thus showing the total amount of Mr. Wyatt's claim to be \$111,797.57. I cannot find on the file any correspondence showing that work on this channel to the amount of \$500.00 was made twice. I regret that I cannot throw any more light on this subject.

July 10, 1928.

Dear Mr. Wyatt,-

I have to acknowledge the receipt of your telegram of yesterday's date, in answer to my wire, which was occasioned by one from the Minister.

As you are aware, I am leaving for the West tonight, but I have asked the Architect to give you copies of all the certificates issued on this contract. I have looked into them myself, and I am satisfied that the \$500.00, which I presume was the "extra" for clearing the boulders out of the stream, has been paid. It appears in a list of extras amounting to over \$19,000.00 which were allowed. We have no trace whatever of an inspector's certificate for \$288.43; perhaps you may be able to give us a copy of this certificate. As for the interest charges, we refused them because claims of that nature are never allowed and, as a matter of fact, I did not bring the matter to the attention of the Minister at all. Now that you have brought it to his notice I shall be very pleased to discuss it with him when we are at headquarters again and give him a full statement of your arguments in support of the claim. If you have anything to add to what we have on file I should be glad to receive it. On the other two items I hope you will, if necessary, correspond with the Acting Deputy who may be able to deal with them before I return.

Yours very truly,

July 10th. 1928.

Dear Mr. Stewart,-

I beg to acknowledge the receipt of your letter from Winnipeg of July 6th and your telegram of July 7th. I have arranged to stop over at Kenora and see the proposed site for the new Residential School and have wired the Mayor to expect me.

I have looked into Mr. R.N. Wyatt's claim and am enclosing a copy of a letter I have sent him. When I received your wire I telegraphed him for a full statement of his claim and you will see that my reply deals pretty fully with the questions. His claim for interest was based on the assertion that our Inspector delayed unreasonably forwarding certificates and, therefore, the contractor was compelled to pay larger interest to the bank than should have been necessary. I do not think a claim of this nature has ever been allowed but I have promised to bring the matter to your attention and discuss it fully.

Mr. Brown's claim is based on the alleged fact that he received misinformation from some source that mislead him as to the distance of the site of the school from the railway etc. etc. His specification states that he must visit the site and make all investigation for himself. I think you will remember that Brown has not a very high standing so far as this Department is concerned. We will of course be fair and reasonable with him but we cannot recognize a claim which is on such a flimsy basis.

Yours faithfully,

CS
Hon. Charles Stewart,
Superintendent General
of Indian Affairs,
Edmonton, Alta.

INTRODUCTORY.

Following the submittal of a report, dated November, 1927, on the water supply of the Guy Indian Residential School at Sturgeon Landing, Saskatchewan, by Mr. John Craig, of the Dominion Water Power and Reclamation Service, it was decided to extend the intake pipe twenty feet as was first proposed. It was also decided that the work should be supervised by an engineer from the Winnipeg District Office. Under instructions dated June 16th from Mr. C. H. Attwood, the undersigned was given charge of the laying of this extension to the intake pipe. Three men were engaged for the work which was completed in five days.

In addition to the extension of the intake pipe the instructions covered the following matters:

- 1 - Examination of intake well.
- 2 - Examination of bank slide along suction pipe.
- 3 - Condition of sewerage system.
- 4 - Examination of water pipe from school to barn.

A general plan of the Guy Indian Residential School showing the extension of the intake pipe, together with photographs are appended.

EXTENSION OF INTAKE PIPE.

Since the existing intake pipe from the eight-inch valve to the outer end was not laid to grade but slopes upward, the extension of the pipe involved a change of direction downward following the bed of the river. A flexible joint at the end of the existing intake would have been the best method of making the connection but one of the required size was not readily available. The method

adopted was to make, in effect, a flexible joint out of two ninety degree elbows connected by a short nipple.

The laying of the pipe comprised the following operations:

1 - Unwatering existing Intake.

A cofferdam extending ten feet out from the shore and enclosing the existing intake was constructed. Difficulty was experienced in pumping out the water on account of water "boiling" up through the mud bottom from crevasses in the rock below.

2 - Connecting Extension.

As soon as the water was lowered sufficiently, the intake screen was removed and a ninety degree elbow screwed on. A short nipple was screwed into the elbow and the second elbow connected to it. Twenty feet of 8-inch steel-pipe, in three sections, were connected to the elbow, and after cleaning, the intake screen was connected on.

3 - Lowering Pipe.

After demolishing the cofferdam the new pipe was propped into an upright position and lowered, by means of a rope over a tripod, into place. The pipe was worked down into a mud bar in the bed of the river but it extends beyond the mud bottom into the current where the river bed is composed of limestone. The end of the pipe, i.e., the intake screen, is held up one and a half feet above the bed of the river by the above mentioned bar.

ADDITIONAL MATTERS.

1 - Examination of Intake Well.

During the construction of the concrete intake well two short lengths of pipe were placed through the wall to drain ground water away from the unset concrete mix. It

was stated that these ground waters were contaminated by manure placed around the outside of the well. The water was tasted but no taste of manure was found. Father Doyen, the principal of the school, was most emphatic that no manure had been placed around the well. The pipes were then plugged with tamarack wood.

2 - Bank Slide along Suction Pipe.

During the construction of the intake a small gully, which crosses the suction pipe, was filled in to make a road. The consequent damming of water at this point was probably the principal cause of the slide for since the placing of a culvert at this place last year no sliding has occurred. Photographs showing the present conditions are appended.

3 - Condition of Sewerage System.

The principal of the school was interviewed regarding the condition of the sewerage system, the cess pools and the outlet examined. Everything was found to be in good working order. A photograph of the outlet is appended.

4 - Water Pipe from School to Barn.

The water pipe which supplies the barn with water is out of commission on account of being frozen last winter. This line is a three-quarter-inch galvanized iron pipe which was laid five feet below the ground surface. The ground through which the pipe runs is a hard-packed sandy soil being part of the boys' playground. It was suggested to the principal that the pipe should be laid nine feet below the surface, boxed and insulated.

CONCLUSIONS.

The intake well and tank were cleaned out and, after a thorough flushing, the water was found to be clear and palatable.

It is noted that since the section of the intake pipe from the eight-inch valve to the double elbow joint was not laid to grade, extra precautions will have to be taken each fall to protect this section from freezing. The principal of the school was advised of this condition.

Sir,-

In further reference to your letter of April 19th, I enclose herewith a report received from our District Chief Engineer at Winnipeg, on the Extension to the Intake Pipe to the Water Supply System of the Guy Indian School at Sturgeon Landing, Saskatchewan, which has now been completed. You will note that the system has been inspected and appears to be in good working order.

Your obedient servant,

J. T. Johnston,
Director.

Honorable Sir:-

Please find attached to this letter
the return of labour for the work done in the water
line from the school to the stable. The distance is
of 227 feet. Those indians working in it certainly
did their very best to dig that distance 9 feet deep
as you required it to be done on your visit .

I was the inspector of that work, as for the construct-
ions of the outbuildings: carpenter shop and hen house.
The frost was found at 7 and 8 feet deep. At 9 feet, Mr
Tuchs put the water pipe into a box made of shiplap and
filled with saw-dust. I hope we wont have any more diffi-
culty about it.

Yours sincerely,

MEMO FOR FILE:

When I was at the Guy Indian Residential School this summer, I took up with the Principal the matter of outbuildings. The most urgent is an implement house, and it should be supplied in 1929. In addition, some type of drier, perhaps steam, should be allowed. In 1930-31, an Indian house and an ice house should be erected. I have made a note for estimates.

R

Honorable Sir:-

When you hired Mr Charles Rush and Sam Hoey for
carpenter work on the outbuildings, you were told by his
lordship Charlebois that we were willing to board them at
the school; and this was understood by them. But on the
30th of July they started boarding themselves across the
river without any reason, asking me to pay them \$10.00 and
\$7.50 per day. Would you accept this?

The hen-house is quasi finished. For the carpenter house,
they are working on the roof. Next week I will be able to
send you all the bills for the material.

Could you, please, let me have a few blank forms for return
of labour?

Also can I ask you for a grass mower and a potato digger?

Children are all coming back from vacation. I hope
this year will be another for progress.

Yours obligingly, *Rev. Napoleon Doyon, C.M. P.*

August 1st, 1928.

Honorable Mr Russell T. Ferrier,
Supt. of Indian Education,
Dept. of Indian Affairs,
Ottawa

R

Honorable Sir:

As there is no more mosquitos.....in the country, I have a good chance to obtain what I am aiming at; not an automobile, but something necessary for our school.

The carpenters are on the job since one month. The hen house is quasi completed; the carpenter shop is not so much advanced: The cement foundation and the frame-work are done. The work is very good though slow, I imagine. However I think that you will be satisfied, as I am until now.

I am going to ask you to-day if it will be possible to have pretty near half of the second floor well finished so that we could make a sheemaker room. This will be the only place we can find for. Mr Rush told me that he can make that room very comfortable for wintertime. Also would you allow us with having electricity in carpenter shop?

Few days ago I ordered at The Pas some lumber for ordinary use around the school; and I see that I will be obliged to order some more: 40 2x4x14; 40 2x4x14; 500' rough lumber; 300' ship-lap; 8 4x4x16 oak; 8 1x4x16 oak (to make a bench saw); 250' flooring 250 lin. ft 1/4 round (for repair).

Can I order the lumber necessary to double the implement shed? and have Mr Rush and Hoey to built it?

Can I order one swing at Eaton's for the sisters as it will cost less than to have it made here?

About the cement epron we were talking about on your last visit and fixing the walks in front of the building, would you agree with me if I put Mr Fuch as the foreman and the Dept. will ~~pay~~ the three other hired man? I have 70 bags of cement left for that pur-

Sturgeon Landing, SASK..

---2---

pose, and enough gravel, I think. I hope this will be satisfactory to you, because you know that I have a lot of other expenses to stand with, for in the fall I would like to open at least two acres of land to advance the work and continue the progress of this school. Our hay is all flooded this year; so I will be obliged to go and have hay cut at seventeen miles from here.

About the barge, you know the necessity of having one. The Pas Canoe would charge \$438.50 for one kind and \$375.25 for another kind. Will it be possible for your Dept. to stand that expense?

I hope, honorable Sir, that you will continue your kindness to me knowing that I am doing my very best for the prosperity of the school. With your kind support, I did very much as everybody says, and I am very willing to go farther yet. This school is yours; also I want to put my share in it, remembering what you told me: help us and we will help you. This is the hardest time for you bearing expenses of all kinds; but it would not be very long now, as I can see.

Hoping to hear favorably from you, I beg to remain yours truly,

Napoleon Doyon, C. M. S.
Principal.

Ottawa, August 24, 1928.

Reverend Sir:

I have your letter of the first instant, addressed to Mr. Ferrier, with reference to progress on the outbuildings at the Guy Indian Residential School. I note that you would like to finish the second storey of the carpenter shop for a shoemaker's room and that you would like to light the building by electricity. You might let me have an estimate of the cost of this special finishing and the electric wiring.

You may purchase the lumber necessary to complete the implement shed and you may have the two carpenters do the work. You may also engage three labourers who, under the direction of your Mr. Fuch, will use the 70 bags of cement which you have for the cement apron around the building and the walks in front.

I regret there are no funds available for the purchase of a barge at the present time. You may order one swing for the playground from the T. Eaton Company and, when the equipment is received, you should forward a properly certified voucher, in duplicate, to the Department for payment.

I have to acknowledge receipt of the labour return which you enclosed, which covers the wages paid for the painting of the barn. A cheque in reimbursement will be directed to you.

*Sent
aug 24/28*

I have also your letter of the 15th instant, with reference to the two carpenters who were engaged for the hen-house and carpenter shop at the school. From the time they commenced boarding themselves across the river, it will be satisfactory if you pay Charles Rush and Sam Hoey \$1.00 and 75¢, respectively, per hour. You should put them on the labour returns, commencing August first, at the new rate. Under separate cover, there is being directed to you a supply of labour return forms.

I regret that potato diggers are not supplied to Indian residential schools, but I am pleased to authorize you to purchase a lawn mower at an estimated cost of \$20. A properly certified account, in duplicate, should be forwarded to Ottawa for payment.

Your obedient servant,

A. F. MacKenzie

Dear Sir:-

Receiving your letter No 132-7-5, re chicken fence, I looked over on the Catalogue on hand, and I found that for a good fence that will fit the new building with its surroundings, the cost should be about \$180.00. As I am going to receive 100 chickens at the beginning of Sept., I would be grateful if you could possibly arrange every thing for that purpose.

Yours very truly,

Rev. Napoleon Doyon, P.M. 9.
Principal.

Guy Indian Residential Boarding School,
Sturgeon Landing, SASK..

Sept. 7th, 1928.

Mr. A. E. Mackenzie,
Acting Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa Ont.

Dear Sir:-

Please find enclosed several accounts ~~that~~ for which I will be please to receive payment as soon as possible. Honorable Mr Ferrier agreed with all those expenses when he came and visit the school in June.

We used the saw dust for the root-cellar and the hen House. The lumber was used for ordinary needs of the school. In fact the carpenter took pretty near all for the outbuildings.

Mr Ferrier advised us to buy the granery.

A
About the transportation of children during holidays, I made out to the Dept. in July, an account for \$100.00. As I did not receive any payment yet, I put the whole account to-day.

Hoping to hear from you, I remain

Yours very truly,

Rev. Napoleon Dayon, C. d. d. f.
Principal.

CANADA

OFFICE OF
INDIAN AGENT

The Pas, Man.
September 18th, 1928

31-153.

*I told him he
should purchase it
from Sch funds.*

Sir:

I have the honor to report that the Principal of the Guy School states that Mr. Ferrier informed him that he might purchase a still to distill water for the batteries used in the electric light plant at the school.

Father Doyon tried to purchase this still in Winnipeg, but was informed that this could not be sold to him without an order from the Department, as the Mounted Police would make trouble for the firm if they sold it without authority. If the Department gives this authority to Father Doyon, I would be obliged if they would confirm it by a letter, which can be shown to the Mounted Police.

Your obedient servant,

[Signature]
Indian Agent.

Sir:

I have your 21-153 of the 18th instant, with reference to a supply of distilled water for the electric batteries at the Guy Indian Residential School.

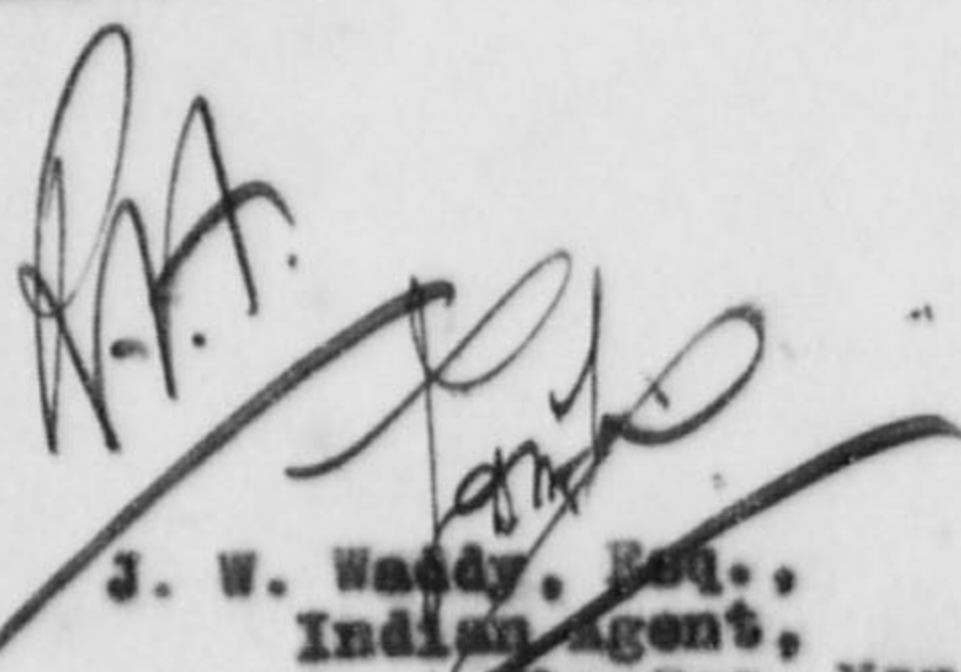

Whereas distilled water must be used for this purpose and the school in question is distant from sources of supply, this letter conveys departmental sanction for the use of a still for the one purpose of distilling water. I am enclosing a copy of this letter for your file, so that the original may be given to Father Doyon. It is understood that the cost of this special equipment is a charge on school funds.

Sept 11
Mr A. F. Mackenzie,
Acting Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa Ont.

Dear Sir:-

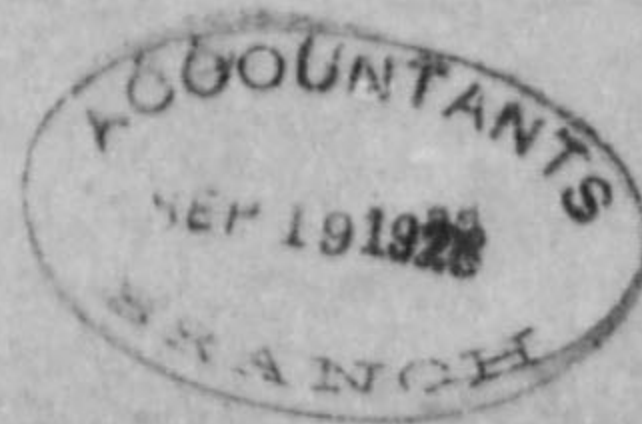

Please find enclosed the account for the engineer
house that was built last fall, and painted lately.

When Mr Ferrier was here I explained to him the reasons
why we had that building fixed up and he agreed for pay-
ment of the expenses. About the labour, I did not want you
to pay the work of Mr Fuchs, engineer, who work over one
month on that house. I am sending only the account of those
who help him. I hope you will be satisfied and will be
glad to pay me back those expenses.

Yours obligingly,

Rev. Napoleon Doyon, O.M.I.
Principal.

*I suggested he send
in the acct. & the
Dept. would consider them

DEPARTMENT OF INDIAN AFFAIRS
CANADA

September 28, 1928.

Memorandum:

Approved
DR. SCOTT.

When I was at the Guy Indian Residential School this summer, the Rev. Principal asked if the Department would reimburse him for expenditure in connection with a house for the school engineer. This building was erected in the fall of last year. I advised that he forward his receipts to the Department for our consideration.

Receipts are now to hand, showing the following expenditure:-

Lumber	-	\$545.80
Hardware	-	20.00
Paint	-	23.50
Freight	-	96.87
Labour	-	101.57
Total	-	<u>\$787.74</u>

Funds can be found to assist with this expenditure, and I wish to recommend that the Department reimburse the Principal for the cost of the materials used - a total of \$589.30. The Principal would then be responsible for the freight and the labour, amounting to approximately \$200.

Luella A. Ferrier
Supt. of Indian Education.

Reverend Sir,-

I have your letter of the 11th instant enclosing receipts showing the expenditure in connection with the engineer's house at the Guy Indian Residential School. I am pleased to inform you that the Department has decided to reimburse you for the materials used and a cheque for \$589.30 is being directed to you under separate cover.

Your obedient servant,

J. D. McLEAN

OFFICE OF
INDIAN AGENT

The Pas, Man.
September 26th 1928.

57-153

Dear Sir:-

I have the honor to report that the Principal of the Guy Indian Residential School asks for \$100.00 lumber for general repairs to the school. He also asks for oak to amount of about \$40.00 for making swings for the children and to make a bench for the wood saw.

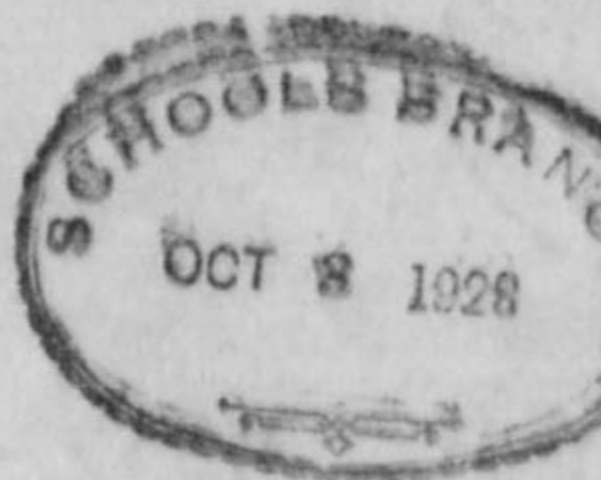

He also asks for a visit by a dentist to attend to the children, many of whom require the service of a dentist.

He also requests that a toilet and basins be placed in the boys dormitory on the first floor, plan of same is enclosed. This matter was taken up with the Department before, but we could not see where these repairs could be put in without tearing up too much of the building. The mechanic at the school has figured out how this can be done and I have got an estimate from a plumber of \$200.00 for the material and work as per list given me by the Principal, this should cover the work, but repairing torn out part of the building will add to the cost. However, the boys in this room should have basins and toilet and I beg to recommend that these be allowed.

Your obedient servant,

[Signature]
Indian Agent.

Ottawa, October 5, 1928.

Sir:

I have your 57-153 of the 26th ultimo, with reference to requests of the Rev. Principal of the Guy Indian Residential School. You may order \$140 worth of lumber for the general repairs, for making swings and for benches. You may also arrange for the installation of a toilet and wash basins in the boys' dormitory on the first floor, at an estimated cost of \$200. The school should be responsible for repairing the carpenter work after the equipment has been put in position. I am returning the plan which you forwarded with your letter. When the work has been satisfactorily completed, you should forward a properly certified voucher, in duplicate.

Your obedient servant,

J. D. McLEAN

long it will be necessary to have a wall erected so as to prevent this. The septic tank, which is close to the river, was exposed this year by the running water, and at the time of my inspection, the Rev. Principal was having a stone wall erected some 10 ft. away from the tank and intended to fill this in with dirt so as to protect it.

The school is provided with a staff of 10 Sisters, 2 Brothers and one mechanic, besides the Principal. Excellent work is being done and I believe the children receive the best of care. *Dr. H. Hamilton*

COMMISSIONER'S OFFICE,

R

IN YOUR REPLY REFER TO

NO. 205-11

ED

REGINA, SASK. October 24th, 1928.

ALSO TO DATE OF THIS LETTER

Dear Mr. Graham:-

I beg to submit the following report on the schools of The Pas Agency, which were inspected between September 8th and September 24th, 1928.

GUY INDIAN RESIDENTIAL SCHOOL.

The school is situated close to the river at Sturgeon Landing, which is a trip up the Saskatchewan of about 24 hours by steam boat from the town of The Pas. The building was erected some two years ago, and is under the supervision of the Roman Catholic Church.

The school building is a very fine structure and modern in every respect. The dormitories are large and bright and were well ventilated. There are three classrooms, which were bright and well furnished. The sewing room, laundry, dining room and playrooms are all bright and airy, and the building throughout was spotlessly clean.

The children enrolled number 108, there being 44 girls and 64 boys. The children were all clean and tidy and appeared quite healthy. The Rev. Father Doyon informed me that during last winter he had a great deal of sickness at the school, but at the present time the children were in good condition. Some children, I understand, have been discharged; the Doctor considered these unfit to stand school life.

The three classrooms were visited and

I was delighted with the work. The children spoke out well

well and appeared to understand their studies. The windows were not open in some of the rooms and I took the opportunity to point out the necessity of keeping plenty of fresh air provided, even in the cold weather.

The school is well supplied with fire equipment, all of which is in good condition. I would, however, point out that the low platform of each fire escape is about 8 ft. from the ground and the children must jump off this on to the ground. This would be very dangerous in case of a fire as the children would no doubt be shoved off by those coming behind and would pile up on the ground beneath the fire escape. An extension reaching to the ground should be provided and this could be hinged on to the platform and raised when not in use.

The barn is situated about 200 ft. south of the school and is in good repair. The chicken house is new and is well built. A machine shed and workshop was under construction and no doubt would be completed within a few days.

The root cellar is built about 100 ft. north of the school. The walls are cement and the roof is covered with poles and dirt, over which is a board roof, covered with roofing paper. Apparently the cellar gives satisfaction as there still remained a few old potatoes and these were quite good.

The school garden consists of about five acres, largely potatoes, although practically all other vegetables were to be found. The garden was well kept

GUY INDIAN RESIDENTIAL SCHOOL (CONT'D.)

kept and the vegetables showed excellent growth. No frost had occurred at the time of my inspection.

Five cows are kept at the school, but they were in poor condition and, in fact, appeared to be a poor dairy type. Hay is hard to get as the country is all bush and swamp. The Principal claimed he had 60 loads, but in order to get it he was obliged to go a distance of nearly 20 miles. It is impossible for the five cows to provide milk sufficient for 108 children, as well as a staff of 12 or 14. If more cows cannot be kept, the milk supply could be supplemented by powdered milk. I believe milk added to the children's diet would be of great benefit.

Fish are caught and stored for winter use and, in addition, the children sometimes get moose and beef.

In the summer it is practically impossible to keep meat as there is no ice house. Here, where food must be secured in quantity, an ice house is badly needed.

The Rev. Father pointed out that many of these children come to school a distance of from one to five hundred miles, and when the parents come, as they sometimes do in the winter, there is no building in which they can be accommodated. A small house consisting of two rooms would be ample and would not entail a large expenditure.

I would also point out that the river bank in front of the school is washing away and before long

a building could be put up at little expense. I should think the school would be glad to do this for their own satisfaction, but a small grant might be made. A log house would be much better than a frame building and \$200.00 should supply this if the school would render some assistance.

COMMISSIONER'S OFFICE,

D REGINA, SASK., Nov. 7th, 1928

Dear Mr. Scott:-

I beg to forward herewith a report on the various schools in The Pas Agency, which were visited by Mr. Inspector Hamilton during the month of September.

*Exhibit
132-7-14*

In connection with the Guy Indian Residential School I note what the Inspector says regarding the height of the fire escapes from the ground. This, no doubt, is in accordance with the Department's regulations. / I would particularly draw your attention to what the Inspector says regarding the type of cows that are kept at this school, and also the small number that are kept. This, to my mind, is a very important matter. Indians are subject to tuberculosis and unless they get proper and nourishing food, milk in particular, they will fail. As a matter of fact, under the best of conditions they cannot stand confinement as well as White children, so the Department should insist on the proper number of cows being kept at this School. Of course, if there is no way of producing feed for these cows it is another matter, but I have no doubt there is a means of supplying the necessary feed or the Department would never have built a school at this point. These children will be under-nourished unless they get milk, especially where fish forms a large part of the diet. / You will note the Inspector points out that they have no means of providing storage for meat in the summertime. I do not know that there would be much meat kept there if there are no animals around the place, and if the meat comes in in small quantities in the summer months an ordinary ice house built of logs would meet the requirements. I would also draw your attention to the Inspector's remarks regarding accommodation for Indians visiting the school. This is a small matter. There are all kinds of logs close to the school and -a building-

Ottawa, November 15, 1928.

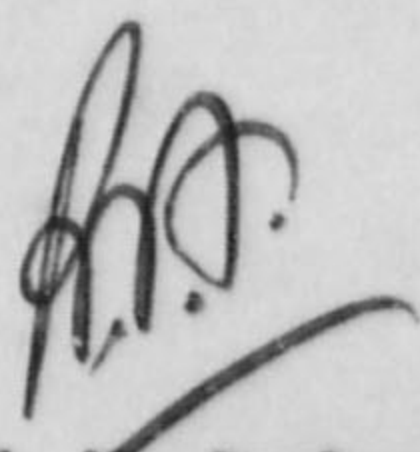

Sir:

I am directed to acknowledge your 205-11 of the 7th instant, enclosing Mr. Inspector Hamilton's report on the schools in The Pas agency. Arrangements are being made to supplement the milk herd at the Guy Indian Residential School. An item will be placed in the Estimates for an ice house. The Department is suggesting that the Principal get out logs and build a house for visiting Indians.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy & Secretary.

End

Ottawa, November 15, 1928.

Sir:

It is represented that a house for visiting Indians is needed at the Guy Indian Residential School. The Department considers that a log building would be suitable for this purpose, and I have to ask you to suggest to the Rev. Principal that he get out the logs, erect the building and then requisition to the Department for the necessary finishing lumber and hardware.

The need of an ice house at this school is known to the Department, and an item is being placed in our Estimates for submission to Parliament. Please inform the Rev. Principal.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy & Secretary.

Ottawa, November 26, 1928.

Reverend Sir,-

With reference to your letter of the 23rd July and labour returns therewith submitted for work done in connection with the Guy Indian Residential School, I have to point out that the first three items on the list dated 30th June are incorrect. An overpayment of \$1.00 was made in connection with each. You should, therefore, lose no time in obtaining refund to the amount of \$3.00, which money you should forward to the Department.

Yours truly,

F.H. Paget
Chief Accountant.

WINNIPEG September 18/28

R

R. Gurney Orr, Esq.,
Architect,
Dept. Indian Affairs,
Ottawa, Canada.

Dear Sir:-

I have your letter of Sept., 13 and in reply will say in estimating the cost we allowed for an extra plasterer and painter, also the moving of the materials from the basement to store house, which we had to construct on the outside of the building, this we estimated would cost FIVE HUNDRED DOLLARS extra, to which your Inspector agreed at that time. You will note that to ship men from Winnipeg cost considerable money for fares and expenses, which we had to do in this case.

Trusting this information will make this matter clear to you.

Received plans for the School at Kenora, but no specification. Would be pleased to have these sent along.

Yours truly,

*To cost of for my

R

OFFICE OF
INDIAN AGENT

384-153.

The Pas, Man.
December 27th, 1928.

Sir:

I have the honor to enclose report of my visit to The Guy Indian Residential School.

In addition to the formal report, I wish to say that the water intake at this school is working satisfactorily at present, although there was only about two feet of water above the intake and there was some danger of frost on this account, but Father Doyon had a large supply of moss hauled to cover up the place.

The Bootmaker's shop and the Carpenter's shop are being finished at the present time.

The Sewer outlet is exposed as the water has fallen away from that part of the River bank, however, I do not think we will have any trouble from the frost on this account.

There are 350 cords of wood on hand at the school, and the Principal is preparing for next winter stock at the present time.

For recreation the children have been supplied with skates and they certainly enjoy skating around the big lake which is in front of the school.

Mr J.W.Waddy, Indian Agent.

The Pas MAN..

Dear Sir:-

Regarding the report made by Inspector Hamilton to the Dept. of Indian Affairs, stating that the number of cows kept at our school is not quite sufficient to supply enough milk for all our pupils, I would say that it will be possible to keep more cows if only we had a more powerful engine and a barge to transport horses and implements to 17 miles from the school where we could cut enough hay to feed 15 cows. This hay could be hauled part in the fall and in winter time. Will this solution be satisfactory to the Dept?

Yours truly,

Rev. Napoleon Deyon, D.D.C.P.
Principal.

Dear Sir:-

As I was requested last Summer by Honorable Mr Ferrier to make cement rails in front of the school, I would ask the Dept. if he is ready to send to the school the necessary material: 125 bags of cement, (so that) and pay the labour work, so that we could start on the work as soon as possible in May. To say that I am ready to do my share on this kind of work, I am ready to freight from The Pas 75 bags of that cement.

Yours truly,

Rev. Napoleon Lignon. D.M.S.

OFFICE OF
INDIAN AGENT

The Pas, Man
Jan 11th 1929.

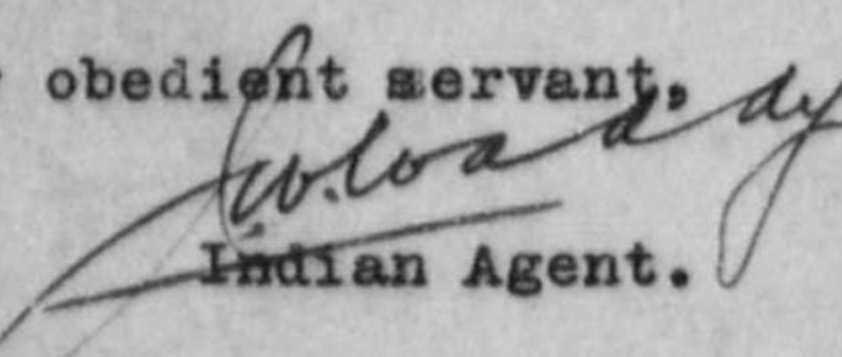

Dear Sir:-

I have the honor to enclose two letters from the Principal of the Guy Indian Residential School.

One letter refers to his solution of the shortage of feed at the school in the future, he asks for a large boat and barge. He was talking to me about this; he would also use the outfit to haul his freight from The Pas. I asked him if he had a boat in sight and he said that Mr. Hayes at Sturgeon Landing wanted to sell his boat and barge for \$3,000.00 some time ago but would now accept less. The cost of such an outfit would therefore be about some such figure.

The other letter asks for supply of 125 bags of cement to make railing around the front of the school, he offers to haul 75 of the sack of cement. Further expense would be the supply of gravel and the labor. He states that this was approved by Mr. Ferrier at time of his visit. I will supply the cement if authorized but have nothing on record about it in the office so far.

Your obedient servant,

Indian Agent.

under

Ottawa, January 22, 1929.

Sir:

I have your 432-153 of the 11th instant, enclosing letters from the Principal of the Guy Indian Residential School, concerning cement borders around the lawns. The Department authorizes the purchase of 125 bags of cement, provided the school will be responsible for the necessary labour. Please inform the Principal and supply the material, if he agrees to make the improvement. The Department might also allow the sum of \$25.00 for gravel.

Concerning more cows at the school, I note it is necessary to haul the feed and that the school requires a larger boat and a barge. I regret there are no funds for this purpose at the present time, and I have to request that the school authorities will supplement their milk supply with Klim, or other dried milk products, until it is possible to keep more milch cows.

Dear Sir:

Please find enclosed several accounts for payment. The debt of this new school is yet too high to be able to pay them. Therefore I apply to your kind generosity. These items were very necessary. Last Summer \$180.00 were allowed for the poultry fence. What we bought from Wood Vallance was urgent repairs for our 10 H.P. Engine, and for the water line. The 3 Door Checks were also necessary. The total Amount is \$337.44 .

Yours very truly,

Rev. Napoleon Doyon, B. A. S.
Principal.

Ottawa, February 25, 1929.

Reverend Sir:

I have your letter of the 9th instant, asking the Department to reimburse the Guy Indian Residential School for certain expenditure, some of which was authorized. May I point out that, in future, accounts that are authorized, as the Ashdown's account for \$85.30, for poultry fencing, and their account for \$14.90, for a lawn mower, should not be paid by the school management but should be certified as correct and forwarded to Mr. Indian Agent Waddy, who would transmit them to the Department for payment. Our cheque would then go direct to the firms in question. This information is for your future guidance.

The Department is making reimbursement on account of the labour in erecting the poultry run, the freight, the cost of the fencing, the lawn mower and the repairs to the engine, and a cheque for \$299.94 is being directed to you in reimbursement. I regret that I cannot allow the door checks, as these are not supplied by the Department.

Your obedient servant,

J. D. McLEAN

153-514

The Pas, Man.
February 16th 1929.

Dear Sir:

I have the honor to report that the Principal of the Guy Indian Residential School has asked to be supplied with a drying machine for his laundry. He also asks for a 16 H.P. steam boiler to make steam for the dryer and to operate the electric light plant and the pump.

The Principal states that when Mr. Ferrier visited this school last summer these matters were discussed and that favorable consideration was promised by Mr. Ferrier.

A dryer is required at the school, and a steam plant would cut down the operating expenses, as fuel oil as used there now is very expensive.

I enclose a booklet with the dryer described on page 39. The book could be returned here when this item is noted as I only borrowed it.

Your obedient servant,

J. Waddy
Indian Agent.

Asst. Deputy & Secretary,

March 4, 1929.

Sir,-

Replying to your letter of the 16th ultimo with reference to the request from the Principal of the Guy School for a drying machine for his laundry, I beg to say that the Department of late years has been installing a Junior Drying Tumbler, as shown on page 43 of the Catalogue. This machine, although more expensive, has proven much more satisfactory for drying clothes.

With reference to the 16 H. P. steam boiler asked for there will, of course, be required an engine in connection with this boiler if it is their intention to use same for operating the electric lighting plant and pump. Will you please advise me if the Principal would prefer the Junior Drying Tumbler in place of the drying room, also the type of steam boiler and engine required, and if possible an estimate of the cost of the engine and boiler.

I am returning herewith the Catalogue as requested.

Your obedient servant,

A. F. MacKenzie

Feb. 10th 1929

Dear Mr. Maddy,

Mr. Edmuntson made a very good work in the school putting the desks and basin in the senior boys' armitory. He finished yesterday afternoon at 2 o'clock. I thank you very much for having sent him. To morrow Mr. French will make the partition for desks.

All the children are well now. It would be time for the dentist to come if possible.

Would you kindly phone to Father Lagimodere at the Bishop's House telling him that Mr. Trayson is in town so that they send me the mail. With thanks.

Yours truly,

Napoleon Doyon, J. M. S.
Principal.

The Pas, Man. March 13th 1922

Sir,

I enclose herewith Vouchers Nos.....407.....,

amounting to \$ 333.87.....in favour

of Frost Bros. P.O.Box 319.....The Pas, Man.....

installing toilet and basins in senior boys
for dormitory at The Guy Indian Residential School.

This expenditure was authorized by Departmental

Letter No. 132-7-5.....dated.....October 5th 1922.
The bill is higher than the estimated cost as the plumber
had to use more material than estimated, also the cost of
transport to the school has increased since traffic stopped
passing through Sturgeon Landing.
Yours obedient servant

25	9	8	275	30	7 1/2	20	10 1/2	2 1/2	3	2 1/2	22 1/2	22 1/2	1550

Special prices given on carload lots.
Additional charge for larger belt pulleys.

Vertical Automatic Engine, here illustrated, is made from patterns combining many desirable features. The frame is of such design as to combine beauty of outline with such distribution of metal as to make it strong and unyielding in every part. The top and bottom of each frame is "faced off" true in a lathe, and the main boxes are planed true. Some manufacturers of small engines do not do this, and it is essential to **Perfect Construction and Permanent Alignment**.

With each vertical engine is included a full set of oil cups, lubricator, throttle valve, drain cocks and wrenches.

Will be furnished enclosed at an additional cost.

THE VALVE

Is of the hollow piston type and is therefore **PERFECTLY BALANCED**. The valve is fitted with **self-expanding rings**.

Bushings are placed in the steam chest, forming a casing in which the valve works. These bushings can be renewed at very small expense, without reboring the valve chest, should this become necessary after long use.

Climax Horizontal Automatic Engine

Sizes, Weights and Specifications of Climax Horizontal Automatic Engines

Horse-Power Standard Rating	Cylinder		Revolutions	Auto- matic Pulley		Belt Pulley		Shaft, Diameter	Pipes		Floor Space		Weight
	Diameter	Stroke		Diameter	Face	Diameter	Face		Steam	Exhaust	Width	Length	
10	6	7	275	26	6½	16	8½	2½	1½	2	20	46	1250
12	7	7	275	26	6½	16	10½	2½	2	2½	20	46	1300
16	7	8	275	30	7½	20	10½	2½	2	2½	23	53	1780
20	8	8	275	30	7½	20	10½	2½	2½	3	23	53	1860
25	9	8	275	30	7½	20	10½	2½	2½	3	23	53	1940
30	8½	12	250	40	10½	24	12½	3¾	2½	3	32	78	4200
40	9½	12	250	40	10½	26	14	3¾	3	3½	32	78	4270
50	10½	12	250	40	12½	30	14	4¾	3½	4	32	78	4350

Special prices given on carload lots.
Additional charge for larger belt pulleys.

The frames of these engines are well designed, have ample weight and are very rigid. The cylinder and steam chest are one casting, and are bored at same setting, insuring perfect alignment. Steam chest has removable bushing or cage for valve. Valves are piston, and have self-expanding rings. Parts interchangeable, perfect alignment and large wearing surfaces. The high speed and very close regulation of the **Climax** commend them for electrical work or any similar duty. Can be furnished enclosed at an additional cost. Each horizontal engine is furnished with lubricator, throttle valve, set compression grease cups, drain cocks and wrenches.

Rated horse-power is based on initial steam pressure, 80 lbs. cutting off at ¼ stroke.

We are attaching hereto a leaflet illustrating and describing the 16 H.P. "Climax" Steam Engine. Regarding the boilers you will note that we have quoted first on the locomotive type of boiler, and secondly on the type which must be bricked in. We estimate that the labor and material for bricking a boiler of this size would cost approximately \$450.00 to \$500.00.

Thanking you for this opportunity of submitting prices, and trusting that we may have the pleasure of serving you further, we are,

We are pleased to have your inquiry of
March 13th for prices on a 14 H.P. Horizontal steam Eng-
ine and a 16 H.P. Tubular Boiler, and beg to advise that
we are unable to quote on just the sizes you mention, due
to the fact that they are not manufactured. However, we
offer the following for your consideration:-

- 1 - 7"x8" Climax, 16 H.P. Horizontal Automatic steam Eng-
ine, speed 275 R.P.M. complete with 20" dia. x 10 $\frac{1}{2}$ "
belt Pulley,
Net, Price F.o.b. The Pas, Man.-.....\$508.50
- 1 - 25 H.P. return tubular Firebox boiler 36" x 10'0" for
125 lbs. working pressure, with racking grates, ash-
pit front and mountings, including injector.
Shipping Weight - 6700 lbs.
Net Price, F.o.b. The Pas, Man.-.....\$1374.00

or as an alternative we offer:-

- 1 - 25 H.P. Horizontal Return Tubular Boiler for setting in
brickwork 36"x10'0" - suitable for 125lbs. working press-
ure, with full front diagonal grates, castings and mount-
ings.
Shipping Weight - 6000 lbs.
Net Price, F.o.b. The Pas, Man.-.....\$779.00
- 2 - Injectors with pipes and fittings for above boiler.
Net Price, F.o.b. The Pas, Man.-.....\$ 73.50

Mr. W.-W. Waddy, Indian Agent,
Le Pas, Man.

Dear Mr. Waddy,

With reference to your kind letter of the 12th. ultimo, I beg to say that I had an interview with Rev. Father Doyon, Principal of Guy School and that I have also spoken of this matter with the Reverend Sisters. They all prefer the Drying Room to the Junior Drying Tumbler as more economical. The Drying Tumbler is liable to wear out the clothes specially the woolen ones as blankets that are washed occasionally.

As for the Boiler and Steam Engine, I have written to the Fairbanks Morse, Winnipeg and you will find their quotations herewith attached.

To avoid excessive expenses of installation by experts, we would prefer the Firebox Boiler of the locomotive Type.

Thanking you for your courtesy in this matter,

I remain,

Yours very truly,

Martin Lajeunesse,
S.D.

Bishop's House, Le Pas, Man., April 8th. 1929.

Mr. J.-W. Waddy, Indian Agent,
Le Pas, Man.

Dear Mr. Waddy,

Rt. Rev. Bishop Charlebois has received lately from the Department of Indian Affairs a copy of plan and specification of a Cold Storage Plant which has been successfully operated in connection with Schools in the North-West Territories as a means for the freezing of fish and meat.

Rev. Father Doyon, Principal of the Guy School, had the occasion to look over these plans and he approved them accordingly.

Last year, it was question between The Indian Dep. and Rev. Father Doyon to have such a Cold Storage Plant installed at the Guy School this year.

On reception from the Department of the approbation necessary for the same, we shall be glad to have local contractors tender on this building.

Yours very truly,

Martin Lapinasse,

University of Ottawa
Ottawa, Canada

May 3rd, 1929 192

The Department of Indian Affairs
Ottawa, Ont.

Attention of Mr. Carrier.

Bishop Charlebois has asked me to place the following requests before the Department of Indian Affairs:-

For the *Suy* School

1.- A steam engine of sufficient power to work the dynamo and the machinery of the laundry. This would replace the gasoline motor which is now in use at the School. It is found that when this motor gets out of order, and new pieces have to be procured for its repair, the house is without light and cannot use the laundry machinery for whole weeks. The motor would be kept at the School and could be used in cases of emergency.

2.- A steam boiler large enough to run the engine and to furnish steam for the drying machine.

It is pointed out that, inasmuch as fuel wood is very cheap in those parts, the expense of running the steam engine would be much less than that of running the gasoline motor.

It would also be a great advantage for the boys at the school to learn how to operate a steam engine.

The installation of the boiler and engine will be done at the expense of the directors of the School.

3.- A drying-machine is also needed at the same school. The machine of the rotary type is not suitable for the drying of blankets, while the machine with compartments can be used for all purposes. Accordingly, this latter machine would be preferred.

Ottawa, May 4, 1929.

Sir:

I have your 632/153 of the 9th ultimo, with reference to a drying machine and an engine and boiler for the Guy Indian Residential School. The engine and boiler requested by the church authorities cost approximately \$1,900, with an additional \$500 for bricking in and installation. A drying room is worth approximately \$600, or a total for this proposed equipment of \$3,000. This amount is all that is available for improvements at the Guy School this year, and, if the Rev. Principal is willing to wait for the ice house, the Department is prepared to proceed with the supplying and installation of this machinery. I should be grateful for an early answer in this connection.

Relative to the cold storage, the plans that were left with Bishop Charlebois call for a building which will cost approximately \$5,000. This is much more expensive than is usually allowed Indian residential schools, but it provides equipment for freezing fish and meat. The ordinary ice house and cold storage that the Department generally builds at these schools cost from \$1,200 to \$1,600. You might enquire if the church authorities are willing to bear a portion of the cost of this special ice house if the Department arranges for an appropriation for next year.

Dear Sir;-

In reference to your letter #132-7-5 of May 4th regards engine, boiler and drying room for the Guy Indian Residential School, I beg to say that His Lordship Bishop Charlesbois has informed me that he wishes the above supplied and will carry on at the school without the new ice house until next year.

I will be leaving here in a short time and will be absent about three months on work in the Isle a la Crosse Agency, so any answer to this request could be directed to the Principal of the school to avoid delay.

R

June 5, 1929.

W. J. Orr
please
Memorandum:*OK*
W. J. Orr
DR. SCOTT.

There is now available \$3,200. for improvements at the Guy Indian Residential School. When the Estimates were prepared, there was an item of \$2,000. for laundry machinery and \$1,200. for an ice house. The school authorities and Mr. Indian Agent Waddy are urging the provision of a dry room, \$600.; a boiler, \$1,374.; and engine, \$508. - a total of \$2,482. The school authorities are willing to let the ice house stand for another year, provided the machinery mentioned is supplied. The boiler and engine are needed to run the dynamo and other machinery, as it is extremely difficult to get gasoline at times, and, further, the gas engines and motors occasionally need repairing and the school is somewhat distant from machine shop facilities. If you will authorize the expenditure, Mr. Orr will place the order for the machinery.

Honorable J.D. McLean,
Asst. Deputy & Secretary.
Dept. of Indian Affairs,
Ottawa Ont..

R

Honorable Sir:-

By Mr J.W. Waddy's letter, dated Jan. 31st, 1929, the Department was authorising me the buying of 125 bags of cement for making cement borders around the lawns in front of the school. But as I didn't have the cement before the first boat came, I did all the best to ornament the front part of the school so that to-day I think it will not be necessary to put any cement borders. Otherwise, with eight and ten hired men, and the boys, I cleared six acres of new land in front of the school, along the river and the lake; so that if you are of my opinion, I would like to be authorized to buy, in lieu of 125 bags of cement, 185 rods of good woven wire fence to embellish the place. If the Dept. could do it I would be very glad and thankful. *The wire will cost about \$175.00*

Also our electric batteries are all filled up with dirt and should be emptied and refilled. Could you authorize me to have it done as soon as possible during the Summer, or would you like to buy the material for them?

Wishing to hear soon about these two questions, I beg to remain yours very truly,

Rev. Napoleon Doyon, C. M. I.
Principal.

Reverend Sir:

I have your letter of the 20th instant, and, in reply, I have to authorize you to expend \$175. for woven wire fencing for the Guy Indian Residential School. It is understood that this is in lieu of the earlier authority concerning the purchase of cement.

I note that the electric batteries are requiring attention. You should send them in to a competent man in The Pas and have him report direct to Ottawa concerning their condition and what is necessary to put them in good shape. In his first letter, he should let us have an estimate of the cost. Consideration will then be given to authorizing the improvement.

The Canadian Wood Truck Dry Room # 3421

Size
Section 1 Doors 2 Coils 1 1/4" Trucks 2

Cabinet

Shall be constructed of kiln-dried lumber, tongued, grooved and beaded, and built in sections securely bolted together. Inner surface shall be covered with sheet asbestos and lined with heavy tin plate sheets, lock-jointed and blind nailed, making same heat retaining and fire-proof on inside. Outer surface shall be finished with two coats of yellow shellac. Doors shall be constructed in similar manner, hung on heavy coppered hinges and fitted with malleable-iron latches.

Coils

Shall be provided with vertical stands of 1 1/4-inch steam coils of the circulating type, 18 pipes high, with suitable supply and return connections and located on either side of door opening.

Circulation and Ventilation

A fan suspended from roof and constructed with four metal blades, and operated by a horizontal countershaft with bevel gears, shall be furnished for proper circulation of air.

Ventilation shall be arranged by intake of air at door opening and outlet of damp air through funnel-shaped galvanized pipe connection in roof.

Trucks

Shall be constructed with metal bases, mounted on casters, and galvanized-pipe uprights carrying iron cleats for holding metal clothes bars, and tied with galvanized pipe-ties. Shall be provided with wood handles for convenience in handling and angle-iron floor tracks for guiding trucks into room.

The R. C. Episcopal Corporation of Keewatin 2.

now being prepared by Mr. Pederson, and will be forwarded on to you for approval immediately upon completion.

In connection with the storage battery, we understand that it is your desire to have this overhauled, but on taking the matter up with the Globelite Battery Company, they point out that it is an extremely difficult matter to repair one of these batteries in the field, unless suitable equipment is on hand. In addition to this, our men are not battery experts, and for this reason we would suggest that, if possible, you send it in to the Globelite Battery Company for examination and repairs.

This battery we understand has been in service for about four years, which is the life of an average battery, and it may not be possible, or worth while, to dismantle it for shipment to Winnipeg. A new 200 Ampere Hour 110 Volt Globelite Storage Battery would cost \$766.50 f.o.b. Le Pas, Manitoba.

Regarding the Fairbanks-Morse 10 H.P. Type "Z" Engine now at the school, Mr. Pederson suggests that this engine be overhauled for which the following new repair parts would be required:

1 - #18 A.C. connecting rod, complete.....	\$55.40
1 - #202 A.C. Butterfly Valve casing.....	6.20
3 - #6 Piston Rings.....	<u>4.60</u>
Total Price f.o.b. Winnipeg.	\$66.20

We again thank you for the business you have placed with us, and hope to have the pleasure of serving you further.

Attention Rev. Martin Lajeunesse, O.M.I.,
Secretary.

Reverend Father:

Please accept our thanks for your order given to our Engineer, Mr. T. Pederson, for a 16 H.P. Climax Steam Engine, and a 25 H.P. return Tubular Firebox Boiler, for the Indian School at Sturgeon Landing, which we have entered as per the attached copy.

Mr. Pederson advises that you are also interested in a 3 door drying room for the laundry, and wish to say that on taking the matter up with the Canadian Laundry Machinery Company, we are informed that they do not now manufacture a 3 door drying room. However, they do make a two door and a four door dryer in both wood and steel, on which we are pleased to quote you the following prices:

- 1 - Canadian Laundry Machinery Company 2 door Wood drying room, complete with coils, fan, and trucks, as per specifications attached hereto.
Shipping weight 3600 lbs.
Price f.o.b. Le Pas, Manitoba.....\$791.00.
- 1 - Ditto 4 door Wood drying room as above, complete with equipment. Shipping weight 6300 lbs.
Price f.o.b. Le Pas, Manitoba.....1478.00.
- 1 - Ditto All Metal 2 door Drying Room complete with equipment as above. Shipping weight 3000 lbs.
Price f.o.b. Le Pas, Manitoba.....1197.00.
- 1 - Ditto All Metal 4 door Drying Room complete with necessary equipment. Shipping weight 6000 lbs.
Price f.o.b. Le Pas, Manitoba.....2343.00.

Shipment on any of the above can be made from Toronto approximately two weeks after receipt of order at the factory.

Re. Guy School, Letter 132-7-5.

Dear Sir:-

On receipt of your letter of June the 7th, approving the purchase and installment of Boiler and Engine for Guy School, I made a special trip to Sturgeon-Landing to see for a proper place for these machines. I came back rather dubious as to the place where we could have the Boiler installed. I thought then it was advisable to ask the Fairbanks-Morse to send an expert to investigate on this matter. This was done at the Company's expense, and Mr. Pederson, the man who was sent to Sturgeon-Landing, is actually preparing two different Blue-Prints which I will submit to you as soon as I receive them.

Drying Room.

You will see by the enclosed letter received from the Fairbanks-Morse that a 3 door Drying Room, as desired by the Mother Superior, is no longer manufactured, but according to information I had from the hospital here, I am inclined to believe that a 2 door Drying Room of the size of the one quoted on will suffice. We would prefer the metal Drying Room to the other and would like to have your advise as soon as possible.

Storage Battery.

The same letter of Fairbanks-Morse will also tell you about the Storage Battery. Please advise if you approve of the suggestion.

Gas Engine.

I would also thank you for giving instructions in regard with the overhauling of the Gas Engine in operation at the Guy School.

Thanking you for the attention you have already given to this matter and awaiting your answer, I remain,

Yours very truly,

Martin Lajeunesse

Rev. Father:-

Att: Rev. Martin Lajeunesse
O.M.I. Secretary

We are pleased to advise that Mr. Pedersen has now completed the installations drawing for the boiler and Engine for the Indian School at Sturgeon Landing and we take pleasure in enclosing herewith two alternatives. The first is our drawing No. F.M.1101 showing the boiler installed in the present wood supply shed with a 7ft 6 inch by 6 ft. pit extension directly behind the boiler to make room for cleaning the tubes. If this plan is adopted it will not be necessary to make any extension to the building, with the exception of the pit excavation as mentioned above. This would of course leave no room for the wood supply inside of the building.

Drawing No. F.M. 1102 shows the installation of the boiler with a 12 ft. addition to the present building, and if this plan is adopted it would leave sufficient room for the wood supply inside of the building.

Mr. Pedersen stated that it is your desire not to make any extension to the building if at all possible, in which case the first mentioned drawing should be used, where it will only be necessary to have a small pit extension directly behind the boiler as mentioned above.

You will note that Mr. Pedersen has made some changes in the arrangement of the material in the power house in order to instal the new engine in line with the present Generator. After you have had an opportunity of checking over these drawings we would ask that you kindly return to us the one which meets with your approval.

Dear Sir:-

Pursuant to my letter of July the 15th, I beg to submit to you the two plans I just received from the Fairbanks-Morse in regard with the installment of a boiler and Engine at the Guy School.

You will notice that Plan No. FM 1102 will necessitate enlargement of the building and means more expenses but of course it would give more room for the wood supply.

I would be very obliged to you if you could let me know as soon as possible which one of these two plans you wish us to follow.

Yours very truly,

Martin Lajunen

The Secretary,

Department of Indian Affairs,
Ottawa.

Dear Sir :

Guy School, Sturgeon Landing, Sask.

Boiler and Steam Engine.

I am sorry to advise that the water level in the Saskatchewan River is so low that it is impossible for boats to reach Sturgeon Landing. Consequently I have notified the Fairbanks-Morse Company not to ship the Boiler and Steam Engine at the present time. As both Boiler and Engine have been brought to Winnipeg especially for our requirements, the Company expect us to pay this Fall.

Storage Batteries and Gas Engine.

Pursuant to my letter of July 15th., I beg to say ~~that~~ that the Rev. Father Principal is very anxious to know what has been decided about same.

Thanking you in anticipation of your reply,

I am,

Yours very truly,

Martin Lajunen

Ottawa, August 26, 1929.

Reverend Sir:

I have your letter of the 19th instant, with reference to the difficulty of getting the new boiler and steam engine transported to the Guy Indian Residential School at the present time. The Department will rely on you to see that shipment is made as soon as transportation is resumed.

I regret that part of your letter of the 15th ultimo remained unanswered. You may authorize the Rev. Principal to make the most economical arrangements in connection with the overhauling of the gas engine. I note that the Canadian Fairbanks-Morse Company's expert estimated the cost to be approximately \$66.

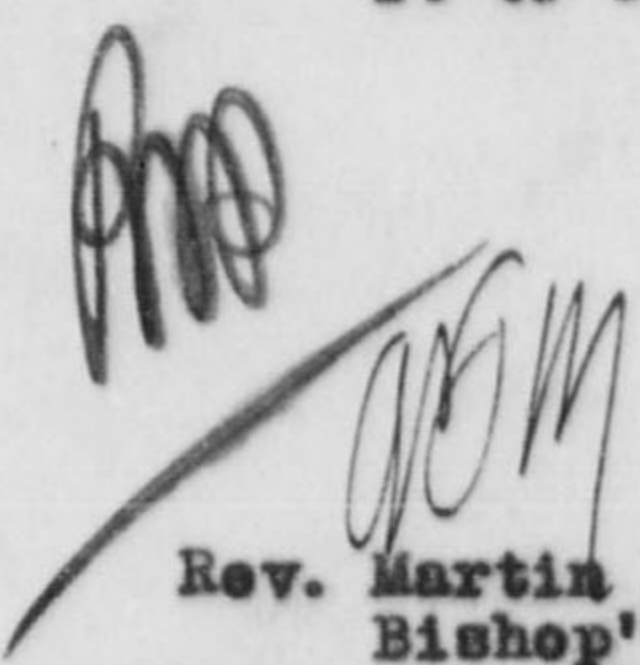

I have discussed the matter of the electric light battery with the Department Architect, and I believe it advisable to purchase a new one. A new 200 ampere hour, 110 volt, Globe Light Storage Battery may be purchased from the Canadian Fairbanks-Morse Company, at their quoted price of \$766.50, f. o. b. The Pas, Man. When the battery has been supplied, if satisfactory, you should certify to the account, in duplicate, and forward it to Ottawa for payment.

Your obedient servant,

A. M. MacKenzie,

Sir:

I have your three letters of the 5th instant, regarding the various matters referred to therein relative to the Guy Indian Residential School.

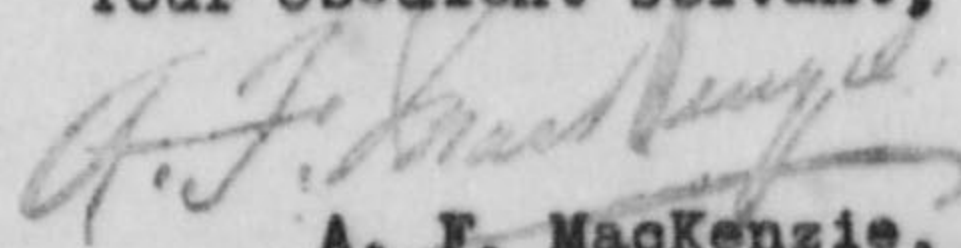

Your recommendation that the school authorities be reimbursed for the expenditure incurred in the deepening of the channel to obtain an adequate water supply, and also that payment be made for the outlay incurred in the procuring of extra help to assist in putting out the forest fires in the vicinity of the school, has been noted, and the department is today communicating with the Reverend Principal requesting him to forward the necessary vouchers and receipts covering these expenditures. A copy of our communication to the Reverend Principal is enclosed herewith for your information.

Relative to the 12 extra desks required, I have to say that the school desks at present in use are those manufactured by the Canadian Office & School Furniture Co. Ltd. Their western representative is the Western School Supply Ltd., Regina, and you may place an order with this firm for the supplying of twelve (12) Preston ball bearing single school desks, for pupils 15 to 18 years of age, and also for one (1) teacher's sanitary desk, No. 11, and two (2) teacher's arm chairs, No. 23. Please obtain an account, in duplicate, covering the cost of this equipment. When the desks have been received, you should certify the account and forward same to the Department for payment. When placing the order, you should furnish full shipping directions.

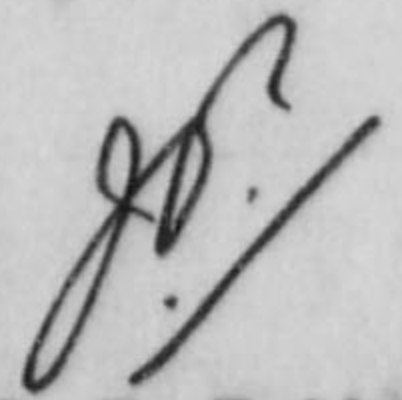

An order will be placed here to forward through the Government Stationery Office 20' of blackboard material, 3½' wide.

The Department will approve of the expenditure required in having a doorway cut between the bedroom and sitting room on the right hand side of the main entry to the school, also for the supplying of a new door. You may inform the Principal accordingly. A certified account, in duplicate, should be forwarded covering the cost of having this work carried out.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

J. W. Waddy, Esq.,
Indian Agent,
The Pas, Man.

132-7-5.

Ottawa, September 11, 1929.

Rev. Sir:

Mr. Agent Waddy, The Pas, informs the Department that it was necessary, owing to the numerous forest fires in the vicinity of the Guy Indian Residential School, to engage the services of extra help to assist in fighting the fires, and recommending that the sum of \$50 be allowed for this work. In this connection I have to request that you will forward accounts, in duplicate, giving details of the labour employed, also receipts in payment of the men for their services. When we have these accounts, consideration will be given to reimbursing you for the outlay not exceeding approximately \$50.

Mr. Waddy also states that, owing to the water supply becoming practically exhausted, he instructed you to deepen the channel. The Department will consider reimbursing you for the expenditure incurred for this purpose, upon receipt of accounts covering the cost of any material used and for the labour employed. Receipts for any expenditure paid by you should be attached to your vouchers.

We are informing Mr. Agent Waddy that you have been communicated with regarding the above matters.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Dear Sir;-

I have the honor to report that the Prinnipal
of the Guy Indian Residential School has asked to be
supplied with the following lumber for repairs.

40- 2x12x12
1000 f.b.m. shiplap
500 f.b.m. 1x10x14 rough lumber
200 f.b.m. 1/2x4x12 flooring-fir-
50 pcs 2x4x14

P.K. P.O.
The cost of this would be about \$250.00
if delivered by boat freight. If the allowance is
granted will you please advise me by wire as the water
is getting so low that the boats will soon cease to
operate.

Sir:

I have your letter of the 14th instant, relative to the request of the Principal of the Guy Indian Residential School to be supplied with a quantity of lumber for the purpose of making repairs.

In this connection I have to confirm the following night lettergram to you of today's date:

"May arrange for purchase and forwarding of quantity of lumber for repairs mentioned your letter fourteenth instant for Guy Indian Residential School."

It is noted that you estimate the cost of supplying the quantities of the various kinds of lumber as mentioned in your letter to be approximately \$250, delivered by boat freight.

Please forward itemized accounts, in duplicate, covering the cost of the lumber. A certified account, in duplicate, should also be forwarded covering the freight charges.

Your obedient servant,

Russell G. Ferrier

Sir:

I have your letter of the 14th instant, relative to the repairs required to the Fairbanks-Morse 10 H.P. engine at the Guy Indian Residential School.

In this connection I have to inform you that the Department will approve of the supplying of the various equipment mentioned in your letter as being required to carry out the repairs. Either yourself or the Principal should arrange for the purchase and forwarding of the parts required, obtaining an itemized account, in duplicate, covering the cost. After this equipment has been received, you should certify the account in the usual manner and send it to the Department for payment. It is presumed that the labour required in making the repairs will be carried out by the school authorities without cost to the Department.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

September 13th, 1929.

Mr J.W.Waddy, Indian Agent.
The Pas, MAN..

Dear Sir:-

Authority 132-75
Sept 1929

I am sending herewith account for the Dept.re work on the river at the intake. According to the low water, as you saw it yourself, there was hardly any water coming out from the channel made last year and three years ago. I had to make it deeper with dynamite and to enlarge it at the opening in the rapid. So I succeeded to draw half of the rapid on the school side. It required lot a work and as the water was cold last week, I had to increase the wages. I do not think that the Dept. would object to pay this account, because it was very necessary to get water during the winter and to hinder the pipe from freezing.

I hope you come and see the work done.

I remain your always truly,

103

Sir:

I have your letter of the 7th instant, enclosing the requisition which you received from the Principal of the Guy Indian Residential School for various items of lumber and other supplies.

In this connection I have to request that you will obtain from the Principal a report as to the uses for which the various items are required. It is expected that the school authorities, themselves, will carry out any minor repairs that may be required, paying the cost of the materials from their per capita earnings or other receipts. When we have full information regarding the various items on the requisition, consideration will then be given to the materials that can be supplied by the Department. I am returning herewith the requisition in order that the Principal can furnish the information asked for.

Your obedient servant,

Dear Sir,-

Referring to your letter of the 11th instant, enclosing voucher No. 489 amounting to \$55.28 in favor of Mr. Chas. W. Hill, for engine supplies for the Guy School, I beg to state that when charges are made in accounts for express or charges paid to railway companies, it is necessary to obtain the railway company's receipted bills from the dealers and attach the same to the accounts in support of the charges made. There is also an item for cartage to Sturgeon Landing. If the charge was made by Mr. Hill himself, no receipt is necessary, but if he paid a transportation company for freighting, a receipt for the payment made should also be attached to the account. In future be good enough not to forward any accounts without the proper receipts attached.

Yours truly,

The Pas, Manitoba,
March 3rd, 1930.

Dear Sir:-

I have the honor to reply to your letter #132-7-5 of the 13th, ultimo, and I beg to inform you that I have just returned from inspecting the Guy Indian Residential School, Sturgeon Landing, Sask.

With reference to the Requisition For School Material, you returned, I took the matter up with the Principal, and he pointed out to me what he required the materials for. Part of the lumber is required as a reserve, on account of the difficulty of getting stuff in, in the summer time.

You will note he has put in the column "Remarks" the purpose for which repairs are needed.

I pointed out to him that the Dept. expected him to procure some of these out of his per capita account, but his actual figures show that the school was run this last year at a loss.

The place is such in good order I am sure that nothing is wasted. May I recommend that the enclosed requisition receives favourable consideration.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa Ontario.

OFFICE OF
INDIAN AGENT

707-153

The Pas, Manitoba,
March 3rd, 1930.

Dear Sir:-

I beg to report on inspection of the Guy Indian Residential School, Sturgeon Landing, Sask., I found the school in first class shape, due to the efficient management.

There are a few suggestions however which I would make.

OK
P.D.
stand // The pipes from the furnace in the basement are too near the ceiling, and I would suggest asbestos sheets attached with hangers for attachment to the ceiling. This would require about 50 lin. feet of asbestos with $\frac{1}{2}$ inch iron hangers. The bins for flour, tea, sugar etc., are infected with little white moths and in spite of all the efforts of the Nuns, breed there and spoil all the contents. I suggest these be lined with tin or zinc. The corridors to the height of four feet should be painted white so that they could be washed.

Everything around the out buildings are in splendid shape and reflect credit on the outside staff.

All of which I respectfully submit for your consideration.

Your obedient servant,

J. W. Swindell
Indian Agent.

Asst. Deputy & Secretary,

Ottawa, March 8, 1930.

Sir:

I have your two letters of the 3rd instant, relative to the request of the Principal of the Guy Indian Residential School for various items of lumber, paint, hardware, etc., and for asbestos covering for the furnace pipes and lining for the flour, tea and sugar bins.

In connection with these requests, I have to say that the Department will approve of an expenditure not exceeding the following amounts in the purchase of the various supplies requisitioned for by the Principal:

Lumber \$200; Paint \$40; Hardware, etc., \$60.

The Department will also approve of the supplying of the asbestos sheets with the hangers required in covering the pipes from the furnace which are near the ceiling. Approval is also granted for the purchase of the quantity of tin or zinc required in lining the flour, tea, sugar and other bins in which food supplies are stored at the school.

Before making the purchase, you should consult the Principal as to the type and quantity of the various supplies he requires, but it is to be understood that the above authorized amounts are not to be exceeded. After the purchase has been made, itemized accounts, in duplicate, properly certified, should be forwarded covering the cost. All work is to be performed by the school authorities without expense to the department.

Regarding the painting of the corridors to the height of four feet, I have to say that this work will have to stand for the present.

You might inform the Principal it is expected in future that all materials and labour required in making replacements of a minor nature are to be supplied by the school authorities without expense to the Department.

It is noted that the general conditions around the outbuildings and the school are in good order.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Ottawa, June 5th, 1930.

Sir:

I have the requisition which you forwarded from the Principal of the Guy Indian Residential School for classroom supplies and a number of rear seats and refills for fire extinguishers.

An order is being forwarded to the Government Stationery Office to send to the Principal's address the supply of classroom equipment considered necessary.

Relative to the rear seats required, I have to say that the school desks at use in this school are those manufactured by the Canadian Office & School Furniture Co. Ltd., whose western representative is the Western School Supply Ltd., Regina. You may place an order with this firm for the supplying of three (3) rear seats for single desks No. 2 and four (4) rear seats for single desks No. 5. Please obtain an account, in duplicate, covering the cost of this equipment. When these rear seats have been received, you should certify the account and forward same to the Department for payment. When placing the order you should furnish full shipping directions.

We are today placing an order with the Lafrance Fire Engine & Foamite Ltd., Toronto, to ship, addressed to the Principal, Sturgeon Landing, c/o Ross Navigation Company, The Pas, the five refills for the 2½ gallon Foamite extinguishers and ten refills for the 1 quart fire gun size. The above firm have been requested to forward their account, in duplicate, to you, covering the cost of these extinguishers F.O.B. The Pas. When you are aware that they have been received, you should certify the account and send it to the Department for payment.

Your obedient servant,

A. F. MacKenzie

POOR COPY

Ottawa, June 9th, 1930.

Reverend Sir,-

Rev. Father Lajeunesse, O.M.I., of Ottawa University, has handed to the Department the list of repair parts, lumber, cement and roofing paper which have been requested for the Guy Indian Residential School. It is necessary that Mr. Indian Agent Tweddell deal with this list before any action is taken and I am forwarding it by concurrent mail to him for his recommendation and estimate.

It is probable that not all can be allowed as the Appropriation for Indian Education is entirely assigned. However, you will be informed by Mr. Tweddell after he has received whatever authority can be granted.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie

Acting Asst. Deputy and Secretary.

Rev. N. Doyon
gfm

Rev. N. Doyon, O.M.I.,
Principal,
Guy Indian Residential School,
Sturgeon Landing, Sask.

Mr. [Signature]
Ottawa, June 9th, 1930.

Sir,-

I have to inform you that the Church authorities have forwarded direct to the Department the enclosed list of repair parts and other materials which are requested for the use of the Guy Indian Residential School. I have explained that it is necessary for the Department to have your recommendation, with estimate of the cost, before any authority can be granted. Parts for two gas engines are requested. As these will not be very expensive, and apparently are necessary, you may make purchase to the best advantage and have the materials shipped to the school.

Please ascertain the cost of the items marked in blue and report if these are really required at present. It is necessary to safeguard the Appropriation for Indian Education this year as it is already over-assigned. Only really urgent improvements can be effected at this time.

You might discuss with the Reverend Principal the lumber, cement and roofing. Ascertain just how urgent these last items are and let the Department have your recommendation, with estimate of the cost.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

[Signature]
Re. Guy School.

Dear Sir,

I am in receipt of a letter from The Fairbanks-Morse Co. Ltd of Winnipeg, stating that they are going to ship, in a few days, the material bought last year from their firm for the Guy School. At the same time they ask me if the services of their engineer will be requested to make the complete installation. Their price for such an engineer would be \$12.00 per day plus transportation and expenses.

There is no doubt that the services of an engineer are needed, as there is nobody at Sturgeon-Landing and even in The Pas who knows enough about steam and electricity to undertake such an installation.

I would ask you then to let me know as soon as possible if the Department approves the prices asked for by the Fairbanks-Morse Co. Ltd for the services of their engineer.

As the water is liable to go down very quick this year, it would be advisable to give prompt attention to this matter.

With kindest personal regards, I remain,

Yours very truly,

Martin Lajunen

Ottawa, June 9, 1930.

Sir:

I have to inform you that, last year, over \$4,000 worth of mechanical plant was purchased from the Fairbanks Morse Company, Limited, of Winnipeg, for the Guy Indian Residential School. An electric light battery, a steam engine, a boiler, laundry machinery and all fittings were purchased. This was done through the church authorities, and recently, Rev. M. Lajeunesse, O. M. I., of Bishop Charlebois' staff, got in touch with the company concerning the installation of the equipment this year. He has written the Department that the Company will send an engineer for \$12 per day, plus transportation and expenses. As the services of the Company's officer are highly desirable, considering the amount of expensive equipment that is being installed, I have today wired Father Lajeunesse that the engineer may be engaged and that the account, in duplicate, should be presented to your office.

Your obedient servant,

A. F. MacKenzie

OFFICE OF
INDIAN AGENT

The Pas, Manitoba,
June 26th, 1930.

Dear Sir:- Re:-Requisition For Gay Indian Resid. School.

I beg to acknowledge receipt of your letter No. 132-7-5 of the 9th, instant, in which you ask for estimate of cost of items marked in blue, in enclosed Requisition, i.e.,

1 Flue Expander \$8.00 1 Tire Upsetter \$32.00
16 Brass Firl Rings $1\frac{1}{4}$ to expand to $1\frac{1}{2}$ for Fire-hose \$5¢ each
24 Speer H. Carbon Brushes for Dynamo \$2.50 each
1 Cauldron Kettle \$29.25

The prices opposite each article are quoted by Wood Vallance Ltd., of The Pas.

The tire upsetter in my opinion is not much needed, where there are only one or two wagons, it would not be used very often, perhaps only once in a season. It would be cheaper to cut and weld the tires.

The cauldron is for the laundry, and is required, owing to there being 120 scholars now resident at the school, some having been transferred from the Cross Lake Indian Residential School.

The tube expander is necessary, also rings for fire-hose.

The carbon brushes are expensive, and I cannot see why two dozen should be purchased at once. I understand that there are four brushes to a set, and that the life of a set is from five to ten years and with care much longer, so I should say a set of four be ample.

Should you consider the articles recommended by me required may I suggest these be bought by you, as Wood Vallance Ltd., would have to send out for these, and are not certain if these could be got here in time for the boat to Sturgeon, as there is no regular service to this point.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,

Ottawa, July 3, 1930.

Sir:

I have your 148-153 of the 26th ultimo, with reference to the requisition for repair parts and other materials at the Guy Indian Residential School. I am returning the copy of the requisition, repeating the authority to purchase the spare parts for the two gas engines. You may purchase the cauldron kettle at a cost of \$29.25, the flue expander and the rings for the fire hose. You may also purchase one set of four carbon brushes for the dynamo. The Department agrees that a tire upsetter is not necessary. I understand that the boat for Sturgeon Landing leaves on the 5th instant, and, as it is impossible to have these materials all there, you should order them locally, in the regular manner, and get them in when possible.

Later, please let me have a recommendation regarding the lumber, cement and roofing that is requested. You may keep the enclosed copy of the requisition.

I wish to refer to my letter of the 9th ultimo, concerning the installation, by a Fairbanks-Morse Company engineer, of the machinery which was purchased last year. I have today received a telegram from Father Lejeunesse, that a few materials are needed in this connection, and he has been authorized to purchase 20 bags of sawdust, 1800 ft. of rough lumber, one keg of nails, 20 bags of cement and a few fittings.

195-153

R

The Pas, Manitoba,
July 25th, 1930.

Dear Sir:-

Inclosed please find bills from Wood Vallance Ltd., for \$3.07, \$42.00 and \$95.32, The Pas Lumber Co, for \$2.00 and \$2.00, Transport Ltd., \$31.50, Ross Navigation Co. Ltd., for \$460.15, a total of \$636.04.

These bills have been incurred during my absence and authorized by wire to Rev. Father Lazennies, While I presume that the bills are correct, I am unable to vouch for them.

It would be better if all orders came through this office, as the bills after delivery of the goods are handed to me, and I have no means of checking same.

Awaiting your further instructions.

Your obedient servant,

Indian Agent.

OFFICE OF
INDIAN AGENT

193-153

The Pas, Manitoba,
July 25th, 1930.

Dear Sir:-

In reply to your letter No.132-7-5 of the 3rd, instant, I beg to say that the quantity of lumber etc., requisitioned for is excessive.

No doubt some lumber is required for repairs from time to time, but Father Doyon, Principal of the school, has received quite a quantity of lumber already and will, I think, have enough to keep him going for a considerable time.

The 125 bags of cement would cost approximately \$145.00, here, is not really necessary, also the oak for wagon tongues. These are not often broken, and anyway can be made of tamarac, which is available at the school.

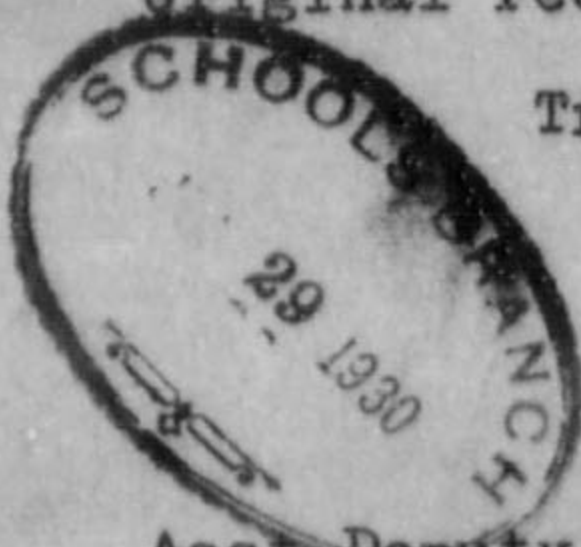

The 30 rolls of 3 ply roofing paper, would cost approximately \$115.00 here. As far as I am aware, the condition of the roof of the school, only requires at the most 5 rolls, and this I would recommend.

The total cost of building material in the original requisition would be around \$438.00

Trusting this will have your approval.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,

Ottawa, July 30, 1930.

Sir:

I have your 195-153 of the 25th instant, enclosing accounts in connection with the Guy Indian Residential School. These are returned herewith, as they should be certified to by either yourself or Father Lajeunesse, to whom the authority was directed. It is the general practice to have all orders go through your office, but it was necessary to make an exception in this case, for quite satisfactory reasons. When returning the accounts, only two copies are required by the Department. The freight bills, with the Ross Navigation accounts, etc., should be returned with the other papers.

I have also your 193-153 of the 25th instant, stating that lumber, cement, etc., are now urgently required at this school. You may purchase 5 rolls of 3-ply roofing paper and arrange shipment to the institution.

ENCL.

To Mr. H. J. Tweedell
Indian Agent
The Pas.

27th July 1930

Sir

The roof over the laundry and engine room is in a very bad shape. the engine room has half a dozen leaks.

If one should start over the dynamo or batteries it might cause serious damage & expense.

On Father Doyens request I wrote my Winnipeg firm who advise as follows.

To supply asphalt roofing material would cost \$31⁰⁰ for one coat.

Material for two coats would cost \$56²⁰.

We would have to warm this, & put it on hot, afterwards put gravel & sand on, which material we already have on hand. Cheap help could be hired locally to do this work.

As the leaks are so bad I would strongly advise applying two coats.

Kindly advise what you wish we should do in this matter.

I remain

Yours truly

O. Peterson.

222-153

OFFICE OF
INDIAN AGENT

The Pas, Manitoba,
July 31st, 1930.

Dear Sir:-

Please find herewith bills for material for the Guy Indian Resid. School, at Sturgeon Landing, Sask. goods ordered by Bishop Charlebois's secretary, Father Lazennesse, one for \$21.57 and the other for \$20.75, also a letter received by me from Mr. O. Patterson, erector for Fairbank Morse Co., and requisition for school material from the Principal, who has run out of the regular forms.

I have been in consultation with Father Lazennesse in regard to the roof of the boiler house, and am of the opinion that the roof could be repaired at a less cost than that quoted by Mr. Patterson, and does not require an expert for the work.

Father Lazennesse showed me another list of supplies for the installation, which included 1000 feet of Metallic Sheeting for the boiler room. This we agreed was not essential and will be eliminated.

I am, in as far as possible trying to keep unnecessary costs, and trust this will be to your approval.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa Ontario.

132-7-5.

Ottawa, August 8, 1930.

Sir:

I have your letter of the 31st ultimo, enclosing accounts covering the cost of material supplied the Guy Indian Residential School. I am returning these accounts, as it is necessary that they be properly certified before payment can be made. I may add that these accounts are only required in duplicate. When they have been returned, properly certified, payment will be made.

Relative to the quotation which you forwarded from O. Patterson for repairs to the roof of the laundry and engine room, I have to say that it is considered the school authorities should undertake the work without calling in the services of an expert. You may arrange to supply the quantity of asphalt roofing material necessary, forwarding accounts, in duplicate, properly certified, covering the cost.

It is noted that, after consultation with the Principal, it is not considered necessary to supply 1000' of metallic sheeting for the boiler room.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,

Dear Sir,

In reply to your 132-7-5 ,second paragraph,
Re.Roofing of Laundry &Boiler Room, at The GUY SCHOOL
I am informed that the Principal Rev. Doyon,
will be in The Pas, shortly,and I will take the matter up
with him , and try to have the work done at a less cost
than suggested by him.

Trusting this will have your approval,

Your obedient servant

I told Mr. Paterson that I did not object to him using an hour or so, seeing that the work was done right, but that the cheaper men must do the work.

I may say that Father Lajennesse was thoroughly in accord with my decisions.

The necessary material being ordered is, No. 8 wire for connecting old and new batteries, 4 sheets asbestos for between the pipes and rafters, 4 sheets asbestos for heater in boiler room, 1 half inch reducing valve to reduce maximum pressure of 125 lbs to 2 or 3 lbs to be put on high pressure steam line to dryer. To be used when engine is not running. 1 length 2" black pipe, 3-2"x45° elbows for drainage fitting, 6-2" elbow drainage fittings, 2-2" Tees, 2-2" Plugs 1-2" Union, 2-2" Black Nuts, 2-2" close nipples, 3-2" nipples 4 to 6" long.

The school has already been supplied with five rolls roofing paper to repair the boiler room roof.

I trust this will meet with your approval.

Your obedient servant.

OFFICE OF
INDIAN AGENT

The Pas, Manitoba
August 22nd, 1930.

Dear Sir:-

I beg to report that I visited the Guy School on the 22st, instant, by 'plane, accompanied by the Bishop's Secretary, Rev., M. Lazennesse. There has been so much expense attached to the installation of the boiler and engine, that I thought it right to see how the work was progressing before ordering the last list of material received by Father Lazennesse from the Principal, Father Doyon.

I found that the boiler and engine are in place, and looks like a good job, though all connections are not completed such as the drain from exhaust, which in the old system used to run water all over the floor. Mr. Paterson is using the exhaust steam for heating the drying room and other rooms instead of it going to waste.

He asked for metallic sheeting for the boiler room. I suggested instead, asbestos sheets over the piping, same as was put in at the Mac-Kay School, which he agreed would do as well.

The Principal, had him plan a Fish Table for the cleaning of fish. Rather a good but elaborate thing, and as it does not impair the efficiency of the plant, I decided not to have it.

In the boiler room, Mr. Paterson was going to build a cement wall 12" thick, 8' high and 15' long, reinforced with $\frac{3}{4}$ " steel rods, and a similar wall in the new boiler room 7x5x12, to protect the boilers from wood being thrown in through the shutters. I informed Mr. Paterson that this could be done later if necessary as I did not consider it was work for an expert.

The principal wrote me asking that Mr. Paterson be instructed to repair the pipe in the water tower, which had frozen last winter and burst. I answered his letter, stating that if it would not entail much cost it could be done, otherwise he must submit the estimated cost for your approval. He merely answered that it would not cost much and that Mr. Paterson had started on the job.

In my absence at Treaty he ordered lumber for making another casing and sawdust for filling in between, so as the material is on the ground, I thought it as well to have it done and save further trouble in the winter or in case of fire.

XX

Re: Ice house and list of Requisitions:

The Department had decided last year to build an ice house for the Guy School, and the building was to be put up this summer. Nothing has been done as yet. In the list of requisitions which we presented to the Department last spring, and which was sent back to our agent for approval, many articles were crossed out by the agent which we need badly and which, I am sure, the Department would have been disposed to grant us. It seems that the agent is over-zealous in these matters. Besides, none of the things that were asked for and approved by the agent have been received so far.

Original on.... 132-7-9.

Bay
Ottawa, September 12, 1930.

Reverend Sir:

Father Lajeunesse has brought to the Department's attention your request for an exchange of land at the Guy Indian Residential School. I may say that this was granted two years ago, and I cannot do better than enclose a copy of the official letter to His Lordship Bishop Charlebois.

Concerning a road from Sturgeon Landing to the Flin-Flon Railway, a distance of 16 miles, I may say that the Department would be favourably disposed to provide some assistance next year. It will be necessary to know, however, what the work will cost and what proportion would be expected from us.

A note is being taken for next year's Estimates in connection with the ice house. You might let me know, in a separate letter, whether the school would be satisfied with an ordinary ice house or whether you are hoping to secure a freezer. If a building equipped for freezing fish and meat is really needed, the Department will expect the church authorities to bear a portion of the cost. The ordinary ice house and cold storage that the Department generally builds at Indian residential schools costs approximately \$1300. The plans that Bishop Charlebois had some time ago call for a building which would cost approximately \$5,000.

I trust that the articles which have been allowed by the Department on recent requisitions have now been purchased and have reached the school.

ENCL. *[Signature]*

Memorandum:

MR. BUSZARD.

With reference to your memorandum of the 16th instant, concerning improvements to the heating plant at the Guy Indian Residential School, I may say that this institution is 135 miles by water from The Pas, Man. The School is located in Saskatchewan and is really not in the agency of Mr. Tweddell, our representative at The Pas. The reason Mr. Tweddell is asked to assume some responsibility is that all transportation to the school is via The Pas.

In the case of remote Indian residential schools, of necessity, the Department must deal direct, in part, with the school principal or the church authority that is directly responsible for the management. With particular reference to improvements at The Guy School, instructions are sometimes given to Mr. Indian Agent Tweddell and sometimes to the Roman Catholic Bishop, the Right Reverend O. Charlebois, O.M.I., who is also at The Pas.

A Mr. Patterson, an engineer of the Fairbanks-Morse Company, of Winnipeg, has been at the school in connection with the installation of a steam engine, a boiler, laundry machinery, an electric battery and necessary fittings which were purchased from the Company. Bishop Charlebois was given the authority direct from Ottawa to engage the Company's engineer. I wanted the installation of the mechanical plant to be done by an expert and to be entirely satisfactory to the church authorities. For this service, the engineer is to receive \$12 per day. No accounts for his services have yet reached the Department; but, when they are before us, they will be scrutinized with the usual care.

The accounts for fittings and other materials used in connection with the installation of the new equipment were certified by the Reverend Father M. Lajeunesse, who is Bishop Charlebois' business executive. Indian Agent Tweddell's attitude in the matter has been entirely correct. He could not certify to some of the accounts in connection with Mr. Patterson's services and the improvements themselves, because the authority was not directed to him and he was not being held responsible for the work.

Regarding the necessity for the improvements, I may say that they were recommended by our own Architect. Some additional repairs to mechanical plant have been authorized since Mr. Patterson arrived at the school, following the recommendation of the Indian Agent. If the School Principal has had any further work done, of course, he will have to meet the costs.

Work done by Indians on new installation at Guy Indian School.

Sept. 17/30.

Digging new foundation for gasoline engine, pouring concrete, and taking engine off old foundation onto new one.

4 men 3 days each (4 hours' overtime) 124 hours.

Mounting gas and steam engine clutches on engine room shafting, and putting back in place.

5 men. 2 days. 100 hours.

Installing new batteries, making new shelving, and taking old batteries out.

2 men. 2 days. 40 hours.

Installing steam and water piping and lagging same.

3 men. 7 days. 210 hours.

Installing laundry steam dryer, and friction clutch for same, and new SKF bearing on laundry shafting.

Note: This meant taking shafting down.

2 men. 4 days. 80 hours.

Taking down radiators and piping in laundry to make room for steam dryer.

4 men. $\frac{1}{2}$ day each. 20 hours.

Altering water tower steam piping to use exhaust steam, as well as steam from heating boilers.

1 man. 1 day. 10 hours.

Repairing burst 3" water tower piping.

4 men. 1 day each. 40 hours.

Installing new drains in new boiler room, cutting up concrete, helping thread piping and recementing floor.

1 man. 2 days. 20 hours.

Installing wood hopper chute in concrete outer wall of old boiler house.

2 men. 1 day each. 20 hours.

Installing boiler in place on foundations and lagging same.

3 men. 2 days. 60 hours.

Digging trench from laundry drain catch basin to steam engine, for steam engine separator drains and dryer drains.

Note: Heavy Hammer and big chisel required for this work.

2 men. 2 days, each. 40 hours. ✓

Tightening up water tower bolts and renewing nuts on some of them. Special scaffolding used on this work.

3 men. 1 day, each. 30 hours. ✓

New boiler room.

Building up wooden walls (double, with sawdust between walls) and galvanized sheeting on roof and passage.

3 men. 6 days, each. 180 hours. ✓

Building up casing round water tower piping, two thicknesses of paper, and 6" of sawdust.

3 men. 6 days, each. 180 hours. ✓

Taking boiler and other machinery from water front up to building.

4 men. 4 1/2 days, each. 60 hours. ✓

New Boiler Room

Cutting down old concrete wall at end of old fuel room, digging out new boiler room; i.e., chiselling out limestone, rock boulders, clay, etc., building forms, mixing and pouring concrete, fetching aggregate and sand from a mile away and sieving it, and erecting dividing partition. *impart*

10 men. 15 days. 1440 hours.

Cutting out old gas engine foundation, digging steam engine foundation, taking steam engine through window, mixing and pouring cement and putting engine on foundation.

4 men. 4 days each. 160 hours. ✓

**THE CANADIAN FAIRBANKS-MORSE COMPANY
LIMITED**

FILE:—

SUBJECT:—

WINNIPEG, MAN.

September 17, 1930

Mr. Waddell,
Indian Agent,
The Pas, Man.

Dear Sir:

I am giving you a rough time sheet of work done at Guy Indian School installing new machinery. The work actually started on June 30th and finished August 31st. Blue prints will be forwarded on to you from Winnipeg as soon as printed, with any additional information you may require.

Regarding the machinery.

There is one locomotive return tube type of boiler installed 125 lb. pressure for supplying a 16 horsepower Climax Engine with steam.

Also a complete new set of Globelite Batteries,
And one steam dryer for the laundry.

Taking the boiler first.

There is one Duplex steam pump for supplying water to the boiler. Water can be taken by the pump from:

- (1) The heating return mains
- (2) The hot water tank
- (3) Cold water from the water tower.

There are also two steam Penberthy injectors, either one of which can be used to supply water to the boiler; the water being drawn from a separate tank in boiler room.

A cold water supply is also directly coupled up to the boiler from the building water main; this can be used when the steam pressure is below 20 pounds.

So there are five different ways of supplying water to the boiler:

- (1) By Steam Pump
- (2) By One Injector
- (3) By a Second Injector
- (4) By cold water direct from water system when pressure is below 20 pounds.
- (5) By hot water direct from hot water storage tank when pressure is below 20 pounds.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 3)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

Per Copy

Mr. Waddell - 2.

Taking the 16 HP Steam "Climax" Engine next.

It is capable of running all the following at the same time:

- (1) Charging the batteries and supplying the building with light.
- (2) Pumping Water
- (3) Running laundry machinery
- (4) Running baking machine.

The exhaust piping from the engine has been installed to:

- (1) Heat the radiators in the water tower.
- (2) Heat the radiators in the laundry steam dryer.
- (3) Heat the hot water
- (4) Supply the building with heat.

By this method, no heat is wasted in the exhaust steam, so making the plant a most economical one.

The steam dryer in the laundry is heated with exhaust steam from the engine. There is also a line steam connection from the high pressure steam pipe that can be used when the engine is not running.

I remain,

Yours truly,

O. Pettersson,
Erector for Fairbanks-Morse.

Minister's Office

E1.

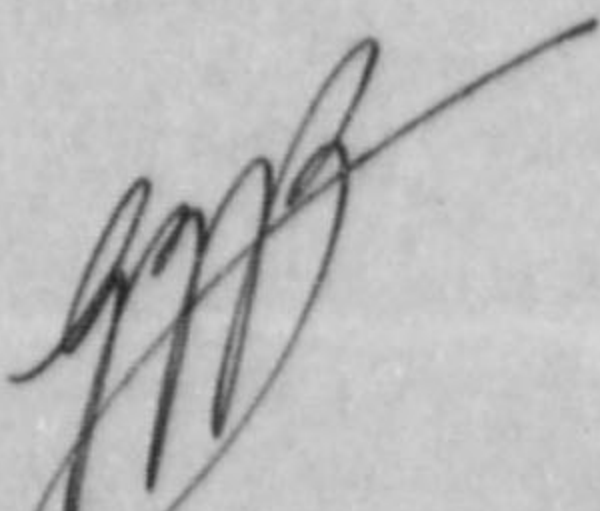

MEMORANDUM

Ottawa, September 16, 1930. +

Dr. Scott.

The attention of the Minister has been drawn to certain work in connection with the heating plant now under way at the Guy Indian School in northern Manitoba. It has been stated that the changes are more extensive than was reported as necessary by the Agent on the Reserve; that the man now employed on the work is from Winnipeg and is being paid at the rate of \$12.00 per day; that the Agent refused to certify to the accounts, and that the accounts have been paid upon the certification of an outside party.

Would you please let the Minister have a report dealing fully with the attitude of the Agent in the matter, the employment of the help from Winnipeg, and also as to the name of the party who has been certifying to the accounts and what connection he has with the Department.

Private Secretary.

September 19, 1930.

Memorandum:

MR. BUSKARD.

With reference to your memorandum of the 16th instant, concerning improvements to the heating plant at the Guy Indian Residential School, I may say that this institution is 135 miles by water from The Pas, Man. The School is located in Saskatchewan and is really not in the agency of Mr. Tweddell, our representative at The Pas. The reason Mr. Tweddell is asked to assume some responsibility is that all transportation to the school is via The Pas.

In the case of remote Indian residential schools, of necessity, the Department must deal direct, in part, with the school principal or the church authority that is directly responsible for the management. With particular reference to improvements at The Guy School, instructions are sometimes given to Mr. Indian Agent Tweddell and sometimes to the Roman Catholic Bishop, the Right Reverend O. Charlebois, O.M.I., who is also at The Pas.

A Mr. Patterson, an engineer of the Fairbanks-Morse Company, of Winnipeg, has been at the school in connection with the installation of a steam engine, a boiler, laundry machinery, an electric battery and necessary fittings which were purchased from the Company. Bishop Charlebois was given the authority direct from Ottawa to engage the Company's engineer. I wanted the installation of the mechanical plant to be done by an expert and to be entirely satisfactory to the church authorities. For this service, the engineer is to receive \$12 per day. No accounts for his services have yet reached the Department; but, when they are before us, they will be scrutinized with the usual care.

The accounts for fittings and other materials used in connection with the installation of the new equipment were certified by the Reverend Father M. Lajeunesse, who is Bishop Charlebois' business executive. Indian Agent Tweddell's attitude in the matter has been entirely correct. He could not certify to some of the accounts in connection with Mr. Patterson's services and the improvements themselves, because the authority was not directed to him and he was not being held responsible for the work.

Regarding the necessity for the improvements, I may say that they were recommended by our own Architect. Some additional repairs to mechanical plant have been authorized since Mr. Patterson arrived at the school, following the recommendation of the Indian Agent. If the School Principal has had any further work done, of course, he will have to meet the costs.

Duncan C. Scott

Deputy Superintendent General.

Reverend Father:

Mr. O. G. A. Petterson, our Engineer who made the installation of the machinery, etc., at the Guy Indian Residential School, Sturgeon Landing, has now returned to Winnipeg. On his way back, he called on you at The Pas, but unfortunately you were away. A complete set of drawings showing the various changes made at the School are enclosed, for your information.

Mr. Petterson reports that at the time he left, everything was working nicely, and we hope that the work has been done to your entire satisfaction.

Bishop's House, Le Pas, Man., November 3rd. 1930.

Department of Indian Affairs,
Ottawa, Canada.

Att. Mr. ~~C. F. G. G.~~ ^{Reverend}

Dear Sir,

Please find enclosed the last accounts in regard with the installation of Boiler, Steam Engine, Dryer, Batteries, repairing of Water Tower etc at The Guy Indian Residential School.

The expenses are somewhat higher than it was expected, notwithstanding my constant efforts to keep them down. I do not want to boast about my work but I think you would like to know what I have done in the interest of The Department.

First of all, in July 1929, I have obtained from The Canadian Fairbanks-Morse Co. Ltd, absolutely free of charge, the services of an expert who went to Sturgeon-Landing to take all the measurements and made out blue print of the work to be done. It was calculated that both expenses and labor amounted to \$152.20

Regarding the time, the Engineer, Mr. Petterson spent on the job, there was one whole week, from September 1st to 8th., inclusive, for which no charge was made. In addition to this, as I represented that we should not be charged for the Sundays, though they were practically spent in checking up material, making orders, keeping time etc... I have been granted \$58.00 credit note for this

I have also obtained from The Beaver Lumber Co. Ltd, \$66.00 discount on the lumber though their account is due since three months. At my request, the Rev. Father Principal has also passed \$58.00 credit note for the work done by his team and charged for on the Return of Labour.

Finely, with the approbation of His Lordship Bishop Charlebois, I have also discarded an account for \$93.00 presented by Rev. Father Doyon for the board of Mr. Petterson for the 62 days he was at the School.

You will find enclosed a blue print and a complete report of the work done, showing the time spent on each job, as well as the number of hours spent by additional labor which was deemed necessary.

Hoping that you will find this satisfactory and thank you for your courtesy in this matter.

I remain,

Yours very truly,

Martin Lajeunesse

Ottawa, November 14, 1930.

Reverend Sir:

I have your letter of the 3rd instant, enclosing accounts in connection with the installation of the mechanical plant at the Guy Indian Residential School. I note with satisfaction that you have effected savings for the Department. This is appreciated. It is also my duty to state that more work was undertaken than really authorized. I find that a new boiler room has been prepared. There is no record that this was authorized. However, the accounts are now receiving consideration. I am returning, for certificate, the account of The Pas Lumber Company, in duplicate, for \$2.00. All accounts should be certified correct. When this is returned, a cheque will issue in favour of the Company.

Your obedient servant,

Encl.

MEMO

Letter from Father Doyon, Principal of the
Guy School, Sturgeon Landing.

EXTRACT
ON 23/12/30
leaf 8-P

The wagon road between Sturgeon Landing and the Flin-Flon railway is almost completed. It will be used this coming winter. Its cost will be about \$1,500.00. The Provincial Government has promised to pay a part of the expense, and it is expected that the Department of Indian Affairs will pay at least a part of the balance.

Re Refrigerating Plant -

The plans of the refrigerating plant have been received, and Father Doyon would undertake to build it for the sum of \$5,000.00.

Re Mowing Machine and Rake.-

The mowing machine and the rake which were furnished to the School some years ago are now out of order. New ones will be needed for the coming year.

Presented by J.A. Lajeunesse, O.M.I.

Ottawa, December 6, 1930.

Reverend Sir,-

Reverend Father Lajeunesse has brought to the Department's attention your request for next year's estimates. I have noted that you beg the Department to give a grant toward the cost of the road from Sturgeon Landing to the railway; and that you would like a refrigerating plant. I may say that I am not hopeful that the refrigerator can be supplied next year as our funds are and will be needed for really urgent improvements.

With reference to replacing the mower and the hay rake I may say that this will have to be done from the per capita or other school earnings. When the Department builds a residential school a full complement of agricultural implements and livestock is supplied but all replacements have to be made by the school.

Your obedient servant.

OFFICE OF
INDIAN AGENT

The Pas, Manitoba,
December 13th, 1930

Dear Sir:-

The Rev. Father N. Doyon, Principal of the Guy Indian Residential School at Sturgeon Landing, Sask, called here with a Requisition for repairs, which I inclose for your approval.

Re the first item. 22' x 1 11/16 Shaft. This shaft has been damaged slightly, through contact with an iron rod, which in some way was out of place. The shaft is 1 11/16" in diameter, and the weight of the rod coming in contact with the shaft has worn or cut a slight groove in the shaft, about 1/16" deep. Father Doyon fears it might break. Not being quite satisfied that the shaft might break, I called upon Mr. Williams, The Pas Superint. of Utilities, and he advises me there is no necessity for a new shaft, but in case of a break we should purchase and have on hand a Ribbed Compression Coupling from the Fairbank Morse Coy., for 1 11/16" shaft, catalog No. 2377, costing in the neighborhood of \$7.60. By putting this coupling on the same shaft would be O.K.

The 1100 ft. of wire is for connecting the lights to the workshop and barn.

The items Connecting Rod and Piston, complete, I have deleted till I receive further information as to immediate necessity. I presume that these are meant to be spare parts.

The other articles on the Requisition are for minor repairs principally, all of which I would recommend and submit for your approval.

Your obedient servant,

Indian Agent.

Asst. Deputy & Secretary,
Dept. of Indian Affairs,
Ottawa Ontario.

Ottawa, December 19, 1930.

Sir:

I have your letter of the 13th instant, enclosing a requisition from the Principal of the Guy Indian Residential School to be supplied with shafting, connecting rod and wire for connecting the lights to the workshop and barn and other articles for minor repairs.

In reply I have to say that, as the shafting and connecting rod, etc., are in the way of replacements, it is considered that the school authorities should provide the expenditure required in supplying same from their per capita earnings or other receipts. We are not prepared at the present time to authorize the wiring of the outbuildings for lighting purposes.

Your obedient servant,

A. F. MacKenzie

439-153

R

The Pas, Manitoba,
December 22nd, 1930

Dear Sir:-

Before Mr. W.G. Tweddell, the Agent, left for Cumberland House, he requested me to write you re our letter 434-153 of the 13th, instant, in connection with the Connecting Rod and Pistons.

Mr. Tweddell received a letter from Father Doyon, Principal of the Guy Indian Residential School, stating that these parts were required as soon as possible, and were not for spare parts. Father Doyon has hung off ordering these from last year as he was trying to economize, but now both parts are worn out and the whole machine is shaking are wearing out, so at last the Father is forced to request spare parts.

I have received an estimate on these, which I list below:-

1 only No. 18C Connecting Rod Complete	\$55.70
1 " " 5-A.C. Pistons Complete	51.50

Awaiting your further instructions.

Your obedient servant,

W. G. Richardson

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, February 27, 1931.

Sir:

I am enclosing, for your attention, Return of Labour, in duplicate, which has to do with a repair to the water line at the Guy Indian Residential School. It is stated that you were unable to give favourable consideration to this account. The Department believes that this may have been an emergent expenditure, which was quite justified, and, as the Guy Indian Residential School has no means of ready communication with your office, they had no opportunity of securing the necessary authority. Further, digging during the late fall is fairly heavy work, and it is possible that Father Doyon was not going beyond reason when he engaged two men to supplement the work of the boys. Please give this further consideration, and, if you believe that the account is a fair charge against Parliamentary Appropriation, you should certify to it and return it to Ottawa for payment.

The Department commends you for your desire to economize wherever possible; but you should remember that emergent expenditures are sometimes necessary and that the Department wishes to assist our institutions with special expenses, provided funds can be found for the purpose and provided the repairs or improvements are not occasioned by inefficient management. Whenever you are in doubt about an account at an Indian residential school, you may forward it to the Department with a covering letter of explanation.

I am also enclosing a quotation of the Canadian Fairbanks-Morse Company, to put in good condition the gasoline engine at the Guy School, which is used as a supplementary unit. I should be pleased to have your report regarding the need of the repair parts mentioned in the enclosure.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Dear Sir:-

The Rev. N. Doyon, Principal of the Guy Indian Residential School, at Sturgeon Landing, Sask., has requested me to procure for him two tube expanders.

They require one for each boiler, as the flues are of different diameters, one-2 5/8 to 3 inch and one 3 1/8 to 3 1/2 inch.

I have a quotation on these, (Wiedeke Expanders) from Wood Vallance Limited, The Pas, of \$17.50 and \$18.50 each, F.O.B. Winnipeg.

I would respectfully request authority to purchase these expanders.

Ottawa, March 12, 1931.

Sir:

I have your letter of the 5th instant, returning the requisition and quotation for supplying the parts required for repairs for the Fairbanks-Morse engine at the Guy Indian Residential School.

In reply I have to say that the Department will approve of the purchase of the various items as mentioned in the requisition which is returned herewith. Regarding the supplying of the cast iron shaft, 22" long by 1-11/16 diameter, I would refer to your letter of December 13th, last, in which you stated that, after consulting The Pas Superintendent of Utilities, he advised that there was no necessity for a new shaft. The Department will, however, leave this matter in your hands, and if you decide that this shaft should be supplied to be on hand in case of breakage to the present shaft in use, you may purchase same. If, however, you consider that it is not necessary, this item should be struck off the requisition.

After the supplies have been purchased and forwarded to the school, you should obtain itemized accounts, in duplicate, properly certified, covering the expenditure incurred. These you should certify in the usual manner and send to the Department for payment. Receipts covering the cost of any freight charges should be attached. The enclosed quotation should also be attached to the accounts.

Your obedient servant,

A. F. MacKenzie

Mon Révérend Père,

S'il vous était possible de venir par le prochain courrier, je serais bien content. Peut-être bien que l'agent viendra faire sa visite dans ces jours-là. C'est qu'il y a une question grave sur le tapis: la bouilloire à vapeur. Elle n'a pas éclaté mais peu s'en est fallu. J'ai fait une description qui vous montre où elle est percée trois pouces de large. C'est ni plus ni moins qu'un défaut dans la construction. Le frère Ouimette dit même après l'avoir bien examinée que cet endroit perforé a été réparé, et très mal, après le travail de la bouilloire fini. Il dit aussi que c'est l'endroit le plus difficile dans la construction. C'est un collet autour du chapeau. Ce collet renferme deux rangées de rivets; et c'est entre ces deux rangées de rivets que se trouve l'ouverture. Il faudra faire venir un expert de la compagnie pour réparer. Comment s'arranger pour faire venir un expert? C'est la question. Je suppose que la bouilloire est garantie et j'aime à croire que la compagnie sera obligée de faire les frais de la réparation.

En venant vous pourriez aussi constater que notre four à pain est de nouveau en branle et devra être réparé le plus tôt possible. Ce qu'il faudrait pour le réparer serait:

- 1)- 10 Pcs Angle Iron $1\frac{1}{2} \times 5/16$ X 6 ft long. S'il y avait moyen d'avoir ces morceaux en double comme ceci: L, ce serait mieux.
- 2)- 50 briques de 9 pouces de long $4\frac{1}{2} \times 2\frac{1}{2}$. Le frère voudrait les avoir moins épaisses d'un côté que de l'autre pour faire une arche. Ce matériel devrait être chargé au dept. mais je ne sais pas si l'agent l'acceptera.
- 3)- Doz. Sheets Galv. Iron 12 in x 25 in. - 16 G.

Il faudrait faire venir de chez Fairbanks Morse probablement Two Phosphor bronze Bearing Sleeves of special composition for our dynamo portant l'inscription suivantes:

The Imperial Electric Co.

No 7703 K.W. 7.5. Volts Amp 60 R.P.M. 1875,

type S.B.S. Volts Adj. N.L.T.L.

285.
TRANSLATION OF LETTER SENT TO FATHER MARTIN LAZENNESSE, O.M.I. THE PAS.
FROM THE GUY INDIAN RESIDENTIAL SCHOOL. STURGEON LANDING. SASK. MAY 21st. 1931.

MY REV. FATHER.

I WOULD BE VERY PLEASED IF YOU COULD COME WITH THE NEXT MAIL
COURIER, PERHAPS THE AGENT WILL BE MAKING HIS VISIT IN THE NEAR FUTURE.

I MAY SAY THAT WE HAVE A VERY SERIOUS MATTER TO DEAL WITH:
THE BOILER: IT DID NOT EXPLODE BUT CAME VERY NEAR EXPLODING.

THE ATTACHED DRAWING WILL SHOW WHERE IT IS (PIERCED) OR BLOWN
OUT, ABOUT THREE INCHES WIDE.

IT IS NOTHING MORE NOR LESS THAN FAULTY CONSTRUCTION.

BROTHER OUIMETTE, (ENGINEER) SAYS AFTER A THOROUGH EXAMINATION,
THAT THE HOLE HAD BEEN PATCHED OR REPAIRED BEFORE, AND VERY BADLY
MENDED AT THAT.

IT IS THE COLLAR AROUND THE "HAT" OR DOME. THIS COLLAR IS
RIVETED WITH TWO ROWS OF RIVETS, AND THE HOLE IS BETWEEN THE TWO ROWS OF
RIVETS.

AN EXPERT ONLY COULD REPAIR THE DAMAGE.

HOW TO GET AN EXPERT IS THE QUESTION.

I PRESUME THAT THE BOILER WAS GUARANTEED BY THE COMPANY,
THEREFORE I THINK THE COMPANY SHOULD DO THE REPAIRS AT THEIR EXPENSE.

SHOULD YOU COME, YOU COULD ALSO SEE THAT OUR BREAD-OVEN IS
OUT OF COMMISSION AND SHOULD BE REPAIRED AS SOON AS POSSIBLE.

MATERIAL REQUIRED FOR REPAIRING:-

1. 10 Pcs. Angle Iron $1\frac{1}{2}$ x $\frac{5}{16}$ x 6ft. long.
2. 50 Brick 9 x $4\frac{1}{2}$ x $2\frac{1}{2}$ tapering if possible for building arch.
3. 1 Doz. Sheets Galvanized Iron 12 x 25-16G.

FOR OUR DYNAMO.

2 Phosphor bronze bearing sleeves from Fairbank Morse

Marked:-Imperial Electric Co.

No. 7703 K.W. 7.5 Volts Amp. 60 RPM 1875

Type S.B.S. Volts Adj. N.L.T.L.

OFFICE OF
INDIAN AGENT

The Pas, Manitoba,
May 27th, 1931.

Dear Sir:-

I have the honor to enclose herewith a letter in French, received from Father Lazennesse, Secretary to His Grace Bishop Charlebois of The Pas, Manitoba, accompanied by a drawing, and my translation to the letter in French.

This letter was sent to Father Lazennesse from the Principal of the Guy Indian Residential School, Sturgeon Landing, Sask., and deals with a defect in the boiler installed some three months ago by the Canadian Fairbank-Morse Co., Ltd., of Winnipeg, Manitoba.

I think pressure could be brought upon this Company to repair this boiler free as it clearly shows defective workmanship or material.

I would be pleased if you would take this up with the above Company, and if possible have them carry out these repairs as soon as possible.

Further in the letter attached is a list of material required for the bread-oven, which is out of commission, also requirements for the dynamo.

Should these requirements meet with your approval, I will purchase same and have the repairs made, as cheaply as possible.

Your obedient servant,

Indian Agent.

Asst, Deputy & Secretary,

Gentlemen:

I have to request that you will ship, charges prepaid, addressed to W. G. Tweddell, Indian Agent, The Pas, Man., refills for 5 - 2½ gallon Foamite fire extinguishers and also refills for 10 - #0 Fire Gun extinguishers.

Please forward your account, in duplicate, covering the cost of these refills, to Mr. Tweddell, with receipt for freight charges attached. He is being informed of the order placed with you and requested, upon receipt of the refills, to certify your account and send same to the Department for payment.

These refills are required for fire extinguishers which were supplied for the use of the Guy Indian Residential School, Sturgeon Landing, Sask. The Agent will arrange to forward the refills from The Pas to the school.

Yours truly,

Sir:

A requisition was received from the Guy Indian Residential School for refills for fire extinguishers. An order is today being placed with the Lafrance Fire Engine and Foamite, Limited, Toronto, to ship, addressed to you, charges prepaid, refills for 5 - 2½ gallon extinguishers and also refills for 10 #0 fire gun extinguishers.

This firm is being requested to forward to you the account, in duplicate, covering the cost of the refills, with receipt for prepaid freight charges attached. When the refills arrive at The Pas, please arrange to have them forwarded to the school and you should instruct the Principal to have them placed in the extinguishers. Please certify the account covering the cost and forward it to the Department for payment.

Ottawa, June 5, 1931.

Gentlemen:

The Department has received a report on the condition of the boiler installed by your Company at the Guy Indian Residential School and which shows a very serious defect in the collar around the dome. The Principal, in his report, states that this boiler came very near exploding and that there is a hole, which he considers is the result of faulty construction, at the place mentioned. The engineer at the school states that, after a thorough examination, the place where this hole occurred was found to have been patched or repaired and the work very badly done at that. He states the collar around the dome is riveted with two rows of rivets and that the hole is between these two rows of rivets. Our Agent at The Pas states that this boiler was installed some three months ago by your firm and results show defective workmanship or material.

It is considered that your firm should undertake the necessary repairs, sending an expert to do the work, and without cost to the Department or the school authorities. I shall be pleased if you will give this matter your prompt attention, as it is necessary that these repairs be carried out as soon as possible. The Department will be pleased to hear from you as to what action you are prepared to take regarding the carrying out of the repairs required. For your information, I enclose a sketch made by the Principal, showing where the defect occurred in the boiler.

Your obedient servant,

Encl. 
A. F. MacKenzie,
Secretary.

Ottawa, June 5, 1931.

Sir:

I have your letter of the 27th ultimo, enclosing a communication which you received from the Secretary to His Lordship Bishop Charlebois, regarding the defect that occurred in the boiler at the Guy Indian Residential School. In this connection I have to say that the Department is taking this matter up with the Canadian Fairbanks-Morse Company, Limited, Winnipeg, who installed the boiler, requesting them to arrange at an early date to send an expert to carry out the repairs required. This firm is being told that, owing to a defect in the boiler or in the workmanship, it is expected they should make the repairs without cost to the Department or the school authorities. It is hoped that they will attend to the matter at an early date.

With reference to the material required for the bake oven, also requirements for the dynamo, I have to request that you will arrange for the purchase of the materials required for both these services and have them forwarded to the school. It is hoped that, when the materials are received, the engineer will be able to carry out the repairs without cost to the Department. Please forward an itemized account, in duplicate, covering the cost of the materials supplied for repairing the bake oven and the dynamo. In the purchase of these, you should keep all expenses as low as possible.

Your obedient servant,

over
A. F. MacKenzie,
Secretary.

- C O P Y -

The Canadian Fairbanks Morse Co. Ltd.,
Winnipeg,
Man.

Dear Sirs;

Attention - Mr. F. W. Miller.

Answering your letter of June 18th, in connection with our letter of June 17, re boiler at the Guy Indian School, Sturgeon Landing.

Since receiving your letter I have had a personal interview with Mr. R. A. Stewart, Chief Inspector of Boilers for Manitoba, and he informs me that the boiler on which trouble developed may not be required until fall, as the scholars will be at the homes for the summer, and the boiler may not be required until school is reopened. Mr. Stewart expects to leave for Churchill in a couple of weeks, and would make a personal inspection of this boiler along with his local inspection of that district, if it is in Manitoba. He is in doubt however, as to whether Sturgeon Landing is in Manitoba, as it is near the Saskatchewan border. If it is in Saskatchewan, of course, he would have no jurisdiction, and we would have to make our own inspection.

The C.N.R. has volunteered to get the boat sailings from The Pas for us, and owing to the lack of this information now, we will be unable to leave by train to-morrow, as gas and oxygen will have to be forwarded and should be on the ground before we arrive there.

In the meantime, while I could carry out instructions given in yours of June 18, re details of the trip, I think it would be well to wait in any event until we get some idea as to sailing dates, so that very little time would be lost making connection between the Pas and Sturgeon Landing.

Hoping you may be able to advise us as to the Provincial location of Sturgeon Landing, we are -

Yours very truly,

VULCAN IRON WORKS LIMITED.

(Signed) J. S. Mowat,
Manager.

Honorable A.F. MacKenzie, Secretary.

Department of Indian Affairs,

Ottawa

Ont.

Honorable Sir:-

Excerpt for 93-128

I regret to say that my children, leaving finally the school, are going away without having been revaccinated. Last week I saw at The Pas, Man., Mr W.G. Tweddell, Indian Agent, asking him to send a doctor to treat those pupils; but not one came.

I was waiting for the visit of the same Indian Agent to see and approve the necessary repairs that have to be made during Summer. As he is not coming, after his visit to Cumberland House to pay the treaty, I undertake to write to you directly so that the necessary means shall be taken to repair the roof over the engine room and laundry room. The bad condition of that roof is really a danger for our batteries and the rest. I would not like to be responsible for a new set of batteries next year. I am including a photo re the roof. It is covered with roofing paper. The surface of it is 1764^{sq} ft. Last Fall I had tar and pitch mixed up to fill the cracks, without any good result. I do not know what you would suggest to have a good roof?

*1 thickness
3 ply roofing
4 100*

Hoping to receive from you a prompt answer, I beg to remain

yours truly,

Rev. Napoleon Doyon, A.D.D.P.
Principal.

Ottawa, July 8, 1931.

Rev. Sir:

Referring to that portion of your letter of the 21st ultimo, regarding the repairs required to the roof of the engine room and laundry room at the Guy Indian Residential School, I have to say that the Department will approve of the purchase of the quantity of felt roofing required to reroof this addition. It is considered that one thickness of three ply felt roofing, properly installed, would serve the purpose, and you may, therefore, arrange to purchase the quantity required. It is noted that the surface area of the roof is 1764 square feet. The purchase of this material should be made from the Beaver Lumber Company, The Pas, Man.

Please obtain an account, in duplicate, covering the cost of the material and also an account, in duplicate, covering the freight charges from The Pas to the school. These accounts you should certify in the usual manner and forward to the Department, when payment will be made. The school authorities are to be responsible for the installing of the roofing without cost to the Department.

The picture of the roof which you enclosed in your letter was received.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Honorable A. F. MacKenzie, Secretary
Department of Indian Affairs,
Ottawa Ont.

Honorable Sir:-

As soon as I received your letter No 132-7-5 dated Junly 8, I ordered from the Beaver Lumber Co, The Pas, 20 rolls of felt roofing required for the engin and laundry room.

no I am enclosing herewith copies or invoices for the roof material, freight, and also what it cost the school for labour. I had to hire a carpenter from The Pas, at forty cents per hour, who spent more than 12 days to make the work. I would be glad if you could refund to me what I paid for labour, as I have to pay myself the expenses of that hired man: board and fair.

Yours truly,

Rev. Napoleon Deyon, A. d. b. P.

Ottawa, August 19, 1931.

Reverend Sir:

I have your letter of the 11th instant, with enclosures, concerning the roofing repair at the Guy Indian Residential School. You are being reimbursed for the freight, \$21.00, and for the paint, \$22.95 - a cheque for \$43.95 will be directed to you under separate cover. The Beaver Lumber Company's account for \$77 is being paid direct to the firm. I regret that our funds are so low that we cannot reimburse the school for the labour. I am returning the time sheet to you. If you will read my letter of July 8th, last, it is clearly stated that the installation was to be done without cost to the Department.

Your obedient servant,

Honorable Sir:-

No funds
Last year I was asking the Department of Indian Affairs to help us so that we could have a barge at our disposition. As I understood there was no money allowed to buy one. In July I had the opportunity to buy one in the cheapest way, for \$165.00. Would it be possible to your Department to refund the money?

Yours truly,

Rev. Napoleon Doyon, O.M.I.
Principal.

GUY INDIAN RESIDENTIAL SCHOOL (R.C.) (CONT'D.)

There are now three root cellars at the school, all of which are in use. They have stored about 600 bus. of potatoes, 140 bags of carrots, and 40 bags of beets. They also have about 500 head of cabbage, as well as several bags of onions. This year the tomatoes did not ripen on the vines, but they gathered 15 bags of green tomatoes, many of which ripened after picking. The balance of the cabbage, as pointed out previously, was used for sauer-kraut as it is impossible to keep such a quantity otherwise.

The Reverend Principal is assisted by 11 Sisters, 4 Brothers, 1 night man, and 1 farmer. The school is well managed and well looked after, and the children are receiving a good training and I believe receive good food.

EXD.

GUY INDIAN RESIDENTIAL SCHOOL (R.C.)

[Handwritten signature]
I was delighted with the improvements made at this school since my last visit. The yards have been well planned, levelled, and proper swings and teeters erected for the children. More land has been cleared and they now have two good sized gardens. The barn yard has been cleared of stumps and rocks, and new fences built and proper roads and driveways arranged.

The school I found to be spotlessly clean throughout, and the surplus clothes and bedding all neatly arranged

arranged in various closets.

The sewing room is well equipped, and I found a goodly supply of clothes, both for boys and girls, neatly stored away. The clothes are all made by the senior girls assisted by the Sisters in charge, and the work is all well done.

The laundry is well arranged and the machinery appeared in good repair. The metallic ceiling is badly rusted from the steam and dampness, and needs painting.

The kitchen work is carried on by the girls, supervised by a Sister, and all food is well prepared and nicely served. This year over 300 jars of wild fruit and rhubarb were preserved, as well as over 250 jars of peas, beans, tomatoes, corn, and squash, all of which had been grown in their own garden. This Sister also supervised the making of 18 large barrels of sauer-kraut.

The dormitories were clean, the beds neatly made, and the rooms all well aired and bright.

The fire escapes are all in good condition, and none of the doors leading to them are locked. An alarm bell is fixed on each door, which rings the moment it is opened so that it is impossible for anyone to open the door without an alarm being given. Fire drill is observed regularly, and a night man kept on duty.

The playrooms were tidy and well aired. All toilets I found in good working order and clean. Excellent care is given to all machinery, all of which appeared to be in perfect working order.

The meals

GUY INDIAN RESIDENTIAL SCHOOL (R.C.) (CONT'D.)

The meals served to the children are as follows:-

Breakfast:- Fish, potatoes, lard & bread, tea or milk.

Dinner:- Meat or fish, potatoes, a vegetable, or beans, bread, tea.

Supper:- Porridge, fish, bread, lard, tea or milk.

Puddings and dried fruit are served for dessert, also syrup.

The classroom work is carried on at present in three classrooms:-

The junior room with 47 on the roll,
The intermediate room with 36 on the roll,
The Senior " " 38 " " "

The work is carried on from Grade I to Grade VII, and the children speak out well and do not appear nervous or backward. I believe good progress is made.

The children were all clean, neatly dressed, and bright in appearance. There were no children sick, and they all appeared healthy and happy.

The barn is in good repair, but badly in need of paint. The interior was all nicely whitewashed and the floors were swept clean.

The chicken house was freshly whitewashed, and the fence in good repair. An average of 100 hens are kept each winter.

The work shop was tidy and a Brother was busy repairing shoes and moccasins. The Reverend Principal requested that a sewing machine for leather work be supplied as all their repair work, both shoes and harness must be done at home. The old machine is worn out and past repairing.

EX-11

IN YOUR REPLY REFER TO

205-11A R.C.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

REGINA, SASK. December 21st, 1931.

Sir:-

With reference to your telegram of today's date, regarding the burnt out generator at the Guy Indian Residential School, The Pas Agency, I could not obtain one of the type required in Regina, and could receive no assurance that one could be secured in Winnipeg. In view of this, and also in view of the fact that the generator is crated and at the station in The Pas, I have arranged to have it shipped to Winnipeg to-night by express, and am sending special instructions through a firm here to have the generator repaired as a rush order. I am hoping I shall be able to have this wound and repaired within two days after its arrival, which should be Wednesday morning, and will probably have it returned to the school and the current on by next Saturday or Monday at the latest.

I am told this procedure will be quicker than if a new generator were purchased as, in all probability, a man would have to go up to The Pas to take measurements, etc. I trust this action will meet with your approval.

In the meantime, the school will have to carry on for three or four days with coal oil.

A new generator would probably cost over \$600.00, and I did not feel that it would be wise to spend this amount at this time.

Your obedient servant,

The Secretary,
Dept. of Indian Affairs,
OTTAWA.

W. M. Graham,
Indian Commissioner.

Guy Indian Residential Boarding School,
Sturgeon Landing, SASK.
April 3d, 1932.

To the Secretary
Department of Indian Affairs
Ottawa Ont,

Schools

Dear Sir:-

I am informed by Rev. Father Marcotte to submit direct to you the list of Material I deem absolutely necessary for our school. We have already bought and paid at the price of \$170.00 the lumber I was asking for in the original list, which lumber will be used for general repairs.

I am asking for bearings for the Dynamo, because the ones in use now have given three years service, and are liable to fail at any time.- As it takes weeks to be in communication with Winnipeg, you realize that a new set is not superfluous.

The same remark applies for the threading tool which would enable us to make all the repairs in that line and thus save the Dept. to pay for wages and travelling expenses to experts from the outside.

As for the repair parts for the Motor boat, they are not less necessary, as without them we will not be able to use our boat next Summer.

I hope you will see your way to have these granted to our school; and you may rest assured in return that we do not spare neither our time nor our care to save as much as possible and to prevent the buildings and the machineries to deteriorate.

Yours very truly,

Rev. Napoleon Dugon, O.M.I.
Principal.

Ottawa, April 12, 1932.

Sir:

A communication has been received from the Principal of the Guy Indian Residential School requesting that certain repair parts for the motor boat and dynamo and a threading tool be supplied. I enclose herewith copy of the requisition giving particulars as to what is required, and would request that you arrange for the purchase and forwarding to the school of same. Should you require any further information, you could consult the Reverend Principal and ascertain definitely the repair parts required. After the purchase has been made, please forward an account, in duplicate, properly certified, covering the cost.

While these supplies are similar to those on the requisition which you forwarded under cover of your letter of February 29th, last, for which funds could not be provided at that time, the Department has, in view of the recent requisition, decided to authorize the purchase.

Your obedient servant,

A. F. MacKenzie

Ottawa, November 3, 1932.

MEMORANDUM

Father Lajeunesse called at the Department today and advised that the bake oven at the Guy School was completely burnt out. He states that only a second-hand oven had been supplied to this school in the first place.

He had a quotation from the Jean J. Daoust Co., 506 St. Jean Baptiste St., St. Boniface, Man., on new bake ovens, as follows:

Size No. 4 Wood burning bake oven:

Price	Freight	Tax	Dis. 5%	Total
\$550	\$13.50	Inc.	\$27.50	\$522.50

Size No. 3 Wood burning bake oven:

Price	Freight	Tax	Dis. 5%	Total
\$325	\$7.50	Inc.	\$16.25	\$309.75

Father Lajeunesse will write later stating whether or not the No. 4 oven would be suitable.

REQUISITION FOR SCHOOL MATERIAL

Date November 3d 1932For Guy Ind. Res. School The Pas Agency

NOTE:—Teachers should secure from the Department of Education, of the Province in which the Indian School is located, a list of the text books authorized for use in the white schools. In ordering text books, only those authorized in this list should be requested.

To avoid delay, teachers should give full particulars regarding each article required.

The name, series, number of grade, and name of author and publisher of all books required should be given as fully as possible.

When ordering kindergarten material, the catalogue number of some well known firm should be given for each article required.

Only one item should be specified on each line of this requisition and no entry should be made under heading "No. Authorized".

ARTICLES	NO. ON HAND	DATE OF LAST RECEIPT	NO. REQUIRED	NO. AUTHORIZED	REMARKS

Ottawa, November 15, 1932.

Sir:

I have your letter of the 7th instant, enclosing a requisition from the Principal of the Guy Indian Residential School to be supplied with a wood burning oven, lubricators for the engine and galvanized iron sheets.

Regarding the bake oven, I have to say that Rev. Father Lajeunesse visited the Department recently in connection with the supplying of an oven. He was to obtain full particulars as to the type of oven required and inform the Department. The quotation which he obtained was much less than that mentioned by the Principal on his requisition. When we hear from Father Lajeunesse, consideration will be given as to whether funds for the supplying of the oven can be provided or not, and you will be informed of the Department's decision in the matter.

You may arrange for the purchase of the lubricators required for the engine, also, if you consider the same to be absolutely necessary, you may purchase 6 galvanized iron sheets. You have not stated the purpose for which these sheets are required. It is considered, however, that the Principal should pay for this equipment. You should forward an account, in triplicate, properly certified, covering the cost of the lubricators, and if you consider that the Department should pay for the iron sheets, an account, in triplicate, properly certified, should be forwarded covering the cost of same.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Guy Indian Residential School,
Sturgeon Landing, Sask.

Révérend Père,

Votre faveur du 2 courant ne nous est parvenue que le 14 au matin. Nous nous empressons de vous répondre en informant Son Excellence Mgr Charlebois, par le même courrier.

Nous avons un peu d'explication en ce qui concerne le four tel que proposé, à vous donner. Nous n'avons jamais vendu de fours de dimensions supérieures au No 4; quand le besoin s'est fait sentir, comme à Lebret, nous avons fourni deux fours No 4, pour votre cas, un No 4 et un No 3 feraient bien l'affaire.

Cet arrangement a beaucoup d'avantages dont les principaux sont: Vous n'êtes pas forcé de chauffer les deux fours si votre cuisson ne remplit pas complètement les deux fours. La cuisson est beaucoup plus régulière dans ces unités 3 et 4 ce que nous pouvons vous garantir, nous ne pourrions pas vous assurer le même résultat avec un four de grandeur spéciale.

De plus, la fabrication de ce four spécial tel que proposé, nécessiterait de nouveaux patrons et des difficultés imprévues surgiraient ce qui en somme rendrait le coût d'un tel four, inabordable pendant ce temps que nous traversons.

Il ne faut pas oublier non plus, la facilité d'expédition que représentent deux fours de grandeurs ordinaires à comparer avec ce que nécessiterait un four de 12' de longueur ...

"LIGHTNING SERVICE AT A CURRENT CHARGE"

Dans nos entreprises nous ne nous tenons aucunement responsables des délais qui peuvent se produire par les grèves, les accidents, dans les transports ou de n'importe quelle façon en dehors de notre contrôle. Cet estimé doit être accepté sans délai.
All agreements are contingent upon strikes, accidents, delays by carriers, or other causes beyond our control. Prices quoted subject to immediate acceptance and to change without notice.

Non Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Tous ces faits considérés, nous tenons à vous faire une proposition que nous ne pouvons pas garantir pour longtemps.

Nous avons actuellement en main, un four No 4 qui n'a jamais servi et en toute première condition sauf pour le fini qui est un peu détérioré par la fumée lors de notre dernier incendie. Ce four a les mêmes garanties d'un four ordinaire, la seule différence: le fini serait poli à la machine au lieu d'un fini naturel.

Nous désirons vous faire le prix de \$800.00 pour ce four en question No 4 et le four nouveau No 3, taxe, transport, fret compris jusqu'à Atik station.
- tous nos fours maintenant comportent un thermomètre -

Si vous remarquez, la longueur du No 4 est de 96' et celle du No 3, 49' ce qui fait un total de 145' alors que vous demandiez 144' les autres dimensions étant les mêmes.

Ce four a été offert à deux autres clients en perspective, et nous ne pouvons vous assurer ce prix indéfiniment. En toute justice, nous devons vendre ce four au premier client à qui l'offre aurait été faite.

Notre expérience en cette matière est que nous vous faisons actuellement une offre que nous croyons en toute sincérité être avantageuse. Si vous désirez profiter de cette occasion nous vous conseillerions de nous télégraphier à nos dépens afin que nous ayions en main un ordre qui nous permette de vous réserver le four pour vous plutôt qu'aux autres clients.

Espérant, Révérend Père que vous nous favoriserez d'une réponse sous peu, nous sommes

Respectueusement à vous

[Handwritten signature]
Re. Oven for Guy School.

Dear Sir:-

When I had the pleasure to call to your office, in the last days of October, I promised you to furnish to your Department some informations needed in connection with the above mentioned matter.

Rev. Father Doyon, Principal of the Guy School was here yesterday and after considering the matter very carefully he says that the oven No.4 (the largest manufactured) would not be large enough to answer their needs. With this only unit they would be obliged to bake every day or at least every other day this causing a large amount of extra work both for staff and machineries, as in most of the cases they would have to run the engine only for the mixer.

Consequently we would appreciate very much if you could see your way to grant the two units No.4 and No.3.

I enclosed a recent letter from Mr. Daoust where these two units are offered for \$800.00 f.o.b. Atik.

Yours very truly,

Martin Lajeunesse

Rev. Sir:

I have your letter of the 21st instant, enclosing a communication received by the Reverend Principal of the Guy Indian Residential School from Jean J. Daoust & Cie., St. Boniface, quoting a price for the supplying of two oven units, viz., No. 3 and No. 4.

As our funds this year are extremely limited - no special amount being provided to supply this equipment - it will only be possible at the present time to furnish the school with a No. 4 oven. We are communicating with the above firm, requesting their lowest price F.O.B. Atik Station for the supplying of a No. 4 oven. It is noted that the price quoted in their letter to the Principal is for two units, No. 3 and No. 4, while we will only be able to provide, as stated above, one baking unit, a No. 4, at the present time.

Dear Sir:

Re: 132-7-5, Date November 25, 1932.

We have your above mentioned favor on hand, for which we thank you very much.

Referring to the special No. 4 we have quoted on, for the Guy Indian Residential School, we may say that we will ship F. O. B. to Atik Station, this No. 4 at our expense and pay the Government tax on same, for the sum of Five Hundred and Fifty (\$550.00) Dollars. We have to refinish this Oven because of the damage caused to the exterior of it by smoke. It has never been used and was ready for shipment, being stored in our warehouse. It will be repolished, and will have the same guarantee as any other Economy Oven. It is equipped with a thermometer and we are sure that the Principal of Guy Indian Residential School would experience as much satisfaction with it, as all the others do.

We believe we should mention ^{this} to be subject to immediate acceptance, due to the fact that we have quoted on this same Oven to other prospective buyers, and we cannot guarantee to have it on hand for a very long while.

If you think advisable to put in your order for same by telegram, you may do so and reverse charges to us.

For your information, we will now attach hereto, a copy of letter received from Mr. Paget, together with a list of Indian Residential Schools using one or more Economy Ovens.

Hoping to be favored with your valuable order, we beg to remain

Yours truly,

Ottawa, December 2nd, 1932.

Gentlemen,-

The Department is in receipt of your letter of the 28th ultimo, quoting a price of \$550., F. O. B. Atik Station, on your No. 4 Bake Oven for the Guy Indian Residential School. It is noted that you quote this price on an oven the exterior of which has been slightly damaged by smoke but which will be repolished and will be guaranteed to be the same as any other Economy Oven.

Reverend Father Lajeunesse recently visited the Department and showed us a letter which he had received from you, quoting a price of \$522.50 for your No. 4 Oven. It was understood that this quotation covered the price of a new oven. Under these circumstances, it is considered that your quotation of \$550 for the repolished oven is rather high.

Our funds this year are extremely limited and I would appreciate your giving this matter further consideration with a view to quoting a better price than the one mentioned in your recent letter.

Your obedient servant,

T. R. L. MacInnes.

Re: 132-7-5, December 2.

Dear Sir:

We thank you for your favor of December 2nd, just received today.

We have been asked for quotations by four different parties in connection with the Guy Indian Residential School. The price of Five Hundred and Twenty-two (\$522.50) dollars and fifty cents was quoted F. O. B., The Pas, as we thought His Grace MOnsignor Charlebois, O. M. I. was writing for his own purpose. We learned sometime after, that the same Oven was to be shipped to Sturgeon Landing, Saskatchewan. We find that we have been quoting according to the mailing points from letters received, for none of them, except yours was specifying where the said Oven was to be shipped.

Moreover, we had quoted this price of Five Hundred and Twenty-two (\$522.50) dollars and fifty cents for a No. 4; and Three Hundred and Nine (\$309.75) dollars and seventy-five cents for a No. 3; in the case where the Nos. 3 and 4 were needed at one time. We, sometime after, quoted Eight Hundred (\$800.00) dollars for a new No. 3 together with a re-polished No. 4, being under the impression they were going to The Pas.

We are, therefore, justified in maintaining our price of Five Hundred and Fifty (\$550.00) Dollars, F. O. B. Atik Station, thirty days, Government tax included; as previously quoted in ours to you, dated November 28th.

Ottawa, December 14, 1932.

Sir:

I have to refer further to your letter of the 7th ultimo and the Department's reply of the 15th, regarding the supplying of a wood burning oven for use at the Guy Indian Residential School. The Department is today placing an order with Jean J. Daoust & Cie., St. Boniface, Man., to supply a No. 4 Bake Oven, at the price quoted by them, viz.: \$550, f. o. b. Atik Station, Sales Tax included. The exterior of this oven had been slightly damaged by smoke, but it will be repolished before shipment and guaranteed to be the same as any other new oven of similar size. The above Company have been requested to ship the oven, addressed to the Rev. N. Doyon, O.M.I., Principal, Guy Indian Residential School, Atik Station, Man.

ENCUMB.
REQ'N. No. 80

The company have been asked to forward to you their account, in triplicate, covering the cost. When you receive notice that the oven has arrived, you should certify the account and send it to the Department for payment.

I may add that the funds at the Department's disposal this year are extremely limited and one oven is all that can be supplied for use at the Guy School. The Rev. Principal is being informed of the order placed for this oven and he is being requested to accept delivery when it arrives at Atik Station.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Secretary.

Re: 132 - 7 - 5

Dear Sir:

On December 14 last, we have received an order from you in connection with the shipping of a No. 4 Economy Oven, to Reverend N. Doyon, at Atik Station, Manitoba.

On the 22nd, shipment was made. Since then, we have been informed by Reverend Father Doyon that this Oven has reached its port safely and is now giving splendid service; that he has also informed Mr. Lovell, Indian Agent at The Pas and that we will be forwarded with payment of this same Oven. Would you please advise us at what date we could expect payment on this, as have obligations to meet in the course of a few days and we would like to give them definite dates on same.

The state of business at present will shortly compel us to let off our staff. We are trying to avoid this as much as we can and we would be ready to make special concessions on any orders placed from now on until the First of May, so as to enable us to operate the regular way. If the Department feels the need of any Economy Ovens, and that we could take the order at present on them, we would consider a special discount for this quiet season.

The matter of course, is left to your discretion, and we only want cooperation so as to curtail unemployment as much as possible.

Hoping to hear from you in the near future, we are

Yours very truly,

LD/NS

R. Sutherland
Mr J.D. Sutherland.
Acting Supt. of Indian Education.
Department of Indian Affairs.
Ottawa Ont..

Dear Sir:-

According to conditions prevailing in this country, it is impossible for this school to pay a salary to a night watch-man, what I have done for two years. I paid \$960.00 to Mr Ismael Gauthier in two years for that work. Last week I had to discharge him, for we have no funds for that work. I am disposed to do my best to keep a close watch over the school so that there will be no danger for fire and so on, but to take all responsibilities, I cannot do it anymore. If the Department is willing to pay a night watch-man, I will be glad to hire that same Ismael Gauthier, for he is very good for that kind of work. Please, let me know the Department's decision about this.

Yours truly,

Rev. N. D. Gyon. O. S. A. P.
Principal.

Guy Indian Residential Boarding School,
Sturgeon Landing, SASK.

January 28th, 1934.

[Handwritten signature]
Dear Sir:-

R

Last week, M.A.G. Hamilton, Inspector from Winnipeg, paid a visit to our school. After a thorough inspection of the school and of the buildings. M. Hamilton suggested what is most necessary to me to ask the Department for at the present time. May I call your attention on the following items.

1. M. Hamilton noticed that the school needs painting, outside and inside as well, and also the other buildings. He suggested that the Department should supply the school with paint.

2. The school would also benefit of a binder if the Department would buy one. We grow enough oats now to make good use of it.

3. I spoke to M. Hamilton of an idea that runs across my mind for quite a while. He approved of it and suggested that I refer the case over to the Department. Here is the idea: I want a sawmill. It can be operated at a low cost and both the Department and the school can have a great benefit out of it. Every year, since the opening of the school, an average of \$200. is spent on lumber and the Department did not give any financial help to that effect for the last four years. Here the timber is plentiful and the quality of the lumber would satisfy the ordinary requirements. Every year a few thousand feet of lumber can be cut for the general purpose of the school. A good second-hand transportable sawmill can be bought at a very reasonable price and I kindly ask the Department to share with me the burden of the purchase. Let the Department give me \$200. and I supply the balance of the purchase price, and I finance the operation and the upkeep of the sawmill.

4. The school has been providing with 8 fire pumps, but four should be replaced at once because they are out of order.

In the course of next week, you will very likely receive M. Hamilton's report; I hope that it will be very satisfactory.

I hope that the Department will take into serious consideration the above-mentioned necessities which the school is facing at the present time and I sincerely wish that

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

they all come to their fullest realization.

M. Hamilton, while visiting up here, mentioned that very likely a Member of the Department Of Indians will come and pay a visit to Sturgeon Landing during the summer months. I anticipate the pleasure of welcoming the honorable Member. He will then convince himself of the necessities which the school has been asking for.

I remain,

Truly Yours,

*Rev. Napoleon Doyon, O.M.I.
Principal.*

ALSO TO DATE OF THIS LETTER

Inspector's
~~COMMISSIONER'S~~ OFFICE,

Winnipeg, Man.

ED

~~REGINA, SASK.~~ February 24th, 1934.

Sir:-

I have just returned from an inspection trip to the Guy R.C. Indian Residential School, The Pas Agency, and beg to submit the following report.

There are 87 children in attendance, which are arranged in three classrooms, as follows.

The junior room is in charge of Sister of Precious Blood and there are 13 pupils in Grade I and 21 pupils in Grade II.

The intermediate room is in charge of Sister St. Eusele, with 13 in Grade III and 9 in Grade IV.

Sister St. Philip de Marie is in charge of the senior grades with 14 in Grade V, 15 in Grade VI, and 2 in Grade VII.

I spent some little time in all the rooms and was pleased with the work. The children, without exception, can be heard to read from any part of the classroom. They read with expression and understanding.

The arithmetic, spelling, and oral work was good. I examined their scribblers and work books, which I found to be neat and the work well set out.

I am glad to report that splendid progress is being made in all classrooms; the Sisters in charge speak good English and, I believe, are rendering their best services.

The children were all well dressed, clean, and neat in appearance. Their hair was well kept and combed.

The Secretary,
Dept. of Indian Affairs,
OTTAWA.

The discipline

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The discipline is excellent, and yet there is freedom and understanding, which makes the work very pleasant.

The children appeared in good health, except for two boys who are confined to bed suffering from T.B. They are isolated from the other pupils and receive the best of care and attention.

The fire equipment is in good condition, except the fire hose. These are cracked in places where they are folded back and forth on the racks. Six new hose should be provided. The dormitory doors are never locked and I found the fire escapes in good condition and free from snow. Electric bells ring if the doors are opened. A night watchman is on duty, but this is never satisfactory unless the school is provided with a punch clock and stations placed throughout the building. I would strongly recommend that a clock be provided. This is a frame building and every precaution should be taken to prevent fire. The small fire extinguishers are in good condition, but the large ones have not been refilled during the past year. I understand the solution should be renewed yearly.

*This has been ruled
PP*

The dormitories were all well aired, the beds neatly made and clean. The mattresses are homemade. I understand the Department supplied the ticking. These mattresses are almost on a par with those purchased, being filled with cotton and wool. I think the Sisters deserve great credit for this work.

The sewing room is in charge of a Sister and the girls are taught plain sewing. I saw large quantities

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Boer Copy

quantities of clothing made by the girls, and the work was neat and well done. They make all their own dresses and underclothing, also shirts, pants, coats, and underclothing for the boys. The girls also receive a splendid training in cooking and laundry work. In summer all the children do some work in the garden.

The building was clean throughout, and excellent care has been taken of the school and equipment. It was erected in 1926 and no interior decorating has since been done. The white walls need paint, especially in the kitchen and halls. I see that in the 1933-34 Estimates \$600.00 was asked for repairs. If any portion of this is available, I would like permission to buy some paint. The Reverend Principal will see that same is applied without cost to the Department. The Sisters are anxious that some cleaning be done and I trust that a small expenditure may be incurred. A hundred dollars would supply a fair amount and would greatly encourage the staff in their work. The exterior of the school is greatly showing the need of paint.

A
100⁰⁰

The main barn is about 30 ft. by 40 ft. and accommodates both the horses and cattle. At present they have 4 horses and 10 cows beside a number of young stock. The Reverend Principal feels he could do better by killing the present stock for beef and purchasing 4 or 5 registered cows with some record of production. Feed is hard to secure in this country and no doubt a few cattle of a higher class would be more profitable. The barn is badly in need of paint, most of it having peeled off.

The chicken house is in good repair. The poultry is well cared for, and fresh eggs were gathered daily

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

daily, although the weather registered 20 to 35 below zero.

There are four large root cellars; funds for one were provided by the Department, but the other three were erected at the expense of the school authorities. These cellars, even yet, have a bountiful supply of potatoes, carrots, beets, cabbage, turnips, and sugar beets. In fact, although this school is far north, it has perhaps the largest supply of vegetables, with the exception of Brandon, of any school I visited this past year. The children have abundance of food, both vegetables and meat. The menu is as follows:-

Breakfast	-	Fish with rice or potatoes; bread and lard. Tea with milk and sugar.
Dinner	-	Soup; meat with beans or macaroni, or fish and potatoes. Once a week, dessert - syrup, prunes, dried apples with doughnuts or cake. Tea with milk & sugar. All the bread they desire.
Luncheon	-	Raw carrots; bread cakes or bannock.
Supper	-	Fish and porridge; bread with lard; tea with milk & sugar.

The children have all the food they wish, and certainly appear well fed.

In the warehouse was stored about 4,000 frozen whitefish and trout, and nearly 3,000 lbs. of beef was packed away in ice. The other storehouse was filled to capacity with flour, oatmeal, sugar, rice, and all the other supplies necessary to do until December of this year. All freight now goes over the Hudson Bay railway to Atik and is freighted in some 20 miles during the winter.

The Reverend Principal has cleared a quantity of land and has made a wonderful improvement in the grounds surrounding the school. Last year, he grew approximately

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

approximately 15 acres of oats and hopes to increase this to at least 25 or 30 acres. He requested that a 6 ft. binder be supplied to assist in harvesting. The sheaves could then be stored under cover and no waste would occur. We have very little outlay in machinery at this point and, if possible, I would like to have the binder supplied.

The garden certainly must have been an object lesson to all who visited the school. In addition to the supply of roots stored, the Sisters have a large quantity of home canned peas, beans, tomatoes(ripe), corn on the cob, as well as all kinds of mixed pickles. This school is doing excellent work and is worthy of any consideration which the Department can give.

The Principal, Rev. Father Doyon, pointed out the need for lumber, both for repair work and for the erection of outbuildings. He stated that each year the expense in this connection reached \$200.00, and felt that it would be to the advantage of all if a sawmill could be provided. He stated if the Department would supply \$200.00, he would raise the balance required and pay all other costs. I am quite sure a suitable outfit would cost at least \$500.00. I feel the Reverend Principal has presented a reasonable proposition, and as the school would reap the benefit, in that all the rough lumber necessary could be provided, I would recommend that the Department grant assistance to the extent of \$200.00.

200

It is perhaps unfortunate that a school of such high standard is so situated that few white people are privileged to see it. Certainly it is a credit, both to the Department and the church, and is undoubtedly doing excellent

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

excellent work in the classroom as well as outside. The children receive a thorough training - the boys, in gardening, care of stock, shoemaking, and carpentering; the girls, in cooking, sewing, laundry work, and also in gardening. The discipline is excellent and I am sure the pupils leave the school much better fitted to cope with whatever conditions they may be obliged to face.

Your obedient servant,

A. G. Hamilton

WINNIPEG, MAN., February 24th, 1934.

Sir:-

In reply to your letter dated February 17th, No. 132-7-5, I now enclose herewith my report in connection with the Guy Indian Residential School, The Pas Agency.

I visited this school on January 24th, but only returned to Winnipeg on February 22nd, consequently the delay was unavoidable as the intervening time was spent on inspection work at The Pas and points throughout the Manitowapah Agency. Other school reports will be submitted in the near future.

Your obedient servant,

A. G. Hamilton

EX'L.

Ottawa, March 2, 1934.

Sir:

I beg to acknowledge receipt of your 205-11A-R.C. of the 24th ultimo, enclosing a report regarding your recent visit to the Guy Indian Residential School. The Department is pleased to note that you found everything satisfactory.

You may arrange for the purchase of the fire hose that is necessary and you may also expend an amount not exceeding \$100 for paint. Please make these purchases as soon as possible and forward certified accounts, in triplicate, in order that payment can be made from the current year's Appropriation.

There are not sufficient funds available at the present time to permit consideration of allowing a grant for a sawmill at this school.

Refills for the fire extinguishers were ordered on the 23rd ultimo and are going forward, by express, addressed to the Principal, at Atik Station.

Your obedient servant,

T. R. L. MacInnes
T. R. L. MacInnes,

APR 3 1934

132-7-5
The Pas, Manitoba,
March 29th, 1934.

Dear Sir:-

I beg to report that it was found necessary to send the dynamo of the Guy Indian Residential School to the Electric Equipment Limited, Regina, Sask, for repairs.

Father Doyon stated the armature had to be tested, also it was not straight on the shaft. The commutators were grounded between the ~~shaft~~ bars, and it was sent to the same firm as repaired it once before, as these repairs could not be done here.

The school, meantime, are carrying on with oil lamps, hence the rush to have this dynamo repaired.

I trust this will meet with your approval.

Your obedient servant,

Samuel Lovell

Mr J.D.Sutherland,
Acting Supt.of Indian Education
Dept.of Indian Affairs
Ottawa Ont.

Honorable Sir:-

Again this year I come to you
asking the Department of Indian Affairs to pay a salary
to our night watchman of the school, who is Mr G.Riou.

Last year you did favored me with a salary of thirty
(\$30.00) dollars a month.

Hoping to receive the same favor this year, I beg to
remain yours very truly,

Rev. Napoleon Dayon.
Principal.

Gentlemen:

I have your letter of the 27th ultimo, with reference to payment of your account to the amount of \$21.97, covering material shipped to Sturgeon Landing, Sask., in February, last. In this connection I would request that you forward an itemized account, in triplicate, to

Rev. N. Doyon, O. M. I.,
Principal,
Guy Indian Residential School,
Sturgeon Landing, Sask.

You should request him to certify the account and forward it direct to this Department, when payment will be made.

It does not appear that your account has been forwarded to the Principal, and it is necessary that he certify that the goods were received before payment can be made. I regret the delay in this connection.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,

332-153

The Pas, Manitoba,
October 1st. 1934.

Dear Sir:-

I have the honor to attach herewith the Guy Indian Residential School returns for quarter ending Sept. 30th, 1934 with Admission & discharge form.

I also attach herewith a requisition from this school.

In a letter to me the Principal states there are four children over 16 years old in school, that he understood children were to be kept till they were 18. He stated it is too late now to send these children home, but that they will all be discharged next year.

Regarding the requisition, if this is approved the cheapest and best way to ship same is to send it by winter freight to Attik on the Flin Flon railway.

Your obedient servant,

Samuel Lovell

Ottawa, October 10, 1934.

Sir:

I have your letter of the first instant, enclosing a requisition from the Principal of the Guy Indian Residential School, in which he requests that certain farm machinery, paint and wrought steel piping of various sizes and lengths be supplied.

The Department will have no funds this year to provide for this expenditure. When our Estimates for the next fiscal year are being prepared, consideration will be given to including the amount required to supply the equipment and materials mentioned above. I would request, however, that you submit, as soon as possible, an estimate of the cost of supplying the following:-

- | | |
|---------------------------------|------------------------|
| 1 Binder, 5 ft. cut., | 1 Mower, |
| 1 Chaff cutter, | 80 gal. outside paint, |
| and the quantity of steel pipe. | |

You should also give particulars regarding the sawmill equipment required and the approximate cost. The above information with reference to the cost involved is required when consideration is being given to providing the amount in the Estimates for next year.

Regarding the typewriter, I regret that it will not be possible to supply a machine this year. This request will have to stand over for consideration at a later date.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Secretary.

Dear Sir:-

Further to my letter #389-153 of October 17th, regarding a sawmill for the Guy Indian Resid. School at Sturgeon Landing, I beg to advise you that I have interviewed Father Doyon the Principal and find that all he wants is the frame and track belting, saw and carriage. They have the power at the school to run this saw.

If this were made in The Pas it would cost approximately \$400.00 which is a big saving from having to buy same.

Trusting this is the desired information.

Your obedient servant,

Samuel Lovell

Sir:

I have your letter of the 28th ultimo, regarding the request of the Principal of the Guy Indian Residential School, to be supplied with 6 pieces of 2" extra strong galvanized iron, each 11 ft. long, for the school steam boiler.

In reply I have to say that the Department will approve of you arranging for the purchase of this material. It is noted the cost will be approximately \$34.50, f. o. b. The Pas. After the purchase had been made, you should obtain an account, in triplicate, covering the cost, which you should attach to proper voucher forms, certify in the usual manner and forward for payment.

I have also your letter of the same date, with reference to a sawmill, stating the type of equipment required and the cost. In this connection I have to say that the Department has no funds available at the present time to authorize the purchase of sawmill equipment. Consideration will be given when our Estimates are prepared for the next fiscal year. However, I am not in a position to state whether the funds for this purpose will be provided.

[Handwritten signature]
Dear Sir:-

I keep in mind the short interview I had with you October 5th, 1934. I was most glad to see you and give you referendes about the Guy School. Since eight years, you agreed with me that I did not ask many things to the Dept.; and I was thankful to you for the good note you gave to the progress of my school. However in the meantime I was asking few articles whose list of requisition you received that same day of my visit. You were going to give to it all your consideration. As I did not received any details about yet, I dare again to come and ask you if it will be at all possible to obtain from the Department of Indian Affairs that material so much desired for my school.

Not to cause you to much trouble, I include with this letter copy of the list and letter sent on Sept. last to Mr Lovell and to you. I would also draw you attention to my letter of January 28th, 1934 regarding Mr Hamilton's report, to this matter.

I am ready to make the transportation of this material, for it is the best time of the year.

Yours truly Rev. N. Dayon, O.M.I.

The Pas, Man.,

Jan. 7th, 1935.

132-7-5
JAN 12 1935

Dear Sir,

I have a letter from the Rev. N. Doyon, O.M.I., the Principal of GuyIndian Residential School, in which he asks that his steam boiler be inspected.

The Department of Public Works, Regina, state that they do not make regular inspections of boilers in such remote places, but if the Department of Indian Affairs, will pay all the expenses of the inspector from Hudson Bay Junction and the school and return, they will send an inspector up on a special trip. They further state that the trip will take the better part of a week.

This boiler has been in the school, I believe, for about ten years and has never been inspected by a competent person. I think it desirable that this boiler be inspected periodically so that we can be sure it is quite safe.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa.

Samuel Lovell
Indian Agent.

Indian Affairs. (RG 10, Volume 6313, file 655-5, part 4)

BoR Copy

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, January 15, 1935.

Sir:

I have your letter of the 7th instant, relative to the request of the Principal of the Guy Indian Residential School to have the steam boiler inspected.

In reply I have to say the Department regrets there will be no funds available during the present fiscal year to pay the cost of an inspector of the Provincial Department of Public Works, Regina, from Hudson Bay Junction to the school and return. While it is, no doubt, desirable that an inspection be made, could not the school authorities, themselves, pay the cost of the inspection? It is hoped that the school authorities have a competent engineer in charge of the boiler and that every care is taken in its management and operation.

For your information, I may add that a request has also been received from the Principal, to be supplied with certain farm machinery and paint for the exterior of the school building, shop and hen-house and a quantity of piping, couplings, etc., for the steam boilers. You were authorized, in official letter of the third ultimo, to purchase 6 pieces of 2", extra strong, galvanized iron piping for the hot water boiler. I would request that you arrange to have this supplied and the accounts, in triplicate, properly certified, forwarded for payment before the end of the present fiscal year, viz.: March 31st, next.

Regarding the other equipment asked for by the Principal, he is being informed that, until our Estimates are passed by Parliament at its next session, we will be unable to state what funds, if any, are available during the coming fiscal year to supply equipment for this school.

Your obedient servant,

A. F. MacKenzie,
Secretary.

132-7-5.

Ottawa, January 15, 1935.

Reverend Sir:

I have your letter of the 4th instant, addressed to Mr. Sutherland, of this Department, enclosing a requisition, in which it is requested that certain farm machinery, a sawmill, a supply of paint, and a quantity of steel pipe of various sizes be provided for use at the Guy Indian Residential School.

In this connection I have to say that Mr. Lovell, Acting Indian Agent, The Pas, Man., has been authorized to purchase 6 pieces of 2 ft., extra strong, galvanized iron, each 11 ft. long, for the hot water boiler. No doubt, this will be forwarded in the near future.

Our Estimates for the next fiscal year have not yet been approved, and I am therefore not in a position to state, at the present time, how much, if any, of the other equipment asked for in the requisition can be supplied. I may add, however, that it is very doubtful if funds will be available to provide the cost of supplying the farm equipment and a small sawmill. It will likely be the first of April before the Department is definitely aware what funds are available to provide equipment, etc., for your school during the fiscal year 1935-36.

Your obedient servant,

A. F. MacKenzie

DEPARTMENT OF INDIAN AFFAIRS

CANADA

The Pas, Man.,

Feb. 14, 1935.

Dear Sir,

With reference to your letter 132-7-5, dated Dec. 3rd, 1934, I beg to advise that I purchased the galvanised pipe from Wood Vallance, Ltd., The Pas, the firm from whom I had obtained the approximate cost of the material when I wrote to you on Nov. 28th, asking for authority to purchase it.

It appears that Wood Vallance did not have a catalogue showing the cost of the pipes, but one of the clerks simply told me what it thought it would cost. It, of course was not a tender.

The cost of the pipes is \$50.46 delivered at Atik, which is considerable more than I said it would cost. This is regretted but I was simply giving you the information that had been given to me by Wood Vallance. The pipes are now installed at the Guy Residential School and there is nothing I can do but certify to and forward the accounts for payment.

Your obedient servant,

Samuel Lovell
Indian Agent.

flooded the kitchen floor and one or two other basement rooms. This could be prevented by a cement walk around that portion of the school most effected. I understand the total distance would be about 80 ft. and the walk should be at least 6 ft. wide. At the end of the walk, the Rev. Father intends to make a small cement ditch which would carry the water away. The expense in connection with this would only entail the purchase of a quantity of cement, probably around 35 to 40 sacks.

I would also draw the Department's attention to my report of February 24th, 1934, in which I pointed out the need for paint, both on the exterior of the school and barn. The buildings are certainly presenting a more neglected appearance each year and, if possible, the painting should be carried out.

I do not know the amount of money included in the Estimates for this school, but I trust funds are available and that I may receive authority to carry out the recommendations mentioned.

INSPECTOR'S OFFICE

ED

WINNIPEG, MAN., June 19th, 1935.

Sir:-

While at The Pas in connection with the treaty party, I met Rev. Father Doyon, Principal of the Guy Indian Residential School, Sturgeon Landing. I regret that I was unable to visit the school, but wish to submit the following requests received from the Rev. Father, which I trust will be given consideration.

In my last report, written on February 24th, 1934, I pointed out the need for a small binder to harvest the grain crop. This year the crop will amount to approximately 30 acres and unless a binder can be obtained, it would be useless for the Rev. Father to anticipate bringing any further acreage under cultivation. A 5 ft. binder would meet their requirements and would cost approximately \$215.00 F.O.B. The Pas. This size binder is not handled in the West and would have to be ordered in time to be shipped with other machinery from the Eastern factories.

Last winter the Principal had a difficult time to keep the pipes from freezing in the room where the pressure boiler is installed. This room is a lean-to from the main building and the roof is covered with corrugated iron. The Rev. Father wishes to put another roof over this with an air space between. The size will be about 18x24 and the material required will be shiplap and rubber roofing. The cost of this work will amount to approximately \$40.00. I would recommend that this work be carried out before the cold weather sets in. A freeze-up in connection with the pipes would entail heavy expense and would be a serious matter in view of the remote location of the school.

This spring the water from the roof effected the basement wall in several places and I understand

Ottawa, June 26, 1935.

Sir:

I have your 205-11A R.C. of the 19th instant, regarding the request of the Principal of the Guy Indian Residential School, to be supplied with a small binder and also to have certain repairs carried out.

In this connection I have to inform you that there is an item, to the amount of \$500.00 in our Estimates for the current fiscal year, for painting and miscellaneous repairs at this school. No funds were provided to supply a binder. It is considered the school authorities should supply this equipment from their per capita allowance or other receipts.

The Department will approve of the Principal installing another roof over the room in which the pressure boiler is situated. It is noted that the material required - shiplap and rubber roofing - would cost, approximately \$40.00. Itemised accounts, in triplicate, properly certified, should be forwarded covering the expenditure.

Regarding the installing of a cement walk around that portion of the school most affected by flooding from water from the roof, I have to say that the Department will approve of the expenditure in the purchase of the quantity of cement - approximately 40 sacks - in having the cement walk installed. The school authorities will have to carry out the labour, without expense to the Department. Accounts, in triplicate, properly certified, covering the cost of the cement, should be forwarded for payment. After payment has been made for the cost of installing another roof over the room in which the pressure boiler is installed and the cost of supplying the cement, the Department will approve of the balance of the \$500.00 available being utilized in the purchase of paint, oils, etc., in the painting required to the exterior of the school building. The Department would like to be advised of the amount of the painting that could be carried out for the unexpended portion of the appropriation provided for this school and the quantity of paint, etc., that it would be necessary to supply. You might take up this matter with the Principal, advise him of the expenditure authorized above and request him to inform you regarding the painting. It is presumed that the staff could do the greater part of the work if the painting materials were supplied.

Your obedient servant,

A. F. Mackenzie,
Secretary.

[Handwritten signature]
Dear Sir,

When I was at the Guy Indian Residential School recently, the Principal drew to my attention to condition of the boiler used for heating the water required for the School. This boiler is in very bad condition. In fact it is in a dangerous condition, as it is extremely thin and there are over thirty patches in it.

The boiler is heated through pipes running through the furnace in winter and by a jacket heater in summer.

38203
I wrote to Inspector Hamilton and reported the matter to him and asked him to find out in Winnipeg what the cost of a new boiler would be. One with black coil pipes would cost \$330.00 and one with brass coil pipes would cost \$383.00. There would probably be additional cost for installation as there would be other material required connecting it up. The staff could do the actual work of installing it. I think \$20.00 in addition to the cost of the boiler would cover everything.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa.

Samuel Lovell

Ottawa, October 11, 1935.

Sir:

The Department has received a communication from S. Lovell, Indian Agent, The Pas, regarding the condition of the boiler used for heating water at the Guy Indian Residential School. Mr. Lovell states he wrote you, to ascertain the cost of supplying a new boiler, and that a boiler with black coil pipes would cost \$330 and one with brass coil pipes, \$383.

The Department has funds available for repairs and equipment at this school, to the amount of \$500, and is prepared to authorize the expenditure in supplying a new hot water boiler. I would request, if you have sufficient information on hand to place the order, that you will arrange for the purchase, from a firm on the approved list, of a boiler with brass coil pipes and for the forwarding of same to the school. It is hoped that the cost, including transportation charges, will not exceed the sum of \$400.00. If you have not sufficient information to place the order, you should communicate with Mr. S. Lovell, Indian Agent, and ascertain definitely the requirements. It is understood that the staff of the school will carry out the work of installing the new boiler.

I would request that you give this matter your early attention. After the purchase has been made, please obtain an account, in triplicate, covering the cost, attach same to proper voucher forms, certify in the usual manner and forward for payment. A voucher, covering the transportation charges, with receipt attached, should also be forwarded.

The Department will leave the matter of purchasing the new boiler in your hands, to make the best arrangements and at the lowest possible cost.

Your obedient servant,

T. R. L. MacImmes

Dear Sir:

The Department has received the enclosed requisition, forwarded by Rev. Father Plourde, O.M.I., from the Principal of the Guy Indian Residential School, Sturgeon Landing, Sask. I would request that you ascertain, from Marshall-Wells, in Winnipeg, the cost of the various items of equipment, as mentioned, from the catalogue of that firm, and advise the Department. You should, also, make enquiry and state the cost of the bearings and brushes required for the dynamo.

Regarding the shiplap and the quantities of the various dimensions of plank required, I would request that you state the best source of supply. Would it be more advantageous to purchase this material at The Pas or have it forwarded from Winnipeg? Could you state, also, the approximate cost of supplying the shiplap and plank.

The Department is informing Father Plourde that you are being requested to obtain prices on the equipment asked for by the Principal of the School and submit same for consideration.

Yours truly,

Encl.

No. 205-11A R.C.

ALSO TO DATE OF THIS LETTER

FEB 18 1936

RECORDS

Sir:

In reply to Department Letter 132-7-5 dated February 7th, I beg to advise that the hardware, as listed, will cost approximately \$160.00 F.O.B. Atik, Manitoba.

The lumber should be purchased at The Pas where the price is practically the same as Winnipeg. Winnipeg prices are as follows:

Shiplap	\$44.00 per M
Plank, 2x14-10	70.00 "
" 2x6 -14	45.00 "
Dimension 2x4-14	45.00 "

These prices are subject to from 15 to 20 percent discount.

I understand from the Canadian Fairbanks-Morse people that the bearings and brushes required will need to be brought in from the States and the price will be approximately \$10. each for the bearings and \$1.25 each for the brushes.

Your obedient servant,

A. G. Hamilton

Sir:

I have your No. 205-11A R.C. of the 15th instant, quoting a price for the supplying of the lumber, hardware, etc., for use at the Guy Indian Residential School, as per the requisition which was enclosed in communication to you of the 7th instant. I may add that the Department did not keep a copy of this requisition on file. I would request that you arrange for the purchase and forwarding of the hardware, as listed. It is noted the cost would be approximately \$160, f. o. b. Atik, Man. You may arrange, also, for the purchase of the bearings and brushes required. It is noted the cost of the bearings will be approximately \$10 each and the brushes, \$1.25 each. Please obtain itemized accounts, in triplicate, covering the cost. These, you should attach to proper voucher forms, certify in the usual manner and forward for payment. Receipts for any freight charges should be attached.

Regarding the purchase of the shiplap and plank, it is noted that this material can be obtained at The Pas, and I would request that you arrange with Mr. Agent Lovell to make purchase of the quantity of shiplap and plank, as stated on the requisition, and have same forwarded to the school. Please obtain itemized accounts, in triplicate, covering the cost. They could be certified by the Agent and forwarded to you for transmission to the Department.

I would request that the purchase of all the above equipment be made as soon as possible, in order that the accounts can reach the Department before our books close at the end of the fiscal year, March 31st, next. The Department will leave the purchase of the supplies in your hands, to obtain same at the lowest cost.

Yours truly,

Prices are all F.O.B. Atik, Manitoba, and are
subject to the usual terms.

We are unable to quote prices on the Typewriter
or Dynamo parts.

We do not carry Yale Chain Blocks, but have
quoted "McKinnon" Blocks, which are described in the en-
closed pamphlet, and we feel sure they will give your cus-
tomer satisfactory service.

We are also unable to quote on 2-pt. Barbed Wire,
as we have very little call for that style now and have
discontinued it.

Yours truly,

Ottawa, March 3rd, 1936.

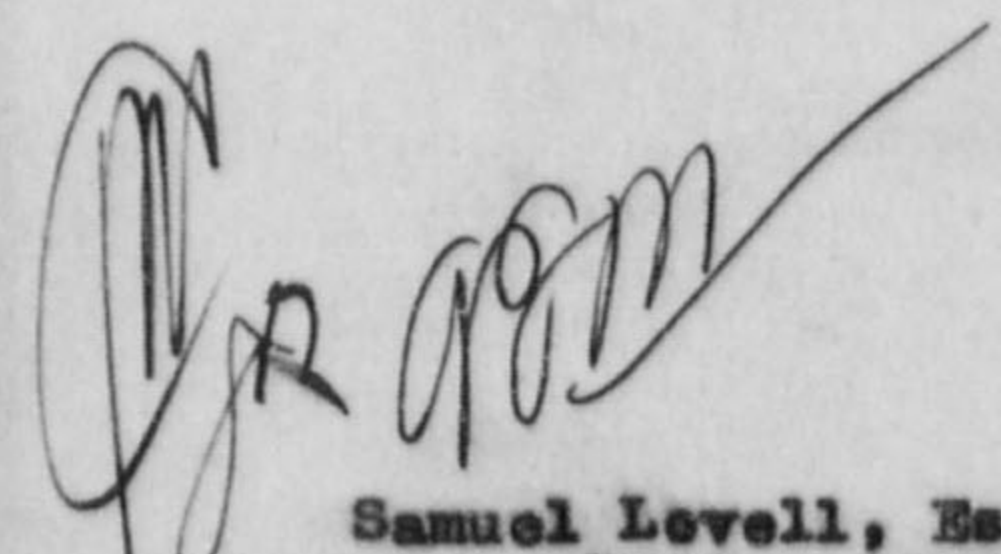

Dear Sir,-

The Department is placing an order for five (5) recharges for 2½ gallon Foamite extinguishers and ten (10) refills for 1 quart Fire-Gun extinguishers for the Guy Indian Residential School. These recharges will be shipped direct to the Principal, addressed to Atik, Mile 35, Flin Flon Railway, Manitoba.

The account, in triplicate, will be forwarded to you and you should arrange to have the Principal advise you when the refills are received, in order that you may certify the account and forward it to the Department for payment.

Yours truly,

A. F. MacKenzie.

Dear Sir:

I have to inform you that the sum of, approximately, \$800 to \$1,000 is available in the Appropriation for Indian Education for the current fiscal year to carry out certain repairs, painting, etc., at the Guy Indian Residential School. I would therefore request that you take up with the Principal the matter of the work, which should include materials and any labour, that he desires be carried out at this school during the present fiscal year. As full details as possible should be given and also a complete list of materials, paint, etc., as it may be necessary to arrange for the purchase in Winnipeg. Any painting the Principal desires should be in the interior of the school building only, as it is not intended, this year, to provide the cost of any extensive exterior painting of buildings. As complete a report as possible of the work recommended, the approximate cost and a list of the materials should be forwarded at an early date. Full shipping directions for any material supplied should also be given.

Yours truly,

A. F. MacKenzie

OFFICE OF
INDIAN AGENT

The Pas, Man.,

Sept. 17, 1936.

Dear Sir,

With reference to your letter 132-7-5, dated April 24th, 1936, in connection with repairs for Guy Indian Residential School. Owing to pressure of work, Mr. Lovell, has been unable to make a visit to the Guy School this year, consequently he was unable to make a report on the repairs, etc., required, as asked for in your above-mentioned letter.

The Rev. Father N. Doyon, however, came to the office yesterday and requested that we write to the Department for authority to purchase the following articles to be sent to Atik, Man, so that they can be taken to the school during the winter.

1 Galvanized Range Boiler, extra heavy, size 120, Cap 82 gals
Diameter 24 ins. Height 60 ins.
With stand and fitting. Price \$55.44

8 rolls poultry fencing. (165 feet to roll 72 ins. height
Line wire 22) Price \$84.40

1 Mower 5½ feet (John Deere) \$123.50
1 Sulky rake, 12 feet 70.50
1 typewriter no \$100.00 —
Approx. 325 feet of second hand iron pipe \$250.00

from The Pas Hospital, viz 175 ft. 4 in.
100 ft. 3 in. 50 feet 2½ in. for repairs
and to be kept in case required, as it is
difficult to get material of this sort in
when repairs are needed. The price quoted
is about half the first cost.

628.40

The above prices were obtained locally. Probably the new goods could be obtained cheaper if they were shipped in from Winnipeg.

I am writing this, on the instructions of Mr. Lovell, who went away to Shoal Lake and Red Earth Reserves early this morning.

Your obedient servant,

J. J. White
S. Lovell, for

Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

MEMORANDUM:The Honourable the Superintendent General,-

Mr. Agent Lovell, The Pas, Man., telegraphs that the batteries in connection with the electric light system at the Guy Indian Residential School, Sturgeon Landing, Sask., (Electoral District of Welfort) are completely worn out and that the school is without light, other than candles and lamps.

The present batteries were supplied this school in October, 1929, and were obtained from the Fairbanks-Morse Company, Limited, Winnipeg, at a cost of \$766.00, f. o. b. The Pas. A 200 amp. hour, 56 cell, 110 volt battery is required. The best available source of supply is Winnipeg.

I beg to recommend that approval be granted to incur the expenditure and that Mr. Inspector Hamilton, Winnipeg, arrange for the purchase and shipment of the batteries to the school. I shall be pleased to have the names of the firms from whom quotations should be received, either in Winnipeg or The Pas.

Funds to cover the cost of new batteries for this school are available in the Appropriation for Indian Education. As the matter is urgent, I should be pleased to have your early direction.

Ottawa, September 28, 1936.

Dear Sir:

The Department has received a telegram from Mr. Agent Lovell, The Pas, Man., stating that a new battery is required for the electric light system at the GUY Indian Residential School, Sturgeon Landing, Sask.

As the best source of supply for a new battery is in Winnipeg, I have to request that you will arrange for the purchase and forwarding of a battery, 200 ampere hour, 56 cell, 110 volts, addressed to:

Rev. N. Doyon, O.M.I.,
Principal, Guy Indian Residential School,
A t i k, Man.

You should obtain prices from the following firms in Winnipeg and make purchase from the firm quoting the lowest price:-

Schumacher MacKenzie, Ltd.,	334 Main St.,
Power & Mine Supplying Co. Ltd.	123 Princess St.,
Westinghouse,	15 Portage Ave. East,
Canadian General Electric,	265 Notre Dame Ave.,
Kummen Shipman,	309 Fort Street,
Winnipeg Electric,	
Fairbanks-Morse,	300 Princess St.

The firm from whom the battery is purchased should prepay freight charges. Please obtain an account, in triplicate, covering the cost, with receipt for prepaid freight charges. This account, you should certify in the usual manner and forward for payment. The Department is informing Mr. Agent Lovell that the purchase of the battery has been placed in your hands.

Yours truly,

T. R. L. MacInnes,
Acting Secretary.

EX'D.

Ottawa, September 28, 1936.

Dear Sir:

Referring to your telegram of the 22nd instant, regarding the supplying of a new battery for the electric light system at the Guy Indian Residential School, I have to inform you that Mr. Inspector Hamilton, Winnipeg, has been requested to obtain prices for the supplying of a battery of the same type as that supplied this school in 1929, viz.: 200 amp. hour, 56 cell, 110 volts. Mr. Hamilton has been requested to have the battery forwarded to Atik Station, Man. I would request that you inform the Principal accordingly and arrange with him to accept the battery when it arrives at Atik.

You were authorized, in official telegram of the 23rd instant, to purchase the galvanized range boiler, of the type as mentioned in your letter of the 17th instant, at a price of approximately \$55.00.

There are no funds available, this year, to supply the quantity of poultry fencing, a mower, a rake, and second hand iron piping. The Department is not prepared to consider the supplying of a typewriter at the present time.

After you have purchased the range boiler, you should obtain an account, in triplicate, covering the cost, which you should attach to proper voucher forms, certify in the usual manner and forward for payment.

Yours truly,

T. R. L. MacInnes
T. R. L. MacInnes,

RECORDS

Dear Sir,

I am enclosing herewith a Requisition for School material which I have just received from the Rev. Father N. Doyon, the Principal of Guy Indian Residential School.

Most of the material requested for was contained in a requisition that I sent to you some time ago and you replied that the amount authorized had already been expended and nothing further could be purchased during the present financial year. I informed Father Doyon of the contents of your letter. He has however, again sent in the requisition.

Your obedient servant,

Ottawa, February 9th, 1937.

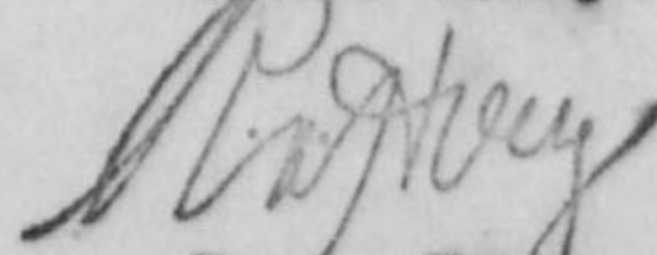

Dear Sir,-

The Department is in receipt of your report of the 2nd instant regarding your recent inspection of the Guy Indian Residential School. An order has been placed with the Singer Sewing Machine Company to supply two (2) ordinary sewing machines and one (1) tailor's machine for this school.

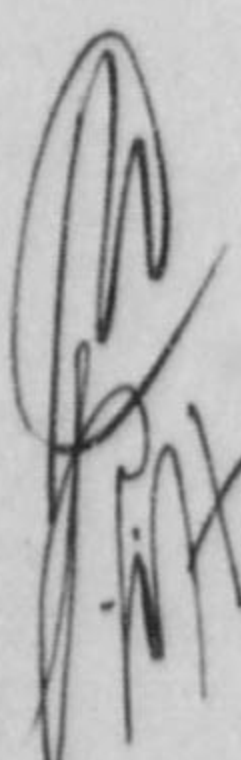

You may purchase the battleship linoleum which you report is required for the kitchen. It is noted that the cost of this will be, approximately, \$60.00.

Owing to lack of funds, it is regretted that authority cannot be given for the purchase of the paint that you recommend be supplied.

Yours truly,

R. A. Hoey.

132-7-5.

Ottawa, March 15th, 1937.

Dear Sir:

I have your telegram of the 13th instant, regarding the request of the Principal of the Guy Indian Residential School for the immediate purchase of the equipment mentioned therein, in order that it can be forwarded to the school by winter freight.

In this connection I have to say that our Estimates for the coming fiscal year provide for the following equipment and material for repairs:

Hay mower and rake \$200,
General repairs 500.

You may arrange for the purchase of the farm machinery and other materials, but the total expenditure must not exceed the amount provided in the Estimates. For your information, I enclose herewith a requisition received from the Principal for the materials required. This requisition is all the information we have as to the Principal's requirements. You may, however, have sufficient information to place the orders.

You should obtain itemized accounts, in triplicate, covering all expenditure. These accounts should, however, be dated after April first, next, and payment will be made from our Appropriation for the coming fiscal year. Please have separate accounts covering the expenditure for each of the various items forwarded to the Department. Receipts for any freight charges should also be attached.

It should be understood that any labour required will be carried out by the school authorities without expense to the Department.

With reference to the attached requisition, we have received the following telegram from S. Lovell, Esq., Indian Agent, The Pas, Man.-

"Armature for generator electric plant at Guy School out of order and Electric Equipment Co. Regina advise that it cannot be repaired - S T O P - Request authority to purchase new one at cost F O B Regina two hundred and ninety five dollars - S T O P - There is no electric power at Guy School while generator is broken"

RD

You will note from the above that there will be no electric power at the Guy School until the armature is replaced. I would, therefore, appreciate your giving this matter your immediate attention.

Schools
Dear Sir,

R

I am enclosing herewith our voucher No. 689, amounting to \$22.27 in favour of the Rev. N. Doyon, Guy Indian Residential School, Sturgeon Landing, Sask. for repairs to generator at Guy School.

I have been holding this account, as it was noticed there were two items for express. I wrote the Rev. Father Doyon some time ago asking him to send the receipts, but I have not yet received any answer. Owing to the roads breaking up, it is very probable that I will not hear from him for some time. If I waited for the express receipts, I would not be able to get the account to Ottawa before the end of the financial year. I thought it best therefore to send the account in without the receipts and ask you to pass it. The account itself, is of course, receipted.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa.

Ottawa, April 6, 1937.

Dear Sir:

I am returning herewith your Voucher No. 659 in favour of Rev. N. Doyon, covering repairs to the generator at the Guy Indian Residential School to the amount of \$22.27. It is regretted that this account cannot be paid until we have further details.

Please state the number of hours engaged in replacing the mica and the rate charged per hour. Receipts for the express charges of \$3.92 and \$3.85 should also be forwarded.

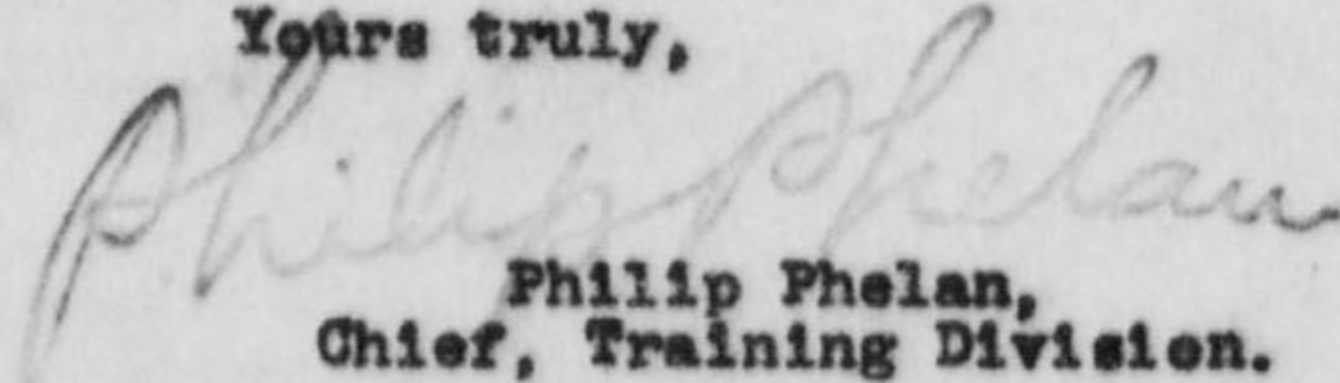

When we have received the account, properly itemized, with express receipts attached, Father Doyon will be reimbursed to the above amount.

DB.

ENC.

Yours truly,

Philip Phelan,
Chief, Training Division.

Dear Sir,

I am enclosing herewith voucher No. 32 amounting to \$144.95 in favour of Rev. N. Doyon, Guy Indian Residential School, Atik, covering receipted account from Monarch Lumber Co. for lumber supplied to Guy School.

This account was received from Guy School without any covering letter, and I had received no authority from the Department covering the purchase. I met Father Doyon at the station and he informed me that he had received authority direct from the Department to buy this lumber. He was unable to give me the reference number, and it will probably be a couple of months before they could get a letter out, as the ice is breaking up.

The Pas, Man.,

June 21, 1937.

Dear Sir,

With reference to my telegram asking you to stop payment on voucher No. 89 amounting to \$295.00 in favour of the Electric Equipment Co. of Regina, Sask. I would now request that this voucher be paid.

I had to have Mr. Hill an electrician from The Pas inspect the armature when we found the generator would not work. He informed me the trouble was not in the armature, but in the field, as there was no charge in it. It was re-charged at The Pas, sent back to Guy School and is now working satisfactorily.

Your obedient servant,

Samuel Lovell

[Handwritten signature]
Dear Sir,

I am enclosing herewith voucher No. 406 amounting to \$86.38 in favour of Rev. N. Doyon, Principal, Guy Indian Residential School Sturgeon Landing, Via Simon House, Man.

I did not know anything about this expenditure until I received the accounts and it was not authorized by me. I therefore presume that Rev. Father Doyon had authority to do this work direct from the Department.

Your obedient servant,

Samuel Lovell

October 21st, 1937.

Dear Sir,

In April of this year, the Canadian Fairbanks Morse Company, made shipment of bearings to the Guy Indian Residential School, Sturgeon Landing, Sask., and submitted invoice for same for \$25.28, which included an item of 40¢ for prepaid express, voucher for which was attached.

The voucher forwarded to Ottawa by the agent concerned, however, did not include the express and your cheque, No.4230, was only in the amount of \$24.88. Mr. Lovell advises that a separate voucher for 40¢ was forwarded on May 31st, his voucher No.112.

The Can. Fairbanks Morse Company have communicated with us several times regarding this as they are anxious to clear their books and we would appreciate being advised if the Department received the voucher for express and whether it is being held for any reason.

Yours very truly,

A. G. Hamilton

Ottawa, November 5, 1937.

Dear Sir:-

I am in receipt of your letter of October 21 with reference to the balance of 40¢ claimed by The Canadian Fairbanks Morse Company.

We have no record of having received the express receipt for the 40¢. It will therefore be necessary for the Company to secure and forward to us through your office another receipt from the express company. When this is received, cheque will be issued.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

132-7-5
The Pas, Man.,
Nov. 30, 1937.

Dear Sir,

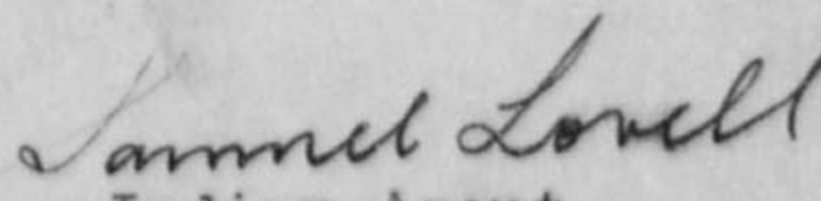

I am enclosing herewith Requisition for supplies for Guy Indian Residential School, which I have received from the Rev. Father N. Doyon and also prices for these articles, which I have got from Winnipeg.

The Principal has pointed out that the saw mill would be useful for making lumber for the school and also for lumber for ex-pupils residing around the school.

At the present time I do not see why the school requires a great deal of lumber. They have, as far as I know, all the buildings they require. As far as supplying ex-pupils who reside in the vicinity of the school with lumber. I do not approve of ex-pupils when they leave school settling near the school. There is nothing for them to do there and the fur is very scarce in that vicinity. A few of them reside near the school now and they are constantly asking for relief. I can therefore see no immediate need for this saw mill and cannot recommend it.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

EX'D.

Ottawa, December 8, 1937.

Dear Sir:-

I am in receipt of your letter of November 30th, enclosing Requisition from the Principal of the Guy Residential School for supplies.

In view of the information contained in your letter, the Department is not prepared to supply at the present time the sawmill requested by the Principal.

I regret that you did not comment on the other articles. Presumably some of these are necessary and, if so, you may arrange for the purchase of the following:

1 pressure gauge double spring	-	\$9.15
6 Brass compressor bibbs	-	4.50
6 Hose $\frac{1}{2}$ "	-	5.88
6 compression stops, size $\frac{3}{8}$ "	-	3.84
12 medium type with adapter 1500 Serie bearings	-	76.80
6 Galv. elbows, size $1\frac{1}{2}$ in. and 2 in.	-	1.68
		2.70
3 Galv. tees, size $1\frac{1}{2}$ in.	-	1.11
1 doz. galv. bushings size $\frac{1}{2}$ x $\frac{3}{4}$ in.	-	
	$\frac{1}{2}$ x 1 in.	1.62
2 Bronze gate valve, size $1\frac{1}{2}$ "	-	
6 Galv. sheets - gauge 28, size 36 x 72	-	
3 Black sheets, size 48 x 96	-	21.00

These are the cheaper articles and, if required at the present time, you may arrange for their purchase. If there are any other articles that are absolutely necessary, you should let me know.

It is noted that the Principal requests a dough mixer. Funds are so limited that it is doubtful if this can be supplied before the end of the fiscal year. You should let me know the size of the mixer at present in the school and any other particulars that you have in order that an order can be placed if funds are available. When replying you should also state if you consider the plough, mower and additional fire extinguishers are required.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

132-7-5
The Pas, Man.,
Feb. 1st, 1938.

[Handwritten signature]
Dear Sir,

R

In reply to your letter 132-7-5, dated December 7th, 1937, I beg to advise that I visited Guy Indian Residential School recently.

The dough mixer is absolutely worn out and it is no use to try and repair it. The gears are all worn out and bin is full of holes. They undoubtedly need a new one. The capacity should be 2½ sacks at one mixing. I cannot obtain prices here. They would have to be got from the wholesale hardware merchants in Winnipeg.

I would recommend that 10 quart size fire
[extinguishers be purchased.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

Samuel Lovell
Indian Agent.

Ottawa,
February 14, 1938.

Dear Sir:

With reference to your letter of the 1st instant I regret that at the present time our funds are so limited that it is not possible to arrange for the purchase of the dough mixer for the Guy Residential School. However, we have noted the Principal's request and an endeavour will be made to supply the mixer early in April.

Six quart size fire extinguishers are being ordered.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

[Handwritten signature]
Dear Sir,

I am, by request of Rev. Father N. Doyon, sending the attached voucher No. 308, amounting to \$147.15 in favour of himself for repairs to Guy Indian Residential School.

These repairs were carried out by the Rev. Father's own authority. I did not know anything about the matter until he brought the accounts into me. I am submitting them to the Department for their decision in regard to payment. I am certifying to them so that it will be unnecessary to return the accounts if the Department decides to meet them. The Principal informs me these repairs were very necessary as the roofs were leaking and the floor was rotten.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

EX'D.

Ottawa,
September 14, 1938.

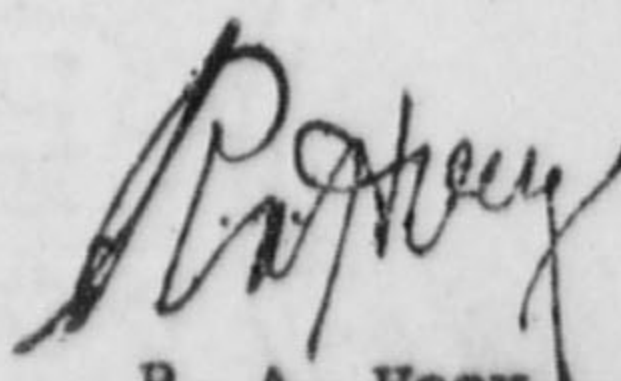

Dear Sir:

With reference to your letter of the 8th instant the Department finds it necessary to return the voucher which you submitted. You should forward two vouchers, one covering the labour and the other covering the cost of the materials. For your information I may say that an amount of \$500.00 was included in the current year's appropriation for repairs and improvements at the Guy School. However, the Principal should not have proceeded with the work without first receiving authority but in view of the amount available in the current year's appropriation payment of the expenditure will be made on receipt from you of the two vouchers requested above.

Yours truly,

S. Lovell, Esq.,
Indian Agent,
The Pas, Man.

EX'D.

Ottawa,
October 26, 1938.

Dear Sir:

The Principal of the Guy Indian Residential School visited the Department yesterday and stated that a Provincial Inspector had recently stated that additional fire escapes are required at the Guy Indian Residential School. I understood from Father Doyon that you had also inspected the Guy School and considered additional fire escapes desirable. Please let me have a report regarding the fire escapes at present on the school and if you consider new fire escapes necessary you should state your reasons. In the latter event you should also let me have an estimate of the probable cost of installing any new fire escapes that you might recommend.

I am also informed that some repairs are required to the roof of the laundry. Full details should be supplied regarding this.

Yours truly,

H. A. Hoey,
Supt. of Welfare & Training.

132-7-5
The Pas, Man.
Dec. 2nd, 1938.

Dear Sir,

I was asked to go to Guy Indian Residential School this week as they had had an accident with their steam engine. There had apparently been an explosion and it had completely wrecked the engine.

This engine is the power they use for light, pumping water and all other power required around the buildings. They are using a small auxilliary gas engine at present, but it has not sufficient power and in case of fire it would be practically useless.

I have made enquiries from the Farbanks Morse Co. of Winnipeg and they tell me they will supply a fifteen horse Vertical Automatic Steam Engine with pulley for \$675.00 F.O.B. Winnipeg.

This engine appears to be essential for the efficient running of the school and also for safety in case of fire and I therefore recommend that it be purchased and sent to the Guy Indian Residential School, as soon as possible. They inform me they will be able to install it themselves.

I could not determine what was the cause of the damage to the engine and none of the staff could give any reason.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

Dec. 3, 1938.

Dear Sir,

Further to my letter of the 2nd instant, with regard to an engine for Guy Indian Residential School, I am enclosing herewith a letter I have received from Fiarbanks Morse Co. in connection with this matter.

The price of this engine is \$675.00 f.o.b. Winnipeg.

Your obedient servant,

Samuel Lovell
Indian Agent.

Memorandum:

DEPUTY MINISTER

Re: Guy Indian Residential School

I have just been advised by the Indian Agent that as a result of an explosion the steam engine at the above-mentioned school has been completely wrecked. This engine is the power used for lighting, pumping water and all other power purposes around the school. At the present time they are using a small auxiliary gas engine but it has not sufficient power. In the case of fire it would be practically useless.

It is, therefore, necessary to supply a new steam engine at the earliest possible date and as the cost of this will probably exceed \$500.00 I should appreciate it if the Honourable the Minister would approve the purchase. In that event the attached purchase order should be sent to Mr. Bailey.

132-7-5
R

The Pas, Man.,
Dec. 5, 1938.

Dear Sir,

In reply to your letter 132-7-5, dated Oct. 26th with regard to request of the Principal of Guy Indian Residential School for additional fire escapes.

I visited the School recently and I would say that additional fire escapes are necessary. At the present time they have two fire escapes of the steel stairs and platform style. They are both at the back of the building and extend from the ground to the attic. I think under stress, especially in winter time when they were slippery with ice, it might be difficult to get the children out with any great speed.

I suggest a frame structure be erected on the left side of the building 6 by 8 feet in which be placed a pole fire escape from the first floor to the second story and from the second story to the attic. They would come down on the porch and a slide could be erected from there to the ground. It would be necessary to make doors in the building to provide outlets to the escape.

I also suggest that similar pole escape be provided on the other end of the building. It would not be necessary to build a structure on this end of the building, except from the 2nd storey to the attic as the rest of the way it would come through the verandah.

I got an estimate from Harrison and Lenneville, The Pas on this job. They estimate it would cost \$1325.00. This firm is the only one doing this kind of work on the preferred list. I do not know how they arrived at their figures, but I think the amount is extraordinarily large.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

Samuel Lovell
Indian Agent.

BELL-PAST
EX'D.

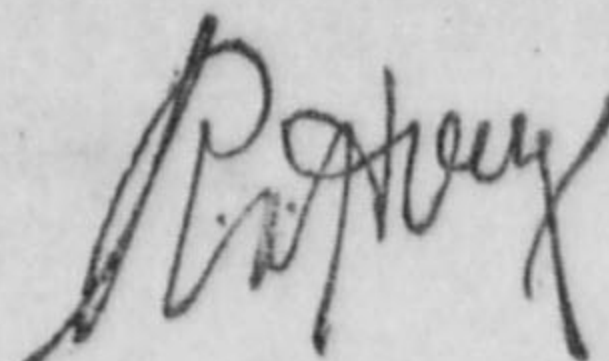

Dear Sir:

I am in receipt of your letter of the 5th instant with reference to the fire escapes at the Guy Indian Residential School.

As no funds were provided in the current year's appropriation for additional fire escapes it is not possible to favourably consider the matter at the present time.

Every endeavour should be made to keep the present fire escapes as clear of ice and snow as possible. You should also satisfy yourself that a reliable man is employed as night watchman. In this way the fire hazards will be minimized.

Yours truly,

R. A. Heey,
Supt. of Welfare & Training.

Memorandum:

MR. BAILEY

I attach account amounting to \$61.60 covering the cost of paint purchased for the Guy Indian residential school. At the time the paint was secured it was desired to have the painting done before the cold weather set in and authority was given to the Principal to purchase the paint locally. I should appreciate it if you would issue purchase order so that the account may be paid.

Winford Medland Limited,

Ottawa, December 29, 1938.

576 Wall Street, Winnipeg.

With reference to your quotations of fifteenth and twenty third instant on steam engine please send today via air mail the following additional particulars

- (1) Net weight and crated or shipping weight
- (2) Set of detailed specifications for your sixteen horse power engine operating at a speed of 275 R.P.M. with a steam pressure of 125 pounds with all data included in your printed copy of specifications for fourteen horse power engine.
- (3) Is the engine you quote on suitable for generating power for light plant, pumping water and miscellaneous machinery at residential school.

W. H. Bailey.

The Pas, Man.,

Jan. 11, 1939.

Dear Sir,

The Rev. Father Doyon, the Principal of Guy Indian Residential School is in the office at present and has asked me to write to the Department to enquire if any action is being taken with regard to supplying the School with an engine to replace the one that broke down.

You will remember we wrote to you about this matter on December 2nd and also on Dec. 3rd. We do not appear to have had reply.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

EXD.

Dear Sir:

With reference to your letter of the 11th instant I may advise you that on the 4th instant an order was placed with Mumford Medland Limited for a new steam engine for the Guy Indian residential school. This engine is being shipped from London, Ontario, and the firm has been requested to rush delivery. It is being addressed to Rev. M. Doyon, O.M.I., Principal, Guy Indian Residential School, Sturgeon Landing, Saskatchewan. It would be advisable for you to get in touch with the station agent at that point and have him notify you as soon as the engine reaches there in order that you may communicate with the Principal and have the engine sent to the school.

It may be a couple of weeks before the engine reaches Sturgeon Landing in view of the fact that it is coming from London, Ontario, but this delay could not be avoided as our Purchasing Agent states that he made very extensive inquiries and this was the only engine suitable for the Guy school that could be secured at the present time.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Dear Sir,

The Rev. Father N. Doyon, the principal of the Guy Indian Residential School informs me he did not receive the grant for the night watchman for the School for the winter of 1937-38. This amounted to \$195.00 and was sent to you on May 5th, 1939, as our voucher No. 60. Will you please inform me if cheque in payment was issued.

In our voucher No. 890 amounting to \$260.00 in favour of Rev. Father N. Doyon, for services of nightwatchman for Guy School for the winter of 1938-39, I notice he is asking for \$40.00 per month instead of the \$30.00 per month previously allowed. I understand this arrangement was made between himself and the Department when the Rev. Father was at Ottawa this past year. I have never been notified about it, but I thought it best to forward the account as it was submitted to me.

Your obedient servant,

Samuel Lovell
Indian Agent.

Dear Sir,

When I was at Guy Indian Residential School recently, the Principal brought to my attention the condition of the lean-to on the School building. This is used as a kitchen and store room etc.

It is in very bad condition and is partly falling down, and is leaking very badly. I calculate it will take about \$276.10 to buy and material and pay for the labour to make the necessary repairs. I would like to have your authority to get this work done.

Your obedient servant,

Indian Agent.

The Secretary,
Indian Affairs Branch,
Ottawa.

EXD.

Dear Sir:

With reference to your letter of the 12th instant the Purchasing Agent is being requested to secure the shiplap, lumber and roofing requested by the Principal of the Guy Indian residential school.

You may purchase the 240 lbs. of tar and pitch. It is noted that the cost of the labour will not exceed \$100.00 and it is presumed that Indians will be employed.

For your information I may say that an amount of \$500.00 was included in the current year's appropriation for repairs and improvements at the Guy school. The expenditure being made at the present time totals \$276.10 for material and labour. Consequently there remains the amount of \$223.90 which the Department is prepared to allow for other requirements at the Guy school. This is the total amount that can be authorized during the current fiscal year. You should let me have full particulars regarding the manner in which you recommend that the balance be spent if necessary.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Guy Indian Residential Boarding School,
Sturgeon Landing, Sask.
April 6th, 1939.

Mr Samuel Lovell, Indian Agent,
The Pas, Man.

Dear Sir:-

Re generator: The Imperial Electric Co. No 7703 K.W.
7.5. Volts 125 Amp 60 R.P.M. 1875
Type S?B.S Volts Adj. N.L.T.L.
Akron O.

Last November when the steam engine broke in pieces, you were told that the shaft of the generator bent, the shock having been so violent. Since then my engineer was able to make the generator work but with much difficulty. Two sets of bearings are worn out since December. Many a time my engineer wanted to straighten the shaft, but fearing that it might break it, and leave us without light for a long time, I refused to have him do it. I do not think either that this can be done in here.

I know very well that at the Dept, they will not be glad to have to buy a new generator, but after all, I cannot blame my engineer who, as you know, is very mindful of his work. It was simply an accident.

If you think it advisable, my engineer may try to straighten the shaft; if not we will have to send the generator to Winnipeg or Regina for repair, but I am sure it will cost as much as a new one, and the trouble....

Whatever you think advisable will be satisfactory to me.

Yours truly,

Rev. H. Doyon, O. S. B. P.
Principal.

The Pas, Man.,
Apr. 22, 1939.

Dear Sir,

I am enclosing herewith a letter I have received from the Rev. Father Doyen, the Principal of Guy Indian Residential School, who is asking to be supplied with a new generator for the school power plant.

Will you kindly inform me if the Department will supply the generator.

*See letter 8/1/39

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa,
April 29, 1939.

Dear Sir:

I am in receipt of your letter of the 22nd instant with reference to the request of the Principal of the Guy residential school for a new generator for the school power plant.

In this connection I would refer you to my letter of the 19th instant regarding the amount provided in the current year's appropriation for new equipment, repairs and improvements at the Guy school. A decision regarding the new generator cannot be made until you reply to that letter.

The Principal describes the generator in the school as follows: The Imperial Electric Co. No. 7703 K.W. 7.5. Volts 125 Amp 60 R.P.M. 1875 Type S.B.S. Volts Adj. N.L.T.L. Akron O.

Apparently the generator at present in use was manufactured in the United States. In the event of the Department deciding to supply a generator we would prefer ordering one manufactured either in England or Canada. You should, therefore, let me have detailed information regarding the type of generator that is necessary to do the work required at the Guy school.

Yours truly,

S. Lovell, Esq.,
Indian Agent,
The Pas, Man.

R. A. Hoey,
Supt. of Welfare & Training.

H

Dear Sir,

I am enclosing herewith our voucher No. 66 amounting to \$74.32 in favour of Rev. Father Doyen, Guy Indian Residential School, Sturgeon Landing.

I knew nothing about this expenditure until I received the receipted account, which Father Doyen sent to me, evidently wanting me to send it to the Department so that he would be reimbursed.

There is no authority for this expenditure though no doubt the belting is required, though he never spoke to me about it when I was there last month. I thought however it best to forward the account to the Department.

Your obedient servant,

Samuel Lovell
Indian Agent.

The Secretary,
Indian Affairs Branch,
Ottawa.

Ottawa,
May 10, 1939.

Dear Sir:

I am in receipt of your letter of the 2nd instant enclosing voucher No. 66 covering the cost of belting purchased for use at the Guy Indian residential school. This account is being returned unpaid. No authority was given for its purchase. The Department cannot control expenditure if Principals persist in securing material for which no authority has been obtained. From previous correspondence you are already aware of the amount available in the current year's appropriation for repairs and improvements at this school and it is doubtful if the equipment already requested can be secured. You will, therefore, see that it is not possible for the Department to favourably consider payment of your voucher 66.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

PLEASE QUOTE
FILE _____

The Pas, Man.,
May 5th, 1939.

Dear Sir,

In reply to your letters 132-7-5, dated the 19th and 29th ultimo, in connection with our requests for repairs for Guy School.

In addition to the lumber, roofing, etc. required, I have recently forwarded to you a voucher amounting to \$74.32 in favor of the Rev. Father Doyen for belting. This, if paid, would have to be charged to this year's appropriation.

The generator in the next thing most urgently required and if there is sufficient funds to purchase it, I recommend that it be bought.

A Canadian or English made generator would no doubt serve just as well as the one used formerly which was made in the U.S.A. It must supply 110 Volts direct current. The power used is the steam engine bought from Mumford, Medland, Ltd. Winnipeg, Man. in Feb. 1939, described as follows.

16 horse power Vertical steam engine, cyl. 7" diameter by 8" stroke, speed 275 RPM, driving belt pulley 20" diameter by 10 1/2". face shaft diam. 2 1/2". balance wheel 26" diam x 6-3/4" face. Weight 1500 lbs

As manufactured by London Concrete Machinery Co.

The above, with the information given in my previous letter, should, I believe, any electric company to know exactly what is required.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

Purpose for which required Generator for power plant

NOTE:—Requisition for non-consumable equipment, state if New Issue or Replacement.
 " consumable equipment and supplies use columns 1 and 2.

Quantity		Quantity on hand (1)	Quantity used per month (2)	Unit Price	TOTAL
1	Generator for school power plant				
	Note: The generator must supply 110 volts durent current. The power used is the steam engine bought from Mumford Medland Limited in January, 1939. See purchase order No. 9487 dated Jan. 4, 1939. While the freight address of the school is Atik, Man., the post office address is Sturgeon Landing, Sask.				

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Memorandum

Mr. R.A.Hoey

R

With reference to your requisition of the 13th instant, for generator, for power plant at the Guy Indian Residential School, at Sturgeon Landing, Sask., in order to insure obtaining a generator of the exact type required, I would ask that you arrange to furnish the following information:-

- (a) Capacity of generator expressed in amperes or kilowatts. If the above information is not available, give the number of lamps and size of each supplied with power by the generator. Please advise not only the total number of lamps installed but the estimated maximum number of lamps that would likely be on at one time.
- (b) Is the wiring system two or three wire.
- (c) Is sliding base required for generator
- (d) Is pulley required for generator.
- (e) State size of the engine pulley, including diameter, width of face, flat or V belt
- (f) Speed and horse power of engine.
- (g) Is belt required. If so, give distance between centre of engine and generator pulleys.
- (h) Will generator be coupled or belted to the engine.
- (i) Will generator be required to charge a battery.
- (j) If the generator required is to replace a generator, give details shown on name plates of the old generator
- (k) Give details of switch box in use, if any.

W.M.Bailey
Departmental Purchasing Agent.

EX'D.

Ottawa,
May 29, 1939.

Reverend Sir:

In connection with the generator which you have requested for the Guy residential school it is necessary for us to have additional information before securing tenders.

I enclose a memorandum received from the Purchasing Agent. Please answer all the questions asked in this memorandum and return the letter with your answer at the earliest possible date.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

R

Dear Sir,

I am returning herewith your account for \$74.32 for belting which you purchased from Wood Vallance.

This account was forwarded to the Department and they have returned it and say they cannot favourably consider the account. They point out that no authority was obtained for this purchase and that they cannot control expenditure if officials and Principals persist in securing material for which no authority has been obtained.

It is doubtful if the repairs you have already asked for can be obtained. Prices for them are now being got and it is already obvious that it will take the current year's appropriation to pay for the repairs.

Your obedient servant,

Samuel Lovell
Indian Agent.

Mr R.A. Hoey,
Supt. of Welfare & Training.
Dept. of Mines and Resources,
Ottawa.

R

Dear Sir:-

Find enclosed informations required by your purchasing agent for generator requested at our school.

I am also including my account for \$74.32 for belting which account has been returned to me last week by our indian agent. I had to wait three months to get a new engine. At last came the vertical engine, new type which requires only one belt but doubled in thickness. That is why I purchase it at the first opportunity being sure that the Dept. would not refuse to give a belt with the new engine. However, Mr Hoey, if you find out that it is impossible to reimburse it, you have only to throw it away.

how Can I ask you, Mr Hoey, how much contribution will the Dept. give to Guy School for the transportation of children during summer vacation? Water is so low now, it is getting quite impossible to carry children by canoe as in previous years. We find many more advantages in carrying them by planes. We obtained that privilege to double the number of children in plains, so the cost of transportation will be lessened. However the gross total cost charged by the Wings Co, who has the contract, will be \$1106.00 for return trip. Would you, please, let me know what will be your contribution, if any.

During May I received from Mr W.R. Leslie, Superintendent of the D. Experimental Farm at Morden, some 200 seedlings for my garden, for which I am very grateful to you.

Very few sick children during the year, no death. Very good work performed by the sisters and other members of the staff. Children will be glad to see their parents between the 15 and 20 of June, but also will be very pleased to come back in August.

Yours very truly,

R. W. N. Doyon, J. de P. Principal

Memorandum:

MR. BAILEY

I enclose account covering the cost of belting for the engine at the Guy Indian residential school. The Principal advises that when the new vertical steam engine (see purchase order No. 9467) reached the school it was found that only one belt was required but this had to be twice as thick as the belt previously used. In order to operate the engine it was, therefore, necessary to purchase the new belting immediately.

I should appreciate it if you would issue purchase order so that the account may be paid.

My dear Mr. Hoey:

Last Fall Rev. Father N. Doyon, Principal of the Guy Indian Residential School, was promised a Guildcraft-Thackeray Loom. I am in receipt of a letter from him today advising me that he has not yet received it.

This is, no doubt, an oversight on the part of your assistants. I am sure that you will want to carry out the promise.

Yours very truly,

Guy Indian Residential Boarding School,
Sturgeon Landing, Sask.
August 1st, 1939.

Mr R.A. Hoey,
Supt. of Welfare & Training.
Dept of Mines and Resources,
Ottawa.

Dear Sir:-

Lately I received from Rev. Fr. Plourde a very good news: the restoration of the 5% of the per capita allowances for residential schools. I am pretty sure that you are the one who obtained for us that restoration. That why I wish to come and congratulate you and in the same time to thank you for that favor received. Last Saturday I received the Guildcraft-Trackeray Loom you promised to me last November during my visit to Ottawa. Thanks for that favor also. The sisters of the school are very glad to have it.

Two months ago, on June 4th, I wrote to you regarding the generator for our school, giving informations required; also what contribution you could give re the transportation of children during summer holidays. I wonder if you ever received my letter?.

I received last week the material required for repairing the roof over the engine room and laundry room. Two men are working at it these days.

Yours very truly,

Rev. N. Doyon. O. d. b. l.
Principal.

Reverend Sir:

I am in receipt of your letter of the 1st instant with reference to the generator that you requested for the Guy Indian residential school. As soon as the application from your office reached the Department the matter was submitted to the Purchasing Branch and I have no doubt the generator will reach the school in due course.

Yours truly,

Dear Sir:

I am returning unpaid your voucher No. 399. It would appear from the information contained on the account that the goods were conveyed from the railway station to the school by the school management.

The Department pays transportation charges on all goods supplied to the railway station nearest the school. From that point it is expected that the school management will freight the shipments to the school without charge to the Department.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

La Roche
Dear Sir,

I have just received a letter from the Rev. Father Doyen, the Principal of Guy Indian Residential School, informing me that the 56 Globelite Batteries used on their power plant are getting very weak and will not work a great deal longer. They have been giving service for more than four years.

He has requested that I write to the Department and ask if another set could be purchased so that it would be possible to get them in to Sturgeon Landing before the ice goes, that is before the end of March. It is very difficult to get heavy freight into to Sturgeon Landing in summer.

The type of batteries formerly used is

Globelite Light and Power Batteries,
Battery type W 11. Capacity 210 A.H.
Series No 6243.

The address of the firm supplying these batteries is Globelite Batteries. Ltd. Winnipeg, Man.

The Secretary,
Indian Affairs Branch,
Ottawa.

Your obedient servant,

Samuel Lovell

February 15 1940

To The Departmental Purchasing Agent, Ottawa,

This space for use of Head Office only

Requisition No.

Order No.

PLEASE FURNISH THE FOLLOWING SUPPLIES FOR USE OF Guy Indian Residential School

VOTE 76 Allotment 12-422

SHIP TO Rev. Father Doyon, Principal, Guy Indian Residential School, Atik, Man.

Purpose for which required Batteries for power plant

NOTE:—Requisition for non-consumable equipment, state if New Issue or Replacement.
“ consumable equipment and supplies use columns 1 and 2.

Quantity		Quantity on hand (1)	Quantity used per month (2)	Unit Price	TOTAL
1	Set Globelite batteries				
Note: In requesting the new set of batteries the Indian Agent reports that the batteries at present in the school will not work much longer. This set was purchased in October, 1936, from the Canadian Fairbanks-Morse Co., Winnipeg, Man., and their account read as follows: "1 Only 56 cells type W11, 210 ampere Hour Globelite Glass Jar Storage Battery, 11 plate, 5 1/2 x 7, 110 volts P.O.B. Atik, Man. Sales Tax Inc. ... \$520.00" It is extremely difficult to get heavy freight to the Guy School during the summer and consequently it is necessary to purchase these batteries immediately in order that they may reach Atik by the middle of March. This will permit them being taken to the school by winter freight before the ice in the river melts. Payment of the cost of these batteries will be made from our appropriation for the fiscal year 1940-41. While the batteries should be shipped to Atik the accounts should be forwarded to the Principal at Sturgeon Landing, Sask., which is the post office address of the school.					

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Dear Sir:

I desire to refer to your letter of May 5, 1939, and subsequent correspondence in connection with supplying a generator to the Guy Indian Residential School. The Purchasing Agent placed the order for the generator on September 8, 1939, with the Canadian Fairbanks Morse Company. The generator was to be supplied at a price of \$390.00, sales tax included, f.o.b. Atik, Manitoba. The attached account has just been received from the Fairbanks Morse Company and it has not been certified either by the Principal or yourself. I should appreciate it if you would ascertain immediately if the generator has reached the school and if it is in good order. If so, you should certify the account and return same for payment. Please give this matter your immediate attention as the Department wishes to pay the cost of this generator from the appropriation for the fiscal year 1939-40 and we will only be allowed to use this vote for another week or ten days.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Dear Sir,

In reply to your letter 132-7-5, dated the 27th ultimo, in connection with generator ordered by the Department for Guy Indian Residential School.

We wrote, directly your letter was received to the Principal of Guy School and to Fairbanks Morse, Winnipeg. The Principal has just been in the office and informed me that the generator reached the school about two weeks ago, but he has not yet received the account. As soon as the account is received in this office it will be forwarded to you.

April 6th, 1940.

Dear Sir,

In reply to your letter 132-7-5, dated the 2nd instant, enclosing account of Canadian Fairbanks Morse Co., Winnipeg, amounting to \$390.00 for generator for Guy Indian Residential School.

I am enclosing herewith our Voucher No. 1177 amounting to \$390.00 in favour of Canadian Fairbanks Morse Co. covering this account.

The Rev. Doyen, Principal of Guy School was in the office a few days ago and told me he had received the generator and it was in good condition, but he had not received the account. In view of the fact that there is not much time if this account is to be paid from the 1939-40 appropriation, I thought it best not to send the account to Father Doyen for his signature.

Your obedient servant,

Dear Sir,

In reply to your letter 132-7-5, dated the 10th instant, with reference to generator supplied to Guy Indian Residential School.

The account of Fairbanks Morse Company was forwarded back to you the day it was received in this office as our voucher No. 1177. It is not understood why you have not received it. It was sent by Air Mail.

Your obedient servant,

Samuel Lovell
Indian Agent.

Dear Sir:

I am in receipt of your voucher No. 45 in connection with the grant toward the salary of the night watchman at the Guy Indian Residential School.

Our appropriation has been reduced and consequently it was only found possible to provide an amount of \$30.00 a month toward the salary of the night watchman at the Guy School. I note that the night watchman was employed for 6½ months and consequently a cheque for \$195.00 is being forwarded to the Principal.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Guy Indian Residential Boarding School,
Sturgeon Landing, Sask.
October 2d, 1940.

Details and specifications necessary for the rebuilding
of the water tank at Guy School.

From the original copy of April 1926.

////

////

WOODEN TANK:-

The tank to be circular having an inside diameter of 10 feet on a minimum height of 16 feet.

The beams on top of the posts supporting the tank floor to be of 10 x 12 dressed timber, extending to the outer edges of the tank house, and fastened to the end of each post with strap irons 5" x 3/8" bolted together with 3/4" bolts

The joists supporting the floor to be formed of 4" x 12" all in one piece and spaced at 16" centres. The joists outside of the water tank may be formed of 2" x 12". Bracing 2" x 2" shall be placed between these joists for the nailing of the floor around the tank house.

The tank to be built with staves 3" x 6" wide made of No 1 California red wood properly bevelled and matched as per detail.

X The floor to be built of 3" x 6" planks, dressed on the four sides well matched and grooved to receive the staves. The staves to be secured together and in place with round iron hoops 7/8" x 3/4" diameter well threaded and provided with metal turbuckles and double nuts.

The first five hoops at the bottom to be 7/8" diameter, the remainder to be 3/4". All metal used in the construction of the tank to be previously painted with two coats of graphite paint.

Dear Sir:

I enclose requisition from the Principal of Guy Indian Residential School, Sturgeon Landing, Sask. which I received some time ago, but held up until I had made an inspection trip to the school and also secured prices.

The enclosed material will cost \$67.37 landed at Atik. The steel cable mentioned in the quotation, but not mentioned in the requisition will be used as a clean out for toilets, which can be used to good advantage.

I recommend that this be accepted.

Your obedient servant,

Sammuel Lovell

The Pas, Man.,
March 25, 1941

Dear Sir:

I enclose the letter received from the principal of Guy School Re lumber for a new water tank.

I made an inspection of this tank on my last visit to the school and found it in very poor condition.

I secured prices from the local lumber yards for Fur and Cedar, these prices were very high so I then asked for prices on Spruce which I enclose.

Labour for this work would cost about \$250.00.

This lumber should be shipped from The Pas before the snow is all gone as the freight would be a lot cheaper.

Trusting this meets with your approval.

Your obedient servant,

S. Lovell

Ottawa,
April 3, 1941.

AIR MAIL

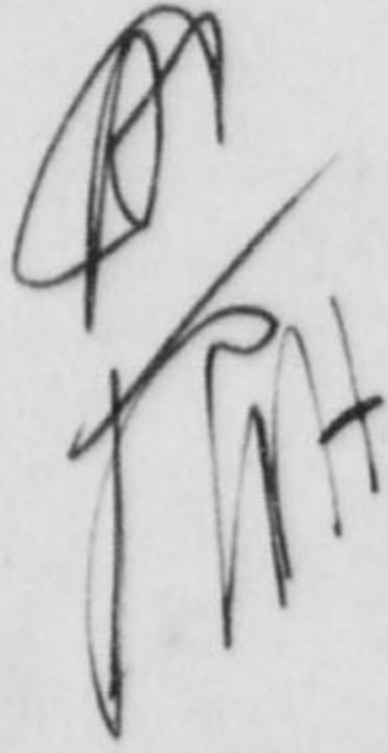

Dear Sir:

I am in receipt of your letter of the 25th ultimo with reference to a request from the Principal of the Guy School for material for a new water tank.

As you are aware this lumber will have to be purchased through our Purchasing Branch and information supplied by the Beaver Lumber Company and the Monarch Lumber Company is rather vague. You should prepare a formal requisition on the form enclosed and return it together with the quotations from the two companies. It is noted that you are suggesting the use of spruce. Do you feel satisfied that spruce would be suitable for the erection of a water tank? I have been advised that fir or cedar would be preferable.

It is also noted that the cost of the labour is estimated at \$250.00. This seems extremely high in view of the fact that the material can apparently be secured for approximately \$160.00.

Yours truly,

Mr. S. Lovell,
Indian Agent,
The Pas, Man.

FILE _____

The Pa., Man.,

April 18, 1941.

Dear Sir,

In reply to your letter 132-7-5, dated the 3rd instant, I am enclosing herewith Requisition for Supplies covering material for a water tank for Guy Indian Residential School.

Though Spruce is not as good as cedar, I think it would be wiser to use spruce in this case. The cost of a cedar tank would be approximately double that of a spruce tank and the life of a cedar tank would not, in my opinion be twice as long.

OF
The cost of labour is only an estimate, but it is apt to be rather high because we have to send in workmen and Guy School is in a rather remote place. I think it would be best to leave it at that figure, but I would of course endeavour to get the work done as low as possible.

Your obedient servant,

Samuel Lovell
Indian Agent.

The Secretary,
Indian Affairs Branch,
Ottawa.

Dear Sir:

With reference to your letter of the 18th instant arrangements are being made with our Purchasing Branch to secure the lumber requested for the water tank at the Guy Indian Residential School. It is noted that the cost of labour may amount to \$250.00. Every endeavour should be made to keep the expenditure below this point.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

EXP.

Dear Sir:

With reference to your voucher No. 24 for \$67.37 in favour of Carroll's Hardware I would point out that this includes an item of \$2.00 for freight from The Pas to Atik. Before payment of the voucher can be made it will be necessary for you to forward a receipt from the transportation company.

Please note that all freight or express charges must be supported by a receipt from the transportation company. It will save considerable correspondence if this detail receives your attention before forwarding vouchers.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

EXD

Dear Sir,

In reply to your letter 132-7-5, dated the 26th instant, in connection with freight bill that should have been attached to our Voucher 24 amounting to \$67.37 in favour of Carroll's Hardware, The Pas.

The goods had not actually been shipped when the voucher was sent in. The reason I forwarded the voucher was because I understood that you wanted the account in right away so that it could be paid from the 1940-41 appropriation.

The goods were shipped direct from Winnipeg to Atik by the Ashdown Co. on order of Carroll's. I should add that Carroll's informed me they lost about \$17.00 on this order, as apparently the price of the goods had gone up from the price list they figured from. They filled the contract according to the tender they quoted the Department.

Freight bill from Winnipeg to Atik is enclosed herewith. I trust this will suffice.

Your obedient servant,

S. Lovell,

Indian Agent.

The Secretary,
Indian Affairs Branch,
Ottawa.

AIR MAIL

Dear Sir:

In reviewing the last paragraph of your letter of the 18th ultimo, in connection with the erection of a water tank at the Guy Residential School, it is understood that it is your intention to employ white workmen.

Is it not possible to secure Indians who could do this work under the direction of some member of the school staff? If not, you should let me know the tradesmen required and the approximate length of time that they would be engaged. You should also state the name of any tradesman whom you recommend to do this work. You should not employ anyone until you hear further from this Branch.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

The Pas, Man.,
May 14, 1941.

Dear Sir,

In reply to your letter 132-7-5, dated the 12th instant, in connection with erection of water tank at Guy School.

It was my intention to employ Indians to do this work, under the supervision of one of the men employed by the School. The man I had in mind is an experienced carpenter, who would work with and direct the Indians. It would be necessary to pay him, as someone else would have to be engaged by the School to do his regular work while he was working on the tank. He has promised to work for 50 cents per hour.

OK
There is only one man on our approved list capable of doing this work. That is Mr. Albert Lenneville. He would want 80 cents per hour and we would have to pay for his time while travelling and also his travelling expenses to and from Guy School. I recommend that the man at the School be employed. I cannot recall the name of this man.

I would like to know your decision in this matter as soon as possible. Nothing will be done until I hear from you.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
Ottawa.

January 11th, 1942.

Mr R. A. Hoey,
Supt. of Welfare & Training.
Dept. of Mines and Resources
Ottawa, Ont.

Dear Mr Hoey:-

END.

Your letter of December 11th was handled to me only on Jan 9, due to the delay of the mail. Your purchase order 7159 of May 12 last has not been filled yet, as we had no road available to freight the material. I have explained the situation to the Indian Agent long before in January, but without success. However as soon after the receipt of your purchase order, the material has been prepared and left at the Monarch Lumber Co until this winter. Last week the Indian Agent told me that the said material will be at Atik to-morrow. This explains why you did not receive yet the account in triplicate signed by me. But as soon as received, you will have it through the Indian Agent who will be here on Tuesday next to visit the school.

The work of the school is going on with success as ever. Be assured that we do our very best for the children who are all actually in good health. I feel that I should congratulate you for your good work and your devotedness to the cause of our Indian tribe.

With the compliments of the season, I remain

yours very truly,

Res. H. Doyon, O. d. b. 7.
Principal.

[Handwritten signature]
Dear Sir,

The Principal of Guy Indian Residential School, has requested me to write to the Department and request that enough paint be purchased to paint the outside of the School building during the present year. He promised to do the work with school labour. I inspected the school buildings and they are in real need of paint, so if it is possible, I recommend that the paint be provided. I have been unable to get wholesale prices locally as the only firm we could get such prices from, Wood Venance, has now left The Pas.

Quantity of paint required.

50 gallons of outside white.
10 gallons of outside green paint.
45 gallons of linseed oil.

Your obedient servant,

Samuel Lonell
Indian Agent.

Ottawa

Dear Sir: Att'n. Mr. Philip Phelan

The exterior of the Sturgeon Landing School should be painted this year. As it stands, it is really a disgrace to the Department of Indians Affairs. I am saying this in all kindness and without wishing in any way to criticize our officials, as they certainly cannot buy paint for our Indian schools if funds are not provided for that purpose by the Government.

You have already shipped a small quantity, but that is altogether insufficient to give the school even one coat. If you could find funds to purchase another lot, Father Doyon will make it go as far as possible, and will supply all the labour free of charge.

Hoping that you will be able to comply with this request, I remain,

Yours very truly,

Indian Affairs. (RG 10, Volume 6314, file 655-5, part 6)

EX'D.
A.

I have here this morning the agent of the Singer Sewing Machine Co. for inspection of our machines in the school. You will receive his report and see that the request I have made for new machines was not without any reasons.

I received from your Dept. all the paint that has been granted for the outside painting of the school. The quantity will certainly not be sufficient, but all of it will be carefully spread over during the summer. As I want to finish the painting of the inside of the school, I already ordered 15 gals. of white paint and 10 gals. of cement paint for the playrooms and kitchen and dining rooms. All this and the work will be paid by the school, for I am always anxious to keep on with the success of this school in every point of view.

April 17 th. 1942

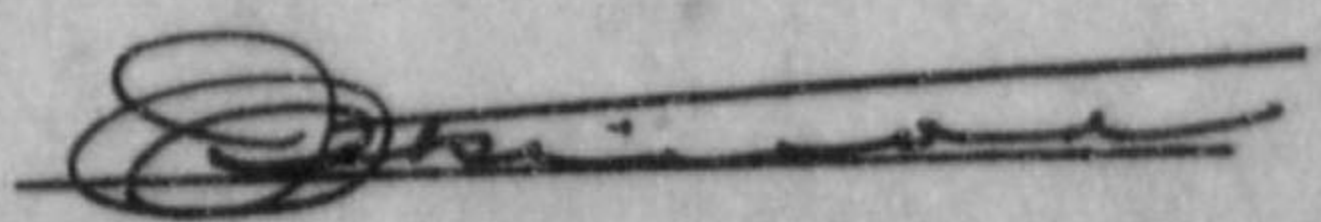

Department of Indian Affairs
The Pas, Manitoba.

Dear Sirs:

On April 16 th. I visited your Mission School at Sturgeon Landing, as per your request of earlier date, for the purpose of checking over the Singer Sewing Machines in use there.

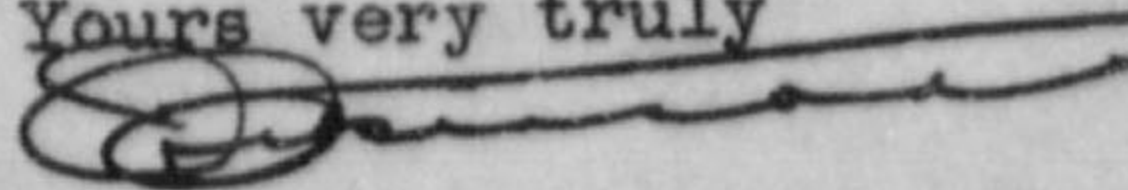

Enclosed please find my report on same.

Owing to the materials used, and the amount of sewing done, I would suggest that the Oscillating or round shuttle machine be used for replacement. The machines of this type, in use at the present time, have been very satisfactory and given excellent service. They are much more practical than the long or Vibrating shuttle machines.

Upon inspection of the machines in question, I found them to be very clean, well oiled, and generally in a condition that would suggest the best of care.

Looking forward to being of further service to you in this matter, I remain,

Yours very truly

J.F. Atkinson

Dear Sir:

A short time ago I was requested by the Principle of the Guy Indian Residential School to write to the Department for a new sewing machine.

I immediately got into touch with the representative of the Singer Sewing Machine in The Pas, asking him to go up to the school and to give me a report on the conditions of the machines at the school, which I enclose, for your information.

I would suggest that three new machines be purchased this year prices are included in the report.

Trusting that this will give you all the information necessary in this connection.

Extract from letter dated July 12, 1942, received from Father N. Doyon, Principal, Guy Indian Residential School:

Three weeks ago I received three sewing machines, small ones; could you tell me if the three larger ones requested have been ordered?

The painting of the school will be finished during this week. The 45 gals. of oil and the 60 gals. of paint bought by the Dept. have been used carefully for that purpose. I bought myself enough paint and oil to paint the barn, shop, chicken house. This is going to be done soon. After the completion of that work, I will send pictures of the school and other buildings so to invite you to come and visit us, will you?

Ottawa,
July 20, 1942.

Reverend Sir:

With reference to your letter of the 12th instant, regarding sewing machines recently supplied to the Guy Residential School, the Department ordered, from the Singer Sewing Machine Company, two ordinary sewing machines and one machine with oscillating or round shuttle. It is true that in the Agent's letter of May 8 three machines of the latter type were requested, but owing to the fact that they cost approximately \$20.00 more than the ordinary type we could only supply one of them.

Yours truly,

Philip Phelan,
Chief, Training Division.

Dear Sir,-

Re: Bread Mixer for Guy School.
The Pas Agency.

The enclosed letter has just been received from
Ryan Brothers, Limited, Winnipeg.

The Reverend Father Doyon is urgently in need
of a machine due to the fact that his old one is worn out
and cannot be repaired. The school is fifty miles from any
railway and it is too much to expect the school to bake
bread for perhaps 125, and do the mixing by hand. The mixer
quoted on was inspected by Father Doyon. It has been in use;
but the Father states it is in good repair and happens to be
exactly the same as our old machine. Since it is second-
hand I presume no priority rating is necessary.

This is the only machine I know available in
Winnipeg and I would urge that the Purchasing Agent be
requested to make the purchase by air mail or wire. The
price quoted is, you will note, f.o.b. Winnipeg. The machine
should be shipped to the Reverend Father Doyon, Atik, Man.,
(C.N.R.).

Yours very truly,

A. G. Hamilton

Note: The dough mixer at this school was originally supplied approximately 12 years ago. In forwarding the request for the mixer Inspector Hamilton writes as follows: "The Reverend Father Doyon is urgently in need of a machine due to the fact that his old one is worn out and cannot be repaired. The school is fifty miles from any railway and it is too much to expect the school to bake bread for perhaps 125, and do the mixing by hand. The mixer quoted on was inspected by Father Doyon. It has been in use; but the Father states it is in good repair and happens to be exactly the same as our old machine. Since it is second-hand I presume no priority rating is necessary. "This is the only machine I know available in Winnipeg and I would urge that the Purchasing Agent be requested to make the purchase by air mail or wire. The price quoted is, you will note, f.o.b. Winnipeg. The machine should be shipped to the Reverend Father Doyon, Atik, Man., (C.N.R.)." I also enclose, for your information, a letter that Mr. Hamilton received from Ryan Brothers Limited.					

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Gentlemen:

We wrote you November 26th confirming quotation made over telephone on Pendrith 3-bag, pulley drive, rebuilt Dough Mixer, which was inspected by the Rev. N. Doyon of Guy School, Sturgeon Landing, Sask. Not having heard from you, we are wondering if any decision has been reached with regard to the purchase of a machine.

We have an Institution who are definitely interested, in fact wish to buy the machine today and we had to tell them that we were holding it for a customer until Monday of next week, so would appreciate hearing from you, gentlemen, by return if you wish us to hold this machine.

Hoping to hear from you, we are

Yours very truly,

RYAN BROTHERS LIMITED.

Dear Sirs,

Between June and August 1942
I did some carpentry work at The
Guy Indian School. for the amount
of \$195.

7 A month ago I went to The Pas
Agency to find out why I hadn't
been paid, He told me that it would
come any day. But I haven't received
it yet. So. I would like to draw
your attention to the fact that I need
that money. And I see no reason
why you should postpone payment
any longer.

If you will kindly look into the
matter and see that I get my
just dues. I would be very grateful.

No Record of this Account!
Yours Sincerely,

Ismaël Cauchier

The Pas, Man.,
Jan 19, 1943

The Secretary, Indian Affairs Branch, Ottawa.

In answer to your letter, file No. 132-7-5,
dated January 5.

I would like to draw your attention to the fact that in 1941, permission was given to buy a water-tank and have the same erected at the Guy Industrial School. The taking down of the old tank and the erection to be under the direction of the Principal Rev. Father Doyon, for the sum of \$150.00.

Owing to transportation difficulties, low water in the lake and wet road, which made it impossible to transport lumber for the tank in until after freeze up, it was therefor too late to erect the tank that year.

In the summer of 1942 I met Ismael Gauthier and the erection of the tank was mentioned as this man was hired by the Father to do the work in 1941.

At the end of July I was informed that the construction of the tank was underway and intended to notify the department to that effect, owing to the rush at Treaty and other work it slipped my mind. I heard nothing further until I received the account for same, this account has been held until I had the opportunity of going into the school and inspecting the tank. At present there is approximately 10 to 11 feet of water in the tank. The tank will gradually swell and the capacity will increase as the lumber tightens up.

*Labour

2

I would like to draw your attention to the fact that this work was absolutely a necessity as the old tank was rotten and did not hold at any time more than 3 feet of water, which would be useless in the event of fire.

While the account as rendered is more than the authority granted in 1941, the price on the whole is very fair in fact 60 cents an hour for that class of work is cheap, and the time taken is very considerate.

I am very sorry that permission was not granted before this work proceeded and will take extra precautions to see that this does not happen again. I strongly recommend that this account be paid.

The Secretary, Indian Affairs Branch, Man.

Dear Sir,

Mr. Lovell, the Indian Agent, visited Guy School recently and he instructed me just before he left yesterday to write to the Department and request that the following material be supplied to the School for the purpose of repairing the water system. He has made enquiries and finds that the material cannot be purchased locally, so he asks that the Department buy and have it shipped to the Rev. Father Doyen, Guy Indian Residential School, Sturgeon Landing, Via Atik, Man.

The material should be shipped to arrive before the end of March at the latest, as it will be difficult to get it across the lake after that.

The Pas, Man.,

March 2nd, 1943.

The Indian Affairs Branch, Ottawa.

Dear Sir,

In reply to your telegram dated the 17th ultimo, and further to my letter of Feb. 9th regarding the purchase of pipes, etc for repairs to Guy School.

These pipes are required to replace old and rusted out pipes in the water system at Guy School and also to have some on hand for emergency repairs. The School staff do their own repairs. They are in a remote area and when repairs are required it is necessary to have the material on hand, otherwise it would take weeks and sometimes months to obtain it. In the meantime the School might have their water supply cut off. No new installation of any kind is being made.

The list of material required was handed to me by the Principal. I think it would be all right to cut this requisition in half, with the exception of the 300 feet of steel pipe, asked for and which is listed at the very bottom.

AIR MAIL

Ottawa, March 31, 1943.

Mr. S. Lovell, Indian Agent, The Pas, Manitoba.

With reference to your letter of the 9th ultimo, I enclose copy of purchase order No. 17453. Due to present conditions, it was not possible to secure the following items:-

1½" iron pipe, 1½" elbows,
1½" T joint pipes.

You will note the supplies are being shipped direct to the Principal, and you should therefore forward to him a copy of the purchase order, in order that he may check the shipment when it arrives and make certain that all the articles included in the purchase order are received. The account should then be sent to you, so that you can attach it to proper voucher forms and submit it for payment at the earliest possible date.

EX'D.

In reply to your letter 132-7-5, dated the 31st ultimo, I am enclosing herewith our Voucher No. 20 amounting to \$114.27 in favour of J.H. Ashdown Hardware Co. Winnipeg, for pipes, etc you ordered for Guy Indian Residential School.

Ashdowns did not send me an account, so I wrote to them for one. I notice they have put "copy" on it, which would appear to imply the account had been forwarded before. Perhaps the first copy of the account was sent direct to the Department.

There is a difference of \$10.11 between Order No. 1745 and the account. This is accounted for by the fact that Ashdowns sent a little more pipe than you ordered. See the first four items.

Mr. Philippe Phelan,
Department of Mines and Resources,
Indian Affairs Branch,
Ottawa, Ont.

Dear Mr. Phelan,

I am directed by His Excellency Bishop Lajeunesse to inform you of the difficulty the Guy Indian Residential School has regarding transportation of its freight during the summer time.

The only good and practical way of transportation during the summer is a water route, on the Goose Lake, from Education or Mile 39 on the C.N. Railroad to Sturgeon Landing. They did not use that route for the last three years on account of low water level. But as the water level is rather high this summer and seems to be remaining so for four months they would like to profit again with that route but the difficulty is to have their freight unloaded at the right place by the C.N.R.

The right place would be Education or Mile 39 on the Pas--Flin Flon C.N.R. Subdivision. The C.N.R. Co. allows the Passenger Train No 63--64 to stop there but not the mixed train No 529-230. There is no road at all between Education and the nearest station where the train stops, namely Simonhouse. Unless the mixed train is allowed to stop at Education they cannot at all have their freight in from the C.N. Railroad up to Sturgeon Landing.

His Excellency has suggested me to come in touch with you and ask you if you would be kind enough to take the matter with the superintendent of the C.N.R. Mr. F.J. Myer, in order to have the mixed train No 529-530 stopping at Education during the months of July, August, Sept. and Oct. Mr. F.J. Myer's address is: Mr. F.J. Myer, Superintendent of Flin Flon Subdivision, Dauphin, Manitoba.

Thanking you in advance for your cooperation we remain,

Yours very truly,

E. Ringuet

Peer Copy

Ottawa, July 6, 1943.

Dear Sir:

I am advised that the most practical way of transporting supplies to the Guy Indian Residential School is a water route on the Goose Lake, from Education or Mile 39 on the C. N. Railroad to Sturgeon Landing.

As you are no doubt aware, this school is the property of the Dominion Government and is operated for us by the Catholic Church in educating Indian children of that district.

I am further advised that the Canadian National Railway allows passenger train No. 63-64 to stop at Education but does not allow the mixed train No. 529-230 to stop there. It would assist the management of our Guy Residential School to a very great extent if it could be arranged to have the mixed train stop at Education during the months of July, August, September and October, 1943. This would permit the unloading of the goods consigned to the school at Education and their transportation from that point to the school, by water, as mentioned in the first paragraph of this letter.

The Department trusts that you will find it possible to meet our wishes in this particular respect.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

F. J. Myer, Esq.,
Superintendent,
Flin Flon Subdivision,
Canadian National Railway,
Dauphin, Manitoba.

Schmidt
Mr. R. A. Hoey,
Supt. of Welfare & Training,
Dept. of Mines and Resources,
Ottawa, Ontario.

Dear Sir:-

Your letter of July 6th regarding additional train stops at Education, mile 39 on our Flin Flon Subdivision, for the months of July, August, September and October of the present year.

The stopping of a freight train on the main line between stations to handle freight, as a general rule, is most undesirable for train operation.

However, I will have the matter thoroughly canvassed and communicate with you further at an early date.

Yours truly,

R. J. Myers
Superintendent.

Dauphin, Man.,

July 19th, 1943.

Mr. R. A. Hoey,
Supt. of Welfare & Training,
Dept. of Mines and Resources,
Ottawa, Ontario.

Dear Sirs:-

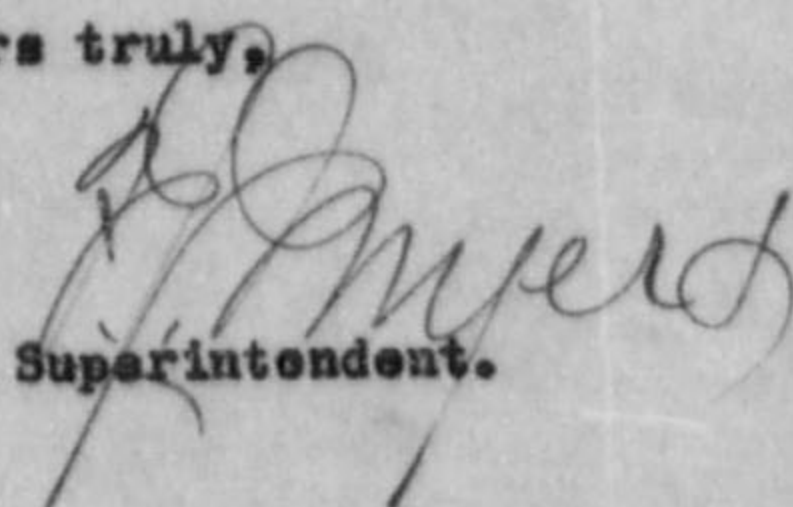

Further to my letter of July 12th
in reply to yours of the 6th, regarding additional train stops
at Education, Mile 39 on our Flin Flon Subdivision.

Would it not be possible to make
use of the regular stopping place at Simonhouse, Mileage 41.0,
or at the Lumber Manufacturers spur at Mileage 42.2, where we
could have the mixed trains 529 and 530 mentioned in your
letter, stop to make whatever handling of freight is required?

The additional stop for this
mixed train at the point desired would be detrimental to train
operation and in the interests of safety, not desirable.

I trust you can see your way clear to
make your arrangements for the freight stops at either Simonhouse
or at mileage 42.2.

Yours truly,

Superintendent.

Philip Phelan
Mr. Philip Phelan,
Chief, Training Division,
Department of Mines and Resources,
Ottawa, Ont.

Dear Mr. Phelan,

We take great pleasure in extending to you our sincere thanks for your intervention regarding additional train stops at Education.

However we regret to say that it is entirely impossible to have our freight unloaded at either Mileage 41.0 or Mileage 42.2 because there is no land road of any kind ~~and~~ way of transportation between Education and Mileage 41.0. On the other hand the freighters for our school cannot reach Simon House or Mileage 42.2 by water road.

Therefore to accept Mr. Myers' suggestion would mean to carry on their shoulders, from mile 41.0 to mile 39.0, the heavy bags or cases or whatever it might be. You agree with us that it cannot be done that way.

We are wondering if it could not be possible to have our freight unloaded at Simonhouse and have the section-man taking it to destination, mile 39, by gaz-car. We think that's the only way the situation can be help.

As you see the transportation of our School supply in summer is quite a problem chiefly to-day when the suppliers cannot guarantee delivery of goods for the time we ask for, that is rather in wintertime.

Hoping that some thing will be done to better the situation, we remain

Yours very truly,

The Secretary, Indian Affairs Branch, Ottawa.

The Principal of Guy Indian Residential School has pointed out to me that their steam boiler has never been inspected by the boiler inspector since it was installed. No doubt this is due to the fact that the school is in unorganised territory.

*Assent for
prior to
24*
I presume that if we want the boiler inspected we would have to apply to Regina for them to send an inspector and the Department would have to pay for the expense of the trip. I am not sure what this would cost. I think it advisable that we have the boiler inspected and I would request permission for me to write to Regina and request this service and also grant me authority to render to the Department the account for this service.

Ottawa,
October 7, 1943.

Mr. S. Lovell, Indian Agent, The Pas, Man.

With reference to your letter of the 2nd instant, you may arrange for the Boiler Inspector to inspect the boilers at the Guy Residential School. It is noted that his transportation will be \$26.40 and that there will be an additional charge for meals.

R.A. Hoey,
Supt. of Welfare & Training.

The Pas, Man.,

Dec. 7, 1943.

Salvage

The Secretary, Indian Affairs Branch, Ottawa.

It was brought to my attention when I last visited Guy Indian Residential School that the following repairs were urgently required.

Repairw for Kitchen Range.

Ry

The top of the range is dropping badly owing to a brace inside the top being broken. The Range is a Gurney Oxford, made by the Gurney Foundry Co. The number on the stove is No. 2030 F. Name on oven door "John Bull". The brace has no number but it is underneath the stove top next to the firebox to the right as one faces the stove. I believe the address of the Gurney Foundry Co. is Toronto, though there is nothing on the stove to indicate this. We would like this to be ordered and sent to the Guy Indian Residential School, Atik, Man.

Childrens' Dining Room Tables

There are four tables in the Childrens' dining room. They are home made and were formerly covered with battleship Linoleum. The linoleum has been worn out and there is none left, consequently it is impossible to keep the tables clean and sanitary as the food gets in between the boards of the table and it is impossible to get it out. They want the tables re-covered with battleship linoleum. That is 402 square yards of linoleum. The cost of this at The Pas is about \$3.00 per sq. yard. If battleship linoleum could not be procured, a heavy linoleum other than battleship would suffice.
